# A SURVEY OF BLACK BASS TOURNAMENT FISHING IN TEXAS, 1979

By

Philip P. Durocher  
Texas Parks and Wildlife Department  
Austin, Texas 78744

## OVERVIEW

This booklet contains 1979 results of black bass tournaments in Texas as reported by Texas Bass Clubs. The primary purpose of this survey, initiated in 1978, is to monitor the impact of tournament fishing in Texas reservoirs.

In this second annual report, results are given for all reservoirs where tournaments were reported. Reservoirs where five or more tournaments were held are again rated in five categories that reflect the quality of fishing. Percent Fishermen Success, Average Weight, and Hours/Trophy Bass are given as in 1978. The remaining two categories used in 1978 (Bass/Hour and Pounds/Hour) were changed to Bass/Fishermen and Pounds/Fishermen.

To determine the best "overall" reservoirs, the top 15 in each category were given a value (No. 1 received 15; No. 2, 14; No. 3, 13; etc.). Summing values each reservoir received in all categories produced its "overall" rating. Further details of the survey methods can be found in "A Survey of Black Bass Tournament Fishing in Texas, 1978" by the Texas Parks and Wildlife Department.

I extend my appreciation to the bass clubs and members of the Inland Fisheries Staff for their cooperation and support in this survey.

## Results and Discussion

Seven hundred and sixty two (762) tournaments were reported by 131 of the 235 clubs on our mailing list. Difficulties in maintaining an up-to-date list of bass clubs and their addresses may account for the low participation rate (56%).

Approximately 3 percent of the survey cards returned were unusable, but this was a significant improvement over the 1978 survey. Most unusable reports were "roadrunner" tournaments. Usable reports, by reservoir, are summarized in Appendix A.

Tournaments were reported on 74 reservoirs. Leading the list with most tournaments reported were Livingston with 65; Toledo Bend, 63; and Palestine, 48.

The largest bass (8 lb. 10 oz.) was caught from Monticello. Bass over 8 lbs. were also caught at Braunig, Conroe, and Palestine. Good catches of trophy bass (6 lbs or better) were made at Palestine, 32; Toledo Bend, 20; and Conroe, 19.

For reservoirs with five or more tournaments (Table 1), Fishermen Success ranged from 83 percent at Travis to 25 at Granbury. Statewide 60 percent of all tournament fishermen weighed in at least one bass compared to 62 percent in 1978. Average Weight of bass ranged from 2.50 lb/fish at Braunig to 0.97 lb/fish at Stillhouse Hollow. The Statewide Average Weight of all bass was 1.51 lb/fish compared to 1.60 in 1978. Catch rates in terms of Bass/Fishermen ranged from 3.93 at Corpus Christi to 0.49 at Twin Buttes. Pounds/Fishermen catch ranged from 5.14 at Toledo Bend to 0.85 at Granbury. Average Statewide catch rates were 2.12 Bass/Fishermen and 3.21 Pounds/Fishermen. Tournament

Table 1. Statewide averages and top 15 reservoirs in five categories and overall for bass tournament fishing in Texas, 1979. Only lakes with five or more tournaments reported were considered.

	% Fishermen Success	Average Weight	Bass/ Fishermen	Pounds/ Fishermen	Hour/ Trophy Bass	'OVERALL'
Statewide Average	60.0	1.51	2.12	3.21	2119	
"Ranking"						
1	Travis	Braunig	Corpus Christi	Toledo Bend	Braunig	Houston County*

\* Denotes Tie

fishermen spent an average of 1,911 hours in 1979 to catch a trophy bass compared to 1,508 in 1978. A trophy bass was caught every 427 hours at Victor Braunig, the least time required for any reservoir in the State.

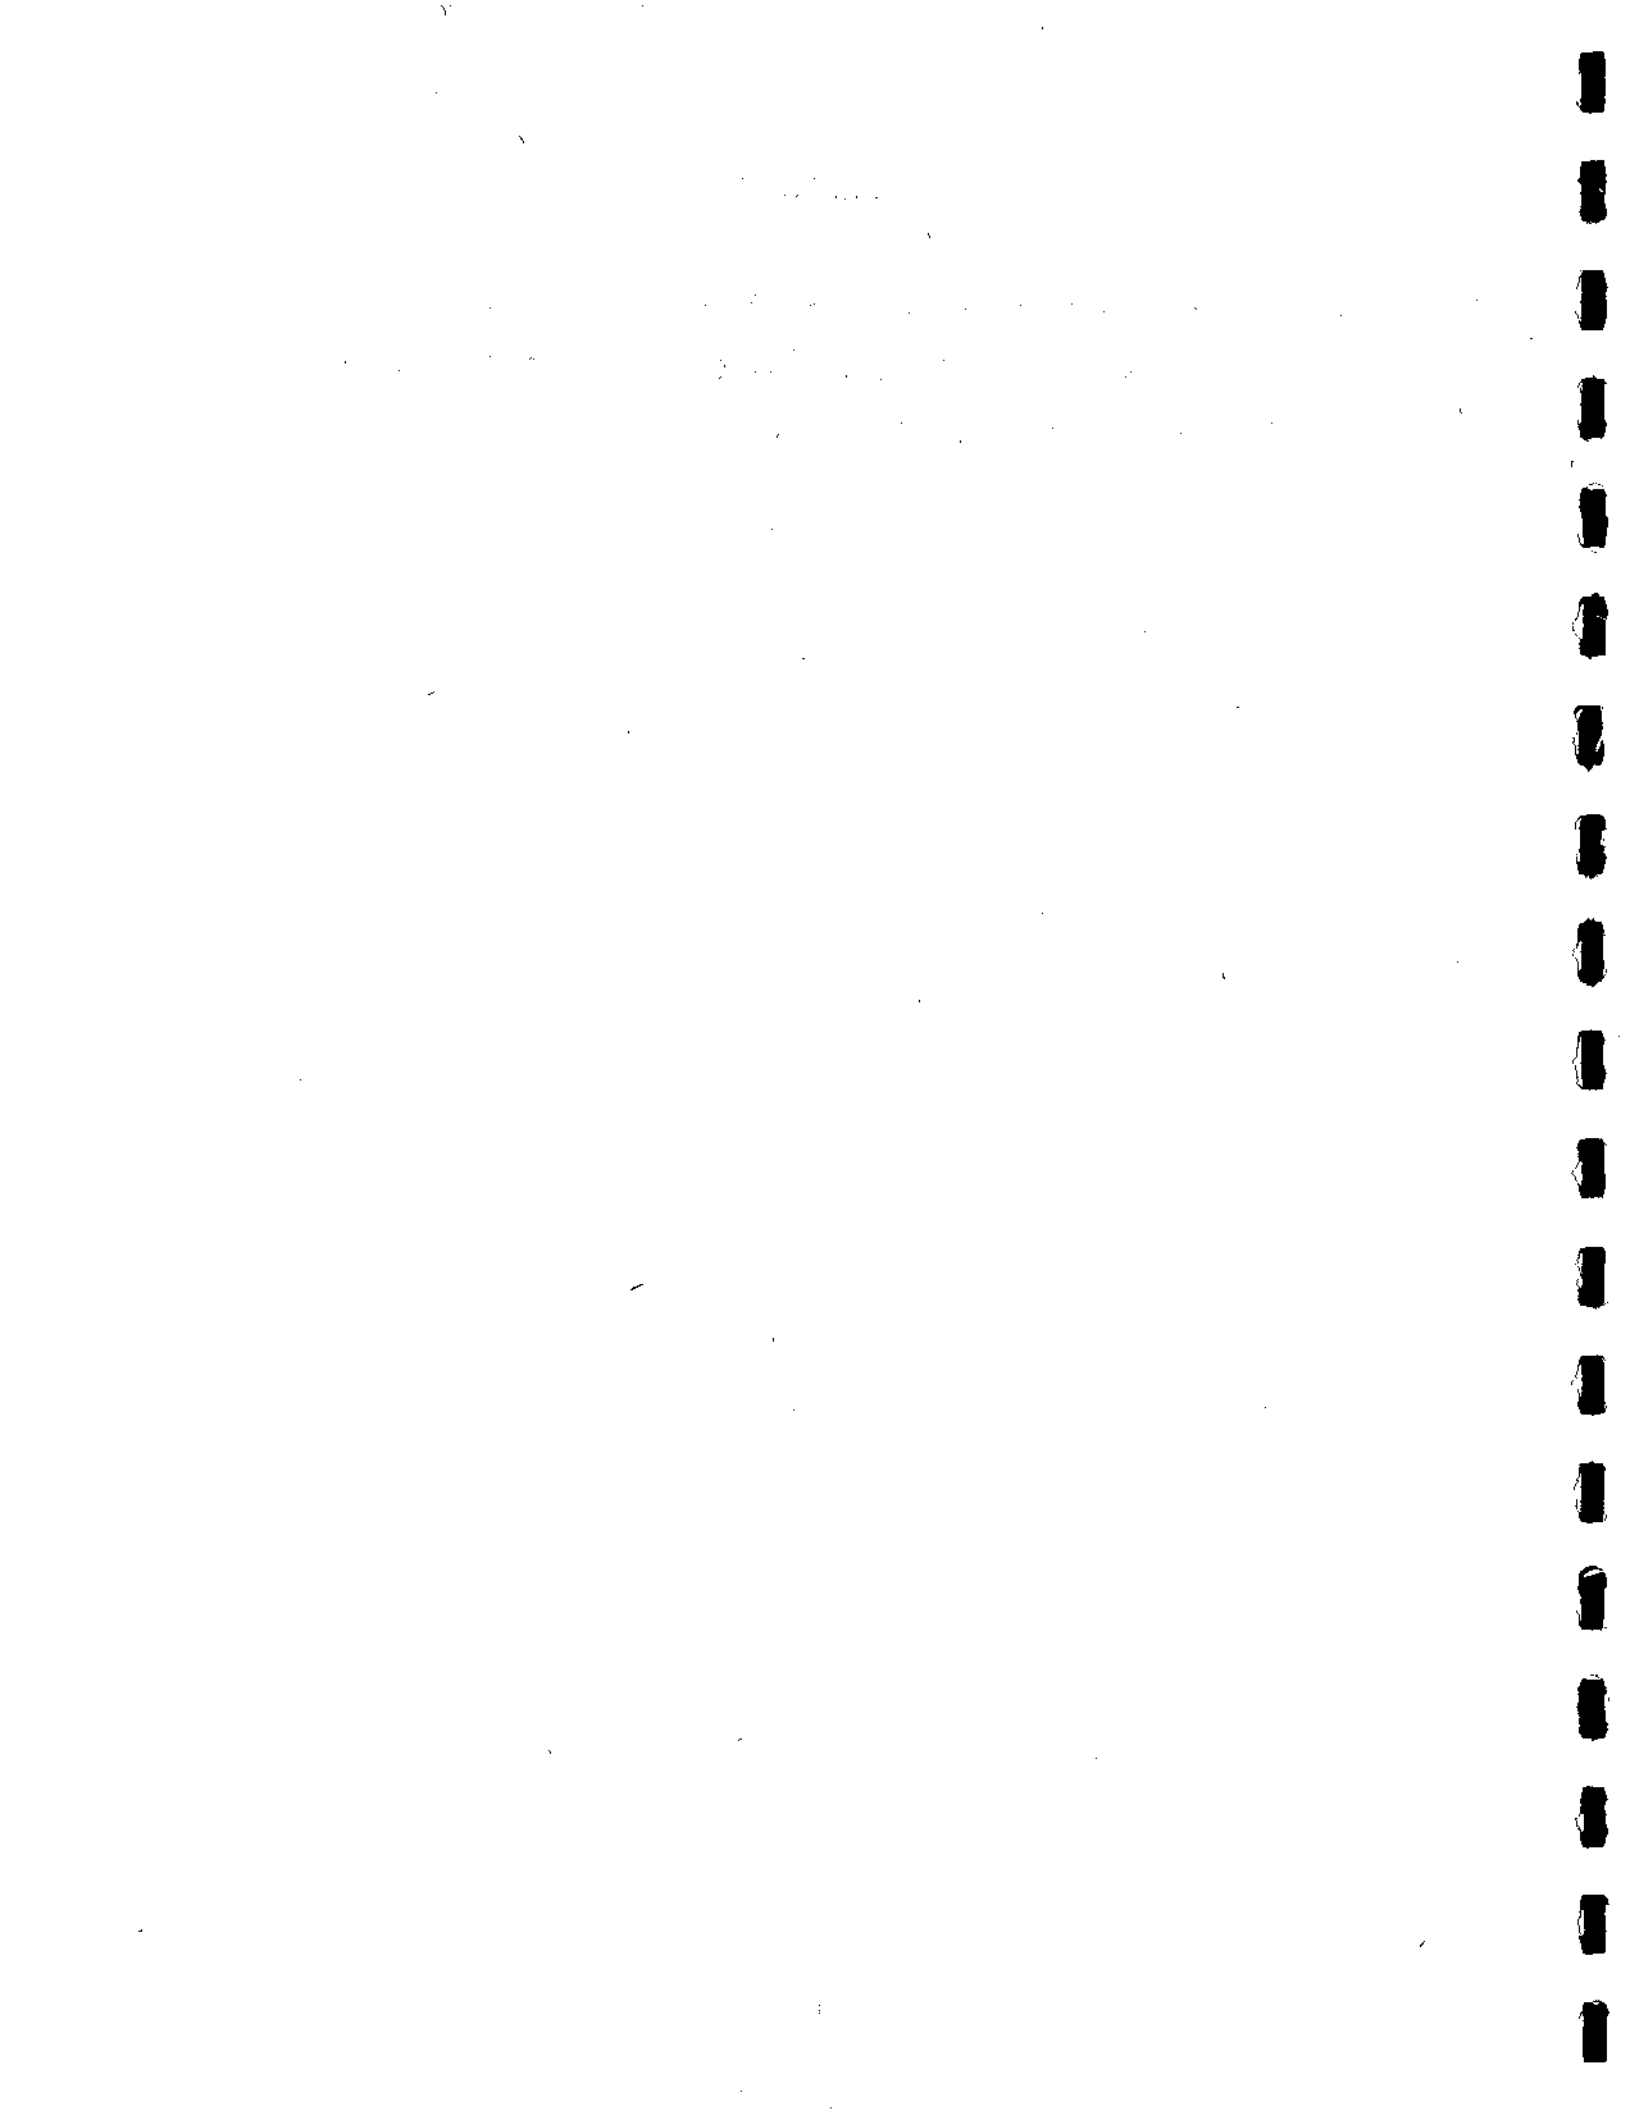

Toledo Bend and Houston County reservoirs tied for the best overall tournament reservoirs in 1979. Both finished in the top 15 in all categories. Conroe was a close third.

The variability of bass fisherman success is demonstrated by the fact that only six lakes which finished in the top 15 for 1978 were represented in 1979. Toledo Bend, Amistad, Corpus Christi, Murvaul, Falcon, and Livingston made the list both years. This result is no surprise to experienced Texas bass fishermen. In general, these reservoirs are large and tend to be less affected by environmental conditions which "make" or "break" bass fishing in small impoundments.

Overall, the quality of bass tournament fishing in Texas has not changed significantly from 1978. In addition, there should be no alarm by the general fishing public that tournament fishing is detrimental. Harvest by bass club competitors (0.029 bass per acre or 0.043 pounds per acre) is still far from that believed detrimental to healthy bass populations.
