Management's Discussion and Analysis Unaudited

For the Year Ended August 31, 2019

INTRODUCTION

Stephen F. Austin State University (the University) is a comprehensive regional public institution of higher education and an agency of the State of Texas (State). Founded in 1923, the University is named for the "Father of Texas," Stephen Fuller Austin. It is located in the city of Nacogdoches, a part of the East Texas forested region. The main campus has more than 400 acres, including part of the original homestead of Thomas J. Rusk, early Texas patriot and United States Senator. In fall 2018, the University enrolled 13,144 students in 34 academic units and 6 colleges. The University offers baccalaureate, masters, and doctoral degrees.

The University is accredited by the Southern Association of Colleges and Schools Commission on Colleges. Specific academic programs hold numerous other accreditations.

The University does not include any blended components in the Financial Statements.

OVERVIEW OF THE FINANCIAL STATEMENTS AND FINANCIAL ANALYSIS

The objective of Management's Discussion and Analysis is to help readers of the University's Financial Statements better understand the financial position and operating activities for the fiscal year ended August 31, 2019, with selected comparative information for the year ended August 31, 2018. This discussion should be read in conjunction with the Transmittal Letter, Financial Statements, and Notes to the Financial Statements. Management has prepared the Financial Statements and Notes to the Financial Statements along with the discussion and analysis. Responsibility for the completeness and fairness of this information rests with the University administration.

Three primary statements are presented: Statement of Net Position; Statement of Revenues, Expenses, and Changes in Net Position; and Statement of Cash Flows. The Financial Statements are prepared in accordance with requirements established by the Texas Comptroller of Public Accounts.

FINANCIAL HIGHLIGHTS

- Enrollment for the fall 2018 semester was 13,144. This figure represents an increase of four percent from the enrollment of 12,614 recorded in fall 2017. Retention rates and persistence to graduation are two metrics by which the Texas Legislature evaluates State universities. The University reported an undergraduate retention rate of 70.5 percent for the fall 2018.
- The University's financial position at August 31, 2019, reflected total assets and deferred outflows of \$707 million and total liabilities and deferred inflows of \$627 million. Overall, the net position of the University decreased \$21.8 million. With the implementation of GASB Statement No. 75, the Employees Retirement System recorded an increase of \$21 million related to the Other Post-Employment Benefits (OPEB) to the University's pension expense. Also, a negative restatement of almost \$12.8 million was required to correct the University's 2018 financial statements due to a calculation error by the state.
- In 2018, the University began a five-year capital fundraising campaign to coincide with the University's 100-year anniversary in 2023.
- In the spring of 2019, the University began construction of a basketball training facility, a residence hall and dining facility and an addition and renovations to the fine arts buildings funded by a \$110 million bond issue sold at a premium that resulted in net bond proceed of \$115.5 million. The issue also provided for the construction of a one-stop shop and welcome center, however the Board of Regents decided to use existing buildings for that endeavor.

CONDENSED FINANCIAL INFORMATION AND FINANCIAL HIGHLIGHTS

Statement of Net Position

The Statement of Net Position provides a snapshot view of assets available for use in the University's continuing operations and enables readers to determine the amounts owed to others. Over time, increases or decreases in net position are indicators of the improvement or decline of the financial health of the University. The Statement of Net Position presents the assets, liabilities, deferred outflow and inflow of resources, and net position of the University at a specific point in time, in this case August 31, 2019. Net position represents the residual interest in the University's assets and deferred outflows of resources after deducting liabilities and deferred inflows of resources.

"Net Position" displays three major categories: Invested in Capital Assets, Net of Related Debt; Restricted Net Position; and Unrestricted Net Position. The Invested in Capital Assets, Net of Related Debt category identifies the equity in property, plant, and equipment owned by the University. Restricted Net Position is either expendable or non-expendable. Restricted Net Position - Expendable may be expended only for the purposes designated by the external donor or provider of the assets. Restricted Net Position - Non-expendable is comprised entirely of funds held as permanent endowments. Unrestricted Net Position is available for any lawful purpose of the University. Although Unrestricted Net Position assets are not subject to externally imposed stipulations, these assets may have other commitments for various future uses in support of the University's mission. These include commitments for encumbrances outstanding at year-end. Also recognized in Unrestricted Net Position are unspent Higher Education Funds (HEF) and other appropriations which have restrictions imposed by the State. Assets and liabilities are generally measured using current values, except capital assets, which are stated at historical cost less an allowance for depreciation.

A summarized comparison of the University's Statement of Net Position at August 31, 2019, and 2018 follows:

In fiscal year 2018, GASB Statement No. 75 became effective for all State agencies. GASB Statement No. 75 requires State agencies to report its proportionate share of the State's Other Post-Employment Benefits (OPEB) liability on the face of the Financial Statements. OPEB includes retiree health care insurance, life insurance and non-pension benefits. Restatement to the University's net assets for its proportionate share of the prior years' accumulated liability associated with OPEB was \$56,912,940.00. However, changes in current year actuarial assumptions increased this liability to \$125,819,972.00. An additional restatement of \$69,570.12 was needed to correct benefits appropriations. Also, the state Comptroller's division notified state agencies during the consolidation of annual reports for fiscal year 2018, of an error found resulting in another restatement of \$12,488,917.00 applicable to the university. Therefore, the fiscal year 2018 Statement of Revenues, Expenses and Change in Net Position amounts reported are restated to incorporate this change.

Statement of Revenues, Expenses, and Changes in Net Position

The change in total net position is calculated from the activity shown on the Statement of Revenues, Expenses, and Changes in Net Position. This statement presents operating revenues and expenses, non-operating revenues and expenses, and other revenues, expenses, gains (losses) and transfers.

Operating revenues are receipts for providing goods and services to the various constituencies of the University. Operating expenses include salaries, wages, and goods and services needed to carry out the mission of the University. Non-operating revenues and expenses include non-exchange transactions for which no goods or services were provided. This category includes State appropriations, Pell grants, gifts, investment income, and interest payments on long-term debt.

A summarized comparison of the University's Statement of Revenues, Expenses, and Changes in Net Position for the years ended August 31, 2019, and 2018 follows:

* Grants and Contracts includes both Operating and Non-Operating Grants and Contracts.

**Other Non-Operating Revenues includes Net Investment Income, Net Increase (Decrease) in Fair Value of Investments, and Net Other Non-Operating Revenues.

Some of the fiscal year 2019 highlights presented in the Statement of Revenues, Expenses, and Changes in Net Position are as follows:

- In January 2018, the Board of Regents approved the consolidation of four mandatory fees into one University Services Fee and increase it \$10 per semester credit hour to \$73 per semester credit hour. A \$1 per semester credit hour increase to the Student Services fee was also approved.
- The Board of Regents approved an increase of 2.0 percent in housing rates and a 1.9 percent increase in meal plan rates for the 2019 fiscal year. Occupancy for the fall term dropped a percentage point to 93.1 percent and the spring term held at 81.9 percent.
- The increase in grant revenues was attributed predominately to Texas Grants.
- With the additional funds related to the bond proceeds, the University realized an increase in investment revenue which accounted for the increase in Other Non-Operating Revenues.

The following is a graphic presentation of the major operating expense categories for the fiscal years ended August 31, 2019, and 2018:

*Other Operating Expenses includes Cost of Goods Sold, Professional Fees and Services, Travel, Repairs and Maintenance, Rentals and Leases, Printing and Reproduction, Federal Pass-Through Expenditures, and Other Operating Expenses.

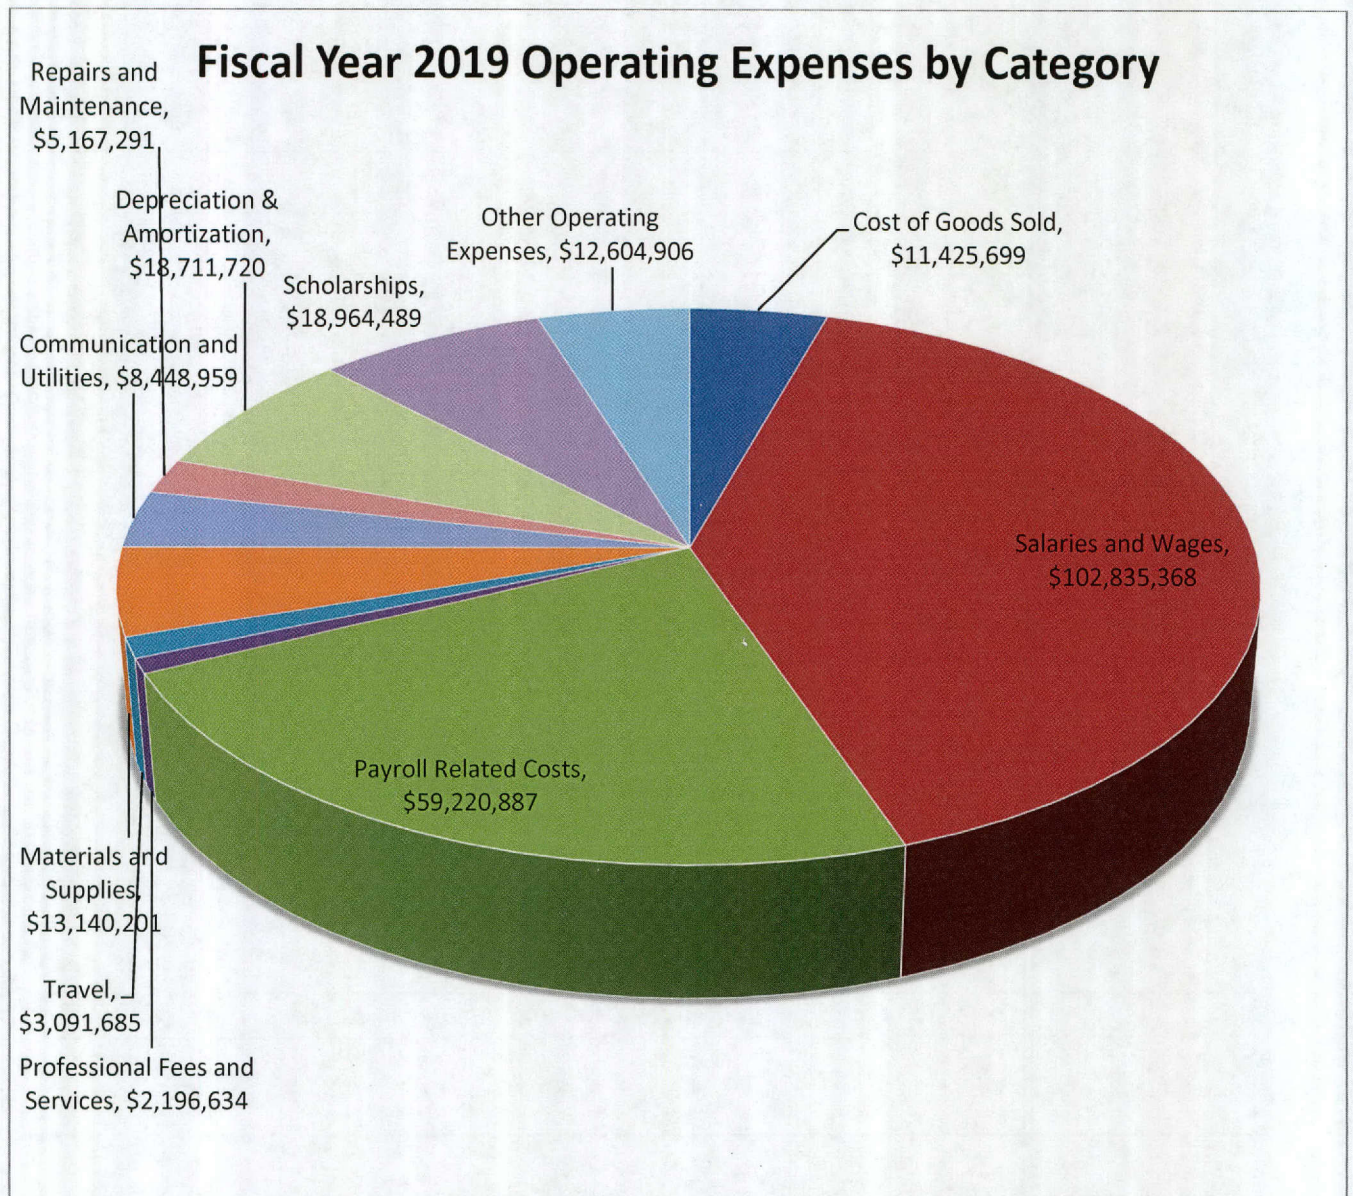

While state and federal loans to students were down ten percent, reported net scholarships increased by approximately \$506 thousand. The largest contributor to the decrease in State and federal student loans was the federal direct loan program. The gross amount of scholarships actually awarded to students from grants and outside organizations increased significantly by approximately \$2.7 million. Pell grants increased \$400 thousand and state grants were up over \$1 million as were institutional scholarships. This indicates that students received a greater amount of funding from sources that will not increase their student debt. A portion of scholarships has been reclassified as either tuition discounts or auxiliary discounts using the NACUBO discount formula. The discount calculation takes into account various types of aid to the student as shown below:

Gross Scholarships and Related Discounts Applied to Revenues			
	2019	2018	Net Change
State and federal student loans	\$ 71,995,892.30	\$ 79,272,360.44	\$ (7,276,468.14)

Some of the fiscal year 2019 significant changes from the prior year for all other operating expenses are:

- Included in the overall payroll costs is a \$4.9 million increase in salaries and wages and an increase of \$36.9 million in payroll related costs that includes an overall increase of \$20.5 million related to net pension expense adjustments pertaining to the GASB Statement No. 75 requirements. A restatement of \$12.4 to the 2018 expense accounted for the remainder of this variance.
- Depreciation expense increased \$2.2 million due to the completion of the STEM building.
- Materials and supplies decreased \$.86 million primarily due to the 2018 equipping of the new STEM building that opened in the summer of 2018.

**Other Operating Expenses includes Rentals and Leases, Federal Pass-Thru Expenditures and Printing and Reproduction costs.*

Statement of Cash Flows

The purpose of a Statement of Cash Flows is to provide relevant information about the University's cash receipts and payments during the fiscal year. The Statement of Cash Flows, when used with related disclosures and information in the other financial statements, provides relevant information about the University, such as:

- Its ability to generate future net cash flows.
- Its ability to meet obligations when due.
- Its needs for external financing.
- The reason for differences between operating income and associated cash receipts and payments.
- The effects on the University's financial position of its cash and its non-cash investing, capital and financing transactions.

The Statement of Cash Flows provides details about the University's major sources and uses of cash during the year. It presents detailed information about the cash activity and an indication of the University's liquidity and ability to meet cash obligations. There are four categories of cash flow activity:

1. Cash Flows from Operating Activities – cash flows from operating activities result from providing services and producing and delivering goods. They include all other transactions not defined as non-capital financing, capital and related financing, or investing activities.
2. Cash Flows from Non-Capital Financing Activities – cash flows from non-capital financing activities include borrowing money and repaying the principal and interest on amounts borrowed for purposes other than to acquire, construct, or improve capital assets.
3. Cash Flows from Capital and Related Financing Activities – cash flows from capital and related financing activities include acquiring and disposing of capital assets, borrowing money to acquire, construct, or improve capital assets and repaying the principal and interest amounts.
4. Cash Flows from Investing Activities – cash flows from investing activities include making and collecting loans (except program loans) and the acquisition and disposition of debt or equity instruments.

The Statement of Cash Flows reports net cash provided or used in each of the four categories of classifying cash transactions. It also reports the net effect of these flows on cash and cash equivalents during the fiscal year in a manner that reconciles beginning and ending cash and cash equivalents for the year.

The final section of the Statement of Cash Flows reconciles the Net Cash Provided (Used) by Operating Activities to the Operating Income (Loss) reflected on the Statement of Revenues, Expenses, and Changes in Net Position. When transactions are part cash and part non-cash, only the cash portion is reported within the Statement of Cash Flows. Non-cash items include information about investing, capital and financing activities that affect assets and liabilities but do not result in cash receipts or cash payments in the fiscal period. The non-cash portion is reported in the non-cash transaction section supplemental to the Statement of Cash Flows.

Net cash provided (used) by operating activities should be viewed together with net cash provided (used) by non-capital financing activities because State appropriations are significant sources of recurring revenue in support of operating expenses, but under GASB Statement No. 35 they must be classified as non-capital financing activities instead of operating activities. Additionally, federal financial aid revenues, including Pell grants, are classified as a non-operating activity since these are considered non-exchange activities, but the offsetting expenditures are recognized as operating expenses. Overall, the University experienced an increase of \$42.3 million in cash and cash equivalents due almost entirely to the sale of bonds for various building projects.

Cash used by operating activities decreased by approximately \$7.15 million due to the fluctuations of the OPEB and pension deferred outflows, deferred inflows and the net pension liability of each. These variances are non-cash adjustments that effect the related expenses of payroll benefits.

Net cash flows provided by non-capital financing activities in fiscal year 2019 decreased \$25 million from the prior year. Because of the requirements of GASB Statements No. 68 and 75, required adjustments caused by external factors, reflected a significant change to benefit appropriations.

Net cash provided for capital and related financing activities increased \$135 million due mainly to the sale of bonds for the construction of a basketball training facility, a new residence hall with a dining facility and an addition to and renovation of the fine arts buildings.

Net cash used from investing activities increased \$43 million due to the investment of the bond proceeds from the Series 2019 bond issues.

ECONOMIC OUTLOOK

In August 2019, the Board of Regents hired Dr. Scott Gordon as the ninth president of the University.

Total enrollment for fall 2019 decreased by two percent when compared to the previous fall. The University is considering various enrollment management initiatives regarding tuition and fee plans that involve flat rate tuition and longer payment plans to attract more students.

In October 2018, the Board of Regents authorized the issuance of financing revenue system bonds for no more than \$125 million for the planned construction or renovation of four buildings on campus. The bond issue will fund the first phase of a fine arts initiative; the addition of the second phase of a freshman residence hall and dining facility; and, the construction of a basketball training facility. Construction has begun on the basketball training facility.

The Board of Regents approved increases in the designated tuition variable and fixed rates. The board also approved a 6.5 percent increase for fiscal year 2020 and 2021 to raise funds for the debt service associated with the construction of a new residence hall and dining facility.

During the upcoming fiscal year, the University will close out the Perkins Loan program per instructions by the federal government. At the end of fiscal year 2019, the University held \$2.6 million in loan receivables, most of which will be transferred to the federal government.

In July 2019, the Board of Regents approved the capital plan of \$6,462,600.00 and an operating budget of \$274,499,292 for the 2019-20 fiscal year.

NOTE 1: Summary of Significant Accounting Policies

Entity

Stephen F. Austin State University (the University) is an agency of the State of Texas (the State). The University's financial records comply with State statutes and regulations including compliance with the Texas Comptroller of Public Accounts' *Reporting Requirements for Annual Financial Reports of State Agencies and Universities*.

The University serves the State as a public institution of higher education.

The University has four related entities. The University has determined no related entity is a reportable component unit of Stephen F. Austin State University.

Due to the statewide requirements embedded in Governmental Accounting Standards Board (GASB) Statement No. 34, *Basic Financial Statements — and Management's Discussion and Analysis — for State and Local Governments* and GASB Statement No. 35, *Basic Financial Statements — and Management's Discussion and Analysis — for Public Colleges and Universities*, the Comptroller of Public Accounts does not require the accompanying annual financial report to comply with all the requirements in these Statements. The financial report will be considered for audit by the State Auditor as part of the audit of the State of Texas *Comprehensive Annual Financial Report*; therefore, an audit opinion has not been expressed on the financial statements and related information contained in this report.

The University follows the "business-type activities" reporting requirement of GASB Statement No. 34 that specifies all the financial statements required for enterprise funds.

Blended Component Units

No component unit has been identified which should be reported as a blended unit.

Discretely Presented Component Units

No component unit has been identified which should be discretely presented.

Fund Structure

Basis of Accounting – Proprietary Fund Accounting

Proprietary fund reporting focuses on the determination of operating income, changes in net position, financial position, and cash flows. The financial statements of the University have been prepared on the full accrual basis of accounting. Accrual accounting attempts to record a transaction's financial effects in the period in which the transaction occurred, rather than when the funds were received or paid by the University. Revenues are recorded when they are earned or when the University has a right to receive the revenues. Expenses are recognized when incurred. The date related cash was received or paid is of no consequence.

Four essential elements of accrual accounting:

- Recognition of expenditures when incurred and the subsequent amortization of the deferred outflows
- Recognition of revenues when they are earned
- Capitalization of certain expenses and the subsequent depreciation of the capitalized costs
- Accruals of revenues earned and expenses incurred

Proprietary funds use the flow of economic resources measurement focus, which is similar to the focus used by commercial entities. Proprietary funds focus on whether the enterprise is economically better off as a result of the events and transactions that occurred during the fiscal period reported. Transactions and events that improved an enterprise's financial position are reported as revenues or gains. Transactions and events that diminished the economic position of the enterprise are reported as expenses or losses. Both current and long-term assets and liabilities are presented on the Statement of Net Position.

The Statement of Revenues, Expenses, and Changes in Net Position is segregated into operating and

non-operating sections.

Generally, operating activities are those that directly result from the provision of goods and services to customers or are directly related to the principal and usual activity of a fund. GASB Statement No. 34 indicates that a consideration for defining a proprietary fund's operating revenues and expenditures is how individual transactions would be classified for purposes of preparing a Statement of Cash Flows according to GASB Statement No. 9, *Reporting Cash Flows of Proprietary and Nonexpendable Trust Funds and Governmental Entities That Use Proprietary Fund Accounting*. Transactions for which cash flows are reported as capital and related financing activities, or investing activities normally would not be reported as components of operating income. This includes most revenues considered to be non-exchange transactions.

Since certain grants are actually contracts for services, they are classified as operating activities. State appropriations and certain grants, such as the Pell grants, are reported as non-operating activities even though they are directly related to the principal and usual activity of the University. These are considered non-exchange transactions and are therefore considered non-operating revenues.

Budget and Budgetary Accounting

The University prepares an annual budget which represents anticipated sources of revenue and authorized uses. This budget is approved by the University's Board of Regents. Unencumbered appropriations are generally subject to lapse 60 days after the end of the fiscal year for which they were appropriated. Budget information is not included in the Annual Financial Report.

Assets, Liabilities, and Net Position

The statement of net position reports the following elements of financial statements:

- Assets
- Deferred Outflow of Resources
- Liabilities
- Deferred Inflow of Resources
- Net Position

Assets

Assets are reported separately as either current or noncurrent in the Statement of Net Position.

Cash and Cash Equivalents

Short-term highly liquid investments with an original maturity of three months or less are considered cash equivalents.

Restricted Assets

Restricted assets include monies or other resources restricted by legal or contractual requirements. These assets include proceeds of proprietary fund general obligation and revenue bonds and revenues set aside for statutory or contractual requirements.

Inventories

Inventories include both merchandise inventories on hand for sale and consumable inventories. Inventories are valued using the average cost method. The consumption method of accounting is used to account for inventories and prepaid items. The cost of these items is expensed when the items are sold or consumed.

Prepaid Items

Prepaid items include prepaid expenses attributable to a subsequent fiscal year, including scholarships attributed to the 2019 fall semester. The cost of these items is expensed when the items are used or consumed.

Capital Assets

Equipment with an initial, individual cost of \$5,000 or more and an estimated useful life in excess of one year is capitalized. Other categories of capital assets have capitalization thresholds that are set by the State. These assets are capitalized and reported at cost or, if not purchased, at appraised fair value on the date of acquisition. Donated assets are reported at fair value on the acquisition date. Depreciation is reported on all "exhaustible" assets. "Inexhaustible" assets, such as works of art and historical treasures, are not depreciated. Assets are depreciated over the estimated useful life of the asset using the straight-line method of depreciation.

Other Receivables - Current and Noncurrent

Current receivables are specified in the Statement of Net Position. They include amounts that are reasonably expected to be received in fiscal year 2019. Noncurrent receivables are those receivables that are not expected to be collected within one year. Included in this category are student accounts receivable and loan receivables that are not expected to be received during fiscal year 2019. The disaggregation of other receivables as reported in the financial statements is shown in Note 24, "Disaggregation of Receivable and Payable Balances."

Liabilities

Liabilities are reported separately as either current or noncurrent in the Statement of Net Position.

Accounts Payable

Accounts Payable represents the liability for the value of assets or services received at the balance sheet date for which payment is pending.

Other Payables – Current and Noncurrent

The disaggregation of other payables as reported in the financial statements is shown in Note 24, "Disaggregation of Receivable and Payable Balances."

Employees' Compensable Leave

Employees' Compensable Leave represents the liability that becomes "due" upon the occurrence of relevant events such as resignations, retirements, and uses of leave balances by covered employees. Liabilities are reported separately as either current or noncurrent in the Statement of Net Position. These obligations are normally paid from the same funding source from which the covered employee's salary or wage compensation was paid.

Capital Lease Obligations

Capital Lease Obligations represent the liability for future lease payments under capital lease contracts. Liabilities are reported separately in the Statement of Net Position as either current, for the amounts due within one year, or noncurrent, for the amounts due thereafter.

Bonds Payable - Revenue Bonds

The principal of revenue bonds is reported separately in the Statement of Net Position as either current, for the amounts due within one year, or noncurrent, for the amounts due thereafter. Bonds payable are recorded at par value, net of unamortized premiums, discounts, issuance costs and gains/(losses) on bond refunding activities. Interest expense is reported on the accrual basis.

Bonds Payable - Tuition Revenue Bonds

The principal of tuition revenue bonds is reported separately in the Statement of Net Position as either current, for the amounts due within one year, or noncurrent, for the amounts due thereafter. Bonds payable are recorded at par value, net of unamortized premiums, discounts, issuance costs and gains/(losses) on bond refunding activities. Interest expense is reported on the accrual basis.

Bonds Payable - General Obligation Bonds

The principal of general obligation bonds is reported separately in the Statement of Net Position as either current, for the amounts due within one year, or noncurrent, for the amounts due thereafter. Bonds payable are recorded at par, net of unamortized premiums, discounts, issuance costs and gains/(losses) on bond refunding activities. Interest expense is reported on the accrual basis.

Deferred Outflows of Resources

Deferred Outflows of Resources represent the University's net asset consumption that is applicable to a future fiscal year.

Deferred Inflows of Resources

Deferred Inflows of Resources represent the University's net asset acquisition that is applicable to a future fiscal year.

Net Position

The difference between assets plus deferred outflows of resources and liabilities plus deferred inflows of resources is "Net Position" on the Statement of Net Position.

Invested in Capital Assets, Net of Related Debt

Net investment in capital assets, consists of capital assets, net of accumulated depreciation and reduced by outstanding balances for bonds, notes and other debt that are attributed to the acquisition, construction or improvement of those assets.

Restricted Net Position

Restricted net position results when constraints placed on net resources are either externally imposed by creditors, grantors, contributors and the like or imposed by law through constitutional provisions or enabling legislation.

Unrestricted Net Position

Unrestricted net position consists of net resources that do not meet the definition of the two preceding categories. Unrestricted net position often has constraints on resources that are imposed by management but can be removed or modified.

The amortized balance of accretion on capital appreciation bonds is included as part of unrestricted net position unless a sinking fund was established, in which case the balance is reported as part of the restricted net position balance.

Interfund Activities and Transactions

The University has the following types of transactions among State appropriated funds and other State agencies:

- **Transfers** – Legally required transfers that are reported when incurred as "Transfers In" by the recipient fund or State agency and as "Transfers Out" by the disbursing fund or State agency.
- **Reimbursements** – Reimbursements are repayments from funds responsible for expenditures or expenses to funds that made the actual payment. Reimbursements of expenditures made by one State agency for another are recorded as expenditures by the reimbursing State agency and as a reduction of expenditures by the reimbursed State agency. Reimbursements are not displayed in the financial statements.
- **Interfund Receivables and Payables** – Most receivables and payables from or to other State agencies are recorded as "Due from Other Agencies" or "Due to Other Agencies" on the Statement of Net Position. The amounts associated with the State Energy Conservation Office revolving loan program are recorded as "Interfund Payable" on the Statement of Net Position. Repayments associated with the loan program due during the current year are classified as "Current"; repayments due thereafter are classified as "Noncurrent."

The composition of the University's interfund activities and balances are presented in Note 12.

NOTE 3: Deposits, Investments and Repurchase Agreements

The University is authorized by statute to make investments following the "prudent person rule." There were no significant violations of legal provisions during the period.

Deposits of Cash in Bank

As of August 31, 2019, the carrying amount of deposits was \$70,453,426.16 as presented below:

CASH IN BANK – CARRYING AMOUNT	\$ 70,453,426.16

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, the University will not be able to recover deposits or will not be able to recover collateral securities that are in the possession of an outside party. The Stephen F. Austin State University Board Policy 3.21, *Investments*, states that all deposits shall be secured by a pledge of collateral with a market value equal to no less than 100 percent of the deposits plus accrued interest less any amount insured by the FDIC. Pledged collateral must conform to Chapter 2257 of the Government Code, Collateral for Public Funds.

At August 31, 2019, amounts insured by the FDIC were \$1,000,000.00. The bank balances at August 31, 2019 that were exposed to custodial credit risks were as follows:

Fund Type	Uninsured and uncollateralized	Uninsured and collateralized with securities held by the pledging financial institution	Uninsured and collateralized with securities held by the pledging financial institution's trust department or agent but not in the University's name

Foreign currency risk for investments is the risk that changes in exchange rates will adversely affect the investment. In order to mitigate this risk, Stephen F. Austin State University Board Policy 3.20, *Investments-Endowment Funds*, limits foreign equity investments to a maximum of 30% of the equity portfolio. The exposure to foreign currency risk as of August 31, 2019 was:

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization. To limit credit risk, Stephen F. Austin State University Board Policy 3.21, *Investments*, limits investments in corporate bonds, debentures or similar debt obligations to the two highest long-term rating categories.

As of August 31, 2019, the Standard & Poor's credit quality ratings of the University's investments by type of securities with credit risk exposure were as follows:

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Stephen F. Austin State University Board Policy 3.21, *Investments*, addresses interest rate risk by limiting variances in the average weighted duration of the portfolio, from industry benchmarks, to +/- 20%.

The University invests funds in The Texas A&M University System's (A&M System) investment pools. The A&M System entered into forward currency contracts for the purpose of hedging international currency risk on its non-U.S. dollar denominated investment securities. When entering into a forward currency contract, the A&M System agrees to receive or deliver a fixed quantity of foreign currency for an agreed-upon price on an agreed future date. These contracts are valued daily and the A&M System's net equity in the contracts, representing unrealized gain or loss on the contracts, as measured by the differences between the forward foreign exchange rates at the dates of entry into the contracts and the forward rates at the reporting date, is reported on the Statement of Net Position as either an investment derivative or an investment derivative liability.

These investments involve market and/or credit risk in excess of the amount recognized in the consolidated Statement of Net Position. Risks arise from the possibility that counterparties will be unable to meet the terms of their contracts and from movement in currency, securities values and interest rates. The table on the following page summarizes the pending foreign exchange contracts as of August 31, 2019.

The unrealized gains of the open foreign currency exchange contracts as of August 31, 2019 are shown as an investment derivative of \$4,188.33 and the unrealized losses are shown as a liability of \$52.33 on the Statement of Net Position. The foreign currency exchange contracts are traded over-the-counter and categorized as Level 2 in the fair value hierarchy.

The gross counterparty exposure for the A&M System, as of August 31, 2019, is presented in the table below. The A&M System's policy does not address master netting arrangements and the A&M System is not party to such an arrangement. The A&M System policy does not require collateral or other security for currency forward contracts.

\$ 105,054.61	\$ 100,918.62	\$ 4,188.33	\$ 52.33	

The A&M System has also invested in Treasury futures. To mitigate interest rate risk associated with Treasury futures, the instruments are used only for the purpose of managing interest rate risk in the fixed income portfolios. Futures contracts expose the A&M System to minimal counterparty risk since they are exchange traded and the exchange's clearinghouse, as counterparty to all exchange traded futures, guarantees the futures against default, therefore, they are not presented in the table above. Futures contracts are marked to market daily; meaning they are valued at the close of business each day and a gain or loss is recorded between the value of the contracts that day and on the previous day. The daily gain or loss difference is referred to as the daily variation margin, which is settled in cash with the broker each morning for the amount of the previous day's mark to market. The amount that is settled in cash with the broker each morning is the fair value of the futures contracts. Exchange traded futures contracts are categorized as Level 1 in the fair value hierarchy. The gains are shown as other receivables and the losses are shown as other liabilities in the Statement of Net Position as summarized in the table below.

Open Futures Contracts as of August 31, 2019

Concentration of credit risk is the risk of loss attributable to the magnitude of investment in a single issuer. As of August 31, 2019, the University's concentration of credit risk is immaterial to any single issuer.

Reverse Repurchase Agreements

The University, by statute, is authorized to enter into reverse repurchase agreements. A reverse repurchase agreement is a transaction in which a broker-dealer or financial institution transfers cash to the University and the University transfers securities to the broker-dealer and promises to repay the cash plus interest in exchange for the same or similar securities. Credit risk exposure for the University arises when a broker-dealer does not return the securities or their value at the conclusion of the reverse repurchase agreement. As of August 31, 2019, the University was not participating in reverse repurchase agreements.

Securities Lending

In securities lending transactions, the University would transfer its securities to broker-dealers and other entities for collateral – which may be cash or securities – and simultaneously agrees to return the collateral for cash or the same securities in the future. The University invests the cash received as collateral and, if the returns on those investments exceed the “rebate” paid to the borrowers of the securities, the securities lending transactions generate income for the University. The University did not participate in securities lending transactions during fiscal year 2019.

Claims and Judgments

The University had no unpaid settlements or judgments as of August 31, 2019.

Employees' Compensable Leave

Annual Leave

Full-time employees earn eight to twenty-one hours per month vacation leave (annual leave) depending on years of State employment. The State's policy is that employees may carry accrued vacation leave forward from one fiscal year to the next up to a maximum number of hours allowed based on their years of service. Employees with at least six months of State service who terminate employment are entitled to payment for all accumulated annual leave. The University accrues the dollar value of annual leave benefits which are payable upon retirement, termination, or death of its employees. The amounts of these liabilities are reported in the Statement of Net Position. The estimated liability, \$4,965,246.02 as of August 31, 2019, is based on outstanding balances reported in the leave reporting system multiplied by the employee's respective salary rate. The University made lump sum payments of \$607,292.24 for accrued leave to employees who separated from State service during the fiscal year ended August 31, 2019.

Sick Leave

Sick leave is earned at the rate of eight hours per month and is paid only when an employee is absent due to illness or to the estate of an employee in the event of his/her death. The maximum sick leave payment to an employee's estate is the lesser of one-half of the employee's accumulated entitlement or 336 hours. Sick leave accumulation from one fiscal year to the next is not limited. The University recognizes the cost of sick leave when paid. The liability is not shown in the financial statements since historical payouts of sick leave have been minimal.

Overtime and Compensatory Leave for FLSA Non-Exempt and Exempt Employees

Under the federal Fair Labor Standards Act and State laws, overtime can be accumulated in lieu of immediate payment as compensatory leave for non-exempt, non-emergency employees up to a maximum of 240 hours. For emergency personnel (e.g., University police officers), overtime can be accumulated up to a maximum of 480 hours. Overtime is calculated at a rate of 1.5 times an employee's normal rate of pay. Non-exempt employees may earn compensatory leave when they work additional hours but the number of hours worked in the work week does not exceed 40 hours. Compensatory time is calculated on an hour-for-hour basis. Unpaid overtime and compensatory time for non-exempt employees is included in the calculation of current and long-term liabilities because these employees are eligible to be paid for these accruals upon death or termination.

Compensatory leave is allowed for exempt employees who are not eligible for overtime pay. This leave is accumulated on an hour-for-hour basis and must be taken within one year from date earned or it lapses, up to a maximum of 80 hours in a fiscal year. There is no death or termination benefit for compensatory leave for exempt employees and it is non-transferable. For these reasons, no liability is reported in the financial statements for compensatory leave earned by exempt employees.

Direct Borrowings and Direct Placements

GASB Statement 88, *Certain Disclosures Related to Debt, including Direct Borrowings and Direct Placements*, requires the disclosure of direct borrowings and direct placements for reporting periods beginning after June 15, 2018.

Direct borrowings occur when the borrower goes directly to the lending source to avoid the high-interest rates associated with indirect lending, such as a public offering where the borrower has no relationship with the lender/investor. The University had no direct borrowings as of August 31, 2019.

Direct placements occur when the sale of an issue of debt securities is made to a single buyer or a limited number of buyers without a public offering. The University had direct placements related to business-type activities at August 31, 2019 totaling \$44,437,073.58. This amount is composed of \$34,445,000.00 of Bonds Payable, related to the Series 2015 Revenue Bonds, and Notes Payable of \$9,992,073.58.

There were no unused lines of credit associated with the direct placements. No assets were pledged as collateral in association with the direct placements. In the event of default, the Series 2015 Bonds shall bear an interest at a rate of 8%.

NOTE 7: Derivatives

The University invests funds in The Texas A&M University System's (A&M System) investment pools. The A&M System Investment Policy allows investment in certain derivative securities. A derivative security is a financial instrument which derives its value, in whole or part, from another security, currency, commodity or index. The A&M System uses investment derivatives to manage risk in its portfolios. Forward contracts are used to manage transaction or currency exchange risk in purchasing, selling or holding investments and Treasury futures are used to manage interest risk in fixed income portfolios.

The following disclosure summarizes the A&M System's derivative activity as reported in the financial statements.

Capital Leases

The University has entered into long-term leases for financing the purchase of certain capital assets. Such leases are classified as capital leases for accounting purposes and, therefore, are recorded at the present value of the future minimum lease payments at the inception of the lease. Following is a summary of original capitalized costs of all such property under lease as well as the accumulated depreciation as of August 31, 2019:

Assets Under Capital Leases Year Ended Aug. 31, 2019	Business-Type Activities
Furniture and Equipment	\$423,552.44
Less: Accumulated Depreciation	221,860.76
Total	\$201,691.68

Future minimum lease payments under these capital leases, together with the present value of the net minimum lease payments at fiscal year-end, are as follows:

Future Minimum Capital Lease Payments Year Ending August 31	Business-Type Activities		
	Principal	Interest	Total
2020	\$60,090.47	\$3,965.53	\$64,056.00

NOTE 9: Defined Benefit Pension Plans and Defined Contribution Plan

The State of Texas has joint contributory retirement plans for all of its benefits-eligible employees. One of the plans in which the University participates is administered by the Teacher Retirement System of Texas (TRS). The TRS defined benefit pension plan is established and administered in accordance with the Texas Constitution, Article XVI, Section 67 and Texas Government Code, Title 8, Subtitle C. The pension trust fund is a qualified pension trust under Section 401(a) of the Internal Revenue Code. The Texas Legislature establishes benefits and contribution rates within the guidelines of the Texas Constitution. The pension's Board of Trustees does not have the authority to establish or amend benefit terms. The contributory percentages of participant salaries currently provided by the State and by each participant are 6.8% and 7.7%, respectively, of annual compensation. Further information regarding actuarial assumptions and conclusions, together with audited financial statements, are included in TRS' annual financial report. Deferred outflows of resources and deferred inflows of resources related to the pension plan administered by TRS are disclosed in Note 28.

 Notes to the Financial Statements
 August 31, 2019

The State has also established an Optional Retirement Program (ORP) for institutions of higher education for certain administrative personnel and faculty. Participation in ORP is in lieu of participation in TRS, and the selection to participate in ORP must be made in the first 90 days of eligibility. The ORP allows participants to select from a variety of companies for the purchase of annuity contracts or to invest in mutual funds. The contributory percentages on salaries for participants entering the program prior to September 1, 1995, are 8.5% and 6.65% by the State and each participant, respectively. The State's contribution is comprised of 6.6% from the ORP appropriation and 1.9% from other funding sources. The 6.6% contribution is mandatory with the other 1.9% being at the discretion of the University's Board of Regents. The Board has approved the additional contributions for these employees. The contributory percentages on salaries for participants entering the program after August 31, 1995, are 6.6% and 6.65% by the State and each participant, respectively. Since these are individual annuity contracts or mutual fund investments, the University has no additional or unfunded liability for this program.

GASB Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers*, paragraph 27(d) requires universities that administer the ORP to disclose the amounts contributed by members and by the employer for that plan. Following are the ORP contributions made for the 2018 fiscal year:

Contributions	Year Ended Aug. 31, 2019
Member Contributions	\$ 1,980,544.55
Employer Contributions	2,092,828.69
Total	\$ 4,073,373.24

NOTE 10: Deferred Compensation

University employees may elect to defer a portion of their earnings for income tax and investment purposes pursuant to authority granted in the TEX. GOV'T. CODE ANN., Chapter 609. Two plans are available for employees: the 403(b) Tax Sheltered Annuity (TSA) plan and the TexaSaver 457(b) plan. The TSA is administered by Stephen F. Austin State University. The 457(b) plan is administered by the Employees Retirement System of Texas. The assets of these plans do not belong to the University or to the State, and thus they have no liability related to the plans.

NOTE 11: Postemployment Benefits Other Than Pensions – Not Applicable

NOTE 12: Interfund Activity and Transactions

The University experienced routine transfers with other State agencies that were consistent with the activities of the fund making the transfer. Repayment of amounts reported as Due To or Due From Other State Agencies will normally occur within one year from the date of the financial statement.

NOTE 14: Adjustments to Fund Balances and Net Position

During fiscal year 2019, certain accounting changes and adjustments were made that required the restatement of net position. Pursuant to the requirements of Governmental Accounting Standards Boards' (GASB) Statement 75, the beginning balance of the unrestricted net assets was adjusted to reflect the cumulative net effect of implementing this pronouncement for prior years. The primary objective of this Statement, according to GASB, is to improve accounting and financial reporting by state and local governments for postemployment benefits other than pensions. For 2019, State agencies were notified that a restatement to our fiscal year 2018 expense and deferred outflows was required due to an error that was discovered during the consolidation of the state's financial reporting.

NOTE 15: Contingencies and Commitments

Unpaid Claims and Lawsuits

As of August 31, 2019, certain lawsuits were pending against the University and/or its officers. The lawsuits, which may present contingent liabilities, are displayed below:

Claimant/ Plaintiff	Defendant Name	Type of Litigation	Damages Sought	Probability of Liability	Possible Loss
USOR Site PRP Group	SFASU	CERCLA	Past and future response costs	Reasonably Possible*	Unknown

Description of the Case

The plaintiff is suing pursuant to CERCLA for recovery of past and future response costs incurred for environmental clean-up and response activities undertaken in Pasadena, Texas.

Claimant/ Plaintiff	Defendant Name	Type of Litigation	Damages Sought	Probability of Liability	Possible Loss
Pamela Clasquin	SFASU	Disability Discrimination	Actual damages; back and front pay; mental/emotional distress; pre and post-judgment interest; reputation; attorney's fees; court costs	Reasonably Possible*	Unknown

Description of the Case

The plaintiff alleges the University took adverse personnel action against plaintiff in violation of the Texas Commission on Human Rights Act.

* Reasonably Possible indicates the event is more than remote, but less than likely.

* Probable indicates the event is likely to occur.

NOTE 16: Subsequent Events

After the sudden death in December 2018 of the university's eighth president, Baker Pattillo, Ph.D., a nation-wide search resulted in the Board of Regents hiring of Scott Gordon, Ph.D. as the university president.

NOTE 17: Risk Management

The University is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; injuries to employees; losses resulting from providing health and other medical benefits to employees; and natural disasters. It is the University's policy to periodically assess the proper combination of commercial insurance and retention of risk to cover losses to which it may be exposed. The methods the University uses to handle each of these risks are summarized below.

Injuries to Employees: Employees of the University are covered by a workers' compensation insurance policy provided by the State Office of Risk Management (SORM). An Interagency Contract with SORM is executed on

Stephen F. Austin State University-755
 UNAUDITED
 Notes to the Financial Statements
 August 31, 2019

behalf of the University for workers' compensation insurance every two years. SORM assesses the University an amount for the insurance coverage in accordance with 28 T.A.C. 251.507. The initial estimated assessment for fiscal year 2019 was \$297,804.42, to be paid in two installments. The first payment of \$223,353.32 was made in September. The assessment was adjusted during the year and the remaining payment of \$17,655.71 was made in May, bringing the actual assessment total to \$241,009.03.

Provision for Health and Other Medical Benefits: Employees of the University are eligible for health insurance and optional coverage(s) if they are employed at least 50% time. The coverage is provided through the State, under the Texas Employees Group Benefits Program (GBP), which was administered by HealthSelect. Eligible employees may select health, dental, vision, life, TexFlex, accidental death and dismemberment, dependent life, and long and short-term disability coverage. All risks associated with these benefits are passed to the GBP. The costs of health insurance coverage are jointly paid by the State and the University as follows: 100% for full-time employees and 50% for their dependents; 50% for part-time employees and 25% for their dependents. Employees hired on or after September 1, 2014, have a 60-day waiting period to participate in health insurance coverage. Contributions made by the State on behalf of the University for health and other medical benefits were \$7,029,778.00 for the year ended August 31, 2019.

Damage to Property: The University is required by certain bond covenants to carry fire and extended coverage and boiler/heavy equipment insurance on buildings financed through the issuance of bonds. The insurance protects the bondholders from a disruption to the revenue stream that is being utilized to make the bond interest and principal payments. In fiscal year 2019, there was a catastrophic fire in the Beef Farm Livestock Barn that resulted in a claim of \$610,907.00, which is the total reimbursement less the deductible of \$250,000.00. The claim has not been received.

The Texas Motor Vehicle Safety Responsibility Act requires that every non-governmental vehicle operated on a State highway be insured for minimum limits of liability in the amount of \$30,000 per injured person, up to a total of \$60,000 for everyone injured in an accident (bodily injury) and \$25,000 for property damage. However, through the SORM Auto Insurance Program the University has chosen to carry liability insurance on its licensed vehicles in the amount of \$250,000/\$500,000/\$100,000. This year the motorized utility vehicles were added to the auto coverage for liability only at \$130.00 per vehicle. The University also carries physical damage for vehicles ten years and newer. The annual premium was \$114,837.00 with a deductible paid of \$3,180.00.

Torts and Other Risks: The University is exposed to a variety of civil claims resulting from the performance of its duties. The University has purchased commercial insurance to address this risk.

Claims and Judgments: Changes in the balances of the University's claims liabilities for 2019 are noted in the table below:

		Beginning Balance	Increases	Decreases	Ending Balance
2019	Claims & Judgments	-	\$250,000.00	\$250,000.00	-

NOTE 18: Management's Discussion and Analysis (MD&A)

See *Management's Discussion and Analysis* at the beginning of this financial report.

NOTE 19: The Financial Reporting Entity

The University is an agency of the State of Texas. The ten members of its Board of Regents are appointed by the Governor, and include one non-voting student Regent. The University has no component units or joint ventures.

NOTE 20: Stewardship, Compliance and Accountability

Note 1, *Summary of Significant Accounting Policies*, discusses the generally accepted accounting principles upon which the financial statements are based and addresses any changes in accounting principles. The University had no

material violations of finance-related legal or contractual provisions. Per the laws of the State of Texas, the University cannot spend amounts in excess of appropriations granted by the Texas Legislature. There are no deficits reported in Net Position.

NOTE 21: Not Applicable

NOTE 22: Donor Restricted Endowments

The University endowments are invested to maximize returns yet preserve principal. The long-term objective of maintaining the purchasing power of the endowments coupled with the goal of providing a reasonable, predictable, stable and sustainable level of income to support current needs guide the management of these funds. Distributions from the earnings and cumulative net appreciation are made annually to fund scholarships, professorships, and for other uses as stipulated by the donors. The Vice President for Finance and Administration reviews the total return on endowment accounts and recommends an annual distribution. The distribution to spending accounts was 3.31% for 2019.

The following tables presents the amount of net appreciation for donor restricted true endowments for fiscal year 2019 and the changes from the prior year amounts for expendable and non-expendable balances.

Donor Restricted Endowments	Amounts of Cumulative Net Appreciation	Reported in Net Position

Beginning with fiscal year 2015, the University reported deferred outflows of resources and deferred inflows of resources in connection with GASB Statement No. 68 requirements related to pension reporting. The requirements include that affected State agencies disclose the proportional share of the net pension liability, pension expense, deferred outflows and inflows related to pensions if those amounts are not identifiable in the financial statements. This year, State agencies were notified that a restatement to their respective fiscal year 2018 OPEB expense and deferred outflows was required due to an error that was discovered during the consolidation of the State's financial reporting.
