RECORDS OF WELLS, DRILLERS' LOGS, WATER-LEVEL
MEASUREMENTS, AND CHEMICAL ANALYSES OF
GROUND WATER IN HARRIS AND GALVESTON
COUNTIES, TEXAS, 1970-74

INTRODUCTION

The collection of hydrologic data in Harris and Galveston Counties, Texas, was begun by the U.S. Geological Survey in 1929 and 1938, respectively. The current data-collection program is in cooperation with the Texas Water Development Board and the cities of Houston and Galveston.

The data-collection program consists of an inventory of new large-capacity and other selected wells, the collection of water samples from wells for chemical analyses, an inventory of ground-water pumpage, water-level measurements in observation wells, pumping tests on large-capacity wells, and a compilation of information on land-surface subsidence.

This report presents records of wells, drillers' logs, water-level measurements, and chemical analyses of ground water collected during the period 1970-74. Additional information on the geology and hydrology of the area may be found in publications listed under "Selected References."

Most of the chemical analyses presented in this report were determined in the laboratories of the U.S. Geological Survey, but some data were obtained from commercial analyses. Dissolved nitrite plus nitrate (N), dissolved orthophosphorous (P), dissolved solids (sum of constituents), hardness (Ca, Mg), percent sodium, residual sodium carbonate (RSC), and sodium adsorption ratio (SAR) were recalculated from commercial analyses to correspond to U.S. Geological Survey reporting methods.

The English units used in this report may be converted to metric units by the following conversion factors:

FROM	MULTIPLY BY	TO OBTAIN
feet	0.3048	meters
gallons per minute	.06309	liters per second
inches	2.54	centimeters

WELL-NUMBERING SYSTEM

The well-numbering system used in this report was devised by the Texas Water Development Board for use throughout the State. Under this system, each 1-degree quadrangle is given a number consisting of two digits. These are the first two digits in the well number. Each 1-degree quadrangle is divided into 7½-minute quadrangles which are given two-digit numbers from 01 to 64. These are the third and fourth digits of the well number. Each 7½-minute quadrangle is divided into 2½-minute quadrangles which are given a single-digit number from 1 to 9. This is the fifth digit of the well number. Finally, each well within a 2½-minute quadrangle is given a two-digit number in the order in which it was inventoried, starting with 01. These are the last two digits of the well number.

On the well-location maps (Figures 1-2) only the last three digits of the well number are shown at each well location; the second two digits are shown in the northwest corner of each 7½-minute quadrangle; and the first two digits are shown by the large block numerals 60, 64, and 65.

In addition to the seven-digit well number, a two-letter prefix is used to identify the county. The prefix for Harris County is LJ and for Galveston County, it is KH.

Table 1.--Records of Wells in Harris County

Water levels : Reported water levels given in feet; measured water levels given in feet and tenths.
 Method of lift and type of power: C, cylinder; E, electric; G, gasoline, butane, or diesel engine; Ng, natural gas; J, jet; Sub, submersible; T, turbine; N, none. Number indicates horsepower.
 Use of water : D, domestic; Ind, industrial; Irr, irrigation; P, public supply; S, livestock; N, none.
 Water-bearing unit : C, Chicot aquifer; CU, upper unit of Chicot aquifer; CL, lower unit of Chicot aquifer; E, Evangeline aquifer.

Table 5.--Record of Wells in Galveston County

Water levels : Reported water levels are given in feet; measured water levels are given in feet and tenths.

Method of lift and type of power: E, electric; S, steam; J, jet; Sub, submersible; T, turbine; N, none. Number indicates horsepower.

Use of water : D, domestic; Ind, industrial; P, public supply; S, stock; N, none.

Water-bearing unit : C, Chicot aquifer; CU, upper unit of Chicot aquifer; CL, lower unit of Chicot aquifer; E, Evangeline aquifer.

No.	Owner	Driller	Date completed	Casing		Water-bearing unit	Altitude of land surface (ft.)	Water level		Method of lift	Use of water	Remarks
