NTSU LIBRARY NON-CIRCULATING

From 'Hi Yawl' to 'Cheerio' *(It Ain't Easy)* From West Texan to British

How does a West Texan learn to speak with an English accent?

It ain't easy, according to **Dr. Donna Lee Crabtree**, assistant professor of speech and theatre. Crabtree is directing the university's production of "The Importance of Being Earnest" by Oscar Wilde.

To help student actors learn the British accent necessary for the play, Crabtree recorded each character's entire dialogue on cassette tapes, using her own abilities at accents. Each actor then listened to the tapes and worked with Crabtree to learn the phrasing and inflection of the dialect.

Crabtree said, "I didn't decide to do the dialect until after I cast the play. I was afraid it might scare off prospective cast members. But, the students have become very enthusiastic. My husband, who is English, came and encouraged the actors. He did help us correct some of the place names."

Although a great deal of work has gone into the accents, the most Crabtree hopes for is a convincing representation of British speech. "No matter how hard we work, I doubt we'd convince the English that we were British," she said. Some of the cast members have prior experience in working with the English accent. **Dianne Davis**, who plays Lady Bracknell and is the technical director of the production, lived in England at one time.

In addition to the accents, Crabtree and Davis are putting time and effort into set and costume design. Davis said, "We are trying to adapt the Coffeehouse into a theatrical stage. We have a very simple set design—two interiors and a garden." Changes in wallpapers and furniture will be used to suggest changes in setting. Davis, looking for period furniture to use on stage, said that much of the atmosphere will be created by knick-knacks and assorted paraphernalia from Edwardian England.

"The design of the stage is such that we will be very close to the audience. We hope to create a very intimate atmosphere," Davis added.

The costumes will be more intricate than the set design, Davis noted. "Ornamentation in the form of frills, laces and accessories characterized women's dress of the period. Wilde is spoofing the aristocracy's concern with false appearances and manners," she noted.

The females in the play will have to wear corsets, just as women did in the nineteenth century. Their costumes will be colorful, ranging from tan to bright pink. Some actresses will feature the "Gibson girl" look in their hairstyles while others will just wear hats.

The men's costuming will not be as accurate as the women's, Davis said. "We are trying for the Edwardian look, but the men's are not as flamboyant as the women's." The character of Algernon will be the gaudiest. Because he is the most outrageous character in the play, Algernon will wear the most colorful of the men's clothing, including a bright pink jacket, with lighter trousers.

The play will be presented in the UTPB Coffeehouse at 8 p.m. on Dec. 5, 6 and 7.

Technical director **Dianne Davis** fits **Robin Decker's** costume for her role as **Gwendolyn** in "The Importance of Being Earnest."

Art exhibition opens

An exhibition of prints and drawings by **Terry Morrow**, art professor at Texas Tech University, opens with a reception in the UTPB third floor art gallery at 7 p.m. Nov. 5.

The exhibit will remain in the gallery through Nov. 28. Gallery hours are 9 a.m. — 5 p.m. Monday — Friday.

Morrow has been on the Texas Tech University faculty since 1968, first as an assistant professor, then as associate professor. He was promoted to full professor in 1979. He previously taught at the University of Chattanooga and the University of Pennsylvania.

He holds a bachelor of fine arts degree from UT Austin where he also began graduate study. He also attended graduate school at the University of Wisconsin at Madison and took a MS degree from Indiana University.

Morrow has participated in numerous competitive and invitational exhibitions throughout the United States. His works are in permanent collections at the University of Chattanooga, Texas Christian University, Western Texas College, Odessa College and San Angelo State University.

He is included in "Who's Who in America Art," and has won several prestigious awards. He took cash awards at the Twelfth Annual National Drawing and Small Sculpture Exhibition at Del Mar College, Corpus Christi in 1978, the Tri State Art Exhibition

in Beaumont in 1976 and the 16th Annual Drawing and Small Sculpture Exhibition at Ball State University, Muncie, Ind. in 1970.

He also took the Juror's Merit Award at the Southwest Graphics Annual in San Antonio in 1976, honorable mention at the Five State Art Exhibition in Port Arthur in 1970, and the Helen Van Aken Purchase Award at the Fifth Annual Juried Gulf Coast Art Exhibition in Mobile, Ala. in 1970.

He has served as juror at several art competition events in Texas and Tennessee and conducts workshops and inservice programs.

Archeology Lecture set

The art of flintknapping, the study of animal bones and the role of museums in archeology will be discussed during a series of archeological lectures on the UTPB campus in November.

Phil Bandy will be the guest lecturer at 7 p.m., Thursday, Nov. 13. His topic of discussion will be "The Ancient and Venerable Art of Flintknapping. Bandy, of Environmental Consultant, Inc. of Dallas, will also give two flintknapping demonstrations and how-to session at 1 p.m., Friday and Saturday, Nov. 14-15 in the UTPB courtyard.

"Zooarcheology: The Study of Animal Bones in Archeology" will be the lecture presented by **Eunice Barkes**, Midland archeologist. The talk is scheduled for 7 p.m., Tuesday Nov. 18 in CR 257.

Joan Hellen, Director of the Museum of the Southwest in Midland will be talking at 7 p.m., Thursday, Nov. 20 in CR 257, on the role of museums in archeology.

Tanksley Rites slated

Funeral services for **Elaine Tanksley**, 39, wife of UTPB Dean of Arts and Education **William Tanksley**, will be at 1 p.m. Wednesday (Nov. 5) in the UTPB courtyard under direction of Resthaven Funeral Home of Lubbock.

Burial will follow in Sunset Memorial Gardens in Odessa.

Officiating at the service will be the Rev. Robert Tanksley, coordinator of religious affairs at Rutgers, The State University of New Jersey.

Mrs. Tanksley died Oct. 26 in an auto accident near Littlefield. Other family members were hospitalized in Lubbock General Hospital. Remaining in satisfactory condition are Kristin, 16 and Kimberley, 14. Wendy, 11, and Gregory, 9, have been released. Tanksley is expected to be released this week.

Mrs. Tanksley was a teacher in Rochester, NY and a social worker in Australia. The family requests memorials be made to Sky High Girls Ranch in Midland.

Other survivors include her mother, Jennette Dunnigan of Wallace, Idaho and a brother, Michael Dunnigan of Mullan, Idaho.

Many faculty, staff, students and others have offered to help the Tanksley in whatever way possible during their convalescence. Persons wanting to offer help may call Sandra Torres in the dean's suite at 367-2326.

John Ben Shepperd, a long-time friend of the university, takes a distinguished Service Award from UTPB President V. R. Cardozier during a "roast" for Shepperd held recently on campus. The award is "for outstanding leadership in the establishment of the university, untiring efforts in support of its development, and unswerving dedication to the university and its programs, in service to all the people of the Permian Basin."

Regents approve faculty texts

The University of Texas System Board of Regents meeting in Austin recently, approved a list of textbooks written by UTPB faculty members currently being used as textbooks.

Regents also accepted a gift from the Houston Endowment, Inc. and approved allocations of the endowment income from the Ellen and Bill Noel Scholarship fund.

The \$25,000 gift from J. H. Creekmore of the Houston Endowment renews the Jesse H. Jones and Mary Gibbs Jones Work Scholarships for upper-level studies. The \$500 scholarships are available to UTPB students who live outside a 50-mile radius of Odessa.

Regents renewed an agreement which divides the income from the Ellen and Bill Noel Scholarship fund between UTPB and Odessa College. In agreement with the terms established when the gift was made in the 1974 fiscal year, 60 per cent of the income from the \$503,000 endowment goes to Odessa College and 40 per cent goes to UTPB.

Faculty-authored books, which were approved for textbooks included "Study Guide to Accompany Basic

Statistics for the Behavioral Sciences," by Profs. James Olson and Alan Marks, psychology and K. Pfeiffer; "Basic Statistics for the Behavioral Sciences by Olson and Pfeiffer; "Anybody Can Write: Programmed Instruction in the Writing of an Informal Essay," by Prof. Robert Rothstein, mass communications.

"**World Resources Management: Key to Civilizations and Social Achievement**," is written by Prof. J. Edwin Becht, dean of management; "The Basic Processes of Criminal Justice," by Prof. J. L. LeGrande, criminal justice management; "Linear Algebra," by Prof. James Nickel, mathematics, and Robin O'Callaghan; "Statistics," by Profs. Nickel and Olson and Prof. Paul Hodges, economics.

Prof. Doug Hale, mathematics, is the author of three textbooks: "Elementary Differential Equations," "Calculus of a Single Variable, I," and "Calculus of a Single Variable, II." Prof. Edwin Kurtz, life science, is author of "Modules for Natural Science 301 and 302," and Prof. Nazmul Karim, control engineering, is the author of Modern Control Engineering Selected Topics.

Teachers

Jobs

Supply & Demand Balance Improves For Teachers

by Leland Martin

The tables are turning.

Gone are the days when teachers were "a dime a dozen."

All those cliches will be replaced as teacher supply and demand provides an improved picture for students now studying to be teachers, but a slightly different picture for the schools which will be hiring them.

Students working on teacher certification will find the job market much healthier than their predecessors, according to a recent teacher supply and demand survey published by the Association for School, College and University Staffing. (ASCUS)

Conducted for ASCUS by the Career Planning and Placement Center at Kansas State University, the report says job opportunities for teachers have improved appreciably during the past four years.

Although supply and demand ratios vary by geographical area and teaching field, opportunities to teach have increased overall, and teacher shortages are reported in several fields.

The south central region of the United States consisting of Texas, Oklahoma, Arkansas and Louisiana reported considerable shortages in the fields of mathematics, chemistry, physics and industrial arts and slight shortages in agriculture, bilingual education, driver's education, biology, earth science, social science, speech pathology/audiology, and all areas of special education including personal and social adjustment, reading and special education for gifted, learning disabled, mentally retarded and multiple handicapped.

The report showed a balance between supply and demand in business education, elementary and secondary counseling, primary and intermediate elementary education, English, journalism, Spanish, vocal and instrumental music and speech.

Slight surpluses were reported in

only five teaching fields—art, home economics, French, German and physical education.

The ASCUS report says one of the reasons for the healthy employment outlook for teachers is the reduction in the number of new teachers entering the field.

"Various data reveal that the number of new teachers completing programs leading to certification is now less than half the new teacher total in 1970," the report says.

Thus, the ability of job candidates to relocate continues to be important. For secondary school teachers, having a second teaching field and being able to supervise extracurricular school activities continues to be important.

Locally, the supply and demand picture is much the same as shown in the south central United States. Leslie Hines, personnel director for Midland Independent School District, said there are probably as many applicants as needed from May to August, but vacancies made late in the summer are difficult to fill.

"These vacancies often reveal major shortages in the areas of bilingual education, math, physical science, and vocational courses," he said, pointing out that many people who make application for teaching positions have found other employment in business or industry by the end of the summer.

He said a position in vocational agriculture was unfilled this year.

"We have an extreme shortage in substitute teachers. We find more and more that families need two incomes to survive, and both family members need full-time work," he said. He point out the number of days a substitute works each month is somewhat unpredictable, and there is also the problem of substitutes who are mothers finding baby sitters on short notice.

He said there are slight surpluses in the number of applicants in home economics, social studies and physical education.

Joe Starnes, personnel director at Ector County Independent School District, said all positions in math and science were filled this fall although there had been a critical shortage, and a position in industrial education is still unfilled.

"We also had need for a tennis coordinator, but that was a unique situation for this year.

He said there is a great need for teachers in all areas of special education.

Scott Irwin, pedagogical studies, said students in elementary education at UTPB are finding a "good balance" when it comes to finding teaching positions.

"A high percentage of our graduates are getting positions. The only exceptions are those people who by their own choice don't compete or because they go on to graduate work," he said.

He noted approximately 30 students are enrolled in elementary student teaching this fall and another 25-30 will be enrolled this spring. "Typically, we graduate 50-65, and 90 per cent of these work in Midland-Odessa or within a predictable commuting distance," he said.

Students working for secondary certification also face a balanced picture, according to Prof. Russell Johnson, pedagogical studies. He said seven UTPB students are now student teaching in area secondary schools. Another 20 will likely seek certification this spring.

"Fortunately, we have a high rate of employment for our graduates," he said, noting most students who graduate with secondary certification find teaching jobs and continue in the education field. However, some stay in teaching for a few years and then go into business or industry," he said.

In Education -

Administration Options Increasing

New career options are on the horizon for educational administrators as the result of the changing roles of education.

Prof. Don E. Miller, pedagogical studies, said the image of educational administrators is changing dramatically as the result of changes in the nation's schools and expansion of continuing education efforts in business and industry.

One of the greatest boosts in the future for education administrators is the increasing demand for continuing education.

Miller said continuing education will be almost compulsory in many fields, particularly in areas subject to state licensing. "Many positions will be occurring outside public education. Large business and industry will have their own educational personnel and administrators will be needed over these.

"General Foods, IBM, Gulf and RCA have already extensive programs in training and development. Private enterprise is already investing millions of dollars each year into continuing education, and this trend is expected to continue and to grow," he said.

"We've seen public school programs changing in the last few years, and they will continue to do so. The trend will be toward administrators having a wide diversity of programs within individual schools with other selected personnel having supervisory responsibility over such programs.

In spite of expected enrollment declines in kindergarten through grade eight for the next few years, Miller said they are expected to swell after 1985. Quoting a recent issue of U. S. News and World Report, Miller said nursery schools both public and private, will grow as more mothers take jobs. "Enrollments already have tripled since 1968, and could include at least half the nation's 3-5 year-olds during the early 1980's," he said.

"Public education will be asked to serve increasingly specialized groups of students, ranging from the mentally and physically handicapped to immigrant and bilingual students. We've seen the implications of this in Texas with the increased responsibility for the education of illegal aliens," he added.

School administrators will not face a completely "rosy" picture during the 1980's however. "School officials will likely face a severe teacher shortage. Enrollments in teacher training institutions have declined in the past few years, so as older teachers retire or quit, there will be fewer available teachers to replace them," Miller said.

In addition, while there will be room for educational innovations such as bio-feedback techniques and computers, "back to basics" will continue to be the watchword in many of the classrooms, and teachers and parents will take a 'show me' stand before embracing them, he said.

"We are finding more and more people entering educational administration programs for more and more reasons," Miller said. "Students are no longer being restricted to the traditional entry mold of entering administration as building administrators."

Intern Program To Expand

An administrative internship program between UTPB and Ector County Independent School District, which begins its second year here this spring, will expand this spring, and again in the fall.

The joint project provides a full-time salaried internship for a student studying for mid-management certification in educational administration.

Joe Starnes, director of personnel for ECISD, said the program, which began last spring with one internship, will provide for two intern positions this spring. "We believe we can have two per semester. We are trying to select now for the spring, and plan to choose fall interns during the coming semester," he said.

Starnes said he hopes there will be enough applicants to offer two internships each semester—four each year.

UTPB **Prof. Don Miller**, pedagogical studies, said the salaried intern program between UTPB and ECISD was two years in the planning.

"Each semester, we placed interns in mid-management positions, but until last year, they were traditionally non-paying positions. Interns spend a specified number of hours each day with an adviser in an administrative setting, but the full-time internship gives the student a more concentrated experience. The school district provides for temporary reassignment of the teacher to the internship at this current salary level. Once the internship is completed, the student returns to the previous teaching position," Miller said.

Starnes said the internship serves a two-fold purpose for the public schools.

"We need some sort of training for prospective administrators in order to fill administrative positions as they come open. This gives us a good chance to examine thoroughly some of the applicants before hiring takes place," he said.

{ Cont. on pg. 8j }

Turkeys: trot or shot!

A Thanksgiving turkey will be the trophy for the winners of a turkey trot fun run, scheduled on campus Nov. 22.

Sponsored by the UTPB Physical Education Club, the fun run is a fund raiser for the club, which is new on campus this fall.

Debbie Holdridge, physical education senior from Odessa and president of the organization, said club members are trying to raise money to attend the Texas Association of Health, Physical and Recreation Convention in San Antonio in December.

Holdridge said competition in the fun run is open to students, faculty and any one else interested in competing. "We plan to have an open division with prizes going to the fastest male and female," she said.

Holdridge noted a \$5 registration fee will be charged to entrants.

She said the turkey trot is one of several fund raising projects planned this fall. The club is also selling UTPB bumper stickers. They have planned a Christmas party Dec. 12.

"This is our first year, and we want to keep the organization active," she said, noting membership now stands at 17 members. The PE club meets the first Thursday in every month. For further information, call 367-2280.

Turkey trot activities will begin at 9 a.m. at the swimming pool parking lot.

The shoot -

Looking for a turkey for Thanksgiving dinner? Well, you just may be able to win one, according to Woody Kupper, director of Student Life.

Because of the lack of "real" turkeys

around these here parts, a trap and skeet contest, along with an Annie Oakley and quail walk competition is scheduled to begin at 10 a.m., Saturday, Nov. 8 at the Odessa Trap and Skeet Club.

Commonly referred to as a "Turkey Shoot", there is a \$5 entry fee per person. Participants in the shoot must bring their own shotgun and ammunition.

Kupper noted that there will be two divisions, one of men and another of women. "Participants will be placed in divisions of equal ability determined by practice rounds," he added.

"For each twenty contestants, five turkeys will be given away, so the more participants we have the more turkeys will be awarded," Kupper explained.

So fellas and gals, get those shotguns out and get ready for that Thanksgiving dinner. For more information, contact Kupper at 367-2136.

November stuff

Alums make big plans for year.

The 1980-1981 Officers of the UTPB Alumni Association have big plans for the coming year. The officers include: **Bruce Brehendt** as president; **Dana Beasley** as vice president; **Carl Pool** as 2nd vice president; **Glenda Morgan** as secretary; **Linda Felts** as treasurer, and **Lynn Reese** as newsletter chairman.

Monthly socials are being planned by the association with the first one scheduled for 8 p.m., Nov. 8 at the Sheraton Inn in Midland. All UTPB alums, and upcoming graduating seniors are invited to the social.

Alex Gonzalez, Coordinator of Alumni Affairs, stated that the socials are designed to encourage new memberships and involve the established members. "By having socials, the alums will get to know each other and the upcoming senior will be involved before they actually graduate," she explained.

She said the socials would be held in different Permian Basin towns each month. "Through this means, our goal of establishing UTPB alumni chapters in each town will hopefully be met," she stated.

Other events being planned are the annual "Night of Celebration" and a Christmas Party.

Gonzalez noted that the Alumni Officers meet at 6:30 p.m., on the last Wednesday of each month in the UTPB student lounge. The officers encourage anyone interested to attend the meetings and offer suggestions.

Herndon, Roberts Lead Development Board

Ray Herndon of Midland and **James Roberts** of Andrews have been named to top positions in The University of Texas of the Permian Basin Development Board.

Herndon, vice president and general manager of Midessa Television Company of Midland, is president of the organization, and Roberts, president of Roberts Publishing Company of Andrews, is vice chairman.

The 20-member board represents company leaders from Odessa, Midland, McCamey, Big Spring, Monahans, Snyder, Andrews and Pecos. The board advises the UTPB president with respect to community relations, assists in informing the public about the university and its work, and assists the president and his staff in securing gifts and other funds for the university.

Herndon, who served two terms as vice chairman of the board, has been board member since it began in 1976. A Midland resident since 1955, he has long been active in civic affairs. He is a member of the Midland Chamber of Commerce and has served as that organization's director. He has been a

member and president of the Midland Rotary Club and currently is a senior active member.

He was one of the original organizers of the Texas Association of Broadcasters and has served as director and president of the organization. He has been designated as a "Pioneer Broadcaster" by the organization.

Roberts, who has been in Andrews since 1934 when his father established a newspaper business there, heads a publishing company which is the parent organization of about 16 weekly and daily west Texas newspapers.

He has served as president of the Andrews Chamber of Commerce and deputy district governor for the Lion's Club. He was a charter member of the Andrews Industrial Foundation and has served as its president since its organization in 1962. He has served as its president of the West Texas Press Association and currently serves as president of the Texas Press Association.

Other members of the UTPB Development Board include **Eugene H. Abbott**, president of Abbott Development Company of Midland; **William B. Blakemore**

II, independent oil operator and rancher of Midland; **Claude W. Brown**, chairman of the board of Security State Bank of McCamey; **Ignacio Cisneros**, president of Star Adair Insulation Company of Odessa; **Dr. J. D. Cone**, Odessa physician; **John A. Currie**, president of State National Bank of Big Spring; **J. Conrad Dunagan**, chairman of the board of Permian Coca Cola of Monahans; **Mel Z. Gilbert**, general manager of Snyder Broadcasting Company of Snyder; **John J. Ingram Jr.**, business manager for Julian Gold, Inc. of Midland; **W. D. Noel**, president of El Paso Products Company of Odessa; **Herschel O'Kelley**, president of Rendova Oil Company of Midland; **Charles R. Perry**, president of Perry Gas Companies, Inc. of Odessa; **Joe Pickle**, retired editor of the Big Spring Herald of Big Spring; **Louis Rochester**, chairman of the board of Murphy and Rochester, Inc., of Odessa; **W. R. Roden**, president of HNG Oil Company of Midland; **W. O. Shafer**, attorney with Shafer, Gilliland, Davis, Bunton and McCollum of Odessa; **Mrs. Charlotte Slack**, community leader from Pecos; and **Mrs. Ingrid Zeeck**, community leader from Odessa.

Senate Begins School Year

UTPB's recently elected student senators are, left to right, Zane Harwell, secondary education graduate from Odessa; Cyndy Pohlman, accounting junior from Odessa; David Jamin, accounting senior from Midland; Scott Smith, accounting junior from Lubbock; Margaret Head, anthropology senior from Rio Frio; Glenda McDowell, treasurer, life science senior from Odessa; David Vickers, president, accounting junior from Andrews; Julius Graves, secretary, psychology post baccalaureate from Lubbock; Larron McLaurin, criminal justice management senior from Odessa; Tony Akins, computer science junior from Odessa; Mike Neal, life science senior from Odessa; Ralph Aldredge, accounting junior from Odessa; and Liz Mack, reporter, sociology senior from Odessa. Not pictured is Julie Sanderson, vice president, psychology senior from Albuquerque, N.M.

More Happenings

(Cont. from pg. 5)

Miller said the university wants to help the intern develop a more comprehensive view of educational administration, and to help him determine areas of competence and interest. "The internship also gives the student the opportunity to apply selected concepts and principles of administration in a specified setting," Miller said.

The first intern to participate in the program, Dorothy Fowler, worked with Dan Williams, director of the Office of Planning, Research, Evaluation and Development. Fowler is a government teacher at Permian High School.

Miller pointed out all students in the mid-management or superintendency certification programs must complete an internship toward the end of their program of study. "Placement of an intern, whether paid or nonpaid, full or part time, is a joint decision between the UTPB Faculty of Educational Administration and the school district concerned," he said.

Besides the full-time paid internship for a period of one year, educational administration students have the option of a one-semester 10-hour-per-week internship for three semester hours credit, or a one-semester 25-hour-per-week internship for six hours credit.

* * * * *

Dance to exercise classes are now being formed for mid-November. The classes will meet 5-6 p.m. on Tuesdays. The classes will exist of new routines over a period of six weeks, with Julie Kupper as instructor. The classes are \$12 for students and gym members, \$18 for non-gym faculty members, and \$20 for the general public. For more information, contact the Office of Student Life, 367-2136.

* * * * *

The Office of Student Life is sponsoring a Racquetball Tournament, scheduled for Nov. 14-15. There will be two divisions of singles men and singles women. Registration deadline is Nov. 12. To register contact the UTPB Gym Store, the Student Life Office or Woody Kupper.

* * * * *

Published works of Chuck Swedburg, UTPB Alum, is now available at local bookstores in the area. His booklet, entitled "Some New, Some Old" is the fifth published works of his poetry. Swedburg is the News Director for KOZA Radio in Odessa. He received his Bachelor of Arts in Mass Communications in the Spring of 1974.

* * * * *

* * * * *

An alumni chapter of Phi Theta Kappa is now in organizational stages on the UTPB campus. Phi Theta Kappa is an honorary fraternity for junior college transfers. The goals of the organization are to make new friendships and be of service to the community. Celecia Mann, senior transfer from Howard College, is organizing the chapter. For more information, contact the Office of Student Life, 367-2136.

* * * * *

A clock was donated by Miller Beer Distributor Woody Woodman, to the UTPB Coffeehouse. The clock, fitting into the "Coffeehouse" atmosphere, has the Miller's crest and a somewhat antique look.

* * * * *

Garry Lon Marble, management junior of Odessa, has been awarded a \$400 scholarship from the Texas Real Estate Research Center. The scholarship program awards students at community or junior colleges as well as students at four-year colleges and universities. Through awarding the scholarships, the Center encourages college students to pursue careers in real estate and help practitioners already working within the industry to upgrade their knowledge.
