# DIRECTORY INTRODUCTION:

This directory includes STS and Public Telephone Listings for State Employees and Agencies. For your convenience, the directory is divided into three sections as follows:

WHITE PAGES (First Section)	— General Information
WHITE PAGES (Second Section)	— Employee Listing
YELLOW PAGES	— Organizational Listing

## TYPES OF CALLS:

Listed below are types of calls that can be placed by using this directory. Specific dialing instructions follow:

### STS CALLS (Long Distance Only):

STS (State Telecommunications System) is a state-leased, private, intrastate long distance telecommunications network providing LOWER COST PER MINUTE service for state government. Where STS service is available it should be used in placing all OFFICIAL BUSINESS calls, within Texas. Local calls and calls to locations outside of Texas must be placed through the regular public telephone system. If the individual or agency you wish to call does not have an STS number listed, it is on an OFF-NETWORK location, but STS should still be used. Follow the instructions on page iii to place your call.

### LOCAL CALLS:

Use the regular telephone to place local calls. However, when calling STS information or an STS Trouble Reporting Number, use the appropriate STS number, even if it is in your local calling area.

### STS NUMBERS:

Each telephone on STS has two numbers. One is the regular number, and the other is a special STS Number. The seven-digit STS number consists of a three digit location code and the four digit extension number. The first digit of an STS number is usually 8 (some Trouble Reporting Numbers begin with 9).

### STS SWITCHER AREAS:

For STS information and Trouble Reporting you need to know which of the four main distribution centers serves your phone. These distribution centers are called SWITCHERS. The second digit in your STS number identifies the Switcher Area: Abilene is a 4 or 6; Austin is 2 or 8; Dallas is 3 or 9; and Houston is a 5 or 7. Thus, an STS number 829-XXXX would be located in the Austin Switcher Area.

### EQUIPMENT MALFUNCTIONS:

Occasionally, when placing a call from a phone on the network to one off the network, the equipment will fail to register your number. When this occurs, the regular telephone operator comes on the line and asks for your number to key into the equipment. Tell the operator that you will place the call again, then hang up and re-dial. The STS number will have no meaning to the regular telephone operator.

# STS INFORMATION

Every agency location on the STS that has an operator or attendant has an information number listed in the organizational section (yellow pages) of this directory. This number is to be used to obtain STS numbers for employees or sections at that location. If no information number is listed and a number cannot be found in this directory, call the STS information number below for your Switcher Area. When the operator provides the number you requested, be sure to write it down for future use.

ABILENE Switcher Area	— STS#841-3011
AUSTIN Switcher Area	— STS#822-2323
DALLAS Switcher Area	— STS#839-2111
HOUSTON Switcher Area	— STS#859-2121

## TYPES OF STS NETWORK CALLS

ON-Network to ON-Network — From STS number to STS number

ON-Network to OFF-Network — From STS number to a Regular number

OFF-Network to ON-Network — From a Regular number to an STS number (operator assist from selected cities)

If the individual or agency you wish to call does not have an STS number listed, it is an OFF-Network location, but STS should still be used. Each telephone on STS has two numbers. One is the regular public telephone system number (e.g., 512/475-5421), and the other is the STS number (e.g., 822-5421), the first digit is usually an 8.

## PROCEDURES

ON-NETWORK TO ON-NETWORK (State office to State office):

- Listen for dial tone.
- Dial your STS Access Code if your location uses one.
- Listen for second dial tone (NOTE: Some locations will not have a second dial tone. In this case, dial the STS number immediately after dialing the access code.).
- Dial the seven-digit STS number.

ON-NETWORK TO OFF-NETWORK: STS can be used to place OFFICIAL BUSINESS calls to phones not at State locations, as well as State locations not on the network.

- Listen for dial tone.
- Dial your STS Access Code if your location uses one.
- Listen for second dial tone (NOTE: Some locations will not have a second dial tone. In this case, dial the Area Code and Regular Number immediately after dialing the Access Code.).
- Dial the Area Code for the location being called, followed by the regular number. When placing this type of call, the Area Code must be dialed, even if it is the same as your own, but do not dial 1 + as you would when making a regular long distance call.

**OFF-NETWORK TO ON-NETWORK:** (Operates only during State working days, 8:00 a.m. to 5:00 p.m.).

- Determine the nearest STS Operator Number from your STS Dialing Guide for Travelers, or from the list on page v of this directory. (Regular Long Distance charges apply only from the location where you place the call to the nearest STS entry point, as listed on page v, for the full duration of the call. These long distance costs are billed directly to the agency.).
- Call the STS Operator.
- Give the operator your name and authorization information required. Obtain detailed instructions for authorization from your agency.
- Give the operator the STS number you wish to reach, and the Area Code and first three digits of the number from which you are calling.

STS wallet size Travelers Guides listing the STS operator's numbers for OFF-network to ON-network calling are available from the Telecommunications Services Division (512/475-5421 or STS 822-5421).

# STS OPERATOR NUMBERS FOR OFF-NETWORK TO ON-NETWORK CALLING

# TROUBLE REPORTING

**PLEASE REPORT ALL DIFFICULTIES ENCOUNTERED  
SO THE NETWORK CAN BE AS FREE OF TROUBLES AS POSSIBLE**

## **GENERAL:**

The grade of service on any telephone system is highly dependent upon identifying and correcting maintenance problems. The prompt and accurate reporting of all troubles experienced on the network will result in better service to all users. The telephone industry must be made aware of failures and degraded service in order to take necessary maintenance and repair actions.

## **PROCEDURES FOR REPORTING TROUBLES:**

If a station encounters trouble when placing a call over the STS network, try placing the call again several minutes later. When trouble still exists, it should be reported to the trouble number below that serves your switcher area except for problems isolated as local. Give your name; agency; location; STS number; number called; trouble and time trouble occurred.

(1) If the STS line in trouble is an access line which connects a location directly to the Abilene, Austin, Dallas or Houston switchers, the trouble should be reported to the switcher that serves the agency. Their telephone numbers (collect calls accepted) are:

Abilene switcher STS 990-6161 or 915/677-4041 for STS 84X-XXXX and 86X-XXXX  
Austin switcher STS 820-1961 or 512/472-2458 for STS 82X-XXXX and 88X-XXXX  
Dallas switcher STS 990-6161 or 214/426-8582 for STS 83X-XXXX and 89X-XXXX  
Houston switcher STS 990-6161 or 713/654-3813 for STS 85X-XXXX and 87X-XXXX

(2) If the STS line in trouble is a detached station in Southwestern Bell territory (a state agency telephone station which is located at premises separate from the PBX location), the trouble should be reported to the Southwestern Bell repair office serving the agency reporting trouble. Their toll free numbers are:

Southwestern Bell area codes 512, 806, 915, and 817 (STS 82X, 88X-XXXX)  
1 + 512/954-4611\*

Southwestern Bell area codes 214 and 817 (STS 83X, 89X-XXXX)  
1 + 817/998-4109

Southwestern Bell area codes 409 and 713  
1 + 713/881-8287

\*Includes Austin CENTREX

In the event that you report trouble to the above numbers and are not satisfied with the results, please call the Telecommunications Services Division at 512/475-5421 or STS 822-5421. We will assist you in restoring satisfactory telephone service. Trouble reporting numbers for other telephone companies (e.g., GTE, Lufkin, United) may be obtained by calling the Telecommunications Services Division.

# FREQUENTLY ENCOUNTERED TROUBLES:

Following is a list of troubles that occur most frequently with suggested actions:

## SYMPTOMS

Slow busy (1 pulse per second):

Fast busy (2 pulses per second):

Recording or number answered other than that dialed:

High and Dry (No Ring):

Circuit Howl (Oscillation):

Can't Hear (Either one or both ways):

Noise on Line or No Dial Tone:

## PROBABLE CAUSE AND RECOMMENDED ACTION

Phone called is busy. Redial in 5 minutes.

All circuits busy or equipment malfunction. Pause, then redial. If "fast busy's" occur frequently, report to area trouble number.

Wrong number or equipment malfunction. Consult STS directory or DDD information operator for correct commercial number. If correct number has been dialed, and trouble still exists, report to area trouble number.

Trunk bad. Report to area trouble number.

Unbalanced circuit. Report to area trouble number.

Bad location or network circuit. Report to area trouble number.

If it occurs after dialing access code, cause is line or equipment trouble. If local telephone lines are also experiencing the same trouble, report to local repair number. Otherwise report to STS area trouble number.

## REQUESTS FOR STS SERVICE:

The STS network is designed to provide economical statewide telephone service, dedicated data and specialized voice communication circuits to eligible agencies in support of official business. All requests for service or information concerning service must be forwarded through agency channels to the Telecommunications Services Division, State Purchasing and General Services Commission, P.O. Box 13047, Capitol Station, Austin, Texas, 78711, STS number 822-5421 or 512/475-5421.

Upon receipt, the request will be analyzed to determine the availability and cost of the services desired. The Telecommunications Services Division will evaluate the requirement for cost effectiveness and coordinate with the requesting agency prior to submitting a firm order to install service. Service requests should be submitted as far in advance as possible. Service requests to add switchboards to the network should be submitted immediately, as soon as the need is known, because of special trunk terminating equipment which must be ordered and installed.

## NEW STS VOICE SERVICE; MOVE OF STS SERVICE; PBX CHANGEOUT:

The following information is required upon requests for new or additional STS service, move of STS service and PBX and/or equipment changeout.

### A. Customer provided information:

1. Agency name, address (include old address if a move), suite/room number, zip code for location of STS service desired.
2. Operational date STS service required.
3. Local telephone number for location (new number if moving).
4. Name and telephone number of local agency contact.
5. Additional information as applicable:
  - a. Personnel increases or decreases.
  - b. Any change in FX or WATS line service.
  - c. Three months toll data for new service (if not available, information such as average expense, average usage in minutes, listing of Texas cities most frequently called and the number of calls to each).

### B. Vendor supplied information for Key and PBX systems:

1. Vendor's name, address, and telephone number.
2. Name of contact for Vendor.
3. Name of Vendor's System.
4. Facilities Interface Code (FIC); e.g., TL31M, TL12M, 2LSCE, OL13A.
5. Interconnect jack; e.g., RJ21X.
6. PIN locations on jack.
7. Touch-Tone — Yes or No.
8. Attendant number (if applicable).
9. FCC Registration.
10. Ringer equivalency.
11. Number of CO lines equipped.
12. Number of CO lines working.
13. Number of STS terminations equipped.

### C. Additional information for PBX installations:

1. PBX station series; e.g., 2X, 3XX.
2. Number of requested digits to be outpulsed to PBX; e.g. 2, 3.
3. PBX level available for tie line access; e.g., 8, 5.
4. Start Dial:
  - a. Incoming from Switcher; e.g., Immediate, Wink, Dial Tone, Delay.
  - b. Outgoing to Switcher; e.g., Immediate, Wink, Dial Tone, Delay.
5. Pulsing:
  - a. Incoming from Switcher; e.g., Dial Pulse, Multifrequency, None.
  - b. Outgoing to Switcher; e.g., Dial Pulse, Multifrequency, None.
6. Vendor price of CCSA (tie trunk) terminations.

Agencies obtaining new PBX's are encouraged to contact Telecommunications Services Division, State Purchasing and General Services Commission, immediately upon receipt of a proposal from a PBX supplier. An evaluation of customer requirements will be conducted to determine the number of STS lines needed at cutover as well as the number of additional lines which will be required to handle projected growth. This evaluation is necessary to determine the number and type of PBX terminations required in support of STS service. In addition to analyzing STS requirements, Telecommunications Services Division offers its services in conducting overall evaluations of PBX proposals if requested to do so by the agency.

## **DATA OR SPECIALIZED VOICE CIRCUITS:**

Dedicated data or specialized voice circuits may be placed in STS Network TELPAK when available and cost effective. Detailed instructions and forms for applying for this service have been sent to each agency. Further information can be obtained by calling the Telecommunications Services Division, STS number 822-5421 or 512/475-5421.

## **DIRECTORY UPDATING:**

In order to provide up-to-date information to the STS operators, all changes, additions, deletions or corrections to the organizational listings (Yellow Pages ONLY) should be forwarded to the Telecommunications Services Division, State Purchasing and General Services Commission, P.O. Box 13047, Capitol Station, Austin, Texas, 78711. Please include the old information as it appears in this directory, along with the change. Information pertaining to new locations must include the following: Agency, City or Town, Division Name (if applicable), Street Address, STS Number, and Regular Telephone Number (including Area Code). Changes to the personnel listing (White Pages) will not be made until a new directory is published.

Every reasonable effort has been made to provide complete and accurate listings and instructions in this directory. Any suggestions for making the directory more useful would be greatly appreciated. Either mail your suggestions to the address listed above, or call STS number 822-5421 or 512/475-5421.

## **MISUSE OF STS:**

STS service is provided for OFFICIAL BUSINESS calls only. STS service is not free, and therefore, should not be used for making personal calls.
