State Pension Review Board

Honorable Greg Abbott, Governor  
Honorable Glenn Hegar, Texas Comptroller  
John McGeady, Assistant Director, Legislative Budget Board  
Lisa Collier, First Assistant State Auditor

Ladies and Gentlemen:

We are pleased to submit the annual financial report of the State Pension Review Board for the year ended Aug. 31, 2019, in compliance with Texas Government Code Annotated, Section 2101.011, and in accordance with the requirements established by the Texas Comptroller of Public Accounts.

Due to the statewide requirements embedded in Governmental Accounting Standards Board (GASB) 34, the Comptroller of Public Accounts does not require the accompanying annual financial report to comply with all the requirements in this statement. The financial report will be considered for audit by the state auditor as part of the audit of the State of Texas *Comprehensive Annual Financial Report (CAFR)*; therefore, an opinion has not been expressed on the financial statements and related information contained in this report.

If you have any questions, please contact Westley Allen at 512-463-1739.

Sincerely,

Anumeha Kumar

Executive Director

UNAUDITED

STATE PENSION REVIEW BOARD

For the fiscal year ended August 31, 2019

**Note 1: Summary of Significant Accounting Policies**

**Entity**

**Historical Background related to the agency**

The State Pension Review Board was created by House Bill No. 156 of the Seventy-Seventh Legislature (as codified in Gov't Code Chapter 801) as an independent state agency to oversee and review all Texas public pension systems. The act became effective on September 01, 1979.

The Board's major functions are:

- To conduct a continuing reviews of public retirement systems;
- To study potential or existing problems affecting the systems;
- To provide information and technical assistance as needed;
- To recommend policies and legislation in the public pension area;
- To provide for actuarial analysis and review of public pension legislation;
- To report in November of each even-numbered years on its activities; and
- To develop and administer an educational training program for trustees and system administrators of Texas public retirement systems.

Due to significant changes related to Governmental Accounting Standards Board Statement No. 34, *Basic Financial Statements – Management's Discussion and Analysis – for State and Local Governments*, the Comptroller of Public Accounts does not require the accompanying annual financial report to be in compliance with generally accepted accounting principles (GAAP). The financial report will be considered for audit by the State Auditor as part of the audit of the State of Texas Comprehensive Annual Financial Report; therefore, an opinion has not been expressed on the financial statements and related information contained in this report.

**Blended Component Units:** No component units have been identified which should have been blended into an appropriated fund.

**Fund Structure**

The accompanying financial statements are presented on the basis of funds, each of which is considered a separate accounting entity.

**Governmental Fund Types & Government-wide Adjustment Fund Types**

**General Fund:** The general fund is the principal operating fund used to account for most of the state's general activities. It accounts for all the financial resources except those accounted for in other funds.

**Capital Asset Adjustment Fund Type:** Capital Asset Adjustment fund type will be used to convert governmental fund types' capital assets from modified accrual to full accrual.

**Long-Term Liabilities Adjustment Fund Type:** Long-Term Liabilities Adjustment fund type will be used to convert governmental fund types' debt from modified accrual to full accrual.

**Fiduciary Fund Types**

Fiduciary funds account for assets held by the state in a trustee capacity or as an agent for individuals, private organizations, other governmental units, and/or other funds. When assets are held under the terms of a formal trust agreement, either a pension trust fund, or a private purpose trust fund is used.

**Agency Funds:** Agency funds are used to account for assets the government holds on behalf of others in a purely custodial capacity. Agency funds involve only the receipt, temporary investment, and remittance of fiduciary resources to individuals, private organizations, or other governments.

## UNAUDITED

### Basis of Accounting

The basis of accounting determines when revenues and expenditures or expenses are recognized in the accounts reported in the financial statements. The accounting and financial reporting treatment applied to a fund is determined by its measurement focus.

Governmental fund types that build the fund financial statements are accounted for using the modified accrual method basis of accounting. Under modified accrual, revenues are recognized in the period in which they become both measurable and available to finance operations of the fiscal year or liquidate liabilities existing at fiscal yearend. The State of Texas considers receivables collected within sixty days after year-end to be available and recognizes them as revenues of the current year for Fund Financial Statements prepared on the modified basis of accrual. Expenditures and other uses of financial resources are recognized when their related liability is incurred.

Governmental adjustment fund types that will build the government-wide financial statements are accounted for using the full accrual method of accounting. This includes capital assets, accumulated depreciation, unpaid Employee Compensable leave, the un-matured debt service (principal and interest) on general long-term liabilities, long-term capital leases, long-term claims and judgments and full accrual revenues and expenses. The activity will be recognized in these fund types.

Proprietary funds, pension trust funds, external investment trust funds and private-purpose trust funds are accounted for on the accrual basis of accounting. Under the accrual basis of accounting, revenues are recognized when earned and expenses are recognized at the time liabilities are incurred. Proprietary funds distinguish operating from non-operating items. Operating revenues and expenses result from providing services or producing and delivering goods in connection with proprietary funds principal ongoing operations. Operating expenses for the enterprise and internal services funds include the cost of sales and services, administrative expenses, and depreciation on capital assets.

### Budgets and Budgetary Accounting

The budget is prepared biennially and represents appropriations authorized by the legislature and approved by the Governor (the General Appropriations Act).

Unencumbered appropriations are generally subject to lapse 60 days after the end of the fiscal year for which they were appropriated.

### Assets, Liabilities, and Fund Equity

#### ASSETS

**Cash & Cash Equivalents:** Short-term highly liquid investments with an original maturity of three months or less are considered cash equivalents.

**Restricted Assets:** Restricted assets include monies or other resources restricted by legal or contractual requirements. These assets include proceeds of enterprise fund general obligation and revenue bonds and revenues set aside for statutory or contractual requirements. Assets held in reserve for guaranteed student loan defaults are also included.

**Inventories:** Inventories include both merchandise inventories on hand for sale and consumable inventories. Inventories are valued at cost generally utilizing the last-in, first-out method. Inventories for governmental fund types use the purchase method of accounting. The consumption method of accounting is used to account for inventories that appear in the proprietary fund types and the government-wide statements. The cost of these items is expensed when the items are consumed.

**Capital Assets:** Assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of one year should be capitalized. These assets are capitalized at cost or, if not purchased, at appraised fair value as of the date of acquisition. Purchases of assets by governmental funds are reported as expenditures. Depreciation is reported on all "exhaustible" assets. "Inexhaustible" assets such as works of art and historical

## UNAUDITED

treasures are not depreciated. Road and highway infrastructure is reported on the modified basis. Assets are depreciated over the estimated useful life of the asset using the straight-line method.

All capital assets acquired by proprietary fund or trust funds are reported at cost or estimated historical cost, if actual historical cost is not available. Donated assets are reported at fair value on the acquisition date. Depreciation is charged to operations over the estimated useful life of each asset, using the straight-line method.

**Other Receivables:** Other receivables include year-end revenue accruals not included in any other receivable category. This account can appear in governmental and proprietary fund types.

### LIABILITIES

**Accounts Payable:** Accounts Payable represents the liability for the value for assets or services received at the balance sheet date for which payment is pending.

**Other Payables:** Other payables are the accrual at year-end of expenditure transactions not included in any of the other payable descriptions. Other payables may be included in either the governmental or proprietary fund types.

**Employees' Compensable Leave Balances:** Employees' Compensable Leave Balances represent the liability that becomes "due" upon the occurrence of relevant events such as resignations, retirements, and uses of leave balances by the covered employee. Liabilities are reported separately as either current or non-current in the statement of net assets.

**Capital Lease Obligations:** Capital Lease Obligations represent the liability for future lease payments under capital lease contracts contingent upon the appropriation of funding by the Legislature. Liabilities are reported separately as either current or noncurrent in the statement of net assets.

### FUND BALANCE / NET ASSETS

The difference between fund assets and liabilities is 'Net Assets' on the government-wide, proprietary and fiduciary fund statements, and the 'Fund Balance' is the difference between fund assets and liabilities on the governmental fund statements.

**Reservations of Fund Balance:** Fund balances for governmental funds are classified as either reserved or unreserved in the fund financial statements. Reservations are legally restricted to a specific future use or not available for expenditure.

**Reserved for Encumbrances:** This represents commitments of the value of contracts awarded or assets ordered prior to year-end, but not received as of that date. Encumbrances are not included with expenditures or liabilities. They represent current resources designated for specific expenditures in subsequent operating periods.

**Unreserved / Undesignated:** Other represents the unappropriated balance at year-end.

**Invested in Capital Assets, Net of Related Debt:** Invested in capital assets, net of related debt consists of capital assets, net of accumulated depreciation and reduced by outstanding balances for bond, notes, and other debt that are attributed to the acquisition, construction, or improvement of those assets.

### INTERFUND TRANSACTIONS AND BALANCES

The agency has the following types of transactions among funds:

**Transfers:** Legally required transfers that are reported when incurred as 'Transfers In' by the recipient fund and as 'Transfer Out' by the disbursing fund.

**Reimbursements:** Reimbursements are repayments from funds responsible for expenditures or expenses to funds that made the actual payment. Reimbursements of expenditures made by one fund for another that are recorded as expenditures in the reimbursing fund and as a reduction of expenditures in the reimbursed fund. Reimbursements are not displayed in financial statements.

<b>Note 5: Changes in Long Term Liabilities</b>
---

During the year ended August 31, 2019, the following changes occurred in liabilities.

	Balance 9/1/2018	Additions	Deductions	Balance 8/31/2019	Amount Due Within One Year	Amount Due Thereafter
Notes and Loans Payable						
General Obligation B/P						
Claims and Judgments						
Capital Lease Obligations						
Compensable Leave	\$ 41,440.89	\$ 40,965.44	\$ 45,946.14	\$ 36,460.19	\$ 24,237.65	\$ 12,222.54

**Employees' Compensable Leave**

A state employee is entitled to be paid for all unused vacation time accrued, in the event of the employee's resignation, dismissal, or separation from state employment, provided the employee has continuous employment with the state for six months. Expenditures for accumulated annual leave balances are recognized in the period paid or taken in governmental fund types. For these fund types, the liability for unpaid benefits is recorded in the Statement of Net Assets. Both an expense and a liability for business-type activities are recorded in the proprietary funds as the benefits accrue to the employees. No liability is recorded for non-vesting accumulating rights to receive sick pay benefits. This obligation is usually paid from the same funding source(s) from which the employee's salary and wage compensation was paid.
