

#### JUL 2 6 1984 Legislative Report 68th Texas Legislature, Regular Session

The Texas Legislature has completed another biennial legislative session in which state funds were again appropriated for operation of the various units, agencies, boards, commissions, and institutions of state government. Passage of Senate Bill 179 during the Regular Session of the 68th Texas Legislature provided funding for the two-year period beginning September 1, 1983. In addition to passage of the General Appropriations Act (SB 179), the legislature considered 3,891 bills and 2,006 resolutions during the 140-day session.

This special edition of *Perspectives* is designed to provide a report on enactments of the 68th Texas Legislature directly related to the University of Houston System. Included are data on appropriations and on specific bills.

Appropriations to public senior colleges and universities in Texas are made in three major categories: (1) Educational and General Elements of Cost which provide funding for general operations of the institutions of higher education; (2) Special Items which are specific programs or projects not funded through the elements of cost; and (3) Major Repairs and Rehabilitation and New Construction of Facilities. Within the first category are formula and non-formula elements of cost.

Formula elements of cost are funded on the basis of student enrollment, semester credit hour production, number of employees, types of physical facilities, size of campus, and other standardized factors in order to make an equitable distribution of state dollars among all senior colleges and universities. The elements of cost which are formula funded include:

General Administration and Student Services; General Institutional Expense; Staff Benefits; Faculty Salaries; Departmental Operating Expense; Instructional Administration; Library; Organized Research; Plant Support Services; Campus Security; Building Maintenance; Custodial Services; and Grounds Maintenance.

Non-formula elements of cost are generally funded by providing salary increases in line with general state salary policy guidelines established by the legislature and inflationary increases for maintenance and operation costs. These elements include:

Organized Activities; Vocational Teacher Training; Extension and Public Service; and Utilities.

Formula appropriations for the 1984-1985 biennium were based on increases over the formula appropriated rates for fiscal year 1983. The formula elements were adjusted to provide a 3% annual increase in maintenance and operation costs and a 4% salary increase in the first year of the biennium. In the second year the formula rates were increased by 2% for salaries even though the legislature requires most state employees to receive a 3% increase in salaries in the 1985 fiscal year. One exception to the overall formula guidelines was in the area of Departmental Operating Expense where the legislature adjusted the 1983 appropriated rates by 9% in addition to the salary and maintenance and operation percentage increases above.

The tables which follow illustrate appropriations for the upcoming biennium in comparison with the current biennium: Table I shows a Comparison of Total Biennial Appropriations by UHS Component, and Table II shows a Comparison of 1982-1983 Appropriations with 1984-1985 Appropriations by Element of Cost by UHS Component. Table III provides a Summary of Appropriations for Special Items and for Major Repair and Rehabilitation and New Construction for the 1984-1985 biennium.

### UH Receives Increased Special Appropriations Funding

Special Item, Major Repair and Rehabilitation, and New Construction appropriations made during the 68th Texas Legislature, Regular Session, were difficult to obtain due to a decrease in the amount of revenue estimated to come into the state treasury during the next biennium. In fact, the legislature actually appropriated nearly one billion dollars less than the Legislative Budget Board had recommended. The University of Houston System was fortunate to obtain special funding in all three categories for several muchneeded activities.

Funding was continued at University Park for the Energy Lab ard an additional \$729,500 was appropriated for acquisition of new engineering equipment. Clear Lake received funding of \$150,000 each year for the High Technology Lab and a special appropriation for instructional equipment. The Basic Skills Lab will receive \$75,000 each year at UH–Downtown, and the Downtown library collection will be enhanced by \$60,000. A new Math and Science Comprehensive Project at UH–Victoria was funded at \$140,000, while the campus received almost \$35,000 to improve its library collection.

In addition to the above Special Items, UH–University Park and UH–Downtown received appropriations for new construction and major repairs and rehabilitation. \$14.6 million will be available in the next two years for the University Park campus to construct the new Architecture Building and to complete much-needed major repair projects. UH–Downtown will have over \$2.6 million for Fire and Life Safety projects associated with elevators, stairs, and other access and escape safety aspects, as well as funding for repairs to the roof.

Appropriations to components of the University of Houston System for all areas increased by 13.4% during the 1984-1985 biennium over the amounts appropriated for 1982-1983. By comparison, appropriations for the same purposes to all state senior colleges and universities will rise by only 10.6% over the next two years.

# Table III

#### Summary of Appropriations for Special Items and for Major Repair and Rehabilitation and New Construction

		APPROPRIATED			APPROPRIATED	
UH COMPONENT	SPECIAL ITEM	1984	1985	MAJOR REPAIR/CONSTRUCTION	1984	1985
UNIVERSITY PARK	<ol> <li>Energy Lab</li> <li>Engineering Equipment</li> <li>Scholarships</li> </ol>	\$ 428,123 729,500 44,536	\$ 433,123 U.B. 44,536	New Construction of Architecture Building and Repairs to Law Center and Roof Repair	\$14,600,000	\$ U.B.
CLEAR LAKE	<ol> <li>High Technologies Lab</li> <li>Scholarships</li> <li>Instructional Equipment</li> </ol>	150,000 10,000 149,250	150,000 10,000 U.B.

VICTORIA	<ol> <li>Math and Science Comprehensive Project</li> <li>Scholarships</li> <li>Library Collection</li> </ol>	140,000 10,000 34,838	U.B. 10,000 U.B.			

# NTSU LIBRARY Other Legislative Matters Affecting UH

Perhaps the most important piece of legislation to pass during the Regular Session of the 68th Texas Legislature was House Joint Resolution 19, which proposes a constitutional amendment to provide funds for the support of higher education and to restructure the Permanent University Fund. The measure will appear on the ballot for voter consideration at the statewide general election to be held on November 6, 1984. If approved by the voters the provisions of this resolution will restructure the Permanent University Fund (PUF) to include all components of The University of Texas System and the Texas A&M University System in the benefits of the PUF. Additionally, and of significance to the University of Houston System, is the provision that will guarantee \$100 million per year from the general revenue fund for support of state senior colleges and universities which are not in either of the above systems.

The \$100 million per year would be allocated to all other higher education institutions for the purposes of acquiring land, constructing and equipping new facilities, major repair and rehabilitation of existing facilities, and acquisition of capital equipment, library books and library materials. All components of the University of Houston System would benefit from adoption of this proposed amendment to the Constitution of Texas.

Other bills enacted by the 68th Texas Legislature and which became law having importance to the University of Houston include:

SB 235 Provides statutory authorization for the University of Houston–Victoria; removes restrictions on acquisition of land by the board of regents of the University of Houston System; and provides uniformity of names of the component campuses of the System by citing each as follows:

University of Houston–University Park University of Houston–Clear Lake University of Houston–Downtown University of Houston–Victoria.

- HB 1704 Permits the board of regents of the University of Houston System to levy a fee for the financing, constructing, operating, maintaining, and improving of facilities for university center activities at the University of Houston–Downtown.
- \$B 567 Provides rates of contribution to the Teacher Retirement System and Optional Retirement Program for the 1984-1985 biennium. Members contributions will be 6% for TRS and 6.65% for ORP and the state's contributions will be 7.1% and 8.5% respectively.
- HB 842 Increases the amount of coverage for a spouse or child under group term life insurance to one-half the amount of coverage for the insured.
- HB 2174 Requires institutions of higher education to select and contract for services performed by health maintenance organizations to offer health-care services to eligible employees and retirees.
- HB 2196 Permits state agencies, including higher education institutions, to use state facilities and expend state funds for health fitness education and activities.
- SB 230 Redefines "employment," under provisions of the unemployment compensation program, to exempt students as well as service performed in an apprenticeship program and service performed by a teaching assistant.

- SB 255 Includes Doctor in Psychology in list of recognized practitioners of the healing arts under provisions of the Texas Insurance Code.
- SB 812 Includes audiologists and speech-language pathologists in list of recognized practitioners of the healing arts under the Texas Insurance Code.
- SB 799 Increases the maximum allowable rate for student services fees at institutions of higher education from \$60 to \$90 per student per semester or summer term.
- SB 1227 Exempts serial and journal subscriptions for higher education libraries from the requirement that the State Purchasing and General Services Commission acquire supplies, materials, services, and equipment for all state agencies.
- HB 1550 Permits higher education institutions to request criminal history record information on applicants for employment for a security-sensitive position. Such positions are defined to include the handling of currency, access to a computer terminal, access to a master key, or work in an area of the institution which has been determined as a security-sensitive area. Additionally, institutions may request a complete set of fingerprints from such applicants and may deny employment to any applicant failing to comply with the request.
- HB 1708 Permits noncommissioned security guards at institutions of higher education to carry a nightstick after completion of required training.
- SB 572 Establishes a Texas Eminent Scholars Program, and provides for state appropriations to match private endowment donations which are made for the purpose of endowing an academic position.
- SB 161 Exempts oral history interviews obtained by institutions of higher education from public disclosure.
- SB 813 Establishes the State Committee of Examiners for Speech Pathology and Audiology within the Texas Department of Health, and provides for the licensing and regulation of speech pathologists and audiologists.
- SB 1181 Establishes a special fund in the state treasury known as the Engineering Excellence Fund, and provides for state funds to be used to match private donations for the purpose of acquiring capital equipment for engineering at the University of Houston and other senior colleges and universities which offer instruction in engineering.

#### Perspectives

This is a special edition of Perspectives, which is published monthly by the UH System University Relations Office. Executive Director: Farris Block. Editor: Steffanie Gibbons, 749-4147.

The University of Houston seeks to provide equal educational opportunities without regard to race, color, religion, sex, age, national origin, handicap, or veteran status.

This policy extends to all programs and activities supported by the University.
