NOTES

This report contains information for the year 1992 and some historical information. It is published as a two volume set. Copies of this report may be obtained from the Railroad Commission of Texas, Publication Sales, P.O. Box 12967, Austin, Texas 78711-2967 (telephone 512-463-7255).

Please note the following explanations of terms and abbreviations used in this report:

All gas volumes are reported in thousand cubic feet (mcf) at a standard base pressure of 14.65 pounds per square inch absolute and a standard base temperature of 60 degrees fahrenheit.

All Liquid volumes are reported in barrels of 42 U.S. Gallons.

GAS WELL GAS production is **wet gas** which includes lease condensate (bbl) converted to gas equivalent (mcf).

Production and well count data for 1991 has been revised to include additional data received by mid-February, 1993.

Production and well count data for 1992 includes all data received by mid-February, 1993.

Data for producing oil wells prior to 1990 is based on preliminary production reports filed for the month of December each year. Beginning in 1990, producing oil well counts are based on producing status in December, as described below under PROD WELLS EOY.

PROD WELLS EOY - Producing oil wells at end of year; consists of oil wells classed as producing (prorated, marginal, exempt, and new pool exempt) in December of production year. Oil production is reported by lease, not by individual well.

TOTAL WELLS EOY - Total oil wells at end of year; consists of all wells on record at the end of production year (includes producing, shut-in, injection, service, etc. - does not include plugged wells).

PROD WELLS 1992 - Producing gas wells for production year; consists of all gas wells having production during 1992.

TOTAL WELLS 1992 - Total gas wells at end of year; consists of all wells on record at the end of 1992 (includes wells plugged during that year, producing, shut-in, injection, service, etc.)

A - associated 49(b) Field.
C - gas cycling reservoir gross production reported.
F - One or more wells from this reservoir are producing full well stream to plant; hydrocarbon liquid totals may be partial.
M - Multiple county field; county listed is discovery well county.
N - Gas production data prior to 1970 is not included in cumulative totals.
N/A - Not available.
