- 14 Depcor-Splendora-Boy association: Nearly level to gently sloping, moderately well drained and somewhat poorly drained, sandy and loamy soils
- 15 Conroe-Landman association: Gently sloping to strongly sloping, moderately well drained, sandy soils

* Texture terms refer to the surface layer of the major soils

Compiled 1982

Each area outlined on this map consists of more than one kind of soil. The map is thus meant for general planning rather than a basis for decisions on the use of specific tracts.
