February 28, 2020

To the Citizens of Texas, Governor Abbott and Members of the 86th Texas Legislature:

The state of Texas Comprehensive Annual Financial Report (CAFR) for the fiscal year ended Aug. 31, 2019, is submitted herewith. Responsibility for both the accuracy of the data presented, as well as the completeness and fairness of the presentation, rests with the office of the Texas Comptroller of Public Accounts. To the best of my knowledge, the information presented is accurate in all material respects, and all disclosures necessary for a reasonable understanding of the state's financial activities are included.

The reporting approach established by the Governmental Accounting Standards Board (GASB) was utilized. The state also voluntarily follows the recommendations of the Government Finance Officers Association (GFOA) of the United States and Canada for the contents of government financial reports and participates in the GFOA's review program for the Certificate of Achievement for Excellence in Financial Reporting. The State Auditor's Office performed an audit, in accordance with generally accepted auditing standards, of the state's general-purpose financial statements. Their opinion is presented in this report preceding the financial statements.

The State Auditor's Office contracted with Clifton-LarsonAllen (CLA) to perform portions of the federal audit procedures necessary to meet the requirements of Title 2, U.S. Code of Federal Regulations, Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance).

The federal portion of the Statewide Single Audit Report for the fiscal year ended Aug. 31, 2019, with the opinion expressed by CLA, will be issued separately.

Profile of the Government

This report includes financial statements for the state of Texas reporting entity. Criteria for determining the reporting entity and presentation of the related financial data are established by GASB. The criteria include legal standing and financial accountability. Other organizations that would cause the financial statements to be misleading or incomplete if they were excluded are also included in the reporting entity. Note 1 of the notes to the financial statements provides detail on the financial reporting entity. Note 19 provides a brief summary of the nature of significant component units and their relationship to the state of Texas.

All activities generally considered part of the state of Texas are included in this report. These activities provide a range of services in the areas of education, health and human services, public safety and corrections, transportation, natural resources and recreation, regulation, general government, employee benefits and teacher retirement state contributions.

The management's discussion and analysis (MD&A) in the financial section provides an overview of the state's financial activities, addressing both governmental and business-type activities reported in the government-wide financial statements.

Accounting System and Budgetary Controls

The state's internal accounting controls provide reasonable assurance regarding the safeguarding of assets against loss from unauthorized use or disposal and the reliability of financial records for preparing financial statements. The concept of reasonable assurance recognizes that the cost of a control should not exceed the resulting benefit.

Budgetary control is exercised through expenditure budgets for each agency. These budgets are entered into the statewide accounting system after the General Appropriations Act (GAA) becomes law. All governmental funds are appropriated for a biennium, except for appropriations related to construction, which are appropriated for five years. The GAA becomes law after passage by the Legislature, certification by my office that the amounts appropriated are within the estimated collections and the signing of the bill by the governor. Controls are maintained first at the agency level, with additional control at the fund and appropriation level to ensure expenditures do not exceed authorized limits. Further detail on budgetary accounting for the state, other than the MD&A section, is found in the required supplementary information.

Financial Policies

Fiscal soundness is an unwavering principle that guides the financial policies of the state. The Texas Constitution supports responsible governance by mandating several limitations on the budgeting process. In addition to the certification process requiring passage of a balanced budget in Article III, Section 49a, budget growth and indebtedness are also limited. According to Article VIII, Section 22, appropriations from state tax revenue not dedicated by the Texas Constitution cannot grow faster than state economic growth estimated by the Legislative Budget Board. Payments required for debt cannot exceed 5 percent of the previous three-year average of nondedicated general revenue as provided in Article III, Section 49j.

The economic stabilization fund (ESF), commonly called the "rainy day fund," authorized in 1988 by the Texas Constitution, Article III, Section 49g, is yet another example of prudent governance. The Comptroller may transfer ESF amounts to the general revenue fund to prevent or eliminate temporary cash deficiencies. Any amounts transferred to general revenue shall be returned to the ESF with interest as soon as practicable, but no later than Aug. 31 of each odd-numbered year. Generally, the Legislature may appropriate within the statutory guidelines, by a three-fifths vote of the members present in each house, amounts in the ESF that do not exceed the amount of any unanticipated deficit in a current biennium or anticipated revenue decline during the next biennium. The Legislature may also appropriate any amount from the ESF for any purpose only if approved by at least two-thirds of the members present in each house. The ESF shall receive a transfer, not later than the 90th day of each biennium, from the general revenue fund for one-half of any unencumbered positive balance remaining in the general revenue fund on the last day of the preceding biennium. The ESF also receives transfers, not later than the 90th day of each fiscal

year, from the general revenue fund for at least 50 percent of the 75 percent of the prior fiscal year oil or natural gas production net collections that exceeded the amount of collections in fiscal 1987. The transfer amount of each production tax is calculated separately and must be in excess of the 1987 threshold. The remaining amount is transferred to the state highway fund as directed by the Texas Constitution, Article III, Section 49-g (c-1) and (c-2).

Until the 2019 session, state law required the Comptroller's office to keep much of revenue in the ESF in relatively low-yield investments that barely kept pace with inflation. SB 69 will allow the agency to move up to 75 percent of the ESF into prudent but higher-yield investments that would maintain the fund's purchasing power.

The balance in the fund on Aug. 31, 2019, was \$11.7 billion. The ESF is also discussed in Note 13.

Economic Outlook

Texas has advantages such as relatively low living costs, an attractive business climate, a central Sunbelt location and a balanced mix of industries that have enabled its economy to grow faster than the nation for many years. These advantages remain and should allow the state's economy to continue to grow over the next biennium and beyond. Texas real Gross State Product (GSP) grew at an estimated rate of 3.6 percent in 2019, after growth of 1.3 and 3.5 percent in 2017 and 2018, respectively. Real GSP is expected to grow by a further 2.7 percent in 2020.

After increasing by 5.1 percent in 2018, Texas personal income is estimated to have again grown by 5.1 percent in 2019 and is projected to grow by a further 5 percent in 2020. Underlying this income growth is growth in the Texas population. Recent estimates by the U.S. Census Bureau show that seven of the nation's 15 most rapidly growing large incorporated cities are in Texas. Texas' population is estimated to have grown by

1.5 percent in 2019 and is projected to grow by a further 1.5 percent in 2020 to reach 29.7 million.

As of November 2019, the Texas unemployment rate was 3.4 percent, down from 3.7 percent in November 2018. Over that period, the U.S. unemployment rate fell from 3.7 percent to 3.5 percent. The Texas unemployment rate is expected to average 3.3 percent in 2020, while the U.S. rate is expected to average 3.5 percent. Total Texas nonfarm employment grew by an estimated 2.3 percent in 2019 and is expected to grow by 1.8 percent in 2020.

Texas Industry Performance

Employment in goods-producing industries increased by 4.1 percent over the past 12 months, while employment in service-producing industries grew by 2.4 percent. All three of the goods-producing industries (mining and logging, manufacturing, and construction) increased employment. Employment was also led by a 56,000 increase in construction, which had the highest rate of growth (7.5 percent) among all industries.

Employment growth in the service-providing industries was led by education and health services (up 65,200) and leisure and hospitality (up 50,700). Among the service-providing industries, other services (4.7 percent), financial activities (3.8 percent) and education and health services (3.8 percent) had the largest percentage increases in employment. The information industry was the only industry to experience an employment decline (1.5 percent) over the year.

Manufacturing

According to the U.S. Census Bureau, the value of Texas exports in 2016 was \$233 billion, a decrease of 7.4 percent from 2015. Year-over-year Texas exports increased for the first time in two years in November 2016 and have increased in every month since. As of October 2019, the value of Texas exports was \$326.8 billion, 6.0 percent higher than the corresponding total

of October 2018. Texas exports comprised 19 percent of total U.S. exports in 2018, and that percentage is likely to increase in 2019.

Construction

Total housing construction activity was up over the year. Total single-family building permits issued in the year ending October 2019, were down slightly by 0.4 percent compared to the prior year period. Building permits for multi-family units rose by 28.5 percent.

According to Multiple Listing Service data from the Texas A&M Real Estate Center, the median sales price for an existing Texas single-family home rose 4.8 percent over the last year, from \$229,000 in October 2018 to \$240,000 in October 2019. The inventory of existing homes for sale in October 2019 was 3.7 months, unchanged from a year ago, but a substantial improvement from the post-recession high of 8.5 months in mid-2011.

Mining and Logging

Texas oil production peaked more than 40 years ago in 1972, when calendar year production reached 1.3 billion barrels. Production volumes reached a low of 343 million barrels in calendar 2007. From that low point, oil production has increased steadily, in large part due to the development and widespread use of enhanced fracturing techniques. Calendar 2019 production is expected to have increased by more than 10 percent from 2018 levels, to reach a new record of 1.6 billion barrels. Production is expected to increase further in 2020, notwithstanding current infrastructure bottlenecks and price volatility.

Major Legislative Initiatives

House Bill (HB) 1, the 2019 GAA, appropriated \$118.3 billion in general revenue and \$248.3 billion in all funds for the 2020-21 budget. The GAA also incorporates other legislation and resolutions enacted by the

86th Legislature which affect appropriations, such as HB 3317 and Senate Bill (SB) 500.

Education and Health and Human Services remain as the largest two areas of the budget, appropriated \$95.9 billion and \$84.3 billion, respectively. The Texas Department of Emergency Management was moved in legislation from the Texas Department of Public Safety and created as a service agency of the Texas A&M University System. Funding for the agency is now included in Article III - Education in the GAA.

Under SB 500, lawmakers also allocated \$9.9 billion in supplemental funding for fiscal 2019 and the 2020-21 biennium, in part to pay for certain needs including foster care, Medicaid expenses and Hurricane Harvey-related items. To shore up this supplemental budget, legislators dipped into the state's ESF, the "rainy day fund," for \$6.2 billion - the largest such draw in the fund's history.

The 2019 session of the Texas Legislature also enacted a variety of new laws affecting state revenues and finances. Legislation in the following areas is expected to have significant revenue implications.

School Finance

The major public school finance bill, HB 3, consumed much of the 140-day session. Lawmakers agreed to use state funds to "buy down" \$5 billion in school district property taxes. In general, HB 3 seeks to push the maintenance and operations (M&O) tax rate for school districts down by an average of 8 cents per \$100 of property valuation in 2020 and 13 cents in 2021. Furthermore, beginning in 2021, school districts that see growth in their property values above the statewide average will be required to use revenue derived from any growth above 2.5 percent to further reduce their tax rates.

In all, HB 3 increased biennial funding by \$11.5 billion over the amount that would have been provided under previous law, including \$6.5 billion in new fund-

ing for schools as well as \$5 billion for property tax relief. Salary increases for teachers and other staff will vary based on a new statewide formula, years of teaching experience and the extra local money available in each district.

In addition, school districts now are required to devote 30 percent of any gains in their basic allotment of state funds per student to compensation for teachers, counselors, librarians and nurses. This compensation can include benefits such as insurance premiums. These changes took effect at the start of the 2019-20 school year.

HB 3 also increased the basic per-student allotment from \$5,140 to \$6,160 and increased "weights" for additional funding that consider specific student characteristics such as economic disadvantage and the need for special education services.

HB 3 also includes funding for full-day pre-kindergarten for eligible children; new incentives for college, career and military readiness; more financial support for special education; financial incentives of \$3,000 to \$32,000 annually to local education agencies for high-performing teachers who teach in rural and/or low-income districts; and a reduction in "recapture" funding by \$3.5 billion compared to what it would have been under previous law.

Local Property Taxes

Many other local government entities besides school districts levy property taxes, including municipalities, counties and special-purpose districts that provide a wide variety of public services. SB 2, the most significant property tax bill, addressed taxes levied by these entities.

Since the 1980s, these taxing authorities have been able to increase their M&O taxes up to 8 percent annually without triggering a provision allowing voters to petition for an election. After SB 2's passage, beginning in 2020 many of them cannot increase their M&O rev-

enue by more than 3.5 percent in a single year without triggering an automatic election.

The new legislation includes some exceptions, however. Most taxing units subject to the 3.5 percent voterapproval tax rate, as well as municipalities with fewer than 30,000 people, can raise an additional \$500,000 annually in M&O revenue without triggering an election, despite the threshold. In addition, junior college districts, hospital districts, certain water districts and taxing units with low proposed M&O tax rates (2.5 cents or less per \$100) are not subject to the 3.5 percent voter-approval rate and can continue increasing their M&O revenue by up to 8 percent annually.

Furthermore, the new legislation allows taxing units to "bank" unused annual tax increases for the three previous years.

Limiting many jurisdictions' ability to raise M&O revenue without voter approval may reduce future increases in property tax bills.

Teacher Benefits

Lawmakers also took steps in the supplemental budget (SB 500) to shore up the Teacher Retirement System (TRS) pension fund.

The state's Pension Review Board considers a pension actuarially sound if it can eliminate its unfunded liability in 30 years or less with current contribution rates. The time needed to do so is called the amortization period; at the beginning of the 2019 session, TRS' was at 32.2 years. To reduce the amortization period, legislators tapped \$524 million from the ESF.

With the passage of the TRS pension reform bill (SB 12), the state's contribution to TRS will rise from a rate of 6.8 percent of payroll to 8.25 percent annually from 2019 to 2024. In the same period, active employees' shares will increase from 7.7 percent of salary to 8.25 percent and district contributions will rise from 1.5 to 2 percent. Current TRS retirees also will receive a one-time extra annuity check, or "13th check," also

funded from the ESF. This will be either for the amount of their monthly annuity payment or \$2,000, whichever is less, at a cost to the state of \$589 million.

The Legislature also made appropriations to TRS-Care, the retiree health care plan, that will stave off a premium increase for plan members in 2020.

Wayfair Decision

Last year's decision by the U.S. Supreme Court in South Dakota v. Wayfair overruled prior decisions that a state could impose sales and use tax collection responsibilities only on sellers with a physical presence in that state.

While Texas has a single state sales tax rate, local sales tax rates vary from zero to 2 percent, which could complicate tax remittance and collection responsibilities for out-of-state sellers. With the passage of HB 2153, the Comptroller's office can set an optional local sales and use tax rate that remote sellers can choose to collect rather than the local sales tax rate where the purchase is delivered.

Another new law, HB 1525, requires online "marketplaces" such as Etsy, Amazon and eBay to collect sales and use taxes on sales made by all third-party sellers who sell to Texans through their sites.

Our agency estimates the new laws and rules adopted to implement Wayfair will add \$500 million to state coffers annually.

Awards and Acknowledgments

Certificate of Achievement

The GFOA of the United States and Canada awarded a Certificate of Achievement for Excellence in Financial Reporting to the state of Texas for its CAFR for the fiscal year ended Aug. 31, 2018. The Certificate of Achievement is a prestigious national award that recog-

nizes conformance with the highest standards for preparation of state and local government financial reports.

In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized CAFR whose contents conform to program standards. Such reports must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. The state of Texas has received a Certificate of Achievement for the last 29 years (fiscal years ended August 1990 through 2018). We believe our current report continues to conform to the Certificate of Achievement Program requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

I will continue to maintain a highly qualified and professional staff to make this certification possible.

Acknowledgments

The preparation of this report requires the collective efforts of hundreds of financial personnel throughout state government, including the dedicated management and staff of the Comptroller's Financial Reporting section and Fiscal Management Division; the chief financial officers, chief accountants and staff at each agency; and the management and staff of the State Auditor's Office. I sincerely appreciate the dedicated efforts of all these individuals who continue to strive for improvements that will make Texas a national leader in quality financial reporting.

Sincerely,

Glenn Hegar

Executive Director/CEO

Independent Auditor's Report

The Honorable Greg Abbott, Governor
The Honorable Glenn Hegar, Comptroller of Public Accounts
The Honorable Dan Patrick, Lieutenant Governor
The Honorable Dennis Bonnen, Speaker of the House of Representatives and
Members of the Legislature, State of Texas

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate discretely presented component units and remaining fund information of the State of Texas, as of and for the year ended August 31, 2019, and the related notes to the financial statements, which collectively comprise the State's basic financial statements as listed in the table of contents.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these consolidated financial statements based on our audits. We did not audit the financial statements of the following entities:

- The Texas Department of Transportation, a component of the State of Texas, which is included in the governmental and proprietary funds. The Texas Department of Transportation constitutes 99.99 percent of the expenditures for the State Highway Fund, a major governmental fund. The Texas Department of Transportation also constitutes 58.9 percent of the assets of governmental activities.
- The University of Texas System, a component of the State of Texas, which constitutes 71.2
 percent of the assets of Colleges and Universities, a major enterprise fund. The University
 of Texas System also constitutes 55.6 percent of the assets of the business-type activities.
- The Texas Lottery Commission, a component of the State of Texas, whose Lottery Fund is a major enterprise fund that constitutes 19.4 percent of the operating revenues of the business-type activities.

Robert E. Johnson Building 1501 N. Congress Avenue Austin, Texas 78701

P.O. Box 12067 Austin, Texas 78711-2067

> Phone: (512) 936-9500

Fax: (512) 936-9400

Internet: www.sao.texas.gov SAO Report No. 20-318

The statements listed above were audited by other auditors whose reports thereon have been furnished to us, and our opinion, insofar as it relates to the amounts included for these entities, is based solely on the reports of the other auditors. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, based on our audit and the reports of other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate discretely presented component units and remaining fund information of the State of Texas, as of August 31, 2019, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Emphasis of Matter

Economic Stabilization Fund

As discussed in Note 13, the Economic Stabilization Fund balance was \$11.7 billion as reported in the governmental fund financial statements as unassigned fund balance as of August 31, 2019. That amount consisted primarily of \$6.8 billion in cash in the State Treasury, \$3.2 billion in current and non-current investments, and \$1.7 billion due from the General Revenue Fund. The \$1.7 billion due from the General Revenue Fund was transferred to the Economic Stabilization Fund in November 2019.

Investments with Values that Are Not Readily Determined

As discussed in Note 3 on page 88, the financial statements include certain investments valued at approximately \$132.7 billion as of August 31, 2019, whose fair values have been estimated by management in the absence of readily determinable fair values.

Our opinions are not modified with respect to these matters.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the budgetary comparison schedule, the schedules of pension liability, and the schedules of OPEB liability, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the consolidated financial statements that collectively comprise the State's basic financial statements. The combining financial statements and schedules, introductory section, and statistical section, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining financial statements and schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, based on our audit,

the procedures performed as described above, and the reports of the other auditors, the Other Supplementary Information Combining Financial Statements and Schedules, as listed in the table of contents, are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory section and the statistical section have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

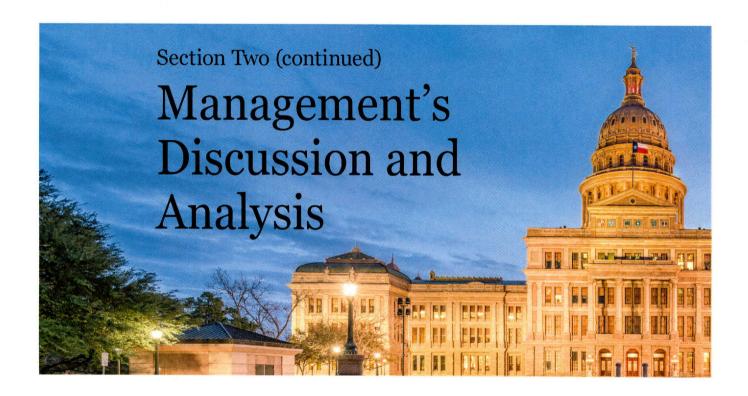

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we will issue a separate report on our consideration of the State's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State's internal control over financial reporting and compliance.

Lisa R. Collier, CPA, CFE, CIDA First Assistant State Auditor

Management's Discussion and Analysis

The following is a discussion and analysis of the state of Texas' financial performance for the fiscal year ended Aug. 31, 2019. Use this section in conjunction with the state's basic financial statements. Comparative data is presented for this 2019 report.

Highlights

Government-wide

Net Position

The assets and deferred outflows of resources of the state of Texas exceeded its liabilities and deferred inflows of resources by \$115.1 billion as of Aug. 31, 2019, an increase of \$15.5 billion or positive 15.6 percent from fiscal 2018. The majority of the increase is primarily due to an increase of \$8.6 billion in restricted net position. The net position is comprised of \$94.2 billion in net investment in capital assets, \$116.6 billion in restricted and negative \$95.8 billion in unrestricted.

Fund Level

Governmental Funds

As of Aug. 31,2019, the state's governmental funds reported a combined ending fund balance of \$79.9 billion, an increase of \$7.7 billion or 10.7 percent from fiscal 2018, primarily due to an increase in tax revenues investments. The state reported a positive unassigned fund balance of \$9 billion in fiscal 2019.

Proprietary Funds

The proprietary funds reported a net position of \$68.9 billion as of Aug. 31, 2019, an increase of \$2.3 billion or 3.5 percent from fiscal 2018, primarily due to an increase in pledged hospital revenue.

Long-Term Debt

The state's total bonds outstanding increased by \$2.5 billion or 4.5 percent during fiscal 2019. This amount represents the net difference between net issuances, payments and refunding of outstanding bond debt. During fiscal 2019, the state issued bonds totaling \$5.9 billion. Detailed information regarding the government-wide, fund level and long-term debt activities is stated in the debt administration section of this management's discussion and analysis (MD&A).

Overview of the Financial Statements

The focus of this report is on reporting for the state as a whole and on the major individual funds. This report presents a comprehensive view of the state's financial activities and makes it easier to compare the performance of Texas state government to that of other governments.

The Financial Section of this report presents the state's financial position and activities in four parts:

- MD&A (this part)
- The basic financial statements
- Required supplementary information other than MD&A
- Other supplementary information presenting combining statements and schedules

The report also includes statistical and economic data.

The basic financial statements include governmentwide financial statements, fund financial statements and notes to financial statements, which provide more detailed information to supplement the basic financial statements.

Reporting on the State as a Whole

The government-wide financial statements are designed to present an overall picture of the financial position of the state. These statements consist of the

statement of net position and the statement of activities, which are prepared using the economic resources measurement focus and the accrual basis of accounting. This means that all the current year's revenues and expenses are included, regardless of when cash is received or paid, producing a view of financial position similar to that presented by most private sector companies.

The statement of net position combines and consolidates the government's current financial resources with capital assets and long-term obligations. This statement includes all of the government's assets, deferred outflows of resources, liabilities and deferred inflows of resources.

Net position represents one measure of the state's financial health.

Other indicators of the state's financial health include the condition of its roads and highways (infrastructure) and economic trends affecting the state's future tax revenues.

The statement of activities focuses on both the gross and net cost of various activities (governmental, business-type and component units). These costs are paid by the state's general tax and other revenues. This statement summarizes the cost of providing (or the subsidy provided by) specific government services and includes all current year revenues and expenses.

The government-wide statement of net position and the statement of activities divide the state's activities into the following three types.

Governmental Activities

The state's basic services are reported here, including general government, education, employee benefits, teacher retirement state contributions, health and human services, public safety and corrections, transportation, natural resources and recreation, and regulatory services. Taxes, fees and federal grants finance most of these activities.

Business-Type Activities

Activities for which the state charges a fee to customers in order to pay for most or all of the costs of certain services it provides are reported as business-type activities. The state's institutions of higher education are included as business-type activities.

Component Units

Component units are legally separate organizations for which the state is either financially accountable or the nature and significance of their relationship with the state is such that exclusion would cause the state's financial statements to be misleading or incomplete. The state has 23 discretely presented component units. Financial information for these entities is presented separately in the supplemental statements and notes.

Reporting on the State's Most Significant Funds

Fund financial statements provide additional detail about the state's financial position and activities. Some information presented in the fund financial statements differs from the government-wide financial statements due to the perspective and basis of accounting used. Funds are presented on the fund-level statements as major or nonmajor based on criteria set by the Governmental Accounting Standards Board (GASB).

A fund is a separate accounting entity with a selfbalancing set of accounts. The state uses funds to keep track of sources of funding and spending related to specific activities.

Governmental Funds

A majority of the state's activity is reported in governmental funds. Reporting of these funds focuses on the flow of money into and out of the funds and the amounts remaining at fiscal year-end for future spending.

Governmental funds are accounted for using the modified accrual basis of accounting, which measures cash and other assets that can be readily converted to cash. The governmental fund financial statements provide a detailed short-term view of the state's general governmental operations and the basic services it provides. This information helps determine the level of resources available for the state's programs. The reconciliations following the fund financial statements explain the differences between the governmental activities column reported on the government-wide statement of net position and the government-wide statement of activities and the governmental funds reported on the fund financial statements. The general fund, state highway fund and permanent school fund are reported as major governmental funds.

Proprietary Funds

When the state charges customers for services it provides, these activities are generally reported in proprietary funds. Services provided to outside (non-governmental) customers are reported in enterprise funds, a component of proprietary funds, and are accounted for using the economic resources measurement focus and the accrual basis of accounting. These are the same

business-type activities reported in the government-wide financial statements, but are reported here to provide information at the fund level.

The employees life, accident and health insurance benefits fund is reported as an internal service fund and provides services on a cost reimbursement basis to other agencies of the financial reporting entity.

Colleges and universities, the unemployment trust fund and the lottery fund are reported as major proprietary funds.

Reporting on the State's Fiduciary Responsibilities

The state is the trustee or fiduciary for ten defined benefit plans and one defined contribution plan. It is also responsible for other assets that can only be used for trust beneficiaries. All state fiduciary activities are reported in separate statements of fiduciary net position and changes in fiduciary net position. These activities are reported separately from other financial activities because the state cannot use the assets to finance its operations. The state's fiduciary responsibilities include ensuring that assets reported in these funds are used for their intended purposes.

Financial Analysis of the State as a Whole

Net Position

Net position was \$115.1 billion in fiscal 2019, an increase of \$15.5 billion or positive 15.6 percent. Several factors affected net position. Cash and cash equivalents increased by \$5.6 billion in governmental activities and by \$1.1 billion in business-type activities from fiscal 2018. The state's bonded indebtedness was \$56.7 billion, which included new issuances of \$5.9 billion in state bonds to finance new construction, housing, water conservation and other projects. Approximately \$3.6 billion in bonded debt was retired or refunded. Total assets of the state was \$353 billion, an increase of \$18.9 billion or 5.7 percent from fiscal 2018. Total liabilities for the state was \$222.6 billion, an increase of \$14.5 billion or 7 percent from fiscal 2018. Of the state's net position, \$94.2 billion was net investment in capital

assets, while \$116.6 billion was restricted by the constitution or other legal requirements and was not available to finance day to day operations of the state. Unrestricted net position was negative \$95.8 billion. The majority of the net position increase is primarily due to an increase of \$6.5 billion in restricted net position.

Changes in Net Position

The state's net position for fiscal 2019 increased by \$15.5 billion. The state earned program revenues of \$101.7 billion and general revenues of \$65 billion, for total revenues of \$166.7 billion, an increase of \$894.6 million or one percent from fiscal 2018. The major components of this increase were tax revenues, which had an increase of \$3.4 billion, and unrestricted investment earnings, with an increase of \$528.4 million. Federal revenues increased \$523 million and interest and investment income increased by \$86.5 million.

The expenses of the state were \$151.8 billion, an increase of \$11.5 billion or positive 8.2 percent from fiscal 2018. The expense fluctuations in governmental activities are largely attributable to a \$8 billion increase in general government and a \$362.6 million increase in

teacher retirement benefits. In business-type activities, there was a \$440.4 million increase in lottery expenses and a \$2.1 billion increase in education services.

The financial analysis of the state's funds will further explain the results for changes in the state's financial condition.

Revenue by Source: Business-Type Activities

Governmental Activities

Governmental activities program revenue was \$64.3 billion, including charges for services of \$11.9 billion, operating grants and contributions of \$52.3 billion and capital grants and contributions of \$120.1 million. The largest change, a \$55.9 million increase, was for capital grants and contributions. Taxes had increases of \$3.4 billion from general revenue sources, with the largest increase attributed to sales and use tax revenue.

Total	\$ 41,000,140	\$ 3,658,997
	TO SEE THE PROPERTY OF THE PARTY OF THE PART	

Governmental activities expenses were \$110.8 billion. All functions of governmental activities in the government-wide statement of activities have a net cost, except the transportation and regulatory functions which reported slight surpluses. The education function and the health and human services function account for 78.1 percent of governmental activities expenses and 77 percent of the net cost. The tax collections of the state provide the primary source of funding, which when added to program revenues, support the payment of governmental services.

Business-Type Activities

Business-type activities generated program revenue of \$37.3 billion, including charges for services of \$27.2 billion, operating grants and contributions of \$9.8 billion and capital grants and contributions of \$331.5 million. The total expenses for business-type activities were \$41 billion. The largest changes occurred in education, with a \$2.1 billion increase for colleges and universities, and in lottery, with an increase of \$440.4 million. There was an increase in net position in the government's business-type activities of \$2.3 billion from \$66.5 billion in fiscal 2018.

Financial Analysis of the State's Funds

Governmental Funds

As of Aug.31, 2019, governmental funds reported fund balances of \$79.9 billion. The general fund reported a positive \$16.3 billion fund balance.

General Fund

The fund balance for the general fund as of Aug. 31, 2019, was \$16.3 billion, an increase of \$3.1 billion from fiscal 2018, mostly due to increases in revenues. Tax revenues increased by \$2.7 billion from fiscal 2018. Also, interest and other investment income and land income revenues increased by \$429.2 million and \$13.2

million, respectively. The state constitution, state statute and federal rule or bond covenants constrain \$7.2 billion. The unassigned fund balance was \$9 billion, which includes \$11.7 billion in the economic stabilization fund, commonly called "the rainy day fund."

State Highway Fund

The fund balance for the state highway fund for fiscal 2019, was \$9.3 billion, an increase of \$1.8 billion from \$7.4 billion from fiscal 2018. Cash and cash equivalents increased \$3.2 billion as unearned revenues decreased \$61.3 million. Interest and other investment income totaled \$145.3 million, an increase of \$71.3 million from fiscal 2018.

Permanent School Fund

The fund balance for the permanent school fund (PSF) as of Aug. 31, 2019, totaled \$46.5 billion, an increase of \$2.4 billion from fiscal 2018. This increase was primarily attributable to an increase in valuation of investments of \$2.1 billion. Value in the fund provided \$1.5 billion in transfers to provide funding for public education. The PSF also supports the state's public school system through a bond guarantee program, where the PSF is pledged to guarantee bonds issued by Texas school districts, enhancing their credit rating. In fiscal 2019, a total of \$84.4 billion in school district bond issues were guaranteed at year-end.

Proprietary Funds

Proprietary funds reported net position of \$68.9 billion in fiscal 2019, an increase of \$2.3 billion from fiscal 2018. The state's public colleges and universities hold 87.3 percent of the reported net position in proprietary funds.

Colleges and Universities

Colleges and universities' net position for fiscal 2019, totaled \$60.1 billion, an increase of \$1.1 billion

from fiscal 2018. Hospital revenue and professional fees discounts and allowances decreased by \$951.7 million and \$655.4 million, respectively for fiscal 2019. Salaries and wages increased by \$768 million and material and supplies increased by \$475.8 million for fiscal 2019. These revenues and expenses primarily contributed to the net loss before capital contributions, endowments and transfers decrease of \$6.5 billion from fiscal 2018. Change in net position decreased by \$6.3 billion or negative 84.5 percent for fiscal 2019. There was also \$1 billion collected from land mineral income (such as oil royalties) deposited into the Permanent University Fund (PUF) for the benefit of the University of Texas and Texas A&M University Systems. The PUF's net position after distributions increased by \$953 million from \$21.9 billion in fiscal 2018 to \$22.8 billion in fiscal 2019. This endowment fund contributes to the support of 15 institutions in the University of Texas System and 15 in the Texas A&M University System.

Unemployment Trust Fund

The unemployment trust fund reports activity related to the administration of statewide unemployment benefits in proprietary funds. The fund reported a net position of \$2.3 billion for fiscal 2019, an increase of \$457.6 million from \$1.9 billion from the prior fiscal year. During fiscal 2019, unemployment taxes collected decreased by \$117.2 million from \$2.4 billion in 2018. The unemployment rate was 3.4 percent. Unemployment benefits paid for fiscal 2019 totaled \$2.1 billion, which represents a decrease of \$170.7 million or negative 7.6 percent as compared to fiscal 2018.

Lottery Fund

The Texas Lottery Commission operates draw and scratch ticket lottery games to generate revenue for the state's foundation school fund. The lottery fund had a net position of \$29.3 million for fiscal 2019, an increase of \$21.4 million from the prior fiscal year. There was

an increase in interest and investment income of \$54.8 million due to the change in the market value of investments. Transfers to state agencies totaled \$1.6 billion. The Commission recorded its highest level of total sales since ticket sales began in 1992 with collections of \$6.3 billion.

Fiduciary Funds

Fiduciary funds reported \$217.1 billion in net position for fiscal 2019, an increase of \$8.5 billion from \$208.6 billion in fiscal 2018, a 4.1 percent increase.

Pension and Other Employee Benefit Trust Funds

Total net position for pension and other employee benefit trust funds was \$188.3 billion for fiscal 2019, an increase of \$3.2 billion from the \$185.2 billion reported in fiscal 2018. The majority of plan assets are held as investments for the pension funds. In fiscal 2019, additions from all sources decreased by \$5.1 billion, while benefit payments increased by \$1 billion. The year was characterized by exceptional returns from US Treasuries as well as the US dollar, while moderate returns from US equities outperformed international equities, which contracted amidst moderately slowing global growth expectations and inflation. The return on investments for the state's two largest pension systems, the Teacher Retirement System of Texas and the Employees Retirement System of Texas was 5.2 percent and 3 percent, respectively, compared to the previous year's returns of 8.2 percent and 9.6 percent.

External Investment Trust Fund

The Texas Treasury Safekeeping Trust (Trust) is the only external investment trust fund. It administers and invests funds belonging to state and local entities as well as providing direct access to services of the Federal Reserve System. The Trust reported a total net position of \$25 billion in fiscal 2019, an increase of \$5 billion from fiscal 2018. The increase in net position is pri-

marily due to an increase in both TexPool and TexPool Prime investment balances.

Private-Purpose Trust Funds

Total net position for private-purpose trust funds was \$3.8 billion in fiscal 2019, an increase of \$292 million from fiscal 2018. Additions from all sources of \$829.7 million exceeded total deductions of \$537.6 million. The net increase of \$292 million is an increase of 17.3 percent from the net increase of \$249 million in fiscal 2018.

Budgetary Highlights

Variances for the General Fund

The differences from original and final revenue budgets are due to both economic and legislative reasons.

Budget mechanisms allow budget revisions for certain revenues when collections exceed the original budget. Accordingly, major revisions were made to both total revenues and expenditures for a net change of \$6 billion.

There was a positive \$1.6 billion variance between the actual and final budget revenues. The largest negative revenue variances occurred with sales of goods and services and other revenue, which reported a \$1.3 billion and \$867.6 million difference, respectively.

The largest negative expenditure variance is related to the health and human services function.

Capital Assets and Debt Administration

Capital Assets

For fiscal 2019, the state has \$152.1 billion in net capital assets. This total represents an increase of \$7.7 billion in total capital assets or 5.3 percent from fiscal 2018. Included in this amount are increases to infrastructure of \$5.5 billion by the Texas Department of

Transportation (TxDOT). Institutions of higher education also added \$3.5 billion to buildings and building improvements.

To ensure future availability of essential services and to finance capital improvements, TxDOT made commitments for construction contracts, comprehensive development agreements and pass-through toll agreements totaling an estimated \$17.8 billion. These commitments extend beyond fiscal year-end and represent future costs to the state.

Note 2 provides detail about the state's capital assets and Note 15 details the state's significant commitments related to future capital expenditures.

Infrastructure Assets

The value of the state's infrastructure assets is included in the governmental activities column of the government-wide statement of net position. The state accounts for its system of roads and highways using the depreciation method. Additional detail is found in Note 2 for capital assets.

Debt Administration

The state of Texas issues both general obligation bonds and revenue bonds. Each series of revenue bonds is backed by the pledged revenue source and restricted funds specified in the bond resolution. Most revenue bonds are designed to be self-supporting from a primary revenue source related to the program financed.

The state's general obligation bond issues were rated Aaa by Moody's Investors Service, AAA by Standard & Poor's, AAA by Fitch Ratings, and AAA by Kroll Bank Ratings Agency as of August 2019. During fiscal 2019, Texas' state agencies and institutions of higher education issued \$5.9 billion in state bonds to finance new construction, transportation, housing, water conservation and treatment and other projects. General obligation debt accounted for \$1.3 billion of state bonds issued in fiscal 2019. This debt, which can only be authorized by a constitutional amendment, carries the full faith and credit of the state. The remaining \$4.6 billion is due to new issuances of revenue bonds. which are serviced by the revenue flows of individual entity projects. Bonds retired during the fiscal year were composed of \$795.2 million in general obligation bonds and \$1.2 billion in revenue bonds. Also, \$840.4 million in general obligation bonds and \$820.5 million in revenue bonds were refunded. The total outstanding general obligation debt of the state after new issuances, retirements and refundings as of Aug. 31, 2019 was \$19.4 billion. This represents a decrease of \$446.5 million or negative 2.3 percent from fiscal 2018. An

Outstanding Bonded Debt

additional \$10.2 billion of general obligation bonds were authorized but are unissued. Total revenue bonds outstanding were \$37.4 billion, which is an increase of \$2.9 billion or 8.4 percent from fiscal 2018. Note 5 discloses the details on the state's long-term liabilities and Note 6 provides detailed information on the state's bonded indebtedness.

Economic Condition

From November 2018 to November 2019 the Texas economy added 336,700 nonfarm jobs, an increase of 2.7 percent, to reach 12,951,400. Private-sector employment rose by 3 percent while government employment (federal, state and local) grew by 0.8 percent. Texas added more new jobs than any other state over the twelve-month period ending November 2019 and had the third lowest unemployment rate among

the 10 most populous states at the end of that period (behind Florida and Georgia). The state's rate of job growth was the highest among the 10 most populous states and the second highest among all states (behind Utah).

Contacting the State's Financial Management

This financial report is designed to provide the state's citizens, taxpayers, customers, investors and creditors with a general overview of the state's finances and to demonstrate the state's accountability for the money it receives. If you have questions about this report or need additional financial information, contact the Financial Reporting section of the Texas Comptroller of Public Accounts at 111 E. 17th Street, Austin, Texas 78774.

Reconciliation of the Governmental Funds Statement of Revenues, Expenditures and Changes in Fund Balances to the Statement of Activities

For the Fiscal Year Ended August 31, 2019 (Amounts in Thousands)

Net Change in Fund Balances	\$ 7,365,274

Amounts reported for governmental activities in the Statement of Activities are different because:

Governmental funds report capital outlays as expenditures. In the Statement of Activities, however, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. The amount by which capital outlay exceeds depreciation in the current period is:

Capital Outlay	\$7,861,988
Depreciation Expense (Note 2)	(2,213,369)
Amortization Expense (Note 2)	(47,446)

The effect of various miscellaneous transactions involving capital assets (i.e., sales and trade-ins) is to decrease net position.

Revenues in the Statement of Activities that do not provide current financial resources are not reported as revenues in the funds. (2,594,659)

5,601,173

(12,012)

285,081

(192,604)

The internal service fund is used by management to charge the costs of the employees life, accident and health insurance benefits fund to individual funds. The adjustments for the internal service fund "close" the fund by allocating these amounts to participating governmental activities.

ating these amounts to participating governmental activities.

972,742

Bond proceeds provide current financial resources to governmental funds, but increase long-term liabilities in the Statement of Net Position. Repayment of long-term debt consumes current financial resources and is an expenditure in the governmental funds, but reduces long-term liabilities in the Statement of Net Position.

Bonds and Notes Issued	(1,313,611)
Premiums on Bond Proceeds	(91,278)
Increase in Obligations Under Capital Leases	(1,395)
Repayment of Bond and Capital Lease Principal	1,691,365

Some expenses reported in the Statement of Activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds.

1,447,850

Transfers of capital assets are not reported in the governmental funds. In addition, resource flows between fiduciary funds and governmental funds are converted to revenues or expenses on the Statement of Activities.

Capital Asset Transfers (Note 2)	(192,604)
Increase in Revenues	31
Net Change in Transfers	(31)

Change in Net Position of Governmental Activities \$12,872,845

Note 1

Summary of Significant Accounting Policies

Basis of Presentation

The accompanying financial statements of the state of Texas were prepared in accordance with generally accepted accounting principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB). The state implemented the following three GASB statements in fiscal 2019.

GASB Statement No. 83, Certain Asset Retirement Obligations, relates to accounting and financial reporting for certain asset retirement obligations (AROs) as a legally enforceable liability associated with the retirement of a tangible capital asset. The GASB statement establishes criteria for determining the timing and pattern of recognition of a liability and a corresponding deferred outflow of resources for the ARO. This Statement also requires disclosure of information of the governmental entity's AROs, the methods and assumptions used for the estimated liabilities and the estimated remaining life of the associated tangible capital assets.

GASB Statement No. 88, Certain Disclosures related to Debt, including Direct Borrowings and Direct Placements, defines debt for purposes of disclosure in notes to the financial statements as a liability that arises from a contractual obligation to pay cash (or other assets that may be used in lieu of cash) in one or more payments to settle an amount that is fixed at the date a contractual obligation is established. The GASB statement expands the additional essential information related to debt disclosures including unused lines of credit, assets pledged as collateral of debt and terms specified in debt agreements. For note disclosure, direct borrowings and direct placements should be reported separately from other debt.

GASB Statement No. 89, Accounting for Interest Cost Incurred before the End of a Construction Period, requires interest cost incurred before the end of the construction period to be recognized as an expense in the period incurred for financial statements prepared using the economic resources measurement focus.

Financial Reporting Entity

For financial reporting purposes, the state of Texas includes all agencies, boards, commissions, authorities, institutions of higher education and other organizations that compose its legal entity. The reporting entity also includes legally separate organizations for which the state is financially accountable and any other organizations that would cause the financial statements to be misleading if they were excluded. All activities considered part of the state are included. These activities provide a range of services in the areas of:

- · General government
- Education
- Employee benefits
- Teacher retirement state contributions
- · Health and human services
- Public safety and corrections
- Transportation
- · Natural resources and recreation
- Regulatory services

The reporting entity for the state is in accordance with the criteria established by GASB. Note 19 provides a listing and brief summary of the component units and their relationship to the state of Texas. The government-wide financial statements present the balances and activities of the state of Texas (the primary government) and its component units.

The state's public school districts, junior colleges and community colleges are excluded from the state's financial reporting entity. These entities are legally separate and fiscally independent from the state. The state is not financially accountable for these entities and it does not make the state's financial statements misleading to exclude them.

Financial Reporting Structure

The basic financial statements include government-wide financial statements, fund financial statements and notes to the financial statements. The reporting model based on GASB Statement No. 34, Basic Financial Statements - and Management's Discussion and Analysis - for State and Local Governments, focuses on the state as a whole in the government-wide financial statements and major individual funds in the fund financial statements.

Government-wide Financial Statements

The government-wide financial statements (statement of net position and statement of activities) display information about the state as a whole - its financial position at the end of the fiscal year and the change in financial position resulting from the activities of the fiscal year, except for its fiduciary activities. These statements include separate columns for the governmental and business-type activities of the state (including its blended component units), and its discretely presented component units. These statements also report all current and noncurrent assets and liabilities, revenues, expenses and gains and losses of the state using an economic resources measurement focus and an accrual basis of accounting.

The statement of net position is presented in a net position format. The net position is displayed in three components: net investment in capital assets; restricted (presented with major categories of restrictions); and unrestricted. This statement reports deferred outflows of resources and deferred inflows of resources in separate categories from assets and liabilities and distinguishes between restricted and unrestricted current and noncurrent assets.

The statement of activities reflects both the gross expense and net expense/revenue by function (public safety and corrections, transportation, etc.) The net expense/revenue is calculated by netting program expenses, including depreciation and amortization, against program revenues for each program. The net expense/revenue identifies the extent to which each function draws from the general revenues of the state or is self-financing through fees and intergovernmental aid.

Program revenues are directly associated with a function of governmental or business-type activities. Internally-dedicated resources are reported as general revenues rather than program revenues.

Program revenues include charges for services, operating grants and contributions, and capital grants and contributions. Charges for services arise from charges to customers or applicants who purchase, use or directly benefit from the goods, services or privileges provided. Charges for services include special assessments and payments made by parties outside of the state's citizenry if that money is restricted to a particular program.

Operating grants include operating-specific and discretionary (either operating or capital) grants while capital grants reflect capital-specific grants from other governments, organizations or individuals. Multipurpose grants that provide financing for more than one program are reported as program revenue if the amounts restricted to each program are specifically identifiable. Multipurpose grants that do not provide for specific identification of the programs and amounts are reported as general revenues.

Certain general government administrative overhead expenses are charged to the various functions of the state. These charges are paid from applicable funding sources and are reflected as direct expenses. Other expenses reported for each function are clearly identifiable to that particular function and are direct expenses. The amount of direct interest expense included in direct expenses in the statement of activities is \$670.4 million.

Fiduciary funds are presented in the fund financial statements by type (pension and other employee benefit trust, external investment trust, private-purpose trust and agency). The assets of fiduciary funds are held for the benefit of others and cannot be used to finance activities or obligations of the government. They are, therefore, not incorporated into the government-wide financial statements.

Fund Financial Statements

The fund financial statements are presented after the government-wide financial statements. They display information about major funds individually and in the aggregate for governmental and proprietary nonmajor funds. In governmental and fiduciary funds, assets and liabilities are presented in order of relative liquidity. In proprietary funds, assets and liabilities are presented in a classified format that distinguishes between all current and noncurrent assets and liabilities. Current assets in the classified format are those considered available for appropriation and expenditure. Examples of expendable financial resources include cash, various receivables and short-term investments not restricted for specific purposes. All other assets are considered noncurrent. Current liabilities are obligations to be paid within the next fiscal year. Examples include payables and the current portion of long-term liabilities.

The governmental funds in the fund financial statements are presented on a current financial resources measurement focus and modified accrual basis of accounting. This presentation is deemed most appropriate to demonstrate compliance with legal and covenant requirements, the source and use of financial resources, and how the state's actual results of activities conform to the budget. A reconciliation between the governmental fund financial statements and the governmental

activities column of the government-wide financial statements is presented since a different measurement focus and basis of accounting is used. The reconciliation explains the adjustments required to convert the fund-based financial statements to the reporting entity-based financial statements.

The state uses funds to report its financial position and the results of its operations. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain government functions or activities. A fund is a separate accounting entity with a self-balancing set of accounts. State transactions are recorded in the fund types described below.

Governmental Fund Types

Governmental funds focus on the sources and uses of funds. Included in the governmental fund financial statements are general, special revenue, debt service, capital projects and permanent funds. The general fund is the principal operating fund used to account for most of the state's general activities. It accounts for all financial resources except those accounted for in other funds. Special revenue funds account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects. Debt service funds are used to account for and report financial resources that are restricted, committed or assigned to expenditure for principal and interest payments. Capital projects funds are used to account for and report financial resources that are restricted, committed or assigned to expenditure for capital outlays, including the acquisition or construction of capital facilities and other capital assets. Capital projects funds exclude those types of capital-related outflows financed by proprietary funds or for assets that will be held in trust for individuals, private organizations or other governments. Permanent funds are used to

report resources legally restricted to the extent that only earnings, and not principal, may be used for purposes that support the state's programs.

The state's major governmental funds are listed below.

The **General Fund** is the primary operating fund for the state and includes transactions for general government, education, employee benefits, teacher retirement state contributions, health and human services, public safety and corrections, transportation, natural resources and recreation, and regulatory services.

The **State Highway Fund**, a special revenue fund, receives funds allocated by law for public road construction, maintenance, monitoring and law enforcement of the state's highway system.

The **Permanent School Fund** is an investment fund consisting of land and proceeds from the sale of land that establishes a perpetual provision for the support of the public schools of Texas. All dividends and other income are allocated to the credit of the available school fund.

Proprietary Fund Types

Proprietary funds focus on determining operating income, changes in financial position and cash flows.

Proprietary funds are reported using economic resources measurement focus and full accrual basis of accounting. GAAP similar to those used by private-sector businesses are applied in accounting for these funds. Included in proprietary fund financial statements are enterprise funds and an internal service fund.

Enterprise funds are used to report any activity for which a fee is charged to external users for goods or services. Activities must be reported as enterprise funds if any one of the following criteria is met:

 The activity is financed with debt secured solely by a pledge of the net revenues from fees and charges of the activity.

- Laws or regulations require the activity's costs of providing services, including capital costs (such as depreciation, amortization or debt service), to be recovered with fees and charges.
- The pricing policies of the activity establish fees and charges designed to recover its costs, including capital costs.

Internal service funds are used to report any activity that provides goods or services, on a cost reimbursement basis, to other funds, departments or agencies of the reporting entity or other governments. The Employees Life, Accident and Health Insurance Benefits Fund accounts for the services provided to state of Texas agencies and institutions of higher education that participate in the Texas Employees Group Benefits Program.

The major enterprise funds for the state are listed below. The **Colleges and Universities** include:

- University of Texas System
- Texas A&M University System
- Texas Tech University System
- University of Houston System
- Texas State University System
- University of North Texas System
- Texas Woman's University
- Stephen F. Austin State University
- Texas Southern University
- Midwestern State University
- Texas State Technical College

These institutions of higher education are represented as a single column in the proprietary fund financial statements and individually in the schedules of colleges and universities in the other supplementary information section of this report.

The **Unemployment Trust Fund** contains the activity of the state related to the administration of state and federally financed unemployment benefits.

The **Lottery Fund** receives fees from external users and uses the fees to operate the state lottery, finance

debt and make investments to meet future installment obligations to prize winners.

Fiduciary Fund Types

Fiduciary funds account for assets held in either a trustee capacity or as an agent for individuals, private organizations, other governmental units or other funds. When assets are held under the terms of a formal trust agreement, either a pension trust fund or a private-purpose trust fund is used.

Pension and other employee benefit trust funds report resources held in trust for the members and beneficiaries of defined benefit pension plans.

External investment trust funds report the external portions of investment pools reported by the sponsoring government.

Private-purpose trust funds report all other trust arrangements whose principal and interest benefit individuals, private organizations or other governments. These trusts include tobacco settlement money, reserve for insurance company liquidations, relief of catastrophic insurance losses, contributions of prison inmates, educational savings plans and others.

Agency funds report assets the state holds on behalf of others in a purely custodial capacity. Agency funds involve only the receipt and remittance of fiduciary resources to individuals, private organizations or other governments. Agency funds include those funds established to account for the collection of sales and use tax for distribution to localities, bond escrow funds, deposits of insurance carriers, child support collections and other miscellaneous accounts.

Component Units

All component units of the state of Texas are reported as nonmajor component units. The combining statement of net position - component units and the combining statement of activities - component units are discretely presented.

Additional information about blended and discretely presented component units can be found in Note 19. More detailed information of the individual component units is available from the component units' separately issued financial statements.

Basis of Accounting, Measurement Focus and Financial Statement Presentation

Government-wide financial statements are presented using the economic resources measurement focus and the accrual basis of accounting. Under the economic resources measurement focus, all economic resources and obligations of the reporting entity, both current and noncurrent, are reported. Under the accrual basis of accounting, revenues, expenses, gains, losses, assets and liabilities resulting from exchange and exchangelike transactions are recognized when the exchange takes place. Revenues, expenses, gains, losses, assets and liabilities resulting from nonexchange transactions are recognized in accordance with GASB Statement No. 33, Accounting and Financial Reporting for Nonexchange Transactions and GASB Statement No. 65, Items Previously Reported as Assets and Liabilities, which partially amended GASB Statement No. 33.

The accounting and financial reporting treatment applied to a fund is determined by its measurement focus.

Governmental funds use the flow of current financial resources measurement focus and the modified accrual basis of accounting. With this measurement focus, generally only current assets and current liabilities are included on the balance sheet. Operating statements of these funds present increases (such as revenues and other financing sources) and decreases (such as expenditures and other financing uses) in current financial resources.

Under the modified accrual basis of accounting, revenues are recognized in the period in which they become both measurable and available to finance opera-

tions of the fiscal year or liquidate liabilities existing at fiscal year-end. The state of Texas considers all major revenues (such as operating grants and contributions and taxes) reported in the governmental funds to be available if the revenues are due at fiscal year-end and collected within 60 days thereafter.

In the governmental fund financial statements, revenues that are earned but not expected to be collected within 60 days are not available to liquidate the liabilities of the current period and are reported as deferred inflows of resources. Unearned revenue is recorded when cash or other assets are received prior to being earned.

Under the accrual basis of accounting, as used in the government-wide financial statements, proprietary fund financial statements and fiduciary fund financial statements, unearned revenue is recorded when cash or other assets are collected in advance before the revenue recognition criteria are met. Revenues are recognized when earned and expenses are recognized at the time liabilities are incurred. Amounts paid to acquire capital assets are capitalized as assets rather than reported as expenditures as they would be under the modified accrual basis of accounting used in the governmental fund financial statements. Proceeds of long-term debt are recorded as liabilities rather than other financing sources under the modified accrual basis. Amounts paid to reduce long-term indebtedness of the state are reported as reductions of the related liabilities rather than expenditures.

Proprietary funds distinguish operating from nonoperating items. Operating revenues and expenses result from providing services or producing and delivering goods in connection with the proprietary funds' principal ongoing operations. Operating expenses for enterprise and internal service funds include the cost of sales and services, administrative expenses, and capital asset depreciation and amortization. Revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses. Although agency funds use the accrual basis of accounting, they do not have a measurement focus because they do not recognize revenues and expenses.

Budgetary Information

The budgetary comparison schedule and the notes to the budgetary comparison schedule are in the required supplementary information other than management's discussion and analysis (MD&A) section. The budgetary comparison schedule presents the original budget, the final budget and the actual activity of the major governmental funds. Reconciliations for the general fund and the state highway fund budgetary basis to the GAAP basis are presented as required supplementary information with explanations of the reconciling items. Budgetary information for nonmajor governmental funds is presented as other supplementary information. The governmental funds with legally adopted annual budgets are the general fund, the state highway fund and the other nonmajor special revenue funds listed in other supplementary information.

Cash and Cash Equivalents

For reporting purposes, cash and cash equivalents includes cash on hand, cash in transit, cash in local banks, cash in the federal and state treasuries, and cash equivalents. Cash in local banks is primarily held by enterprise funds, discrete component units and employee benefit trust funds. Cash balances of most state funds are pooled and invested by the Treasury Operations Division of the Comptroller's office. Interest earned is deposited in the general revenue fund and specified funds designated by law.

The statement of cash flows for proprietary funds presents the change in cash and cash equivalents during the fiscal year. Cash equivalents are defined as short-term, highly-liquid investments that are both readily convertible to known amounts of cash and so near maturity they present insignificant risk of a decrease in

value due to changes in interest rates. Investments with an original maturity of three months or less and used for cash management rather than investing activities are considered cash equivalents. Restricted securities held as collateral for securities lending are not included as cash equivalents on the statement of cash flows.

Investments

Investments are reported at fair value in the balance sheet or other statements of net financial position with exceptions. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Texas local government investment pool (TexPool) and Texas local government investment pool prime (TexPool Prime) meet the criteria for a qualifying external investment pool under GASB Statement No. 79, Certain External Investment Pools and Pool Participants. Certain money market investments may be reported at amortized cost provided the investment has a remaining maturity of one year or less at date of purchase. All investment income, including changes in the fair value of investments, is recognized as revenue in the operating statement or statement of activities.

Receivables and Payables

The major receivables for governmental activities are federal revenue and taxes receivable. The major receivables for business-type activities are patient receivables, federal receivables and gifts, pledges and donations. Receivables represent amounts due to the state as of Aug. 31, 2019, from private persons or organizations. Amounts expected to be collected within the next fiscal year are classified as current and amounts expected to be collected beyond the next fiscal year are classified as noncurrent. All receivables are recorded net of allowances for uncollectible accounts.

Taxes receivable represent amounts earned in fiscal 2019 that will be collected sometime in the future. In the government-wide financial statements, a corresponding amount is recorded as revenue. In the governmental fund financial statements, the portion considered available is recorded as revenue; the remainder is recorded as unearned revenue. Taxes receivable are estimated based on collection experience. Tax refunds payable represent amounts owed to taxpayers for overpayments or amended tax returns. See Note 23 for details on taxes receivable and tax refunds payable.

Other receivables in the general fund consist primarily of program receivables for health care, supplemental nutrition assistance program and temporary assistance for needy families. Other receivables in the colleges and universities fund consist primarily of receivables from investments, from external parties and other companies. Other receivables in proprietary funds other than the colleges and universities fund consist of receivables related to unemployment benefit overpayments. Activities between funds that represent lending/ borrowing arrangements outstanding at fiscal year-end are interfund loans. All other outstanding balances between funds are reported as due from/due to other funds. Any residual balances between governmental and business-type activities are reported in the governmentwide financial statements as "internal balances".

Noncurrent interfund receivables in the general fund, as shown in Note 12, are reported as nonspendable fund balance. Noncurrent interfund receivables in other governmental funds are reported as committed, restricted or assigned fund balance.

Investment trade receivables are reported for sales of investments pending settlement. Investment trade payables are purchases of investments pending settlement.

Inventories and Prepaid Items

Inventories include both merchandise inventories on hand for sale and consumable inventories. Inventories are valued at cost generally utilizing the last-in, first-out method.

The consumption method of accounting is used to account for inventories and prepaid items that appear in both governmental and proprietary fund types. The costs of inventories are expensed when they are consumed. Prepaid items reflect payments for costs applicable to future accounting periods and are recorded in both government-wide financial statements and fund financial statements.

Restricted Assets

Restricted assets include monies or other resources restricted by legal or contractual requirements. These assets include certain proceeds of enterprise fund general obligation and revenue bonds, as well as certain revenues, set aside for statutory or contractual requirements.

Capital Assets

Capital assets are reported in proprietary funds, fiduciary funds and on the government-wide financial statements. The capitalization threshold and the estimated useful life of the assets vary depending upon the asset type. Note 2 includes a table identifying the capitalization threshold and the estimated useful life by asset type. It also provides information on the state's depreciation/amortization policy and other detailed information.

The state has adopted the depreciation method for reporting its highway system. The Texas Department of Transportation, the state agency responsible for construction and maintenance of the state's road and highway systems, adopted the composite approach for reporting infrastructure and bridges. The composite approach is a method for calculating depreciation of a

group of similar and dissimilar assets of the same class (all the roads and bridges of the state) using the same depreciation rate. The composite depreciation rate for fiscal 2019 is 2.5 percent based on a 40-year weighted average life expectancy of the assets in service.

Long-Term Liabilities

Reporting long-term liabilities in the statement of net position requires two components - the amount due within one year (current) and the amount due in more than one year (noncurrent).

General long-term liabilities consist of claims and judgments, capital lease obligations, employees' compensable leave and other noncurrent liabilities. General long-term liabilities are not reported as liabilities in governmental funds but are reported in the governmental activities column in the government-wide statement of net position. The state reports rebatable arbitrage in claims and judgments. General long-term debt is not limited to liabilities arising from debt issuances, but may also include noncurrent liabilities on lease-purchase agreements and other commitments that are not current liabilities.

In the government-wide financial statements and proprietary fund financial statements, bond premiums and discounts are currently amortized over the life of the bonds using the straight-line method. State agencies also have the option of using bonds outstanding or the effective interest method. Bonds payable are reported net of the applicable bond accretion, premium or discount. Gain or loss on refunding is reported as deferred inflows of resources or deferred outflows of resources, respectively, and amortized over a shorter final maturity of the refunded or the refunding bonds. Issuance costs are expensed in the fiscal year in which they were incurred.

In the governmental fund financial statements, bond premiums, discounts and bond issuance costs are recognized during the current fiscal year. The face amount of the debt issued and the related premiums are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

Employees' Compensable Leave Balances

Annual leave, commonly referred to as vacation leave, and other compensated absences with similar characteristics are accrued as a liability as the benefits are earned by the employee. Benefits are earned when the employee's right to receive compensation is attributable to services already rendered and it is probable the employer will compensate the employee for the benefits through paid time off or some other means, such as cash payments at termination or retirement. Employees accrue vacation time at a rate of eight to 21 hours per month depending on years of employment. The maximum number of hours that can be carried forward to the next fiscal year ranges from 180 hours to 532 hours based on years of service.

Under the federal Fair Labor Standards Act and state laws for nonexempt, nonemergency employees overtime can be accumulated in lieu of immediate payment as compensatory leave (at one-and-one-half hours for each overtime hour worked) to a maximum of 240 hours. All overtime exceeding 240 hours must be paid with the next regular payroll. At termination or death, all overtime balances must be paid in full. For emergency personnel (firefighters, law enforcement, prison officers, etc.), overtime can be accumulated to a maximum of 480 hours.

Unused overtime is included in the calculation of current and noncurrent liabilities because each employee may be paid for the overtime or use it as compensatory time.

Compensatory leave is allowed for exempt employees not eligible for overtime pay. This leave is accumulated on an hour-for-hour basis and must be taken within one year from the date earned or it lapses. There is no death or termination benefit for compensatory leave and it is nontransferable. Compensatory leave is reported as a current liability.

Sick leave is accrued at a rate of eight hours per month with no limit on the amount that can be carried forward to the next fiscal year. Accumulated sick leave is not paid at employee termination, although an employee's estate may be paid for one-half of the accumulated sick leave to a maximum of 336 hours. In 2009, the 81st Legislature passed House Bill 2559, which does not allow employees hired on or after Sept. 1, 2009, to apply unused sick or annual leave as service credit to meet retirement eligibility. State employees hired before Sept. 1, 2009, are entitled to service credit in the retirement system for unused sick or annual leave on the last day of employment. The maximum amount of the state's contingent obligation for sick leave was not determined. The probability of a material impact on state operations in any given fiscal year is considered remote.

Capital Lease Obligations

Capital lease contracts payable, which are not funded by current resources, represent the liability for future lease payments under capital lease contracts. Note 8 provides details for capital lease obligations.

Conduit Debt Obligations

Conduit debt issued by the state in the form of bonds is for the express purpose of providing capital financing for a specific third party that is not part of the state's financial reporting entity. The bonds are secured by the property financed and are payable solely from payments received from the third party on the underlying loans. The state has no obligations for the debt beyond the resources provided by the third party on whose behalf the bonds were issued. The state has cho-

sen to continue reporting conduit debt obligations as long-term liabilities on the balance sheet for debt issued prior to GASB Interpretation No. 2, *Disclosure of Conduit Debt Obligations, an Interpretation of NCGA Statement 1*, as well as subsequent debt obligations that are substantially the same as those already reported. GASB Interpretation No. 2, which was effective for Texas beginning Sept. 1, 1996, requires only note disclosure for issuance of all other conduit debt. Note 6 provides details on conduit debt obligations.

Deferred Outflows of Resources and Deferred Inflows of Resources

Deferred outflows of resources and deferred inflows of resources are defined in GASB Concepts Statement No. 4, *Elements of Financial Statements*, as the consumptions and acquisitions of net assets by the government that are applicable to future periods.

Note 27 provides details on deferred outflows of resources and deferred inflows of resources.

Net Position and Fund Balances

The state reports restricted net position when constraints placed on resources are either:

- externally imposed by creditors (such as debt covenants), grantors, contributors, laws or regulations of other governments; or
- imposed by law through constitutional provisions or enabling legislation.

Enabling legislation authorizes the government to assess, levy, charge or otherwise mandate payment of resources (from external resource providers) and includes a legally enforceable requirement that those resources can only be used for the specific purposes stipulated in the legislation. Restricted net position is designated as either expendable or nonexpendable. Expendable restricted resources are those that may be expended for either a stated purpose or for a general purpose subject to externally imposed stipulations. Nonexpendable

restricted resources are those required to be retained in perpetuity. Restricted resources include the state's permanent endowment funds subject to externally imposed restrictions governing their use.

Net investment in capital assets, consists of capital assets - including restricted capital assets - net of accumulated depreciation/amortization and reduced by the outstanding balances of bonds, mortgages, notes or other debt attributable to the acquisition, construction or improvement of such assets. Significant unspent related debt proceeds are not included in the calculation of net investment in capital assets. The unspent portion of the debt is included in the restricted for capital projects category of net position.

Fund balances for governmental funds are classified as nonspendable, restricted, committed, assigned or unassigned. Nonspendable fund balances include amounts that cannot be spent because they are either not in a spendable form or they are legally or contractually required to be maintained intact. Fund balances are reported as restricted when constraints placed upon the use of resources are either:

- externally imposed by creditors (such as debt covenants), grantors, contributors, laws or regulations of other governments; or
- imposed by law through constitutional provisions or enabling legislation.

Committed fund balances are amounts that can only be used for specific purposes pursuant to constraints imposed through legislation passed into law by formal action of the Texas Legislature, the state's highest level of decision-making authority. These committed amounts cannot be used for any other purpose unless the Texas Legislature removes or changes the specified use by taking the same type of action it employed to previously commit those amounts. Fund balances are reported as assigned when the state intends for resources to be used for specific purposes, yet the constraints do not meet the requirements

to be reported as restricted or committed. Intent is expressed by either the Texas Legislature, agency governing board or the agency head/official to which the governing body has delegated the authority to assign amounts to be used for specific purposes. Unassigned fund balances represent amounts that have not been restricted, committed or assigned to specific purposes. The Texas Legislature, agency governing board/the agency head or official to which the governing body has delegated the authority to assign amounts shall determine the procedures and policies for determining assigned fund balances.

The general fund is the only fund that can report a deficit unassigned fund balance. Note 13 presents disaggregated fund balances.

When both restricted and unrestricted resources are available for use, it is the state's policy to use restricted resources first and then unrestricted resources as they are needed. When only unrestricted resources are available for use, it is the state's policy to use committed resources first, then assigned resources, and lastly unassigned resources.

Interfund Activity and Transactions -Government-wide Financial Statements

Interfund activities are presented on the fund financial statements but are not carried forward to the government-wide financial statements. The interfund activities on the government-wide financial statements are consolidated to present only the activities between governmental activities and business-type activities. Interfund services provided and used are allocated to various functions within the primary government. Interfund activity with fiduciary funds is reclassified and reported as external activity.

Interfund payables and receivables are also presented on the fund financial statements but are not carried forward to the statement of net position except for amounts due between governmental and business-type activities. These amounts are reported as internal balances on the statement of net position. Interfund activities between the primary government and component units with a different fiscal year-end are limited and immaterial.

Interfund transactions with discretely presented component units are reclassified and reported as external activity. Note 12 provides details of interfund activities and transactions.

Risk Financing

The state maintains a combination of commercial insurance and self-insurance programs. The state is self-insured for workers' compensation and unemployment compensation claims. The liabilities are funded on a pay-as-you-go basis. The group insurance programs are provided through a combination of insurance contracts, self-funded health plans and health maintenance organization contracts.

Liabilities are reported when it is probable that a loss has been incurred at the date of the financial statements and the amount of that loss can be reasonably estimated. Liabilities include an amount for claims incurred but not reported. See Note 17 for additional information.

Note 2

Capital Assets

Capital assets of governmental funds, which include land, infrastructure, buildings, equipment and intangible assets, are recorded as expenditures at the time of purchase and capitalized in the governmental activities column of the government-wide statement of net position. Capital assets of other funds and component units are capitalized in the fund in which they are utilized. Capital assets are assets with a cost above a set minimum capitalization threshold that, when acquired, have an estimated useful life of more than one year. The capitalization thresholds and estimated useful lives of the state's various categories of capital assets are presented in table 2A.

Table 2A		
Туре	Capitalization Threshold	Estimated Useful Life
Land and Land Improvements	\$ 0	Not applicable
Infrastructure, Non-Depreciable	0	Not applicable
Construction in Progress	0	Not applicable
Buildings and Building Improvements	100,000	5-30 years
Infrastructure, Depreciable	500,000	10-50 years
Facilities and Other Improvements	100,000	10-60 years
Furniture and Equipment	5,000	3-15 years
Vehicles, Boats and Aircraft	5,000	5-40 years
Other Capital Assets		
(Library Books, Leasehold		
Improvements and Livestock)		
Depreciable	Various	3-22 years
Non-Depreciable	0	Not applicable
Internally Generated		
Computer Software	1,000,000	3-10 years
Other Computer Software	100,000	3-10 years
Land Use Rights – Permanent	0	Not applicable
Land Use Rights – Term	100,000	10-60 years
Other Intangible Capital Assets	100,000	3-15 years

Table 2B on the following pages presents the composition of the state's capital assets, adjustments, reclassifications, additions and deletions during fiscal 2019. The adjustments column includes assets not previously reported, accounting errors and other changes. The reclassifications column includes amounts for transfers of capital assets between agencies and reclassifies amounts for completed construction projects previously reported as construction in progress. The additions column includes current year purchases, depreciation and amortization. The deletions column includes assets removed during the current fiscal year.

All capital assets are capitalized at cost or estimated historical cost if actual historical cost is not available. Depreciation or amortization is reported on all exhaustible assets. Inexhaustible assets, such as works of art and historical treasures, are not depreciated. Professional, academic and research library books and materials are considered exhaustible assets and are depreciated. Intangible assets with determinable useful lives are amortized. Donated assets are reported at the acquisition value. Assets are depreciated or amortized over their estimated useful life using the straight-line method.

Most land improvements (infrastructure), including curbs, sidewalks, fences, bridges and lighting systems, are capitalized. The state's highway infrastructure is reported using the depreciation approach.

The state's capitalization policy regarding works of art and historical treasures states that capitalization is encouraged, but not required, for works of art and historical treasures that meet certain conditions. Works of art and historical treasures not required to be capitalized are those that are:

- Held for public exhibition, education or research in furtherance of public service, rather than for financial gain;
- Protected, kept unencumbered, cared for and preserved; and/or
- Subject to an organizational policy that requires the proceeds from sales of collection items to be used to acquire other items for the collection.

Assets of this nature include the historical archives of the Texas General Land Office. This vast collection includes more than 36.5 million documents and approximately 45 thousand maps, dating back to 1561.

Note 3

Deposits, Investments and Repurchase Agreements

Authority for Investments

All monies in funds established in the Texas Comptroller of Public Accounts (Comptroller) Treasury Operations Division (Treasury) by the Texas Constitution or by an act of the Legislature are pooled for investment purposes. State statutes authorize the Treasury to invest state funds in fully collateralized time deposits, direct security repurchase agreements, reverse repurchase agreements, obligations of the United States and its agencies and instrumentalities, bankers' acceptances, commercial paper and contracts written by the Comptroller's office, which are commonly known as covered call options.

The Treasury obtains direct access to the services of the Federal Reserve System through the Texas Treasury Safekeeping Trust Company (Trust Company). The Federal Reserve Bank requires that the Trust Company maintain a positive cash balance in the account during and at the end of the day. The Trust Company met those requirements throughout fiscal 2019. The Trust Company safe-keeps U.S. Government securities in book-entry form for the major investment funds, safe-keeps collateral pledged to secure deposits of the Treasury in financial institutions, and acts as trustee for other public bodies to hold and manage funds on their behalf.

Certain state agencies, component units, public employee retirement systems and institutions of higher education are authorized to invest funds not deposited with the Treasury. As of Aug. 31, 2019, the Teacher Retirement System of Texas (TRS), the permanent school fund (PSF), the Employees Retirement System of Texas (ERS) and the University of Texas System (UT) reported more than 88.6 percent of the total investment fair value; this does not include the investments held by the Texas Comptroller's Treasury Pool, Texpool and Texpool Prime. TRS, PSF, ERS, UT and Texas

Prepaid Higher Education Tuition Board (TPHETB) make investments following the "prudent investor rule." Authorized investments include equities, fixed income obligations, cash equivalents and other investments.

Collateralization

State law requires all treasury funds deposited in financial institutions above the amounts insured by the Federal Deposit Insurance Corporation be fully collateralized by pledging, to the Treasury, securities valued at market excluding accrued interest. Generally, the list of eligible securities includes all U.S. Treasury obligations, most federal agency obligations, and securities issued by state agencies and political subdivisions within the state. All securities pledged to the Treasury must be held by a third-party bank doing business in the state through a main office or one or more branches, any Federal Reserve Bank, the Trust Company, any Federal Home Loan Bank or in the vault of the Treasury. During fiscal 2019, no depository holding state funds failed.

State agencies and institutions of higher education with deposits of public funds not managed by the Treasury are required to secure deposits through collateral pledged by depository banks and savings and loan institutions. Eligible collateral securities are prescribed by state law; however, retirement systems and PSF are exempt by statute from this requirement.

External Investment Pool

The activities of the Texas local government investment pool (TexPool) and the Texas local government investment pool prime (TexPool Prime) are reported as an external investment trust fund. Separate audited financial statements may be obtained by contacting:

Texas Treasury Safekeeping Trust Company 208 E. 10th St., 4th floor Austin, Texas 78701.

Deposits

As of Aug. 31, 2019, the carrying amounts of deposits for governmental and business-type activities, fiduciary funds and discretely presented component units were \$1.1 billion, \$258.7 million and \$439.1 million, respectively. These amounts consist of all cash in local banks and a portion of short-term investments. These amounts are included on the combined statement of net position as part of the cash and cash equivalents and investment related line items. As of Aug. 31, 2019, the total bank balances for governmental and business-type activities, fiduciary funds and discretely presented component units were \$1.2 billion, \$256.9 million and \$422 million, respectively.

Custodial Credit Risk: Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, deposits or collateral securities in the possession of an outside party will not be recovered. There is no formal deposit policy for managing custodial credit risk. The state's securities lending programs are subject to custodial credit risk. This type of risk is inherent to the securities lending programs. The bank balances exposed to custodial credit risk as of Aug. 31, 2019, are presented in table 3A.

Foreign Currency Risk: Foreign currency risk for bank balances is the risk that changes in exchange rates will adversely affect the deposit. There is no formal deposit policy for managing foreign currency risk. Foreign currency deposits are intended for settlement of pending international investment trades. Table 3B presents the bank balances exposed to foreign currency risk as of Aug. 31, 2019.

Investments

The state's investments are recorded at fair value and have been categorized based upon a fair value hierarchy in accordance with GASB Statement No. 72, Fair Value Measurement and Application.

In accordance with GASB Statement No. 72, valuation techniques used for assets and liabilities accounted for at fair value are generally categorized into three types:

- a. Market approach valuation techniques use prices and other relevant information from market transactions involving identical or comparable assets or liabilities. Valuation techniques consistent with the market approach include comparables and matrix pricing. Comparables use market multiples, which may be in ranges with a different multiple for each comparable. The selection of where within the range the appropriate multiple falls requires judgment to consider both quantitative and qualitative factors specific to the measurement. Matrix pricing is a mathematical technique used to value certain securities without relying exclusively on quoted prices for those securities by comparing them to benchmark or comparable securities.
- b. Income approach valuation techniques convert future amounts, such as cash flows or earnings, to a single present amount. These techniques rely on current market expectations of future amounts. Examples of income approach valuation techniques include present value techniques, option-pricing models, binomial or lattice models that incorporate present value techniques and the multi-period excess earnings method.
- c. Cost approach valuation techniques are based upon the amount that, at present, would be required to replace the service capacity of an asset or its current replacement cost. From the perspective of a market participant (seller), the

price that would be received for the asset is determined based on the cost to a market participant (buyer) to acquire or construct a substitute asset of comparable utility.

GASB Statement No. 72 defines "fair value" as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Where available, fair value is based on observable market prices or parameters or derived from such prices or parameters. The availability of valuation techniques and observable inputs can vary from security to security and is affected by a wide variety of factors including the type of security, whether the security is new and not yet established in the marketplace and other characteristics particular to the transaction.

GASB Statement No. 72 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 inputs) and the lowest priority to unobservable inputs (Level 3 inputs). The three levels of the fair value hierarchy under GASB Statement No. 72 are described below:

Level 1 inputs - Unadjusted, quoted prices in active markets that are accessible at the measurement date for identical assets or liabilities. An active market is defined as a market where transactions for the financial instrument occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 inputs - Inputs, other than quoted prices in active markets that are either directly or indirectly observable for the asset or liability through correlation with market data at the measurement date and for the duration of the instrument's anticipated life.

Level 3 Inputs - Inputs are unobservable inputs and should be used only if relevant Level 1 and Level 2

inputs are not available. The state may use their own data or assumptions to develop unobservable inputs.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Management's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and consideration of factors specific to the investment.

The state has some investments that are not subject to GASB Statement No. 72. Investments not measured at fair value include money market investments and participating interest-earning investment contracts that have a remaining maturity at the time of purchase of one year or less. These investments are reported at amortized cost.

U.S. treasury securities, equity securities, fixed income money market and bond mutual funds classified in Level 1 are valued using prices quoted in active markets for those securities.

Debt and debt derivative securities classified in Level 2 are valued using either a bid evaluation or a matrix pricing technique. Bid evaluations may include market quotations, yields, maturities, call features and ratings. Matrix pricing is used to value securities based on the securities relationship to benchmark quoted prices. Index linked debt securities are valued by multiplying the external market price feed by the applicable day's index ratio. Level 2 debt securities also have non-proprietary information from multiple independent sources that were readily available to market participants who are known to be actively involved in the market. Equity and equity derivative securities classified in Level 2 are securities whose values are derived daily from associated traded securities.

Level 3 debt securities use proprietary information or single source pricing. Value of equity securities classified in Level 3 is based on last trade data that is 30 days or more before the fiscal year-end or not qualified to be reported in Level 1, Level 2 or at net asset value (NAV). Real assets classified in Level 3 are real estate investments generally valued using the income approach by internal manager reviews or independent external appraisers, except for the lands with interest in oil and gas described below.

The fair value of the state permanent school fund (PSF) and permanent university fund (PUF) lands' interest in oil and gas is based on a third party reserve study of proved reserves. The present value of the royalty cash flows is calculated by applying a 10 percent discount rate to future expected production volumes of oil and gas based on the price of oil and gas on Aug. 31, 2019. A percentage of probable and possible reserves of oil and gas are included in the fair value estimate. The PSF and PUF lands' surface interests are reported at the price per acre from the American Society of Farm Managers and Rural Appraisers. The PSF and PUF lands are categorized as Level 3 in the fair value hierarchy. The remaining minerals, the trust minerals, because of size, distribution, and limited production histories are valued at three times the previous 12 months revenue. This measure has been used historically to determine the selling price of these types of properties by willing parties. Other types of real estate holdings are reported by one of the following methods of valuation: the latest available appraised amount as determined by an independent state certified or other licensed appraiser or tax assessments used for real estate investments with values that are not significant or by any other generally accepted industry standard. The fair values of investments as of Aug. 31, 2019 are presented in tables 3C, 3D and 3E.

The state utilizes the NAV per share as a method for determining fair value for certain investments in equity, repurchase agreements, commingled funds, mutual funds, real estate, fixed income money market and externally managed investment. These investments calculate the NAV consistent with the Financial Accounting Standards Board's (FASB) measurement principles for investment companies and the state does not intend to sell all or portion of the investment for an amount that is different from the NAV. These invest-

ments are exempt from classification within the fair value hierarchy.

TRS, PSF, ERS and UT account for 91.2 percent of the value reported at NAV. For more detailed information about the redemption frequency, redemption notice period, related unfunded commitments, redemption restrictions and the significant investment strategies of these agencies pertaining to their investments reported at NAV, please refer to the individual financial statements of the agency by contacting:

Employees Retirement System of Texas P.O. Box 13207 Austin, Texas 78711

Teacher Retirement System of Texas 1000 Red River St. Austin, Texas 78701

Texas Permanent School Fund 400 W. 15th St. Austin, Texas 78701

The University of Texas 210 W. 7th St.

Austin, Texas 78701

The investments measured at NAV per share as of Aug. 31, 2019, including unfunded commitments, are presented in table 3F.

Commingled Funds: An external manager pools and invests the funds of several institutional investors. Securities are owned by the overall fund and each investor owns a pro rata share of the fund. The U.S. Securities and Exchange Commission (SEC) does not regulate commingled funds.

Energy, Natural Resources and Infrastructure:

Energy, natural resources and infrastructure funds are also referred to as real assets. Real assets are physical assets that have value due to their substance and properties. Real assets include precious metals, commodities, agricultural land, machinery and oil.

Fixed Income: Fixed income investments generally pay a return on a fixed schedule, though the amount of the payments can vary. These investments include private fixed income funds and bonds issues by countries in emerging markets.

Hedge Funds: Hedge funds may be broadly defined as pooled funds that are not registered with the SEC,

are typically available only to institutional investors or individuals with a high net worth and use advanced trading strategies such as leverage, derivatives, short selling and arbitrage.

Mutual Funds: Similar to commingled funds, the funds of multiple investors are pooled by the external manager. The investors own shares of the fund but do not own

the individual securities. The public, as well as institutional investors can invest in mutual funds. In contrast with commingled funds, mutual funds are regulated by the SEC.

Alternative: These investments are externally managed and invest in multiple types of assets and securities, which may include hedge funds, private equity and the other types described in the following paragraphs.

Private Equity: Private equity funds are privately managed investment pools, typically organized as limited partnerships. They are managed by the fund's general partners who typically make long-term investments in private companies and who may take a controlling interest with the aim of increasing the value of these companies, often by helping to manage the companies. Private equity fund strategies include venture capital investments and leveraged buyouts among others.

Real Estate: Includes real estate held for investment directly or through investment vehicles such as private investment funds, which are limited partnerships that invest in real estate. Such investments are designed to produce high current income and/or capital gains through appreciation in the underlying real estate.

Risk Parity: Risk parity is a portfolio allocation strategy based on targeting risk levels across the various

components of an investment portfolio. The risk parity approach to asset allocation allows investors to target specific levels of risk and to divide that risk equally across the entire investment portfolio in order to achieve optimal portfolio diversification for each individual investor. Risk parity strategies are in contrast to traditional allocation methods

that are based on holding a certain percentage of investment classes, such as 60 percent stocks and 40 percent bonds, within one's investment portfolio.

U.S. Government Obligations: These investments are made in an index fund which invests in securities issued by the U.S. Treasury and U.S. Government Agencies.

TRS, PSF, ERS, UT and TPHETB participate in individual securities lending programs. Cash collateral received by the lending agent on behalf of each entity is invested in a non-commingled pool exclusively for the benefit of the individual entity. Additional information about securities lending activity is disclosed in the "Securities Lending" section of this note. As of Aug. 31, 2019, the investment type balances for the invested securities lending cash collateral are presented in table 3G.

Custodial Credit Risk: Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty, the value of its investments or collateral securities in the possession of an outside party will not be recovered. There is no formal investment policy

for managing custodial credit risk. Consistent with the securities lending program, underlying securities on loans are subject to custodial credit risk.

As of Aug. 31, 2019, the investments exposed to custodial credit risk are presented in the table 3H.

Foreign Currency Risk: Foreign currency risk for investments is the risk that changes in exchange rates will adversely affect the investment. TRS, PSF, ERS and UT are exposed to investment foreign currency risk. TRS, PSF and ERS do not have an investment policy for managing foreign currency risk. UT's investment policy has no limitation on investments in non-U.S. denominated bonds or common stocks.

The investments exposed to foreign currency risk as of Aug. 31, 2019, are presented on table 3I.

Credit Risk: Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. Credit risk ratings are assigned by a nationally recognized statistical rating organization (NRSRO).

TRS' investment policy states that for over-the-counter derivatives, the minimum credit rating, based on a NRSRO, must be at least A- or better at the inception of the contract. The net market value of all over-the-counter derivative positions, less collateral posted, may not exceed \$500 million and all over-the-counter derivative positions without collateral may not exceed 5 percent of the total market value of the fund. Repurchase agreements may not exceed 5 percent of the market value of the total investment portfolio. A securities lending agent must be an organization rated A or better by a NRSRO.

PSF's investment policy requires investments to adhere to specific Standard & Poor's rating guidelines. Fixed income securities must be rated at least BBB and short-term money market instruments must be rated at least A-1.

ERS' general investment policy requires that noncash interest paying securities in the high yield bond portfolios not exceed 15 percent of the market value of the portfolio.

UT's investment policy has no requirements or limitations for investment ratings.

As of Aug. 31, 2019, the credit quality distribution for securities with credit risk exposure is presented on table 3J.

^{*} Credit risk exposure for investments may be less than their fair values due to classification differences. The total fair value of investments is appropriately greater than the credit risk exposure.

Invested collateral reported in fair value is reported by investment type for credit risk.

Concentration of Credit Risk: Concentration of credit risk is the risk of loss attributed to the magnitude of the investment in a single issuer. UT's investment policy states that no more than 5 percent of its cumulative market value of fixed income securities may be invested in a single issuer. PSF's policy precludes exceeding 2.5 percent, ERS employs a limit of 3 percent, TRS sets the limit at 5 percent. The Texas Comptroller limits

the amount the Treasury Pool may invest in a single issuer in certain asset classes, tailored to the asset class and issuer's rating. As of Aug. 31, 2019, governmental and business-type activities did not hold more than 5 percent of investments in any one issuer.

Interest Rate Risk: Interest rate risk is the risk that changes in interest rates of debt investments will adversely affect the fair value of an investment. TRS

and PSF use the effective weighted duration method to identify and manage interest rate risk. ERS and UT use the modified duration method.

Duration is a measure of the price sensitivity of a debt investment to changes arising from movements in interest rates. Duration is the weighted average maturity of an instrument's cash flows, where the present value of the cash flows serves as the weights. The duration of an instrument can be calculated by multiplying the time until receipt of cash flow by the ratio of the present value of that cash flow to the instrument's total present value. The sum of these weighted time periods is the duration of the instrument. Effective duration extends this analysis to incorporate an option-adjusted measure

of an instrument's sensitivity to changes in interest rates. It incorporates the effect of embedded options for corporate bonds and changes in prepayments for mortgage backed securities.

Modified duration estimates the sensitivity of the fund's investments to changes in interest rates.

The investment policy of PSF mandates the average duration of the fixed income portfolio to be consistent with the Barclay Aggregate Bond Index's duration and the duration of the real return portfolio to be consistent with the Barclay's Capital U.S. Treasury Inflation Protected Securities (TIPS) Index. As of Aug. 31, 2019, the Barclay's Aggregate Bond Index duration was 6.1 years, the Barclay's TIPS Index was 7.97 years and the JPM GBI-EM Global Diversified Index

was 5.49 years. The maximum maturity for invested securities lending collateral is 397 days except for bank time deposits, which is 60 days; bankers' acceptances, which is 45 days, reverse repurchase agreements, which is 180 days and floating rate securities, which is three years. The maximum weighted average maturity of the entire collateral portfolio must be 180 days or less. The maximum weighted average interest rate exposure of the entire collateral portfolio must be 60 days or less. TRS, ERS and UT do not have a formal investment policy for managing interest rate risk.

As of Aug. 31, 2019, PSF's investments by investment type, fair value and the effective weighted duration rate are presented in the table 3K.

Investments with Fair Values Highly Sensitive to Interest Rate Changes

In accordance with the applicable investment policies, TRS, PSF, ERS and UT may invest in asset backed and mortgage backed obligations. Mortgage backed obligations are subject to early principal payment in a period of declining interest rates. The resultant reduction in expected cash flows will affect the fair value of these securities. Asset backed obligations are backed by home equity loans, auto loans, equipment loans and credit card receivables. Prepayments by the obligee of the underlying assets in periods of declining interest rates could reduce or eliminate the stream of income that would have been received. As of Aug. 31, 2019, the fair value of investments in asset and mortgage backed obligations highly sensitive to interest rate changes for TRS, PSF, ERS and UT was \$2.1 billion.

Reverse Repurchase Agreements

Investments in reverse repurchase agreements by the Treasury and the Trust Company are permitted by statute. A reverse repurchase agreement consists of a sale of securities with a simultaneous agreement to repurchase them in the future at the same price plus a contract rate of interest. Sale proceeds are invested in securities or repurchase agreements that mature at or almost at the same time as the reverse repurchase agreement. Proceeds from the matured securities are used to liquidate the agreement resulting in a matched position. With a matched position, there is minimal market risk because the seller-borrower will hold the securities to maturity and liquidate them at face value. In the event of default on a reverse repurchase agreement, the Treasury would potentially suffer a loss. The loss occurs if the cash received does not exceed the fair value of the securities underlying the reverse repurchase agreements. The amount of the loss would equal the difference between the fair value plus accrued interest of the underlying securities and the agreement price plus accrued interest.

To minimize the risk of default, all securities backing reverse repurchase agreements are held by the Federal Reserve Bank in the state's name.

As of Aug. 31, 2019, the Treasury's aggregate amount of reverse repurchase agreement obligations was \$19.8 million, including accrued interest. The aggregate fair value of the securities underlying those agreements, including accrued interest, was \$19.9 million. There was no credit exposure during fiscal 2019.

Securities Lending

TRS, PSF, ERS, UT, TPHETB and the Veterans Land Board (VLB) participate in securities lending programs as authorized by state statute. TRS, PSF, ERS and UT established their own separately managed securities lending programs. TPHETB has its own separately managed securities lending programs but also participates in collateral investment pools. VLB participates in collateral investment pools that commingle the cash collateral of several entities. Under these programs, the governmental entities transfer securities to an independent broker or dealer in exchange for collateral in the form of cash, governmental securities or bank letters of credit. In addition, PSF may receive collateral in the form of other assets that it specifically agrees to with its lending agent. TRS, ERS, UT and VLB receive collateral equal to 102 percent of the value of domestic securities lent and 105 percent for international securities. PSF receives collateral in an amount of 102 percent of the fair value plus accrued income for domestic corporate securities and 105 percent of the fair value plus accrued income for foreign securities. However, the required percentage is 102 percent for foreign securities denominated and payable in U.S. dollars. TPHETB receives collateral of 102 percent of the value of domestic securities lent plus accrued interest and 105 percent plus accrued interest for foreign securities. There is a simultaneous agreement to return the collateral for the same securities in the future.

The custodians of the securities are the security lending agents. The securities lending contracts do not allow the governmental entities to pledge or sell collateral securities unless the borrower defaults. The lending agents are required to indemnify TRS, PSF, ERS, UT, TPHETB and VLB if the borrowers fail to return the securities.

TRS, PSF, ERS, UT, TPHETB and VLB loans are terminable at will. There were no significant violations of legal or contractual provisions, no borrower or lending agent default losses and no recoveries of prior period losses during the year.

Differences between the fair value of the invested cash collateral and the cash collateral liability are recorded as part of the net increase/(decrease) in fair value of investments. There is no credit risk exposure to the lender when the fair value of the security on loan is less than the cash collateral liability. The overall securities lending activity as of Aug. 31, 2019, is summarized in table 3P.

changes in interest rates, currency rates and stock and commodity prices. These securities or contracts serve as components of the investment strategies of certain state agencies, public employee retirement systems and institutions of higher education. Those investment strategies are utilized to manage and reduce the risk of the overall investment portfolio. Investment derivative levels and types are monitored to ensure that portfolio derivatives are consistent with the intended purpose and at the appropriate level.

All investment derivative instruments are reported at fair value on the statement of net position and the statement of fiduciary net position. The changes in the fair value of investment derivative instruments are reported as investment revenue in the operating statements. As of Aug. 31, 2019, TRS, PSF, UT, Texas A&M University System (A&M), Texas Tech University System (TTU) and VLB held investment derivatives (swaps, options, futures and forwards).

Forward foreign currency exchange contracts are used for the purchase or sale of a specific foreign currency at a fixed quantity and price on a future date as a hedge against either specific transactions or portfolio positions. The contracts are in the currency native to the security transactions for settlement date and are marked-to-market daily with the change in market value recorded as an unrealized gain or loss. Realized gain or loss is recorded at the closing of the contract. Risks associated with such contracts include the potential inability of the

counterparties to meet the terms of their contracts and unanticipated movements in currency exchange rates.

Securities Lending Activity Summary Table 3P

August 31, 2019 (Amounts in Thousands)

Entity	Fair Value of Securities on Loan	Non-Cash Collateral*	Cash Collateral Liability (Obligation/ Securities Lending)	Fair Value of Invested Cash Collateral (Securities Lending Collateral)	Net Increase/ (Decrease) In Fair Value
TRS	\$20,549,515	\$1,464,576	\$18,821,814	\$18,832,476	\$ 10,662
ERS	153,127		156,461	167,983	11,522
PSF	1,869,258	162,398	1,754,112	1,733,293	(20,819)
UT*,**	782,945	354,669	453,059	453,059	
VLB**	28,644		29,283	29,283	
Total	\$23,383,489	\$1,981,643	\$21,214,729	\$21,216,094	\$ 1,365

- Non-cash collateral received for securities lending activities is not recorded as assets because the
 underlying investments remain under the control of the borrower, except in the event of default.
- ** UT and VLB did not experience any net change in fair value because the cash collateral pools they participated in were maintained at amortized cost as of Aug. 31, 2019.

Investment Derivative Instruments

Derivatives are financial instruments (securities or contracts) whose value is linked to or "derived" from

Futures contracts are standardized exchangetraded contracts to purchase or sell a specific financial instrument at a predetermined price and date. Futures contracts are used to facilitate various trading strategies, primarily as a tool to hedge against the increase or decrease of market exposure to various asset classes. Upon entering into a futures contract, an initial margin deposit is pledged to the broker equal to a percentage of the contract amount.

Contracts are marked-to-market, settled in cash with the broker and recorded as an unrealized gain or loss daily. The daily gain or loss difference is referred to as the daily variation margin. Realized gain or loss is recorded at the closing of the contract. Holders of futures contracts look to the exchange for performance under the contract and not to the entity holding the offsetting futures. Accordingly, the amount of risk posed by the nonperformance of counterparties to futures contracts is minimal. Risks due to movements in the value of the futures contracts and the inability to close out futures contracts due to a non-liquid secondary market remain.

Options are used to alter market (systematic) exposure without trading the underlying cash market securities and to hedge and control risks so the actual risk/return profile is more closely aligned with the target

risk/return profile. Option contracts provide the option purchaser with the right, but not the obligation, to buy or sell the underlying security at a set price during a period or a specified date. The option writer is obligated to buy or sell the underlying security if the option purchaser chooses to exercise the option. With written options, market risk arises from an unfavorable change in the price of the derivative instrument, security or currency underlying the written option.

Swaps represent contracts that obligate two counterparties to exchange a series of cash flows at specified intervals. The ultimate gain or loss depends upon the price or rate at which the underlying financial instrument of the swap is valued at the settlement date. Swaps are used to manage risk and enhance returns. As of Aug. 31, 2019, swap investments were interest rate, credit default, commodity, equity and total return swaps.

VLB invested in pay-variable, receive-variable interest rate swap agreements that are reported as investment derivatives because they are ineffective hedges.

Foreign Currency Risk: TRS, UT and A&M have exposure to investment foreign currency risk inswaps, options, futures and forwards derivative investments. As of Aug. 31, 2019, derivative investments exposed to foreign currency risk are presented in table 3Q.

Credit Risk: TRS and UT instituted policies to mitigate counterparty credit risk for investment derivatives by having master netting agreements and collateral posting arrangements. TRS and UT negotiated thresholds or limits for each counterparty above which collateral must be posted.

TRS' investment policy limits the net market value of all over-the-counter derivative positions, less collateral posted, to an amount not exceeding \$500 million for any individual counterparty.

UT requires collateral to be posted on a daily basis by the counterparty to cover exposure to a counterparty above the limits set in place by the master netting agreement. Collateral posted by counterparties is held by UT in one of its accounts at their custodian bank.

The aggregate fair value of investment derivative instruments in asset positions as of Aug. 31, 2019, was \$250.1 million. The investment derivative instruments were executed with counterparties that had a credit rating of no less than A using the Standard & Poor's rating scale. This represents the maximum amount of loss that would have been recognized as of Aug. 31, 2019, if all counterparties failed to perform as contracted. This maximum exposure is reduced by

\$150.6 million of collateral held and by \$187.5 million in liabilities included in netting arrangements with those counterparties, resulting in a negative \$88 million net exposure of investment derivative instruments to credit risk.

Interest Rate Risk: TRS, UT and VLB are exposed to interest rate risk on swap transactions. Investments in pay-variable, receive-variable interest rate swaps ranged from payment of 100 to 131.25 percent of Securities Industry and Financial Markets Association (SIFMA). Investments in pay-variable, receive-fixed interest rate swaps ranged from payment of various foreign currency rates (Euro Interbank Offered Rate (EURIBOR), London Interbank Offered Rate (LIBOR), Stockholm Interbank Offered Rate, Bank Bill Swap Rate or Canadian Dollar Offered Rate) and receipt of 0 to 3 percent. Investments in pay-fixed, receive-variable interest rate swaps ranged from receipt of various foreign currency rates (EURI-

BOR, LIBOR, Mexican Interbank Rate, Johannesburg Interbank Agreed Rate or Canadian Dollar Offered Rate) and payment of 0 to 8.1 percent. As of Aug. 31, 2019, the investment maturities for the state's swap contracts exposed to interest rate risk are presented in table 3R.

Derivative Investments Exposed to Interest Rate Risk

Interest Rate Swaps	\$(6,060)	\$(9,522)	\$(7,150)	\$9,137	\$(1,445)	\$2,920

Investment Funds

Investment funds include hedge fund pools, private investment pools, public market funds and other alternative investments managed by external investment managers. Risks associated with these investments include investment manager risk, liquidity risk, market risk and leverage risk. Investment manager risk is substantially dependent upon key investment managers; therefore, the loss of those individuals may adversely impact the return on investment.

Also, some investment funds are not subject to regulatory controls. Liquidity may be limited due to imposed lock-up periods, with penalties to redeem units or restricting redemption of shares until a certain period of time has elapsed. Investment funds may employ sophisticated investment strategies using leverage, which could result in the loss of invested capital. As of Aug. 31, 2019, the fair value of various investment funds was \$132.7 billion.

Note 4

Short-Term Debt

On Aug. 21, 2019, (with an issue date of Sept. 4, 2019) \$8 billion of state of Texas Tax and Revenue Anticipation Notes, Series 2019 (Series 2019 Notes) were sold to coordinate cash flow for the state for fiscal 2020. Issuance of the Series 2019 Notes enhanced the state's ability to make timely payments of expenditures payable from the general revenue fund. On Aug. 22, 2019, good faith funds in the amount of \$80 million were received. The Series 2019 Notes bore interest at 4 percent and were priced to yield 1.3357 percent. The balance of \$8 billion was received on Sept. 4, 2019.

On Aug. 22, 2018 (with an issue date of Sept. 5, 2018), \$7.2 billion in state of Texas Tax and Revenue Anticipation Notes, (Series 2018 Notes) were sold for the purpose of coordinating the cash flow of the state for the fiscal year ended Aug. 31, 2019. Issuance of the Series 2018 Notes also enhanced the state's ability to make timely payments of expenditures which are payable from the general revenue fund. The Series 2018 Notes matured on Aug. 29, 2019 and bore an interest rate of 4 percent and was priced to yield at 1.8393 percent as determined by the bids of the initial purchasers.

The Texas Workforce Commission received temporary transfers (loans) for \$289 million from the Texas State Comptroller's office to avoid interest liabilities related to the Cash Management Improvement Act (CMIA). The loans were repaid in full during fiscal 2019.

The Texas Department of Housing and Community Affairs (TDHCA) executed an advance and security agreement with the Federal Home Loan Bank of Dallas (FHLB). The maximum aggregate principal amount available for advances under the advance agreement was \$250 million. As of Aug. 31, 2019, \$115.7 million was available for use in the line of credit and the

balance outstanding was \$134.3 million. The TDHCA pledges the mortgage loans, plus additional amounts deposited in an escrow account, as collateral for the advances. Terms specified in the debt agreements related to default events include:

- Default in the payment of principal or interest of the loan when such payments become due and payable.
- Failure of the TDHCA to perform any promise or obligation or satisfy any condition or liability.
- Evidence coming to the attention of the FHLB
 that any representation, statement or warranty
 made or furnished by the FHLB in connection
 with any advance, any specification of qualifying
 collateral or any certification of fair market value
 that was false in any material respect.
- Issuance of any tax, levy, seizure, attachment, garnishment, levy of execution or other legal process with respect to the collateral.
- Suspension of payment made by the TDHCA to any creditor or any event that results in the acceleration of any of its indebtedness.
- The appointment of a conservator or receiver for the TDHCA under the federal bankruptcy laws.
- The sale by the TDHCA of all or material part of its assets.
- The cessation of the TDHCA to be a type of institution that is eligible to become a borrower of FHLB.
- The merger or consolidation or other combination by the TDHCA with any other non-eligible entity.
- FHLB reasonably and in good faith determines that a material adverse change has occurred in the financial condition of the TDHCA and FHLB deems itself insecure even though the TDHCA is not otherwise in default.

The Texas Tech University System issued commercial paper notes for \$19.5 million to serve as an interim financing source for long-term construction projects in advance of issuing authorized bonds, and \$21.4 million matured. \$50.8 million was remaining at the end of the fiscal year.

The University of North Texas System issued commercial paper notes for \$47.1 million to finance project costs of eligible projects and to refinance, renew or refund commercial paper notes, prior encumbered obligations and parity debt, including interest. \$49.2 million was remaining at the end of the fiscal year.

The Texas State University

System issued commercial paper

notes for \$348.2 million to finance various construction

projects, and \$271.8 million matured. \$125 million was

remaining at the end of the fiscal year.

The University of Houston System issued commercial paper notes for \$27 million to finance various capital projects, and \$15.6 million matured. \$95 million was remaining at the end of the fiscal year.

The University of Texas System issued commercial paper notes for \$1 billion to provide interim financing for capital improvements and to finance capital equipment purchases, and \$710.5 million matured. \$1.5 billion was remaining at the end of the fiscal year.

Short-term debt activity for the fiscal year ended Aug. 31, 2019, is presented in table 4A.

Short-Term Debt

^{*} Includes current year amortization or premiums and discounts

^{**} Includes current year amortization of accretion of \$28.8 million for Governmental and \$84 million for Business-Type Activities.

An additional \$125.3 million in bond issuances were classified and not depicted as other financing sources related to long-term debt.

Claims and judgments are payments on behalf of the state, its agencies and employees for various legal proceedings, self-insurance and workers' compensation claims. Tort claims are covered under the Texas Tort Claims Act. Numerous miscellaneous claims are covered under the Miscellaneous Claims Act for legal liabilities against the state for which no appropriation otherwise exists. Individual claims above \$50 thousand or numerous separate claims from the same individual or entity that in total exceed \$50 thousand must be approved by the Texas Legislature before being paid. Claims are paid from governmental funds. Workers' compensation claims are usually paid from the same funding source(s) from which the employees' salary or wage compensation was paid.

Capital lease obligations are described in detail in Note 8.

Employees' compensable leave is the state's liability for all unused vacation and unpaid overtime accrued by employees, payable as severance pay under specified conditions. This obligation is paid only at the time of termination, usually from the same funding source(s) from which the employees' salary or wage compensation was paid.

Notes and loans payable consist of amounts used to purchase capital equipment. Other uses include the acquisition, construction and renovation of other capital assets, including the interim financing of higher education projects; software/database acquisition and development; refinancing of existing debt; and the funding of agency specific missions such as economic development projects and pest eradication programs. The Texas Department of Transportation (TxDOT) entered into pass-through toll agreements with local entities as a means of financing state highway capital improvements and maintenance. In fiscal 2019, TxDOT recognized an additional \$12.8 million as a long-term liability for pass-through toll payables related to highway projects constructed under pass-through financing agreements.

At Aug. 31, 2019, there was a pass-through toll payable of \$786.5 million. See Note 15 for additional details.

The Texas Windstorm Insurance Association (TWIA), a discretely presented component unit, has direct placements that are subject to optional makewhole redemption, in whole or in part. The outstanding balance as of Aug. 31, 2019 was \$368.5 million. Redemptions are either 100 percent of the principal amount or the sum of the present value of the remaining schedule of principal and interest payments.

As of Aug. 31, 2019, three notes and loan agreements are outstanding for TxDOT. The outstanding direct loan related to governmental activities of \$301.9 million contains various provisions resulting from certain events of default with various remedies. In the case of a payment default, interest is charged on the overdue balance of the note at the default rate (an additional 2 percent) until the payment default is cured (overdue balance repaid). In the case of project abandonment, the default rate is charged until the note is paid in full. In the case of certain bankruptcy related event defaults, the note becomes secured by a first priority security interest in the trust estate. TxDOT has an outstanding direct loan related to business-type activities of \$927.4 million which contains the following default provisions. Of note, in the case of (i) a payment default, interest is charged on the overdue balance of the note at the default rate (an additional 2 percent) until the overdue balance is repaid, (ii) a development default (which occurs upon failure of the borrower to prosecute the work related to the applicable project or to complete the applicable project in accordance with the financial plan), interest is charged at the default rate until such development default is cured, and (iii) a default due to project abandonment, the default rate is charged until the note is paid in full. Additionally, in the case of certain bankruptcy related event defaults, the note becomes secured by a first priority security interest in the trust estate.

Texas State Technical College's (TSTC) direct loan borrowings of \$1.2 million, consist of an amount used to finance a portion of the renovation costs of the 11-1 hangar at the TSTC Waco airport. The loan is secured by all the revenues derived from the airport and two certificates of deposits amounting to \$505 thousand. In the event of a default, the overdue amount, including principal and accrued interest, shall bear interest at a default rate and continue as an obligation until such overdue amount and such interest shall be paid in full. In such an event, TSTC will also have to pay all reasonable out of pocket expenses and internal charges in connection with the collection and enforcement of the loan documents.

Stephen F. Austin State University (SFA) had direct loan placements related to business-type activities as of Aug. 31, 2019 totaling \$10 million. In the event of default, the notes payable have the following remedies: by written notice to SFA, all payments, including future payments, become due; the equipment may be repossessed, with SFA remaining liable for any difference between those payments required in the note and any proceeds from the sale or leasing/subleasing of the equipment; lessor may terminate the Escrow Agreement relating to such Lease and apply any proceeds in the Escrow Fund thereunder to the Rental Payments due; lessor may take whatever action at law or in equity may appear necessary or desirable to enforce its rights under such Lease or the Escrow Agreement relating thereto or as a secured party in any or all of the Equipment subject to such Lease or with respect to the related Escrow Fund. The lessor may take one or any combination of the remedies listed above.

The Revenue Financing System Note (2007 TIPS Project) was issued on July 12, 2007 to fund \$4 million of costs for the Texas Institute for Preclinical Studies (TIPS) within Texas A&M University (A&M System). The note is structured as a loan with the Office of the Governor, Economic Development and

Tourism Division through the Texas Economic Development Bank; all authorized debt has been issued. The loan is secured by a lien on and pledge of the Pledged Revenues. In the event of default or failure to make required loan payments, the A&M System will be required to perform any conditions or obligations described in the loan agreement. The A&M System is responsible for all reasonable expenses related to the enforcement. The outstanding balance as of Aug. 31, 2019 was \$1 million.

The Texas Department of Housing and Community Affairs (TDHCA) has notes and loans payable from direct borrowings in the amount of \$22 million and direct placements in the amount of \$86.5 million as of Aug. 31, 2019 related to business-type activities. TDHCA has two Issuer Notes from direct borrowings and four Multifamily Notes from direct placements. TDHCA's two Issuer notes from direct borrowings are subordinate lien obligations to provide funding for down payment assistance in connection with Texas Homeownership Programs. The 2016 Issuer Note has a loan agreement with Woodforest National Bank secured by the RMRB Indenture and the 2018 Issuer Notes with Woodforest National Bank, Tolleson Private Bank and Hancock Whitney Bank secured by the Single Family Indenture. They contain the following events of default:

- A default in payment of any interest upon the loan when such interest becomes due and payable;
- A default in payment of principal of the loan when such principal becomes due and payable;
- A default in the Asset Test if the amount calculated pursuant to such test equals an amount less than 102 percent for the 2016 Note and 105 percent for the 2018 Note, plus the current outstanding amount of the loan.

The occurrence of any event of default would trigger remedies ranging from demand of immediate payment to the acceleration of the loan causing it to be immediately due and payable.

The TDHCA's four notes from direct placements were primarily issued to provide funding to nonprofit and for-profit developers of multifamily properties to construct or rehabilitate rental housing and are secured by these assets and their respective revenue. These notes are limited obligations of the TDHCA and are payable solely from the payments received from the assets and guarantors, which secure the notes. They contain the following events of default:

- A default in payment of any interest upon the loan when such interests become due and payable;
- A default in payment of principal of the loan when such principal becomes due and payable.

The occurrence of any event of default would trigger remedies ranging from demand of immediate payment to the acceleration of the loan causing it to be immediately due and payable.

Debt service requirements for notes and loans payable and notes and loans payable from direct borrowings and direct placements in long-term liabilities are presented in tables 5B, 5C and 5D.

General obligation bonds and revenue bonds are described in detail in Note 6.

Long-term liabilities associated with the acquisition of restricted assets or long-term liabilities that will be liquidated with restricted assets are classified as liabilities payable from restricted assets.

Asset Retirement Obligations

GASB Statement No. 83, Certain Asset Retirement Obligations, defines an asset retirement obligation (ARO) as a legally enforceable liability associated with the retirement of a tangible capital asset. A government that has legal obligations to perform future asset retirement activities related to its tangible capital assets recognize a liability based on the guidance in this GASB Statement.

Texas Southern University (TSU) purchased radiation equipment with an ARO. TSU must estimate the new obligation amount using probability weighting and record the initial measurement as a deferred outflows of resources ARO and a noncurrent ARO. TSU must assess any relevant factors annually to determine if a significant change in current value has occurred and, if so, record the change in deferred outflows of resources ARO and noncurrent ARO. When the radiation equipment reaches the end of its useful life, the value of the ARO is moved to current ARO. Current ARO is then reduced by the amount of actual expenditures to retire the asset, with an offset to deferred outflows of resources. The estimated remaining useful life of the associated tangible capital assets ranges from 0 to 73 months. The ARO obligation as of Aug. 31, 2019 was \$295.6 thousand.

As of Aug. 31, 2019, the University of North Texas System (UNT) held two radioactive material licenses. The estimated remaining useful life of the associated tangible capital assets is 263 months and 178 months, respectively. Licensing of Radioactive Materials is regulated by the state of Texas (Texas Administrative Code

Title 25 Health Services, Part 289 Radiation Control, Subpart 252 Licensing of Radioactive Materials). UNT estimated the obligation amount using best-estimate current value based on settlement amount and recorded the initial measurement as deferred outflows of resources and a noncurrent liability. UNT will assess the ARO account balances annually for any significant changes in current value and make all necessary adjustments. ARO balances are reduced annually by the amount of actual expenditures to retire the asset. In accordance with the Texas Administrative Code Title 25, Part 289, subpart 201(c), UNT is exempted from posting the financial instruments specifically based upon being a state funded academic facility actively working to reduce the amount of radioactive material authorized on its licenses. The ARO obligation as of Aug. 31, 2019 was \$2.4 million.

The University of Texas A&M System (A&M) has two nuclear reactors which were placed in service in 1957 and 1965, respectively. The U.S. Nuclear Regulatory Commission (NRC) requires a decommissioning plan for the retirement of these assets. The estimated liability for the decommissioning plan is \$9.7 million. The estimate was calculated using NRC publications NUREG/CR-1756 and NUREG-1307 Rev. 15, adjusted using the consumer price index inflation calculator. A 25 percent contingency is also included in the estimate. The A&M also has five radioactive material licenses authorizing the possession and use of radioactive materials. The estimated remaining useful life of the associated tangible capital assets ranges from 12 to 96 months. The A&M is financially accountable for any decommissioning or decontamination costs as required by the Texas Department of State Health Services (Texas Administrative Code, Title 25, Part 1, Chapter 289, Subchapter F, Rule 289.252), and the U.S. Nuclear Regulatory Commission (10 CFR 30.35). The total ARO obligation as of Aug. 31, 2019 was \$12.7 million.

The University of Texas System liability related to clean-up and decommissioning of items using radiation

such as broadscope licenses, cyclotrons and nuclear reactors is reported as an ARO. The liability is measured using best estimates of expected outlays for clean-up and decommissioning costs. The Texas Administrative Code, Title 25, Part 1, Chapter 289. Subchapter F, Rule 289.252 (gg)(6)(D) exempts state licensees from providing financial assurances and no assets have been restricted for payment of the liability. The estimated remaining useful life of the associated tangible capital assets ranges from 0 to 89 months. The total ARO obligation as of Aug. 31, 2019 was \$26.3 million.

Texas Health and Human Services Commission's (HHSC) ARO is related to a sewage treatment plant in Mexia, Texas with an estimated remaining useful life of 9 years. The ARO was calculated using a weighted average methodology. Based on an initial regional assessment, HHSC did not receive enough information to reasonably estimate a weighted average for lab equipment, e.g. X-ray equipment. The ARO obligation as of Aug. 31, 2019 was \$1.9 million.

Pollution Remediation Obligations

Pollution remediation obligations are recognized in the financial statements for existing pollution sites after the occurrence of one or more of the following events:

- The pollution creates an imminent endangerment to public health or the environment.
- The state is in violation of a pollution prevention-related permit or license.
- The state is named as a potentially responsible party by a regulator.
- The state is named in a lawsuit that compels it to participate in remediation.
- The state has commenced or legally obligated itself to begin cleanup activities.

Under applicable accounting standards, estimated expected recoveries from insurance policies and other responsible parties that are not yet realizable in the financial statements reduce the measurement of the

pollution remediation obligation liability. A realized or realizable recovery involves the acknowledgment or recognition by the third party of its responsibility. Realized or realizable recoveries are recognized as assets.

Federal Regulatory Cleanup Requirements: Pollution remediation obligations are associated with projects initiated under federal regulatory requirements. Applicable federal laws and regulations include the Comprehensive Environmental Response, Compensation and Liability Act (also known as Superfund), the National Emissions Standards for Hazardous Air Pollutants and United States Environmental Protection Agency (EPA) Class V Wells regulations.

The Superfund obligation estimates are based on budgeted projections to cover necessary activities for the upcoming fiscal year, along with estimated costs for future years and phases, plus direct salaries and benefits. For sites without available budget projections, estimated costs were provided for the Superfund phases of investigation and cleanup, based on staff experience with similar sites.

Federal reimbursements are expected to offset a portion of these expected costs. The potential for changes due to price increases or reductions, technology or applicable laws or regulations was incorporated into these estimates.

State Regulatory Cleanup Requirements: Other pollution remediation obligations are associated with cleanups required under state of Texas law. The Texas Commission on Environmental Quality (TCEQ) operates as a regulatory agency to ensure cleanups are conducted within applicable state laws and regulations contained in the Texas Administrative Code, Title 30; Texas Water Code; Texas Health and Safety Code; Texas Occupations Code; and Texas Natural Resources Code.

Major Remediation Activity: TCEQ oversees the cleanup of leaking petroleum storage tanks (LPST). Cleanup costs are paid by the owners' environmental

liability insurance or other financial assurance mechanisms or from their own funds. If the responsible party is unknown, unwilling or financially unable to do the work, state and federal funds are used to pay for the corrective actions. Revenue is generated from a fee on the delivery of petroleum products removed from bulk storage facilities. State statutes allow cost recovery from the current owner or any previous responsible owner, however, to date this has not been necessary.

TCEQ calculates expected outlays related to this pollution remediation by establishing the average cost of cleanup and multiplying that cost by the number of active sites, plus direct salaries and benefits for the duration of the cleanup. This methodology is based upon historical experience in estimating these cleanups. At Aug. 31, 2019, there were 301 active state lead sites, with a total estimated pollution remediation obligation of \$66.3 million.

The TCEQ Superfund Section (Section) includes the State Superfund, Federal Superfund, Superfund Site Discovery and Assessment (SSDAP) and the Preliminary Assessment/Site Inspection (PA/SI) Programs. On behalf of TCEQ, the Section identifies, ranks, and addresses sites contaminated with hazardous substances, which no parties are willing to address through a permit, corrective action, voluntary cleanup or enforcement program. These sites are identified through referral from internal and external groups such as TCEQ Enforcement, TCEQ Regional Offices, TCEQ Water Supply Division, public complaints and the EPA.

Site estimates may change drastically from one year to another as the investigations progress and a better understanding of site conditions is obtained. The estimate of liabilities is limited to sites that have been, or are, being assessed and ranked for the Superfund program. Cost recovery activities during fiscal 2019 resulted in collections of \$904.7 thousand.

At the end of fiscal 2019, Texas had 68 sites with pollution remediation obligations in the state and fed-

eral Superfund programs and two sites that required an immediate response or removal action. The current total Superfund liability, as of Aug. 31, 2019, is \$138.3 million.

TCEQ is responsible for collecting fees for a remediation fund designed to help pay for the cleanup of contaminated dry cleaner sites. The fees are generated from the annual registration of facilities and drop stations, as well as from the sale of perchloroethylene and other dry cleaning solvents. TCEQ receives applications for remediation, and then ranks and prioritizes them for corrective action. Legislation in 2007 established requirements for property owners and preceding property owners who wish to claim benefits from the remediation fund, and authorized a lien against property owners and preceding property owners who fail to pay registration fees due during corrective action. No additional cost recovery is allowed by statute.

The pollution remediation obligation is measured by the national average cleanup cost, as calculated by the State Coalition for Remediation of Drycleaners. Direct salary and benefit costs are added to the national average and the total cost is multiplied by the number of active sites. At Aug. 31, 2019, there were 222 active sites, with a total estimated pollution remediation obligation of \$49.9 million.

The Railroad Commission of Texas (Commission) currently has three areas of remediation: abandoned oil and gas wells, oil and gas sites and mines. Under Texas Natural Resource Code, Section 89.043, the Commission may plug abandoned wells if the wells have not been properly plugged or need replugging and the responsible party cannot be found or is not financially able to plug the well, or if the wells will cause or are likely to cause a serious threat of pollution or injury to the public health. The Commission has 23 active well plugging projects as of Aug. 31, 2019, with an estimated cost of \$5.7 million.

Under Texas Natural Resource Code, Section 91.113, the Commission may clean up abandoned oil and gas sites that are causing or are likely to cause the pollution of surface or subsurface water. The Commission has 23 active site remediation projects as of Aug. 31, 2019, with an estimated cost of \$8.8 million. Funding for these programs comes from regulatory and permit fees paid by the oil and gas industry.

The Commission enters into contracts with third parties for abandoned site remediation and abandoned well plugging. These contracts are used to estimate the amount of the plugging and pollution remediation obligation.

TxDOT is responsible for the cleanup and remediation of several polluted sites. Regulatory requirements established by federal and state law obligate TxDOT to perform these pollution remediation activities. Historical cost averages were used to calculate the estimated pollution remediation obligation liabilities. The areas of remediation include compliance with asbestos regulations, lead based paint regulations, Federal Safe Drinking Water Act, state LPST cleanup requirements, Occupational Safety and Health Administration Health and Safety Plan requirements, waste disposal regulations and state non-LPST cleanup requirements at an estimated cost of \$8.2 million for fiscal 2019.

Note 6

Bonded Indebtedness

Description of Bond Issues

The state of Texas had 416 bond issues outstanding as of Aug. 31, 2019. Scheduled debt service payments from the general revenue fund for fiscal 2019 totaled \$716.6 million.

See Note 5 for additional disclosures regarding general obligation bonds - direct placements and revenue bonds - direct placements. See Note 16 for debt issued subsequent to Aug. 31,2019.

General Obligation Bonds and General Obligation Bonds - Direct Placements - General Comments

The Texas Constitution authorizes the state to issue several types of general obligation bonds and general obligation bonds - direct placements. Each issue of general obligation bonds and general obligation bonds - direct placements is designed to be self-supporting from a primary revenue source related to the program being financed, except for the general obligation bonds of the Texas Public Finance Authority (TPFA), the Texas Water Development Board (TWDB), the Constitutional Appropriation Bonds (CABs) and the Texas Transportation Commission Highway Improvement Bonds.

The purpose and primary pledged revenue sources of each type of general obligation bond and general obligation bond - direct placement are summarized below.

The Texas Higher Education Coordinating Board issues bonds for educational loans to eligible Texas college students. Payments received on the loan contracts are applied to debt service on the bonds.

The Texas Parks and Wildlife Department (TPWD) issues bonds to finance the acquisition and development of state park sites. Park entrance fees, sporting goods sales tax revenue and investment earnings are applied to debt service on the bonds.

TPFA issues bonds to finance the acquisition, construction or renovation of buildings for the use of state agencies and institutions of higher education and to fund cancer research. The TPFA is also authorized to issue bonds to assist local government economic development projects and the Texas Military Value Revolving

Loan Fund (TMVRLF). The bonds are payable from state appropriations.

TWDB issues bonds to provide financial assistance to political subdivisions for water conservation and development, water quality enhancement projects and flood control projects. Debt service payments are funded by principal and interest received on loans to political subdivisions, repayments of purchased water storage contracts, earnings on temporary investments and general revenues.

The Veterans Land Board (VLB) issues bonds to provide funds to loan to eligible Texas veterans for the purchase of land, housing or home improvements. Principal and interest payments on loans, plus investment earnings, are the primary source of repayment for bonds.

The Texas Department of Transportation (TxDOT), prior to Jan. 1, 2015, through the Texas mobility fund, issued general obligation bonds and general obligation bonds - direct placements to pay or reimburse the state highway fund for the payment of part of the costs of constructing, reconstructing, acquiring and expanding state highways. In addition, the bond proceeds provided funds for participation by the state in the payment of part of the costs of constructing and providing certain publicly owned toll roads and other public transportation projects. After Jan. 1, 2015, TxDOT may only issue debt to refund existing debt in certain circumstances. Sources of pledged revenue for the Texas mobility fund include the "United We Stand" license plate fees, investment income, motor vehicle inspection fees, driver record information fees, driver license fees and certificate of title fees. Debt service for highway improvement bonds is provided by the state's general revenue.

CABs are issued in support of the construction programs of institutions of higher education not benefiting from the permanent university fund (PUF), which is dedicated to the University of Texas System (UT) and

Texas A&M University System (A&M). Debt service payments on bonds issued are limited to the \$197 million in general revenue funds available for debt service each year.

The Economic Development and Tourism Office (EDTO), a division within the Office of the Governor, issues general obligation bonds to provide financial assistance to export businesses, promote domestic business development, provide loans to finance the commercialization of new and improved products and processes, and provide loans to defense-related communities for economic development projects. Debt service payments are funded from revenues of the EDTO, primarily from the repayment of loans and the disposition of debt instruments.

General Obligation Bonds - Authorized But Unissued

The Texas Constitution limits the amount of bonds that can be issued in any of the general obligation categories. As of Aug. 31, 2019, the amounts of general obligation bonds, other than CABs, authorized but unissued, are presented in table 6D.

General Obligation Bonds Authorized But Unissued Table 6D (Amounts in Thousands) **SELF-SUPPORTING** Texas Agricultural Finance Authority Bonds 55,000 Farm and Ranch Loan Bonds 475,000 Veterans Land and Housing Bonds 1,046,456 Texas Water Development Bonds 5,945,878 College Student Loan Bonds 947,545 Texas Military Value Revolving Loan Fund 200,405 8,670,284 **NOT SELF-SUPPORTING** Agricultural Water Conservation Bonds 164,840 Texas Public Finance Authority Bonds 1,315,937 Total 1,480,777 Total General Obligation Bonds \$10,151,061

Revenue Bonds and Revenue Bonds - Direct Placements - General Comments

Each series of revenue bonds and revenue bonds - direct placements is backed by the pledged revenue sources and restricted funds specified in the bond resolution. The purpose and primary pledged revenue sources of each type of revenue bond are summarized below.

Self-Supporting

The VLB issues bonds to assist in the construction of skilled nursing care facilities for veterans and to make land and home mortgage loans to veterans. The bonds are limited and special revenue obligations payable solely from the income, revenues, receipts and collateral pledged under the related trust indentures.

The Texas Department of Housing and Community Affairs (TDHCA) issues bonds to assist in financing the purchase of homes by or the construction of rental housing for families with very low to moderate incomes and persons with special needs. Loan payments provide the revenues for debt service payments. The agency also issued taxable bonds for investment in collateralized mortgage obligations of federal agencies, to finance mortgage loans and to carry out financial assistance programs.

TWDB issues bonds for the state water pollution control revolving fund. The proceeds are used to provide financial assistance to political subdivisions for water quality enhancement purposes. Principal and interest repayments from political subdivision loans are pledged for debt service requirements of the bonds.

UT and A&M issue PUF bonds to build, equip or buy buildings or other permanent improvements. The Texas Constitution limits UT's and A&M's PUF debt to an amount not to exceed 20 percent and 10 percent, respectively, of the cost value of PUF assets, excluding real estate. Revenue from investments of the PUF is

pledged to secure the payment of principal and interest. The cost value of PUF assets as of Aug. 31, 2019, excluding real estate, was \$19.8 billion. A comparison between the legal debt limits and the actual bonds outstanding at that date is presented in table 6E.

Permanent University Fund Bonds Table 6E (Amounts in Thousands) Legal **Actual Bonds Authorized But Unissued Debt Limits Payable** \$2,416,760 \$1,540,400 University of Texas System \$3,957,160 Texas A&M University System 1,978,580 1,133,580 845,000 \$5,935,740 \$3,550,340 \$2,385,400 Total

Miscellaneous college, university revenue bonds and university revenue bonds-direct placements are issued to provide funds to acquire, construct, improve, enlarge and equip property, buildings, structures or facilities. The revenue bonds and revenue bonds - direct placements issued by each institution's governing board are secured by the pledged revenue of the respective institutions and are not an obligation of the state of Texas.

TxDOT issues revenue bonds and revenue bondsdirect placements to finance state highway improvement projects. Pledged revenues include all revenues deposited to the credit of the state highway fund, including dedicated registration fees, dedicated taxes, dedicated federal revenues, amounts collected or received pursuant to other state highway fund revenue laws and any interest or earnings from the investment of these funds.

The Texas Transportation Commission issued bonds to pay a portion of the costs of planning, designing, engineering, developing and constructing the initial phase of the Central Texas Turnpike System located in the greater city of Austin metropolitan area in Travis and Williamson counties. The bond obligations are payable from and secured solely by a first and second lien as applicable and pledge of the trust estate.

Not Self-Supporting

The following revenue bonds are supported by pledged lease or rental revenue derived from contracts with other state agencies, which in turn comes from legislative appropriations.

The Texas Military Department (TMD), previously named the Adjutant General's Department, assumed the Texas Military Facilities Commission's (TMFC) responsibilities on Sept. 1, 2007. The TMFC's title to facilities, rental and other income pledged to the bonds was transferred to the TPFA. Title will pass to TMD upon final discharge of all bond obligations. Bonds are issued for the construction, expansion and renovation of armories. The bonds are payable from certain pledged revenues, primarily rentals from the TMD. As of Aug. 31, 2019, the

TPFA issues bonds to finance the acquisition of real property and to construct, equip or renovate buildings for the use of state agencies and institutions of higher education. The bonds are payable from specified pledged revenues, collected primarily from occupantagency rentals.

bond obligations were still outstanding.

TPWD issues bonds for infrastructure repairs and construction. The bonds are payable from rent payments, funded by state appropriations, made by the TPWD to the TPFA.

Pledged Future Revenues

Pledged revenues are those specific revenues that are formally committed to directly secure revenue bonds and revenue bonds-direct placements. Table 6F provides information on pledged revenue and pledged future revenue for the state's revenue bonds and revenue bonds-direct placements.

Build America Bonds (BABs)

The American Recovery and Reinvestment Act (ARRA) of 2009 was implemented in February 2009. As part of this federal legislation, a new bond program called BABs was created. Authority to issue BABs expired on Dec. 31, 2010.

TxDOT, UT and the University of Houston System (UOH) had \$3.5 billion, \$1.3 billion and \$67.7 million of direct payment BABs outstanding, respectively, as of Aug. 31, 2019.

Under the Budget Control Act of 2011, acrossthe-board sequestration took effecton March 1, 2013. This resulted in the 35 percent federal subsidy for BABs interest payments being reduced by the applicable federal sequestration reduction rate.

Variable Rate Bonds

Six state agencies had a total of 79 variable rate bond issues with outstanding balances as of Aug. 31, 2019.

Most of the issues' interest rates reset every seven days. The remaining issues' interest rates reset daily or monthly. The potential volatility for related debt service increases with these interest rate reset provisions.

Demand Bonds

The Office of the Governor, the VLB, TDHCA, TxDOT and UT had outstanding demand bonds as of Aug. 31, 2019.

A bond holder may tender any of these bonds for repurchase prior to maturity, usually every seven days. Any bonds so tendered will be purchased either by the proceeds of the remarketing of such bonds or, if not successfully remarketed, from amounts drawn under a letter of credit, liquidity agreement or standby purchase agreement of the respective agency until such time as the remarketing is finalized. As of Aug. 31, 2019, there were no purchased bonds held by liquidity providers under the terms of the various agreements. Details are presented in tables 6G and 6H.

Refunding

Table 6K summarizes bonds refunded during fiscal 2019 to lower interest rates or to restructure debt service requirements for cash management purposes.

Defeased Bonds

Texas defeases various bond issues by placing funds in irrevocable trusts with external financial institutions to provide for all future debt service payments on the old bonds. As of Aug. 31, 2019, the amounts of defeased bonds, at par, that remain outstanding for all bond issuers are presented in table 6L. Also included are various bond issues defeased by placing funds in

irrevocable trusts in the Texas Treasury Safekeeping
Trust Company (Trust Company). Funds placed in the
Trust Company to defease \$343.5 million in bonds
are included in the state's financial statements in an
agency fund. The trust account assets and the liability
for all other defeased bonds are not included in the
state's financial statements. GASB Statement No. 86,

Certain Debt Extinguishment Issues, establishes standards
of accounting and financial reporting for in-substance
defeasance transactions in which cash and other monetary assets acquired with only existing resources are
placed in an irrevocable trust for the purpose of extinguishing debt. Cash defeasance undertaken for cost
considerations are presented in table 6M.

multifamily mortgage revenue bond program pro-
vides long-term variable-rate or fixed-rate financing
to nonprofit borrowers/developers of new or exist-
ing multifamily rental properties in order to generate
and/or preserve affordable rental housing. TSAHC
may finance single developments or pools of proper-
ties located throughout the state of Texas. Borrowers
must agree to set aside a prescribed percentage of a
property's units for rent to persons and families of low
income. TSAHC finances properties under the pro-
gram primarily through the sale of tax-exempt multi-
family housing revenue bonds.

The bonds are secured by the property financed and are payable solely from payments received on the underlying mortgage loans. TSAHC, the state and any political subdivision thereof are not obligated in any manner for repayment of the bonds. Accordingly, the bonds are not reported as liabilities in the accompanying statements.

As of Aug. 31, 2019, there were 14 series of multifamily housing revenue bonds and revenue bonds - direct placements outstanding with an aggregate \$212 million principal amount payable.

The Texas Private Activity Bond Surface Transportation Corporation (TxPABST), a blended component unit of the state, issued five series of bonds in the aggregate amount of \$2.3 billion that remains outstanding as of Aug. 31, 2019. The proceeds were loaned to LBJ Infrastructure Group LLC, NTE Mobility Partners LLC, NTE Mobility Partners

Segments 3 LLC and Blueridge Transportation Group, LLC to finance the development and expansion of public transportation projects. Debt service is funded from loan and interest repayments from the borrowers. The bonds do not constitute a debt or pledge of the faith and credit of TxPABST, TxDOT or the state of Texas.

Conduit Debt

The Texas State Affordable Housing Corporation (TSAHC), a discrete component unit of the state, is authorized to issue statewide 501(c)(3) tax-exempt multifamily mortgage revenue bonds and revenue bonds - direct placements under Texas Government Code, Section 2306.555. The 501(c)(3) tax-exempt

Remaining bond authority has expired.

Conduit bond debt for the TDHCA (multifamily housing bonds) predates the implementation of note disclosure requirements and is reported in the financial statements.

Interest Rate Swaps

Effective interest rate swap agreements are considered hedging derivatives. The aggregate debt service requirements and associated net

swap payments are detailed in this note. See Note 7 for additional information on derivatives.

Estimated Debt Service of Swap Payments

Using rates as of Aug. 31, 2019, the debt service requirements of the state's variable-rate, fixed-rate bonds and associated net swap payments were estimated and are presented in tables 6N and 6O.

Pay-Variable, Receive-Variable Interest Rate Swaps: Estimated Debt Service Requirements of Variable-Rate Debt Outstanding and Net Swap Payments

Table 60

(Amounts in Thousands)

	Variable-	Rate Bonds	Interest Rate	
Year	Principal	Interest	Swaps, Net	Total
2020	\$ 1,365	\$ 690	\$ (258)	\$ 1,797
2021	1,445	652	(244)	1,853

Note 7

Derivative Instruments

Derivatives are financial instruments whose values are derived, in whole or part, from the value of any one or more underlying assets or index of asset values. Derivatives include swap contracts, futures contracts, options, options on futures contracts, forward contracts, rights and warrants.

Hedging derivatives are entered into to reduce the overall cost of borrowing long-term capital and protect against the risk of rising interest rates. The hedging derivatives primarily consist of interest rate swap agreements entered into in connection with long-term bonds. The derivative contracts enable the state to issue bonds at a cost less than what the state would have paid to issue conventional fixed rate debt.

Investment derivatives are entered into with the intention of managing transaction risk, reducing interest cost, or reducing currency exchange risk in purchasing, selling or holding investments. Ineffective hedges are also reported as investment derivatives.

Summary of Derivative Activity

The fair value of effective hedging derivatives is recorded as derivative instrument assets (positive fair value) and derivative instrument liabilities (negative fair value). The cumulative change in fair value of effective hedging derivatives is reported as deferred outflows of resources and deferred inflows of resources. The type of derivative instruments held by entity is shown in table 7A. The state's cumulative derivative activity as of Aug. 31, 2019, is summarized in table 7B. The notional amounts are presented in U.S. dollar equivalents.

Fair Value Measurement

Derivative instruments are recorded at fair value. The fair values of the interest rate swaps were determined using a combination of methods.

The University of Texas System (UT) has calculated the fair value of the interest rate swaps using a forecast of expected discounted future net cash flows. UT continued to use the zero-coupon method in determining the fair values of their effective interest rate swaps, but also considered the nonperformance risk of the parties, as required by GASB Statement No. 72, Fair Value Measurement and Application. All UT's interest rate swaps are classified in Level 2 of the fair value hierarchy. Other swaps are fair valued by using independent broker quotes or using models with primarily externally verifiable model inputs and are also classified as Level 2.

The Veteran Land Board's (VLB) fair value measurements of its swap transactions were calculated by an independent third-party swap advisory consultant using the Income Approach, as described in GASB Statement No. 72. Using observable inputs from interest rate markets and credit default swap prices, the fair value measurements are determined based upon the present value of future implied cash flows. Since the inputs to these fair value measurements are observable from market data sources, they constitute Level 2 measurements, as described in GASB Statement No. 72.

Several of VLB's effective interest rate swaps contain a provision

for the state to be "knocked out" of the swaps by the respective counterparties upon the breach of certain predetermined barriers. In each of these cases, VLB was paid an up-front option premium by the respective counterparties. With regard to the swap associated with Vet Land Tax Ref Bonds Series 2000 (now a part

of state of Texas Veterans Bonds, Taxable Refunding Series 2014B-3 attributable to bond refunding), the knock-out is permanent once the option is taken at the discretion of the counterparty. In the remainder of the swaps with knock-out provisions, the knock-out is mandatory and is periodic in nature, with the knock-out period corresponding only to the period during which the respective barrier is breached. The knock-out provisions are an integral part of the associated swaps and the fair values of the swaps include the effects of the knock-outs.

Texas Department of Housing and Community Affairs (TDHCA) adopted the Income Approach from GASB Statement No. 72 in the fair value measurement of their derivative instruments. Using observable inputs of interest rate markets and municipal bond yields, the fair value measurement is based on the present value of future implied cash flows reflective of nonperformance risk. All TDHCA's derivative instruments are classified in Level 2 of the fair value hierarchy.

Hedging Derivatives

The state entered into interest rate swap agreements with various counterparties, all of which are highly rated financial institutions, to manage various risks associated with the state's debt programs. Each of the state's interest rate swaps is a contractual agreement entered into between the state and a counterparty under which each party agrees to exchange periodic fixed or variable payments, based upon a stated notional amount, over the stated life of the agreement. The net differential paid or received is recognized over the life of the agreement as an adjustment to interest expense. Interest rate swaps determined to be hedging derivatives are designated as cash flow hedges. In fiscal 2019 all cash flow hedges were pay-fixed interest rate swaps. The combination of these swaps and variable-rate bonds creates synthetic fixed-rate debt. The use of synthetic fixed-rate debt has historically lowered the state's borrowing costs, as compared to the borrowing costs associated with the issuance of traditional fixed-rate bonds.

Significant Terms and Credit Ratings

The significant terms and credit ratings of the state's hedging derivatives as of Aug. 31, 2019, are presented in table 7C. The variable rates are quoted in terms of a percentage of the London Interbank Offered Rate (LIBOR) or Securities Industry and Financial Markets Association (SIFMA) municipal swap or United States Federal Funds (USDFP) index rates as noted. Standard & Poor's and Moody's Investors Service credit ratings are disclosed for each swap.

Hedging Interest Rate Swaps: Significant Terms and Credit Ratings

Risks

Credit Risk: The state is exposed to credit risk if the counterparty to an interest rate swap fails to meet the terms and obligations of its contracts. The state mitigates the credit risk associated with its swaps by entering into transactions with a diversified group of highly-rated counterparties. The interest rate swap agreements also contain varying collateral agreements and insurance policies with the counterparties. Posted collateral may be held either by the state itself or by a quality third party custodian. Swap contracts with a negative fair value do not expose the state to credit risk. As of Aug. 31, 2019, the state was not exposed to credit risk because the swaps recorded in the positive position were offset by other swaps with negative fair values.

Interest Rate Risk: On the pay-fixed, receive-variable interest rate swaps, as LIBOR, SIFMA, or USDFF rates municipal swap index decrease, the state's net payment on the swap increases. For the related hedged variable-rate debt, as LIBOR, SIFMA, or USDFF rates municipal swap index decreases, the state's interest payments on the bonds decrease. The value of interest rate swap agreements with a longer weighted average maturity tend to be more sensitive to changing interest rates, and therefore, more volatile than those with shorter maturities.

Basis Risk: The state is exposed to basis risk to the extent that the interest payments on its variable-rate bonds do not match the variable-rate payments received on the associated swaps. The state mitigates this risk by matching the notional amount and amortization schedule of each swap to the principal amount and amortization schedule of each associated variable-rate bond issue and by selecting an index for the variable-rate leg of each swap that is reasonably expected to closely match the interest rate resets on the associated variable-rate bonds over the life of each bond issue. Additionally, tax-exempt interest rates can change without a corresponding change in taxable interest rates due to factors affect-

ing the tax-exempt market that do not have a similar effect on the taxable market.

Termination Risk: Termination risk is the risk that the swap may be terminated prior to its scheduled maturity date as a result of certain specified events. The swap associated with the Vet Land Tax Ref Bonds Series 2000 (now a part of state of Texas Veterans Bonds, Taxable Refunding Series 2014B-3 attributable to bond refunding) provides the counterparty with the option to terminate the swap under certain conditions.

The state or the counterparties may terminate any of the swaps if the other party fails to perform under the terms of the respective swap agreements. If any of the swaps are terminated, the associated variable-rate bonds would no longer have a synthetic fixed-rate and the state would be subject to interest rate risk to the extent that the variable-rate bonds were not hedged with another swap or with variable-rate assets. At termination, if the fair value of the swap is negative, the state would owe the counterparty a termination payment equal to the swap's negative fair value; however, if the fair value of the swap is positive, the counterparty would owe the state a termination payment equal to the swap's positive fair value.

Several swap agreements include optional early termination provisions granting the state the right, but not an obligation, to terminate the interest rate swaps at par without a termination payment after an effective date or after the breach of certain counterparty credit ratings.

Rollover Risk: Rollover risk is the risk caused by a mismatch between the amortization of a derivative contract and the underlying hedged bonds. The maturity dates of the state's effective interest rate swaps were designed to extend to the maturity dates of the underlying bonds. However, in the case of the swap associated with the Vet Land Tax Ref Bonds Series 2000 (now a part of state of Texas Veterans Bonds, Taxable Refunding Series 2014B-3 attributable to bond refunding) the

state will be subject to rollover risk if the counterparty exercises the option to terminate the swap contract.

Market-access Risk: Each swap associated with underlying variable-rate debt subject to tender at the option of the bondholder is subject to market-access risk. In the event the state is unable to remarket its variable-rate bonds, the state may choose to refund the variable-rate bonds with fixed-rate bonds and optionally terminate the related interest rate swap agreements. If an early termination event occurs, the state could be required to pay or to receive a substantial termination payment.

Swap Payments and Associated Debt

Aggregate debt service requirements of the state's variable-rate debt and net receipts/payments on associated hedging derivative instruments are disclosed in Note 6.

Contingent Features

Some of the state's derivative instruments include provisions that require the posting of collateral in the event that the contracting agency's credit rating falls below a specified level as issued by Standard & Poor's and Moody's Investor Service. If the contracting agency fails to post eligible collateral, the derivative instrument may be terminated by the counterparty. Note 15 discloses detail about derivatives with contingent features.

Investment Derivatives

Investment derivatives expose the state to certain investment related risks. Note 3 discloses detail about the state's investment derivatives.

Note 8

Leases

The state leases office buildings, computer and office equipment and other assets under a variety of agreements. Although lease terms vary, most leases are subject to biennial appropriation from the Legislature to continue the lease obligations.

Operating Leases

Operating lease payments are recorded as expenditures or expenses during the life of the lease. Rental expenditures or expenses related to operating leases for the year ended Aug. 31, 2019, are \$468.9 million for the primary government, \$2.6 million for discrete component units and \$5.3 million for fiduciary funds. Table 8A presents minimum future rental obligations on non-cancelable operating leases as of Aug. 31, 2019.

Noncancelable Operating Lease Obligations

Additionally, the permanent school fund (PSF), the University of Texas System (UT), the Texas A&M University System (A&M), the Texas Tech University System (TTU) and the University of North Texas System

(UNT) have leased buildings, equipment and land to outside parties under various operating leases. Table 8B presents estimated future lease rental income on non-cancelable operating leases as of Aug. 31, 2019.

Noncancelable Operating Lease Rental Income

Table 8B

August 31, 2019 (Amounts in Thousands)

	Minimum Future Lease Rental Income						
Year	Primary Government		Component Units		Fiduciary Funds		
2020	\$	50,180	\$	371	\$	41	
2021		41,302		107		41	
2022		37,659		14		46	
2023		32,061				46	
2024		28,235				46	
2025 and beyond		784,257				265	
Total	\$	973,694	\$	492	\$	485	

The carrying value of PSF's leased assets is \$225.9 million. The historical cost of PSF's leased buildings is \$11 million and related accumulated depreciation is \$1.8 million. The historical cost of PSF's leased land is \$216.7 million. Depreciation is not recorded on most of PSF's assets because they are held for investment purposes in a permanent fund. Real estate investments are reappraised periodically and the carrying amounts are adjusted when permanent impairments occur. In fiscal 2019, PSF reported contingent rental revenues in the amount of \$2.6 million.

As of Aug. 31, 2019, the carrying value of UT's leased assets is \$195 million. The historical cost of UT's leased buildings is \$253.9 million and related accumulated depreciation is \$78.3 million. The historical cost of UT's leased land is \$19.4 million. UT reported contingent rental revenues of \$459 thousand.

As of Aug. 31, 2019, the carrying value of A&M's leased assets is \$76 million. The historical cost of A&M's leased buildings is \$143.2 million and related accumulated depreciation is \$68 million. The historical

cost of A&M's leased equipment is \$15 thousand and related accumulated depreciation is \$15 thousand. The historical cost of A&M's leased land is \$876.4 thousand.

As of Aug. 31, 2019, the carrying value of Tech's leased assets is \$37.6 million. The historical cost of Tech's leased buildings is \$61.7 million and the related accumulated depreciation is \$24.4 million. The historical cost of Tech's leased land is \$294 thousand.

As of Aug. 31, 2019, the carrying value of UNT's leased assets is \$32.5 million. The historical cost of UNT's leased buildings is \$35.2 million and the related accumulated Depreciation is \$6.7 million. The historical cost of UNT's leased infrastructure is \$10.7 million and the related accumulated depreciation is \$6.7 million.

Capital Leases

Leases that are purchases in substance are reported as capital lease obligations. The capital assets are recorded at the present value of the future minimum lease payments at the inception of the lease plus any cash paid or trade-in value received.

For governmental and business-type activities, the assets and liabilities are recorded in the government-wide financial statements.

GASB Statement No. 88, Certain Disclosures Related to Debt, including Direct Borrowings and Direct Placements, defines debt and establishes additional financial statement note disclosure requirements related to debt obligations of state agencies.

Texas State Technical College (TSTC) has entered into long-term leases for financing the purchase of certain capital assets. Such leases are classified as capital leases - direct borrowings for accounting purposes and are recorded at the present value of the future minimum lease payments at the inception of the lease. Financing leases are secured by the underlying assets being leased.

In fiscal 2018, Texas Tech University (TTU) entered into a direct borrowing agreement for a capital lease with TCF Equipment Finance (TCF) for turf maintenance equipment to be used at the Rawls Golf Course, which is collateralized by this equipment. In the event of default, TCF has the option to declare outstanding and future payments due immediately, assess related interest and payment collection costs and require the return of the equipment, and/or accelerate payments on or terminate any other agreements with TTU. TTU may only terminate early without liability for future payments upon the occurrence of a nonappropriation event and would surrender its right to the equipment and any related proceeds. This agreement was previously reported as a capital lease obligation in fiscal 2018.

A&M has various leases for the purchase of vehicles, software, and equipment where the A&M takes ownership at the end of the lease. These direct financing arrangements are reported as Notes from Direct Borrowings. The related assets are capitalized at the present value of future minimum payments.

The outstanding notes from direct borrowings related to equipment and software contain provisions where, in the event of default, all remaining payments may be declared immediately due or the lessor may repossess the assets.

The financing arrangements for capital improvements contain provisions that, in the event of default, the lessor has the right to take one or any combination of several options. These options include demand immediate payment for all remaining payments, retake possession of the equipment, require the A&M to sell the assets and remit proceeds to the lessor or terminate the escrow agreement and apply any proceeds to the rental payments.

Table 8C is a summary of the future minimum lease payments for capital leases.

Note 9

Retirement Plans

Defined Benefit Pension Plans

The state of Texas has three retirement systems in its financial reporting entity - Employees Retirement System of Texas (ERS), Teacher Retirement System of Texas (TRS) and Texas Emergency Services Retirement System (TESRS). These three retirement systems administer the following six defined benefit pension plans:

- ERS the Employees Retirement System of Texas Plan (ERS Plan), the Law Enforcement and Custodial Officer Supplemental Retirement Plan (LECOS Plan), the Judicial Retirement System of Texas Plan One (JRS1 Plan) and Judicial Retirement System of Texas Plan Two (JRS2 Plan);
- TRS the Teacher Retirement System of Texas Plan (TRS Plan);and
- TESRS the Texas Emergency Services Retirement System Plan (TESRS Plan).

ERS, LECOS, JRS2, TRS and TESRS Plans are administered through trust; JRS1 Plan is operated on a pay-as- you-go basis.

Pension Expense, Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

For the year ended Aug. 31, 2019, the state recognized pension expense of \$6.9 billion. Of this amount, \$4.1 billion was incurred as an employer and \$2.8 billion as a non-employer contributing entity. The reported deferred outflows of resources and deferred inflows of resources related to pensions are identified in Note 27.

Employees Retirement System of Texas (ERS)

The board of trustees of ERS is the administrator of the ERS, LECOS, JRS1 and JRS2 Plans that provide a standard monthly benefit in a life annuity at retirement and death and disability benefits for members. Each of these four plans is considered a single employer defined benefit plan under GASB Statement No. 68, Accounting and Financial Reporting for Pensions. The benefit and

contribution provisions of the ERS Plans are authorized by state law and may be amended by the Legislature.

Employees Retirement System of Texas Plan (ERS Plan)

In addition to the state of Texas, the ERS Plan includes employers that are component units of the state. ERS and the Texas Treasury Safekeeping Trust company, which are blended component units, and the State Bar of Texas, which is a discrete component unit, are also employers of the ERS Plan. Pension activity for the ERS Plan is reported in governmental activities in the state's basic financial statements. Additionally, due to immateriality, separate disclosure for the State Bar of Texas is not presented.

The ERS Plan covers members in employee and elected classes. Employee class includes employees and appointed officers of the agencies of the state of Texas except those who are included in the coverage of TRS, JRS1 and JRS2 Plans. Elected class includes elected state officials not included in the coverage of the JRS1 and JRS2 Plans, members of the Legislature and district and criminal district attorneys.

The monthly benefit may vary by membership class.

The monthly standard annuity of the employee class is determined by a statutory percentage of 2.3 percent of a member's average monthly compensation multiplied by number of years of service credit. The average monthly compensation of the employee class may vary depending on the hire date. For members hired on or before Aug. 31, 2009, the average monthly compensation is the average of the highest 36 months of compensation. For members hired on or after Sept. 1, 2009 and before Sept. 1, 2013, the average monthly compensation is the average of the highest 48 months of compensation. For members hired on or after Sept. 1, 2013, the average monthly compensation is the average of the highest 60 months of compensation.

The monthly standard annuity of the elected class equals the statutory percentage of 2.3 percent of the current state salary of a district judge multiplied by the number of years of service credit. Retirement benefits are automatically adjusted as state judicial salaries change.

ERS issues a stand-alone audited Comprehensive Annual Financial Report (CAFR). Information on vesting and tier requirements may be obtained from ERS' CAFR:

Employees Retirement System of Texas 200 E. 18th Street Austin, Texas 78701

Law Enforcement and Custodial Officer Supplemental Retirement Plan (LECOS Plan)

The LECOS Plan provides a supplemental retirement benefit to some employees in the ERS employee class.

The LECOS Plan covers custodial officers who are certified in accordance with the statutory requirements as having a normal job assignment that requires frequent or infrequent regularly planned contact with inmates managed by hiring institutions. The plan also covers law enforcement officers who have been commissioned by the Commission on Law Enforcement Officer Standards and Education. The monthly benefit amount payable to LECOS Plan members is equal to the excess of total benefit over the regular benefit payable to the same members under the ERS Plan.

Total monthly standard annuity of the LECOS Plan members equals the statutory percentage of 2.3 percent from the ERS Plan plus an additional 0.5 percent from the LECOS Plan of the average monthly compensation multiplied by number of years of service credit. The average monthly compensation of the LECOS Plan members may vary depending on the hire date. For members hired on or before Aug. 31, 2009,

the average monthly compensation is the average of the highest 36 months of compensation. For members hired on or after Sept. 1, 2009 and before Sept. 1, 2013, the average monthly compensation is the average of the highest 48 months of compensation. For members hired on or after Sept. 1, 2013, the average monthly compensation is the average of the highest 60 months of compensation. Information on vesting and tier requirements may be obtained from ERS' CAFR.

Judicial Retirement System of Texas Plan Two (JRS2 Plan)

The JRS2 Plan covers judges, justices and commissioners of the Supreme Court, the Court of Criminal Appeals, the Court of Appeals, District Courts and certain commissioners to a court who first became members after Aug. 31, 1985.

The monthly benefit for members of the JRS2 Plan is equal to 50 percent of the salary for the position from which the member retired and is increased by 10 percent of final compensation if in office within one year of benefit commencement. Information on vesting and tier requirements may be obtained from ERS' CAFR.

The membership data for the ERS, LECOS and JRS2 Plans as of the measurement date of Aug. 31, 2018 is presented in table 9A.

Employees Retirement System's Membership Table 9A **ERS LECOS** IRS2 Plan Plan Plan Retirees and Beneficiaries Currently Receiving Benefits 111,361 13,080 393 Terminated Employees Entitled to Benefits But Not Yet Receiving Them 119,736 19,842 153 Current Employees Vested and Non-Vested 141,535 37,167 561 **Total Members**

The contribution rates for the state and the members are based on a percentage of the monthly gross compensation for each member. The contribution requirements for the ERS, LECOS and JRS2 Plans for the measurement period of fiscal 2018 are presented in table 9B.

372,632

70,089

1,107

Required Contribution Rates Table 9B

	Employer				Members	
Plan	Employee Class	Elected Class – Legislators	Elected Class – Other	Employee Class	Elected Class – Legislators	Elected Class – Other
ERS	10%	10%	10%	9.5%	9.5%	9.5%
LECOS*	1.6%**	N/A	N/A	0.5%	N/A	N/A
JRS2	15.663%	N/A	N/A	7.5%	N/A	N/A

- * Amount contributed is supplemental to amount contributed for the employee class of the ERS Plan.
- The 1.6% consists of 0.5% of member payroll and a portion of court costs collected under Local Government Code, Section 133.102. The contribution from the court costs equals approximately 1.1% of payroll.

The state's contributions recognized by the ERS, LECOS and JRS2 Plans during the fiscal 2018 measurement period were \$697.2 million, \$26.1 million and \$12.6 million respectively.

The total pension liability is determined by an annual actuarial valuation. The methods and assumptions applied, except discount rate, in the actuarial valuation were based on an experience study covering the five-year period from Sept. 1, 2011 through Aug. 31, 2016. Table 9C presents the actuarial methods and assumptions used to measure the total pension liability for the ERS, LECOS and JRS2 Plans as of the Aug. 31, 2018, measurement date.

	ERS Plan	LECOS Plan	JRS2 Plan

	Texas Mortality Tables with generational mortality improvements projected from the year 2017, which is based on the most recent Ultimate MP scale as published by Retirement Plans Experience					
	Committee of the Society of Actuaries. Rates for male law enforcement and custodial officers are set forward one year.					

Table 9D presents the single blended rate applied to measure the total pension liability, the long-term expected rate of return on pension plan investments and the 20-year municipal bond rate for the ERS, LECOS and JRS2 Plans.

RS Plan 5.69%	LECOS Plan	JRS2 Plan
3.07/0	4 48%	7.50%
7.50%	7.50%	7.50%
3.69%	3.69%	N/A **
2049	2038	N/A **
et Data/Yi	eld Curve/Data r	nunicipal
	3.69% 2049 elity Indexet Data/Yie only fede	3.69% 3.69%

The fiduciary net position for the ERS and LECOS Plans is projected to be depleted in fiscal 2049 and 2038 respectively. As a result, the long-term expected investment rate of return was applied to projected benefit payments through fiscal 2048 for the ERS Plan and fiscal 2037 for the LECOS Plan. The municipal bond rate was applied to all remaining projected benefit payments after fiscal 2048 for the ERS Plan and after fiscal 2037 for the LECOS Plan. The current contribution rates are expected to eliminate the unfunded actuarial accrued liability for the JRS2 Plan in 69 years. As a result, the municipal bond rate and depletion year do not apply to the JRS2 Plan.

The projections of cash flows used to determine this single discount rate assumed that plan member and employer contributions will be made at the current statutory levels and remain a level percentage of payroll. The projected cash flows from the employers are based on contributions for the most recent five-year period as of the measurement date, adjusted on consideration of subsequent events. There have been indicators of the Legislature's commitment to increase funding for the pension funds. The Legislature passed House Bill No. 9 in the 84th legislative session during fiscal 2015 to increase the member contribution rates for fiscal 2016 and 2017. The state contribution rates also increased as a result of this legislative session. The Legislature also maintained some changes made by Senate Bill No. 1459 in the 83rd legislative session. There were no changes made to the contribution levels in the 85th legislative session and therefore, the projected employer contributions remain at the fiscal 2017 funding level.

The long-term expected rate of return on plan investments was developed using a building-block method with assumptions including asset class of investment portfolio, target allocation, real rate of return on investments, and inflation factor. Under this method, best estimate ranges of expected future real rates of return (expected returns, net of investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

The target allocation and best estimates of arithmetic real rates of return for each major asset class for the ERS, LECOS and JRS2 Plans' investment portfolio are presented in table 9E.

Asset Class	Target Allocation	Long-Term Expected Arithmetic Real of Return
Global Equity	50%	3.91%
Global Credit	11%	0.57%
Opportunistic Credit	3%	0.20%
Intermediate Treasuries	11%	0.29%
Real Estate	12%	0.90%
Infrastructure	7%	0.49%
Hedge Funds	5%	0.31%
Cash	1%	0.02%

Sensitivity analysis was performed on the impact of changes in the discount rate on the state's net pension liability. The results of the analysis for the ERS, LECOS and JRS2 Plans are presented in table 9F.

Sensitivity of Net Pension Liability to Changes in Discount Rate*

Table 9F

(Amounts in Thousands)

	1% Decrease	Current Discount Rate	1% Increase

Discount Rate	6.50%	7.50%	8.50%
NPL	\$ 81,917	\$ 34,392	\$ (6,543)

^{*} Positive amounts indicate the pension plan's fiducuary net position (FNP) is projected to be insufficient to make projected benefit payments, whereas negative amounts indicate the FNP is sufficient to make projected benefit payments.

The pension plan's fiduciary net position is determined using economic resources measurement focus and accrual basis of accounting, which is the same basis used by ERS. Benefits and refunds of contributions are recognized when due and payable in accordance with the terms of the plan. Investments of the pension trust fund are reported at fair value in accordance with GASB Statement No. 72, Fair Value Measurement and Application. More detailed information on the plan's investment valuation, investment policy, assets and fiduciary net position may be obtained from ERS' fiscal 2018 CAFR.

The state's total pension liability is based on an actuarial valuation performed as of Aug. 31, 2018. For fiscal 2019 reporting, the measurement date of the state's net pension liability is Aug. 31, 2018. The schedule of changes in the state's net pension liability for the fiscal year ended Aug. 31, 2019 is presented on table 9G.

* The change in the total pension liability due to the change in the single discount rate is included as an assumption change.

There have been no changes to the benefit terms of the plan since the prior measurement date.

For the fiscal year ended Aug. 31, 2019, the state recognized pension expense of \$2.9 billion, \$134.4 million and \$6.8 million respectively for the ERS, LECOS and JRS2 Plans. At Aug. 31, 2019, the state reported deferred outflows of resources and deferred inflows of resources from the sources for these plans in table 9H.

(Amounts in Thousands)						
	ER	S Plan	LECO	S Plan	JRS	2 Plan
	Deferred Outflows of Resources	Deferred Inflows of Resources	Deferred Outflows of Resources	Deferred Inflows of Resources	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ 118,869	\$	\$	\$ 41,565	\$ 2,114	\$ 2,192
Changes of assumptions	1,222,802	1,409,817	182,485	153,508	4,629	23,542

Thereafte	T		

Positive amounts indicate increase in pension expense; negative amounts indicate decrease in pension expense.

Judicial Retirement System of Texas Plan One (JRS1 Plan)

The JRS1 Plan is a single-employer defined benefit pension plan that is not administered through trust.

The JRS1 Plan covers the same kind of membership as the JRS2 Plan except JRS1 Plan members began membership prior to Sept. 1, 1985.

As a result of new judicial officers participating in the JRS2 Plan, the JRS1 Plan membership continues to decrease. Table 9J presents the membership for the JRS1 Plan as of Aug. 31, 2018.

Judicial Retirement System of Texas Plan One (JRS1 Plan)'s Membership Table 9J Retirees and Beneficiaries Currently Receiving Benefits 337 Current Employees Vested and Non-Vested 7 Total Members 344

Members are required to contribute a percentage of their monthly gross compensation to the general revenue fund, and the state is obligated to make appropriations from the general revenue fund in an amount sufficient to pay benefits on a pay-as-you-go basis. The contribution requirements are statutorily established like the other ERS Plans.

The total pension liability is determined by an annual actuarial valuation. The methods and assumptions applied in the actuarial valuations were based on an experience study covering the five-year period from Sept. 1, 2011 through Aug. 31, 2016. Table 9K presents the actuarial methods and assumptions used to measure the total pension liability for the JRS1 Plan as of the Aug. 31, 2018 measurement date.

2.75% compounded annually on Sept. 1

There have been no changes to assumptions, other inputs or the benefit terms of the plan since the prior measurement date.

Sensitivity analysis was performed on the impact of changes in the discount rate on the state's total pension liability. The results of the analysis for the JRS1 Plan are presented in table 9L.

Sensitivity of Total Pension Liability to Changes in Discount Rate

Table 9L

(Amounts in Thousands)

	1% Decrease	Current Discount Rate	1% Increase
JRS1 Plan			
Discount Rate	2.69%	3.69%	4.69%
TPL	\$278,742	\$255,356	\$235,208

The state's total pension liability is based on an actuarial valuation performed as of Aug. 31, 2018. For fiscal 2019 reporting, the measurement date of the state's total pension liability is Aug. 31, 2018. The schedule of changes in the state's total pension liability for the fiscal year ended Aug. 31, 2019 is presented on table 9M.

Schedule of Changes in Total Pension Liability **

Table 9M

As of Measurement Date of August 31, 2018 (Amounts in Thousands)

	JRS1 Plan	
Total Pension Liability		
Service Cost	\$ 411	
Interest on the Total Pension Liability	9,071	
Difference between Expected and Actual		
Experience of the Total Pension Liability	(1,643)	
Assumption Changes*	(5,968)	
Benefit Payments and Refunds	(23,057)	
Net Change in Total Pension Liability	(21,186)	
Total Pension Liability – Beginning	276,542	
Total Pension Liability – Ending	\$255,356	

- * The change in the total pension liability due to the change in the single discount rate is included as an assumption change.
- ** There are no assets accumulated in a trust that meets the criteria in Paragraph 4 of GASB Statement No. 73 to pay related benefits.

For the fiscal year ended Aug. 31, 2019, the state recognized pension expense of \$1.9 million for the JRS1 Plan. Since the expected remaining service lives is one year, at Aug. 31, 2019, the state did not report deferred outflows of resources and deferred inflows of resources related to pensions for (1) Differences between

expected and actual experience and (2) Changes of assumptions.

The \$21.5 million reported as deferred outflows of resources resulting from transactions subsequent to the measurement date for the JRS1 Plan will be recognized as a reduction in the total pension liability for the year ending Aug. 31, 2020.

During the measurement period of fiscal 2019, ERS' calculated single discount rate decreased from 5.69 percent to 4.42 percent, from 4.48 percent to 3.29 percent and from 7.50 percent to 5.45 percent for ERS, LECOS and JRS2 Plans, respectively. This is estimated to increase the net pension liability for the plans accordingly for fiscal 2020: ERS by \$9.8 billion, LECOS by \$482.6 million and JRS2 by \$157.7 million.

Teacher Retirement System of Texas (TRS)

Teacher Retirement System of Texas Plan (TRS Plan)

TRS is the administrator of the TRS Plan, a costsharing, multiple-employer defined benefit pension plan with a special funding situation.

The employers of the TRS Plan include the state of Texas, TRS, the state's public schools, education service centers, charter schools, community and junior colleges. All employees of public, state-supported education institutions in Texas who are employed for one-half or more of the standard workload and not exempted from membership under Texas Government Code, Title 8, Section 822.002 are covered by the system. Employees of TRS and state of Texas colleges, universities and medical schools are members of the TRS Plan.

The TRS Plan provides retirement, disability annuities and death and survivor benefits. The benefit and contribution provisions of the TRS Plan are authorized by state law and may be amended by the Legislature. The pension benefit formulas are based on members'

average annual compensation and years of service credit. The standard annuity is 2.3 percent of the average of the five highest annual salaries multiplied by years of service credit. For grandfathered members who were hired on or before Aug. 31, 2005, and meet certain criteria, the standard annuity is based on the average of the three highest annual salaries. The plan does not provide automatic cost of living adjustments (COLAs).

TRS issued a stand-alone audited Comprehensive Annual Financial Report (CAFR). The TRS CAFR may be obtained from:

Teacher Retirement System of Texas 1000 Red River Street Austin, Texas 78701-2698

The state is both an employer and a non-employer contributing entity under the TRS Plan. The state makes contributions to the plan for its employees as well as the employees of the Texas public school districts. During the measurement period of 2018 for fiscal 2019 reporting, the amount of the state's contributions recognized by the plan was \$553 million for the state as an employer and \$1.7 billion for the state as a non-employer contributing entity. Similar to the ERS, LECOS and JRS2 Plans, the contribution rates are based on a percentage of the monthly gross compensation for each member. The contribution requirements for the state and the members in the measurement period of fiscal 2018 are presented in table 9N.

Required Contribution Rat	es

Non-Employer Contributing Entity (State)	6.8%
Employees	7.7%

A change was made in the measurement date of the total pension liability for the measurement year ending

Aug. 31, 2018. The actuarial valuation was performed as of Aug. 31, 2017. Updated procedures were used to roll forward the total pension liability to Aug. 31, 2018. This is the first year TRS used the roll forward procedures. Table 9O presents the actuarial methods and assumptions used to measure the total pension liability as of the Aug. 31, 2018 measurement date.

Actuarial Methods and Assumptions Table 90 TRS Plan Actuarial Valuation Date August 31, 2017, rolled forward to 8/31/2018 Actuarial Cost Method Individual Entry Age Normal Asset Valuation Method Market Value Actuarial Assumptions: Discount Rate 6.907% Long-term Expected Return 7.25% Municipal Bond Rate 3.69%* Inflation 2.3% Salary Increase 3.05% to 9.05% including inflation Last year ending Aug. 31 in projection period (100 years) 2116 Mortality Active 90% of the RP 2014 Employee Mortality Tables for males and females Post-Retirement 2018 TRS Healthy Pensioner Mortality **Tables** Ad Hoc Post-Employment Benefit Changes None * The source of the municipal bond rate is the Fixed Income Market Data/Yield Curve/Data Municipal bonds with 20 years to maturity that include only federally tax-exempt municipal bonds as reported in Fidelity Index's "20-Year Municipal GO AA Index."

The actuarial assumptions used in the valuation were primarily based on the result of an actuarial experience study for the three-year period ending Aug. 31, 2017, and adopted in July 2018. The mortality rates were based on tables identified in table 9O.

The following assumptions and other inputs have been adopted since the prior valuations and significantly increased the net pension liability:

a. Total pension liability as of Aug. 31, 2018 was developed using a roll forward method of the Aug. 31, 2017 valuation,

- b. Demographic and economic assumptions were updated based on the experience study performed for TRS for the period ending Aug. 31, 2017,
- c. Discount rate changed from 8.000 percent as of Aug. 31, 2017, to 6.907 percent as of Aug. 31, 2018,
- d. Long-term assumed rate of return changed from 8.00 percent to 7.25 percent and
- e. Change in the long-term assumed rate of return combined with the change in the single discount rate was the primary reason for the increase in the net pension liability.

There have been no changes to the benefit provisions of the plan since the prior measurement date.

The discount rate used to measure the total pension liability for the plan was 6.907 percent as of the end of the measurement year; as of the beginning of the measurement year, the discount rate was 8.000 percent. The single discount rate was based on the expected rate of return on pension plan investments of 7.25 percent and a municipal bond rate of 3.69 percent. The projection of cash flows used to determine this single discount rate assumed that contributions from active members, employers and non-employer contributing entity make their contributions at the statutorily required rates. It is assumed that future employer and state contributions will be 7.76 percent of payroll. This includes a factor for the rehired retirees and the non-Old-Age Survivors, and Disability Insurance surcharge. Under these assumptions, the pension plan's fiduciary net position is projected to be sufficient to make all future pension benefit payments through the year 2069. Therefore, the long-term expected rate of return on pension plan investments was applied to projected benefit payments through the year 2069, and the municipal bond rate thereafter.

The long-term expected rate of return on plan investments was developed using a building-block method with assumptions including asset class of invest-

ment portfolio, target allocation, real rate of return on investments and inflation factor. Under this method, best estimate ranges of expected future real rates of return (net of investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long- term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

The target allocation and best estimates of geometric real rates of return for each major asset class for the plan's investment portfolio, along with the expected contribution to long-term portfolio returns, are presented in table 9P.

Table 9P	Target Allocation*	Long-Term Expected Geometric Real Rate of Return	Expected Contribution to Long-Term Portfolio Return

	State as N	Non-Employer Contribut	ing Entity
		Current	
	1% Decrease	Discount Rate	1% Increase
	(5.907%)	(6.907%)	(7.907%)
	\$ 42,337,052	\$ 28,051,905	\$ 16,487,232

The pension plan's fiduciary net position is determined using economic resources measurement focus and accrual basis of accounting, which is the same basis used by TRS. Benefits and refunds of contributions are recognized when due and payable in accordance with the terms of the plan. Investments are reported at fair value. Fair value is a market-based measurement, not an entity-specific measurement. It is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. Measurement, recognition, or disclosure of an asset or liability depends on the aggregation or disaggregation of the unit of account of the asset or liability. TRS utilizes one or more of the following valuation techniques in order to measure fair value: the market approach, the cost approach and the income approach. More detailed information on the plan's investment policy, assets and fiduciary net position, may be obtained from TRS' fiscal 2018 CAFR.

At Aug. 31, 2019, the state reported a liability of \$9 billion for its proportionate share of the collective net pension liability as an employer and a liability of

\$28.1 billion for its proportionate share of the collective net pension liability as a non-employer contributing entity. The collective net pension liability was measured as of Aug. 31, 2018, and the total pension liability used to calculate the collective net pension liability was determined by an actuarial valuation as of Aug. 31, 2017, rolled forward to Aug. 31, 2018. The state's proportion increased from 15.56 percent at Aug. 31, 2017, to 16.42 percent at Aug. 31, 2018, and decreased from 51.82 percent to 50.96 percent for its role as an employer and non- employer contributing entity respectively. The state's proportions of the collective net pension liability were based on

its contributions to the pension plan relative to the contributions of all the employers and non-employer contributing entity to the plan for the period Sept. 1, 2017 through Aug. 31, 2018.

The state recognized pension expense for its employees' pension and grant expense for the pension of Texas public school district and junior college employees. For the year ending Aug. 31, 2019, the state recognized pension expense of \$1 billion and grant expense of \$2.8 billion. At Aug. 31, 2019, the state reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources in table 9R.

Table 9R (Amounts in Thousands)				n-Employer
TRS Plan	Deferred Outflows of Resources	Employer Deferred Inflows of Resources	Contribut Deferred Outflows of Resources	ing Entity Deferred Inflows of Resources
Difference between expected and actual experience	\$ 56,322	\$ 221,704	\$ 174,853	\$ 688,283
Changes of assumptions	3,257,852	101,808	10,114,063	316,065
Net difference between projected and actual investment return		171,448		532,265
Change in proportion and contribution difference	834,130	666,418		1,583,249
Contributions subsequent to the measurement date	612,078		2,326,680	
Total	\$4,760,382	\$1,161,378	\$12,615,596	\$3,119,862

The \$612.1 million and \$2.3 billion reported as deferred outflows of resources resulting from contributions subsequent to the measurement date for the state as an employer and non-employer contributing entity, respectively, will be recognized as a reduction in the net pension liability for the year ending Aug. 31, 2020.

Amounts reported as deferred outflows and inflows of resources related to pensions will be recognized in pension expense and grant expense as follows in table 9S.

Amortization Impact of Deferred Outflows and Inflows of Resources on Pension/Grant Expense

Table 95

(Amounts in Thousands) Year Ended August 31:

	TRS Plan		
	State as Employer Pension Expense*	State as Non-Employer Contributing Entity Grant Expense*	
2020	\$ 709,045	\$1,796,632	
2021	348,245	676,496	
2022	279,453	454,094	
2023	652,507	1,568,162	
2024	611,020	1,594,542	
Thereafter	386,657	1,079,128	

* Positive amounts indicate increase in pension or grant expense.

During the measurement period of fiscal 2019, TRS' board increased the discount rate from 6.907 percent to 7.250 percent and the Legislature authorized with Senate Bill 3 a \$2,700 increase in benefit payments for eligible active members in fiscal 2020. This is expected to decrease the plan's net pension liability by \$3.1 billion for fiscal 2020 of which the state's proportionate share is estimated to decrease \$502.3 million and \$1.6 billion for its role as an employer and non-employer contributing entity respectively.

Texas Emergency Services Retirement System (TESRS)

Texas Emergency Services Retirement System Plan (TESRS Plan)

TESRS is an agency of the state of Texas and the administrator of the TESRS Plan, a cost-sharing multiple- employer defined benefit pension plan with a special funding situation.

The TESRS Plan provides pension benefits for emergency services personnel who serve without significant monetary remuneration through participating fire or emergency services departments within the state. The TESRS Plan provides pension benefits to members with vested service and their beneficiaries as well as death and disability benefits to active volunteer fire fighters and first responders. The benefit and contribution provisions of the TESRS Plan are set by the TESRS board authorized by state law and may be amended by the board. Members are 50 percent vested after the tenth year of service, with the vesting percent increasing 10 percent for each of the next five years of service. For a vested member, the monthly pension benefit equals the member's vested percent multiplied by six times the average monthly contribution of the governing body (of the participating department) over the member's years of qualified service. For years of service in excess of 15 years, the monthly benefit is increased at the rate of 6.2 percent compounded annually. There is no provision for automatic postretirement benefit changes.

Contribution provisions are composed of two parts: Part One contributions and Part Two contributions. Part One contributions are determined by the TESRS board of trustees and Part Two contributions are actuarially determined.

Part One contributions: The governing bodies of each participating department are required to make contributions for each month a member performs emergency services for the department. The contributions from the governing bodies are at a minimum rate of \$36 per member and there is no limit to the maximum rate. Individuals who are members of the TESRS Plan are not required, nor allowed, to make contributions. The state is required to contribute an amount necessary to make the system "actuarially sound" each year, which may not exceed one-third of the total contributions made by participating governing bodies in a particular year.

Part Two contributions: In case the expected future annual contributions from the state are not

enough with the Part One contributions to provide an adequate contribution arrangement as determined by the most recent actuarial valuation, an actuarially determined contribution not to exceed 15 percent of the Part One contributions is to be actuarially adjusted every two years based on the most recent actuarial valuation. Based on the actuarial valuation as of Aug. 31, 2018, the Part Two contributions are not required for an adequate contribution arrangement.

The state of Texas is not an employer of the members under the TESRS Plan. However, the state makes contributions directly to the TESRS Plan for members of the participating fire or emergency services departments in the state. During the measurement period of 2018 for fiscal 2019 reporting, the amount of the state's contributions recognized by the plan was \$1.3 million.

The total pension liability is determined by an actuarial valuation as of Aug. 31, 2018. Table 9T presents the actuarial methods and assumptions used to measure the total pension liability as of the Aug. 31, 2018 measurement date. The actuarial assumptions used in the valuation were primarily based on the result of an actuarial experience study from 2008 as indicated by Rudd and Wisdom, Inc., TESRS' actuary. There has been no change of actuarial methods and benefit terms since the prior measurement date.

	TESRS Plan
Actuarial Valuation Date	August 31, 2018
Actuarial Cost Method	Entry Age Normal
Amortization Method	Level dollar
Actuarial Assumptions:	
Discount Rate	7.75%
Investment Rate of Return	7.75%
Inflation	3%
Salary Increase	N/A
Mortality	RP-2000 Combined Healthy Lives Mortality Tables for males and for females projected to 2024 by scale AA.
Ad Hoc Post-Retirement	
Benefit Changes	None

The discount rate of 7.75 percent was applied to measure the total pension liability. There has been no change in the discount rate since the prior measurement date. No projection of cash flows was used to determine the discount rate because the Aug. 31, 2018 actuarial valuation showed that expected contributions would pay the normal cost and amortize the unfunded actuarial accrued liability in 30 years using the conservative level dollar amortization method. Because of the 30-year amortization period with the conservative amortization method, TESRS Plan's fiduciary net position is expected to be available to make all projected future benefit payments of current active and inactive members. Therefore, the long-term expected rate of return on the TESRS Plan investments was applied to all periods of projected benefit payments without incorporating the municipal bond rate.

The long-term expected rate of return on the TESRS Plan investments was developed using a building-block method with assumptions including asset class of investment portfolio, target allocation, real rate of return on investments and inflation factor. Under this method, expected future real rates of return (net of investment expense and inflation) are developed for each major asset class. These rates are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. In addition, the final 7.75 percent assumption reflected a reduction of 0.26 percent for adverse deviation.

The target allocation and expected arithmetic real rates of return for each major asset class for the TESRS Plan's investment portfolio are presented in table 9U.

Target Allocation TESRS Plan Table 9U

Asset Class	Target Allocation	Long-Term Expected Arithmetic Net Real Rate of Return*
Equities		
Large Cap Domestic	32.00%	5.81%
Small Cap Domestic	15.00%	5.92%
Developed International	15.00%	6.21%
Emerging Markets	5.00%	7.18%
Master Limited Partnership	5.00%	7.61%
Real Estate	5.00%	4.46%
Domestic Fixed Income	23.00%	1.61%
Total	100.00%	

* The above components are weighted to arrive at an average of 5.01%, which is added to the expected inflation of 3.00%, followed by a reduction of 0.26% for adverse deviation to arrive at the final rate of 7.75%.

Sensitivity analysis was performed on the impact of changes in the discount rate on the state's net pension liability. The results of the analysis are presented in table 9V.

Sensitivity of Net Pension Liability to Changes in Discount Rate Table 9V (Amounts in Thousands) **TESRS Plan** Current Discount 1% Decrease Rate 1% Increase (6.75%)(7.75%)(8.75%)\$ 11,941 \$ 6,009 \$ 2,008

The TESRS Plan's fiduciary net position is determined using economic resources measurement focus and accrual basis of accounting, which is the same basis used by TESRS. Contributions are recognized immediately upon billing, reflecting actual participation in the member fire department during the prior quarter. Benefits are recognized when due and payable in accordance with the terms of the plan. Investments of the TESRS Plan are reported at fair value. The fair value

of investments is based on market prices provided by the fund custodian. For investments where no readily ascertainable market value exists, management, in consultation with their investment advisors, determines the fair values for the individual investments. More detailed information on the plan's investment policy, assets and fiduciary net position may be obtained from the fiscal 2018 audited Annual Financial Report for TESRS:

Texas Emergency Services Retirement System P. O. Box 12577
Austin, Texas 78711

At Aug. 31, 2019, the state reported a liability of \$6 million for its proportionate share of the collective net pension liability as a non-employer contributing entity. The collective net pension liability was measured as of Aug. 31, 2018, and the total pension liability used to calculate the collective net pension liability was determined by an actuarial valuation as of that date. The state's proportion as a non-employer contributing entity decreased from 32.75 percent at Aug. 31, 2017 to 27.75 percent at Aug. 31, 2018. The state's proportion of the collective net pension liability was based on a fiscal 2018 schedule of contributions consisting of Part One contributions by the contributing fire and/or emergency services department members and the appropriated "maximum state contributions" as defined in the Texas Emergency Services Retirement System Act.

The state recognized grant expense as a non-employer contributing entity for the pension of the volunteer emergency services personnel in the state. For the year ending Aug. 31, 2019, the state recognized grant expense of \$1.2 million. At Aug. 31, 2019, the state reported deferred outflows of resources and deferred inflows of resources related to the emergency services personnel's pension from the following sources in table 9W.

Deferred Outflows of Resources and Deferred Inflows of Resources Table 9W (Amounts in Thousancs) **TESRS Plan** State as Non-Employer **Contributing Entity** Deferred Deferred **Outflows** of Inflows of Resources Resources Difference Between Expected and Actual 2 \$ Experience \$ 17 Change of Assumptions 22 Net Difference Between Projected and Actual Investment Return 332 Change in Proportion and Contribution Difference 1,267 Contributions Subsequent to the 1,329 Measurement Date Total \$ 1,353 \$ 1,616

The \$1.3 million reported as deferred outflows of resources resulting from contributions subsequent to the measurement date for the state as a non-employer contributing entity will be recognized as a reduction in the net pension liability for the year ending Aug. 31, 2020.

Amounts reported as deferred outflows and inflows of resources related to the emergency services personnel's pension will be recognized in grant expense in table 9X.

Amortization Impact of Deferred **Outflows and Deferred Inflows of** Resources on Grant Expense* Table 9X (Amounts in Thousands) Year ended August 31: **TESRS Plan** State as Non-Employer **Contributing Entity Grant Expense** 2020 \$(317) (693)2021 2022 (402)2023 (180)2024 Thereafter * Negative amounts indicate decrease in grant expense.

Defined Contribution Pension Plan Optional Retirement Program

The state's contributions to the Optional Retirement Program (ORP) are authorized by Texas Government Code, Chapter 830. Full-time faculty and certain other employees in public higher education are eligible to elect ORP in lieu of the TRS Plan before the 91st day after becoming eligible. It is a one-time irrevocable choice between two distinct plans. ORP is administered by each employer. The Texas Higher Education Coordinating Board develops policies, practices and procedures to provide greater uniformity in the administration of ORP.

ORP is a defined contribution retirement plan in which each participant selects from a variety of investments offered by several insurance and investment companies through annuity contracts or mutual fund investments.

These types of investments are authorized by Internal Revenue Code, Section 403(b). With the purchase of these individual contracts, the state has effectively transferred the obligation for the payment of benefits to the companies. Participants vest in ORP after one year of participation.

The contributory percentages of participant salaries provided by each participant and the state were 6.65 percent and 6.6 percent, respectively, for fiscal 2019. Institutions and agencies authorized under state law to provide ORP to their employees may supplement the state contribution at a rate of up to 1.9 percent of payroll.

Individual accounts are maintained at the insurance and investment companies selected by each ORP participant. Separate financial statements for ORP are not prepared because the state retains no assets in a trust or equivalent arrangement, no liability for plan performance and has very limited administrative involvement.

The employers of ORP are institutions of higher education, one educational state agency and some two-year college institutions that are not part of the state reporting entity. State entity participation in ORP for

fiscal 2019 resulted in participant contributions of \$279 million and employer contributions of \$334.3 million.

As of Aug. 31, 2019, ORP had 37,046 participants. The total participant contributions were \$309.3 million and total employer contributions were \$367.2 million. Additional information for ORP is included in the fiscal 2019 *ORP Participation Report Summary* published annually by the Texas Higher Education Coordinating Board (THECB). The report is available on THECB's website at www.thecb.state.tx.us. The report can also be obtained from:

Statewide Coordinator, Optional Retirement Program
Texas Higher Education Coordinating Board
P. O. Box 12788
Austin, Texas 78711

Note 10

Deferred Compensation

The state of Texas offers two deferred compensation plans to all state employees. One was established in accordance with Internal Revenue Code, Section 457. The second was established in accordance with Internal Revenue Code, Section 401(k). All costs of administering and funding these programs are the responsibility of plan participants. The assets of the two plans remain the property of the contributing employees and are not presented in the accompanying financial statements. The state makes no contributions to either plan, the assets do not belong to the state and the state has no liability related to the plans.

The University of Texas System (UT) offers two deferred compensation plans. The first one, for UT employees, was created in accordance with Internal Revenue Code, Section 457(b), where all UT employees are eligible to participate in UT's plan and do not participate in the plan offered by the state of Texas. All investments, amounts, property and rights held under the

deferred compensation trust fund are held for the exclusive benefit of participants and beneficiaries at the fair market value of the plan account for each participant. UT has no liability under the plan. The second one, Physician Referral Service Supplemental Retirement Plan (SRP)/Retirement Benefit Plan (RBP), was created for physicians of the University of Texas M.D. Anderson Cancer Center (M.D. Anderson), a component unit of UT. It was established in accordance with Internal Revenue Code, Section 457(f). Only physicians hired before Jul. 1, 1986, participate in the SRP. The remainder of eligible employees participates in the RBP. Assets of the SRP/RBP remain subject to the claims of the general creditors of M.D. Anderson.

The Texas A&M University System (A&M) offers a deferred compensation plan created in accordance with Internal Revenue Code, Section 457(f). It allows A&M to defer income for eligible participants without regard to the amount deferred or an adverse impact on other retirement plans in which the participant is enrolled. All A&M employees are eligible to participate in this plan subject to the approval of the A&M board of regents, chancellor or any chancellor-designated member chief executive officer.

Note 11

Postemployment Benefits Other Than Pensions

The state of Texas has two retirement systems and two university systems in its financial reporting entity that administer the state's Other Postemployment Benefit (OPEB) plans in addition to providing pension benefits - Employees Retirement System of Texas (ERS), Teacher Retirement System of Texas (TRS), Texas A&M University System (A&M), and the University of Texas System (UT). These two retirement systems and two university systems administer the following four defined benefit OPEB plans:

- ERS the State Retiree Health Plan (SRHP);
- TRS the Texas Public School Retired Employees Group Insurance Program (TRS-Care);
- A&M the Texas A&M University System Retiree Group Insurance Program (A&M Plan); and
- UT the University of Texas System Employee
 Group Insurance Program (UT Plan).

SRHP and TRS-Care are administered through trust, while the A&M Plan and UT Plan are not; and all OPEB plans are operated on a pay-as-you-go basis. These benefits are authorized by statute and contributions are established by the General Appropriations Act.

OPEB Expense, Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

For the year ended Aug. 31, 2019, the state recognized OPEB expense of \$648.7 million. Of this amount, negative \$481.3 million was incurred as an employer and \$1.1 billion as a non-employer contributing entity. The reported deferred outflows of resources and deferred inflows of resources related to OPEB are identified in Note 27.

Employees Retirement System of Texas

The state of Texas contributes to SRHP, a costsharing, multiple-employer defined benefit OPEB plan with a special funding situation. ERS' Board of Trustees administers SRHP.

ERS issued a stand-alone audited Comprehensive Annual Financial Report (CAFR). The ERS CAFR may be obtained from:

Employees Retirement System of Texas

200 E. 18th Street Austin, Texas 78701

Plan Description

SRHP provides postemployment health care, life and dental insurance coverage for participants on a payas-you-go basis as authorized by Texas Insurance Code, Chapter 1551. The benefit and contribution provisions of the SRHP are authorized by state law and may be amended by the Legislature. Retirees must meet certain age and service requirements and have at least 10 years of service at retirement to participate in the plan. Surviving spouses and dependents of retirees are also covered by the plan. The plan does not provide automatic cost of living adjustments.

Contributors to SRHP include active and retired members, employers, and the state of Texas as the only non-employer contributing entity. Employers include state of Texas agencies and universities, community and junior colleges, and other entities specified by the Legislature with the state being the principal participating employer.

Funding Policy

The state is both an employer and a non-employer contributing entity in SRHP. The state makes contributions to the plan for its employees as well as part of the premiums for the junior and community colleges. Retirees pay any premium over and above the employer contribution. The employer does not contribute toward dental or optional life insurance. Surviving spouses and their dependents do not receive any employer contributions. During the measurement period of 2018, for fiscal 2019 reporting, the amount of the state contributions recognized by the plan was \$276.5 million for the state as employer and \$19.9 million for the state as a non-employer contributing entity.

The contribution requirements for the employers of SRHP during the measurement period are presented in table 11A.

Required Contribution Rates – Retiree Health and Basic Life Premium

Table 11A

Level of Coverage	SRHP
Retiree Only	\$ 622
Retiree and Spouse	1,335
Retiree and Children	1,099
Retiree and Family	1,812

Measurement Date

ERS has elected to use a measurement date that is twelve months in advance of the fiscal year, with a measurement date of Aug. 31, 2018 for fiscal year ended Aug. 31, 2019.

Actuarial Methods and Assumptions

The total OPEB liability is determined by an annual actuarial valuation. Table 11B presents the actuarial methods and assumptions used to measure

> the total OPEB liability as of the specified date.

The many actuarial assumptions used in the valuation were primarily based on the result of actuarial experience studies performed by the ERS and TRS retirement plan actuaries for the period Sept. 1, 2011 to Aug. 31, 2016 for state agency members and for the period Sept. 1, 2010 to Aug. 31, 2017 for higher education members. The mortality rates were based on the tables identified in table 11B.

^{*} The source of the municipal bond rate is the Bond Buyer Index of General Obligation Bonds with 20 years to maturity and mixed credit quality. The bonds' average credit quality is roughly equivalent to Moody's Investors Service's Aa2 rating and Standard & Poor's Corp.'s AA.

The following assumptions and other inputs have been adopted since the prior valuation to reflect plan experience and trends as expected by ERS and the actuaries attesting to the results of the valuation:

- a. demographic assumptions (including rates of retirement, disability, termination, and mortality, and assumed salary increases) for higher education members have been updated to reflect assumptions recently adopted by the Trustees from TRS,
- assumed expenses, assumed Per Capita Health
 Benefit Costs and assumed Health Benefit Cost,
 Retiree Contribution and Expense trends have
 been updated to reflect recent experience and its
 effects on our short-term expectations,
- c. percentage of current retirees and their spouses not yet eligible to participate in the HealthSelectMedicare Advantage Plan and future retirees and their spouses who will elect to participate in the plan at the earliest date at which coverage can commence,
- d. percentage of future retirees assumed to be married and electing coverage for their spouse have been updated to reflect recent plan experience and expected trends and
- e. the discount rate assumption was increased from 3.51 percent to 3.96 percent to utilize the updated yield or index rate for 20-year, tax-exempt general obligation municipal bonds rated AA/Aa (or equivalent) or higher in effect on the measurement date.

The only benefit revisions that have been adopted since the prior valuation is an increase in the out-of-pocket maximum for both HealthSelect and Consumer Directed HealthSelect for those HealthSelect retirees and dependents for whom Medicare is not primary. These minor benefit changes have been reflected in the following fiscal 2019 Assumed Per Capita Health Benefit Costs.

Other future actuarial methods may differ significantly from the current measurement period due to such factors as the following: plan experience, changes in economic or demographic assumptions, methodology used and changes in plan provisions or applicable laws.

The discount rate that was used to measure the total OPEB liability for the plan is the municipal bond rate of 3.96 percent as of the end of the measurement year; as of the beginning of the measurement year, the discount rate was 3.51 percent. Projected cash flows into the plan are equal to projected benefit payments out of the plan. As the plan operates on a pay-as-you-go basis and is not intended to accumulate assets, there is no long-term expected rate of return.

Sensitivity analysis was performed on the impact of changes in the discount rate on the state's net OPEB liability. The results of the analysis are presented in table 11C.

Net OPEB Liability, Deferrals and OPEB expense

The OPEB plan's fiduciary net position is determined using economic resources measurement focus and accrual basis of accounting, which is the same basis used by ERS. Benefits and refunds of contributions are recognized when due and payable in accordance with the terms of the plan.

At Aug. 31, 2019, the state reported a liability of \$25.3 billion for its proportionate share of the collective net OPEB liability as an employer, which was comprised of a current portion of \$562.4 million and a non-current portion of \$24.7 billion, and a liability of \$1.8 billion for its proportionate share of the collective net OPEB liability as a nonemployer contributing entity, which was comprised of a current portion of \$40.4 million and a non-current portion of \$1.8 billion. The collective

net OPEB liability was measured as of Aug. 31, 2018, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of that date. The state's proportion decreased from 89.45 percent at Aug. 31, 2017, to 85.44 percent at Aug. 31, 2018, and increased from 3.81 percent to 6.14 percent for its role as employer and non-employer contributing entity respectively. The state's proportions of the collective net OPEB liability was based on its contributions to the OPEB plan relative to the contributions of all the employers and non-employer contributing entity to the plan for the period Sept. 1, 2017 through Aug. 31, 2018.

The state recognized OPEB expense for its employees' OPEB and grant expense for the OPEB of the junior and community college employees. For the year ending Aug. 31, 2019, the state recognized OPEB expense of negative \$445.9 million and grant expense of \$88.1 million. At Aug. 31, 2019, the state reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources in table 11E.

Deferred	Outflows and	Deferred	Inflows of	Resources
Table 11E				

(Amounts in Thousands)

The \$330.3 million and \$26.6 million reported as deferred outflows of resources resulting from contributions subsequent to the measurement date for the state as employer and non-employer contributing entity respectively will be recognized as a reduction in the net OPEB liability for the year ending Aug. 31, 2020.

Amounts reported as deferred outflows and inflows of resources related to OPEB will be recognized in OPEB expense in the following years as reported in table 11F for SRHP.

Amortization Impact of Deferred Outflows and Inflows of Resources on OPEB/Grant Expense

Teacher Retirement System of Texas

The state of Texas contributes to TRS-Care, a costsharing, multiple-employer defined benefit OPEB plan with a special funding situation. TRS' board of trustees (Board) administers TRS-Care.

TRS issued a stand-alone audited Comprehensive Annual Financial Report (CAFR). The TRS CAFR may be obtained from:

Teacher Retirement System

1000 Red River Street Austin, Texas 78701-2698

Plan Description

TRS-Care provides basic and optional group insurance coverage for participants on a pay-as-you-go basis as authorized by Texas Insurance Code, Chapter 1575. Basic coverage includes participation in a major medical group health insurance plan with deductibles based upon enrollment in Part A or Part B of Medicare or non-Medicare participants may pay premiums to participate in one of the two standard insurance plans with more comprehensive benefits. The benefit provisions of TRS-Care are authorized by state law and may be amended by the Board. The Board may adopt rules, plans, procedures and orders reasonably necessary to administer the program, including minimum benefits and financing standards. Retirees must meet certain age and service requirements, have at least 10 years of service at retirement and be a member of the TRS Pension System in order to participate in the plan.

The plan does not provide automatic cost of living adjustments.

Contributors to TRS-Care include active and retired members, employers, and the state of Texas as the only non-employer contributing entity. Employers include public schools, educational districts, regional education service centers and open-enrollment charter schools whose employees are members of TRS.

The 85th Legislature, Regular Session, passed the following statutory changes in House Bill 3976 which became effective Sept. 1, 2017:

- a. Created a high deductible health plan that provides a zero cost for generic prescriptions for certain preventative drugs and provided a zero premium for disabled retirees who retired disabled on or before Jan. 1, 2017 and are not eligible to enroll in Medicare,
- b. Created a single Medicare Advantage plan and Medicare prescription drug plan for all Medicare-eligible participants,

- Allowed TRS to provide other, appropriate health benefit plans to address the needs of enrollees eligible for Medicare,
- d. Allowed eligible retirees and their eligible dependents to enroll in TRS-Care when the retiree reaches 65 years of age, rather than waiting for the next enrollment period and
- e. Eliminated free coverage under TRS-Care, except for certain disability retirees enrolled during Plan Years 2018 through 2021, requiring members to contribute \$200 per month toward their health insurance premiums.

Funding Policy

The state is a non-employer contributing entity in TRS-Care per Texas Insurance Code, Chapter 1575. There is no continuing obligation to provide benefits beyond each fiscal year. TRS-Care is currently funded on a pay-as-you-go basis and is subject to change based on available funding. Funding is provided by retiree premiums, state contributions, active members and school districts based upon public school district payroll. The Board does not have the authority to set or amend contribution rates. The Texas Insurance Code, Chapter 1575, Sections 202-204 establishes the contribution rates, while the General Appropriations Act from each Legislative session establishes the actual public school contribution rate. Employers are also required to pay a surcharge of \$535 per month when employing a retiree of TRS. During the measurement period of 2018, for fiscal 2019 reporting, the amount of the state contributions recognized by the plan was \$790.2 million. The contribution requirements for the employers of TRS-Care during the measurement period are presented in table 11G.

Required Contribution Rates – Retiree Healthcare

Table 11G

(Amounts in Thousands)

Rate	Amount
0.65 %	\$221,325
1.25 %	395,589
0.75 %	255,797
1.25 %	30,037
	\$902,748
	0.65 % 1.25 % 0.75 %

 Contributions from Federal Funds and Private Grants are remitted by the employer and paid at the state rate.

To alleviate a funding shortfall for the 2018 through 2019 biennium, Senate Bill 1, 85th Legislative Session, provided a one time supplemental contribution in the amount of \$182.6 million and also provided increases in contribution requirements for active employee payroll for the fiscal years ending Aug. 31, 2018 and Aug. 31, 2019. The state contribution rate increased 0.25 percent of active employees payroll to 1.25 percent and the employer contribution rate increased 0.20 percent of active employees payroll to 0.75 percent. House Bill 3976 made the 0.25 percent increase related to the state contribution rate permanent. Additionally, House Bill 30 provided another one time supplemental contribution in the amount of \$212 million bringing the total of supplemental appropriations to \$394.6 million for TRS-Care during the 2018 through 2019 biennium.

Measurement Date

TRS has elected to use a measurement date that is twelve months in advance of the fiscal year, with a measurement date of Aug. 31, 2018 for fiscal year ended Aug. 31, 2019.

Actuarial Methods and Assumptions

A change was made in the measurement date of the total OPEB liability (TOL) for the measurement year ending Aug. 31, 2018. The actuarial valuation was performed as of Aug. 31, 2017. Update procedures were used to roll forward the TOL to Aug. 31, 2018. This is the first year TRS used the roll forward procedures. Table 11H presents the actuarial methods and assumptions used to measure the total OPEB liability as of the specified measurement date.

The many actuarial assumptions used in the valuation were primarily based on the results of actuarial experience studies performed by the TRS retirement plan actuary for the three year period ending Aug. 31, 2017 and adopted in July 2018. The mortality rates were based on tables identified in table 11H.

The following assumptions and other inputs have been adopted since the prior valuations to reflect future plan experience as expected by the actuaries attesting to the results of the valuation:

- Total OPEB Liability (TOL) as of Aug. 31, 2018 was developed using the roll forward method of the Aug. 31, 2017 valuation,
- Adjustments were made for retirees that were known to have discontinued their health care coverage in fiscal year 2018 (this increased TOL),
- Health care trend rate assumption was updated to reflect the anticipated return of the Health Insurer Fee (HIF) in 2020 (this increased TOL),
- d. Demographic and economic assumptions were updated based on the experience study performed for TRS for the period ending Aug. 31, 2017 (this increased TOL) and

Actuarial Methods and Assumptions

Table 11H	
	TRS-Care
Actuarial Valuation Date	August 31, 2017, rolled forward to August 31, 2018
Actuarial Cost Method	Individual Entry Age Normal
Actuarial Assumptions:	
Inflation	2.30 %
Discount Rate	3.69% *
Aging Factors	Based on plan specific experience
Expenses	Third party administrative expenses related to the delivery of health care benefits are included in the age-adjusted claims cost
Salary Increase	3.05% to 9.05% (includes inflation)
Healthcare Cost and Trend Rate	Initially 6.75% for non-Medicare retirees, 9.00% for Medicare retirees and 11.00% for prescription drugs for all retirees; decreasing to an ultimate rate of 4.50% over a period of 9 years. The first year medical trend for Medicare retirees (107.74%) reflects the anticipated return of the Health Insurer Fee (HIF) in 2020.
Election Rates	Normal Retirement Participation: 70% participation prior to age 65 and 75% participation after age 65
Ad Hoc Post-Employment	
Benefit Changes	None
Demographic	The rates of mortality, retirement, termination and disability incidence are identical to the assumptions used to value the pension liabilities of TRS. These assumptions were developed in the experience study performed by TRS for the period ending Aug. 31, 2017.
Mortality	
Post-Retirement	Tables based on the 2018 TRS of Texas Healthy Pensioner Mortality Tables, with full generational projection using the ultimate improvement rates from the most recently published projection scale ("U-MP")
Active Members	Sex Distinct RP-2014 Employee Mortality multiplied by 90% with full generational projection using Scale BB

* The source of the municipal bond rate is the Fixed Income municipal bonds with 20 years to maturity that include only federal tax-exempt municipal bonds as reported in Fidelity Index's "20-Year Municipal GO AA Index" as of Aug. 31, 2018.

e. Discount rate changed from 3.42 percent as of Aug. 31, 2017 to 3.69 percent, as of Aug. 31, 2018 (this lowered TOL approx. \$2.3 billion).

The impact of the Cadillac Tax has been calculated as a portion of the trend assumption. Results indicated that the value of the excise tax would be reasonably represented by a 25 basis point addition to the long term trend rate assumption. Assumptions and methods used to determine the impact of the Cadillac Tax include the following:

- a. 2018 thresholds of \$850 and \$2,292 were indexed annually by 2.50 percent,
- b. Premium data submitted was not adjusted for permissible exclusions to the Cadillac Tax and
- c. No special adjustments to the dollar limit other than those permissible for non-Medicare retirees over 55.

Other future actuarial methods may differ significantly from the current measurement period due to such factors as the following: plan experience, changes in economic or demographic assumptions, methodology used and changes in plan provisions or applicable laws.

The discount rate that was used to measure the total OPEB liability for the plan is the municipal bond rate of 3.69 percent as of the end of the measurement year; as of the beginning of the measurement year, the discount rate was 3.42 percent. Projected cash flows into and out of the plan are equal to projected benefit payments out of the plan assumed that members, employers, and non-employer contributing entities make their contributions at the statutorily required rates. As the plan operates on a pay-as-you-go basis and is not intended to accumulate assets, there is no long-term expected rate of return.

Sensitivity analysis was performed on the impact of changes in the discount rate on the net OPEB liability. The result of the analysis is presented in table 11I for the state's proportionate share.

Sensitivity of Net OPEB Liability to Changes in Discount Rate

Table 111

(Amounts in Thousands)

	TRS-Care	
1% Decrease (2.69)%	Current Discount Rate (3.69)%	1% Increase (4.69)%

Sensitivity analysis was performed on the impact of changes in the healthcare cost trend rates on the net OPEB liability. The result of the analysis is presented in table 11J for the state's proportionate share.

Sensitivity of Net OPEB Liability to Changes in Healthcare Cost Trend Rates

(Amounts in Thousands)

	TRS-Care	
	Current Healthcare Cost	
1% Decrease	Trend Rate	1% Increase
\$23,813,418	\$28,673,029	\$ 35,073,242

Net OPEB Liability, Deferrals and OPEB expense

The OPEB plan's fiduciary net position is determined using the economic measurement focus and accrual basis of accounting, which is the same basis used by TRS. Benefits and refunds of contributions are recognized when due and payable in accordance with the basis of the plan.

At Aug. 31, 2019, the state reported a liability of \$28.7 billion for its proportionate share of the collective net OPEB liability as non-employer contributing entity, which was comprised of a current portion of \$434 million and a non-current portion of \$28.3 billion. The collective net OPEB liability was measured as of Aug. 31, 2018 and the total OPEB liability used to calculate the collective net OPEB liability was determined by an actuarial valuation as of that date. The state's propor-

tion decreased from 58.44 percent at Aug. 31, 2017, to 57.43 percent at Aug. 31, 2018. The state's proportion of the collective net OPEB liability was based on its contributions to the OPEB plan relative to the contributions of all employers and non-employer contributing entity to the plan for the period Sept. 1, 2017 through Aug. 31, 2018.

For the year ending Aug. 31, 2019, the state recognized grant expense of \$1.0 billion and reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources in table 11K for its portion as non-employer contributing entity to TRS-Care.

Deferred Outflows and Deferred Inflows of Resources

Table 11K

(Amounts in Thousands)

	TRS-Care	
	Deferred Outflows of Resources	Deferred Inflows of Resources

Texas A&M University and University of Texas Systems

The state of Texas contributes to two singleemployer defined benefit retiree health care and life insurance benefit plans: the A&M Plan and the UT Plan. A&M is the administrator of the A&M Plan and UT is the administrator of the UT Plan.

A&M and UT each issue a publicly available financial report that includes financial statements and required supplementary information. Those reports may be obtained by writing to the systems at the following addresses:

Texas A&M University System

301 Tarrow Street College Station, Texas 77840-7896

University of Texas System

Controller's Office 210 West 7th Street Austin, Texas 78701

Plan Descriptions

Each plan provides certain health care and life insurance benefits on a pay-as-you-go basis as authorized by Texas Insurance Code, Chapter 1601. The benefit and contribution provisions of each plan are authorized by state law and may be amended by the Legislature. Retirees must meet certain age and service requirements and have at least 10 years of service at retirement to participate in the plan. Substantially all of the employees of A&M and UT may become eligible for benefits as long as they reach normal retirement age while working for the state. Surviving spouses and dependents of retirees are also covered by the plans. The plans does not provide automatic cost of living adjustments and there are no assets accumulated in a trust that meets the criteria in GASB Statement No. 75, paragraph 4. As of the measurement date in table 11M, the following employees were covered by the benefit terms.

Benefit Terms*		
Table 11M		
	A&M Plan	UT Plan
Measurement Date	9/1/18	12/31/18
Inactive Employees or Beneficiaries Curren	ntly	
Receiving Benefit Payments	10,299	27,597
Inactive Employees Entitled to But Not Yet		
Receiving Benefit Payments	7,630	12,311
Active Members	24,917	90,605
Total	42,846	130,513

Funding Policy

The state contributes to the cost of each participant's insurance coverage as required by Texas Insurance Code, Chapter 1551, Section 310 and 311. The funds are appropriated under the General Appropriations Act Higher Education Employees Group Insurance Contributions. During the measurement period of 2018, for fiscal 2019 reporting, the amount of state employer benefit payments recognized by the A&M Plan was \$71.1 million and the UT Plan was \$193.7 million.

The contribution rates are determined annually by each system based on the recommendations of their Office of Risk Management and Benefits Administration, Office of Employee Benefits and consulting actuary. Contributions rates are determined based on the benefit and administrative costs that are expected to be incurred, the funds appropriated for the plans, and the funding policy established by the Legislature which is revised as necessary to match expected costs with available revenue. The employer does not contribute toward dental, optional life insurance, optional dependent life insurance, vision, AD&D or long term care. The monthly contribution requirements are presented in table 11N.

Required Contribution	Rates -
Retiree Healthcare and	d
Life Insurance Premiur	n

Measurement Date

A&M has elected to use a measurement date that is twelve months in advance of the fiscal year, with a measurement date of Sept. 1, 2018 for fiscal year ended Aug. 31, 2019.

UT has elected to use a measurement date that is eight months in advance of the fiscal year, with a measurement date of Dec. 31, 2018 for fiscal year ended Aug. 31, 2019.

Actuarial Methods and Assumptions

The total OPEB liability for both plans is determined by a biennial actuarial valuation. Table 11O presents the actuarial methods and assumptions used to measure the total OPEB liability as of the specified measurement dates.

The many actuarial assumptions used in the valuations were primarily based on the result of actuarial experience studies performed by the TRS retirement plan actuary for the period Sept. 1, 2010 to Aug. 31, 2014 for higher education members. The mortality rates were based on the tables identified in table 11O.

	A&M Plan	UT Plan
Actuarial Valuation Date Actuarial Assumptions:	September 1, 2017, rolled forward to September 1, 2018	December 31, 2017, rolled forward to December 31, 2018

Ad Hoc Post-Employment		
Benefit Changes	None	None

As of the measurement date, the discount rate has changed for the A&M and UT Plans. Additionally, between the measurement date and the employer's reporting date, A&M only, adopted a change in benefit terms. Adopted in Jan. 2018 to be effective Jan. 1, 2019, prescription drug coverage for all Medicare primary participants will be provided through a self funded Employer Group Waiver Plan with Commercial Wrap. No other changes in assumptions, inputs, and benefit and eligibility provisions have occurred for either plan.

The discount rate that was used to measure the total OPEB liability for each plan is the municipal bond rate of 3.96 percent for the A&M Plan and 4.10 percent for the UT Plan, as of the end of the measurement year; as of the beginning of the measurement year, the discount rate was 3.51 percent and 3.44 percent respectively.

Sensitivity analysis was performed on the impact of changes in the discount rate on the total OPEB liability.

The result of the analysis is presented in the table 11P.

ensitivity of Changes in		
le 11P ounts in Thousands	s)	
	A&M Plan

Total OPEB Liability, Deferrals, and OPEB Expense

At Aug. 31, 2019, the state reported a liability of \$3.4 billion for the A&M Plan and \$13.1 billion for

the UT Plan. The A&M Plan's total OPEB liability is comprised of a current portion of \$87.9 million and a non-current portion of \$3.3 billion, and the UT Plan's total OPEB liability is comprised of a current portion of \$291.2 million and a non-current portion of \$12.8 billion. The collective total OPEB liability was measured as of the measurement date for each respective plan. The schedule of changes in the state's total OPEB liability for the measurement dates Sept. 1, 2018 and Dec. 31, 2018 are presented in table 11R for each plan.

Schedule of Changes in **Total OPEB Liability**

Table 11R

(Amounts in Thousands)

	A&M Plan	UT Plan
Measurement Date	9/1/18	12/31/18
Total OPEB Liability		
Service Cost	\$ 173,615	\$ 692,255
Interest on the Total OPEB Liability	163,593	498,239
Changes of Benefit Terms	(1,050,344)	
Difference Between Expected and Actual Experience		
Changes of Assumptions or Other		
Inputs	(361,071)	(1,805,442)
Benefit Payments (Employer) Other Changes	(71,054)	(193,743)
Net Change in Total OPEB Liability	(1,145,261)	(808,691)
Total OPEB Liability – Beginning	4,522,674	13,888,295
Total OPEB Liability – Ending	\$3,377,413	\$ 13,079,604

For the year ending Aug. 31, 2019, the state recognized OPEB expense of negative \$822.1 million for the A&M Plan and \$785.6 million for the UT Plan. At Aug. 31, 2019, the state reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources in table 11S for each plan.

Deferred Outflows and Deferred Inflows of Resources*

Table 11S

	A&N	l Plan	UT	Plan
	Deferred Outflows of Resources	Deferred Inflows of Resources	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference Between Expected and Actual Experience	\$	\$ 65,515	\$	\$ 131,515
Changes of Assumptions or or Other Inputs	541,115	1.081.222		2,599,485
Transactions Subsequent to the Measurement Date	71,075		140,597	
Total	\$ 612,190	\$1,146,737	\$ 140,597	\$ 2,731,000

* Both plans are a single-employer defined benefit OPEB plan. Due to statute requiring appropriations for funding the plans, the state reports a proportionate share in governmental activities and business-type activities. The change in proportion and contributions are recorded and amortized to expense as in a cost-sharing plan. However, since the amounts net to zero for each plan between deferred outflows/inflows of resources and expense for this type of deferral, the amounts are not included in the above schedule

The \$71.1 million reported as deferred outflows of resources for the A&M Plan and \$140.6 million for the UT Plan resulted from transactions subsequent to the measurement date, which will be recognized as a reduction in the total OPEB liability for the year ending Aug. 31, 2020.

Amounts reported as deferred outflows and inflows of resources related to OPEB will be recognized in OPEB expense in the following years as reported in table 11T for each plan.

Amortization Impact of Deferred Outflows and Deferred Inflows of Resources on OPEB Expense*

Thereafter	(25,711)	(694,735)

Note 12

* Negative amounts indicate decrease in OPEB expense.

Interfund Activity and Transactions

Interfund activity refers to financial interactions between funds and/or blended component units and is restricted to internal events. Interfund transactions refer to financial interactions with legally separate entities, i.e., discrete component units and other governments, and are restricted to external events.

Reciprocal Interfund Activity

Interfund loans are reciprocal interfund activity with a requirement for repayment. These loans are reported as interfund receivables/payables and are classified as either current or noncurrent.

Interfund services are sales and purchases of goods and services for a price approximating their external exchange value. This activity is reported as revenues in seller funds and expenditures or expenses in purchaser funds. Unpaid amounts are reported as receivables and payables.

Nonreciprocal Interfund Activity

Interfund transfers are nonreciprocal interfund activity. This activity refers to flows of assets without equivalent flows of assets in return and without a requirement for repayment. In governmental funds, transfers are reported as other financing sources or uses. In proprietary funds, transfers are reported after nonoperating revenues and expenses. The majority of transfers are legally authorized by statute or bond covenant to move amounts from one fund to another. Amounts not transferred at fiscal year-end are accrued as due from/due to. Activity occurring within the same fund is eliminated. Additional eliminations are made and transfers in and out are netted and presented in the government-wide statement of activities as transfers-internal activities.

Certain reclassifications and eliminations are made between the fund financial statements and the government-wide financial statements. Resource flows between the primary government and its discretely presented component units are reported as revenues and expenses, as if they were external transactions, on the fund financial statements and the government-wide financial statements. Transfers between the governmental or business-type activities and fiduciary funds are reported as transfers on the fund financial statements and are reclassified to revenues and expenses, as if they were external transactions, on the government-wide financial statements.

Due from/due to amounts between the primary government and the discretely presented component units are reported separately from due from/due to amounts between funds in the fund financial statements and the government-wide financial statements. Due from/due to amounts between governmental or business-type activities and fiduciary funds are reported as due from/due to amounts between funds in the fund financial statements and are reclassified to receivables from fiduciary funds/payables to fiduciary funds, as if they were external transactions, on the government-wide financial statements.

Interfund reimbursements are repayments from funds responsible for payment of expenditures or expenses to the funds that actually made the payment. These reimbursements are reported in the appropriate expenditure/expense category in the fund responsible for the payment.

For the state of Texas, routine transfers are those transfers from unrestricted revenue collected in the general revenue fund to finance various programs accounted for in other funds in accordance with the General Appropriations Act, which is the primary budget document for the state of Texas. Other transfers are legally authorized by statute to move resources from one fund to another. The interfund receivables/payables include loans for energy efficiency programs of approximately

\$23.4 million. There is also a \$1.3 billion receivable for Texas A&M University System from the University of Texas System from permanent university funds. The earnings will be used for bond payments.

Significant transfers include a \$2.1 billion transfer from the property tax relief fund and a \$1.6 billion transfer from the lottery fund to the foundation school fund for educational programs. There is a \$1.2 billion transfer from the permanent school fund to the available school fund. The Graduate Medical Education permanent fund transferred \$9.6 million to the Texas Higher Education Coordinating Board as directed by the legislature.

There is \$1.7 billion due from amount for the state highway fund from the Comptroller's office related to a November 2014 amendment to Article III of the Constitution. Under the amendment, a portion of the funds collected and deposited in the general revenue fund are transferred equally to the economic stabilization fund and the state highway fund. The funds were transferred to the state highway fund in November 2019.

The detail of interfund activity and transactions by fund type and category as of Aug. 31, 2019, is presented in tables 12A-E.

Note 13

Classification of Fund Balances/ Net Position

Table 13A presents a summary of the governmental fund balances by fund type and specific purpose as of Aug. 31, 2019.

The classifications of nonspendable, restricted, committed, assigned and unassigned are the fund balance classifications according to GASB Statement No. 54, Fund Balance Reporting and Governmental Fund Type Definitions. With the exception of nonspendable fund balances, fund balances are presented based on each fund's specific purpose. For the general fund, special revenue funds, capital projects funds and nonmajor permanent funds, the specific purpose of the fund is determined by the Texas Legislature. The revenues received to fund the programs within the fund and the applicable expenditures allowed from the fund are derived through statute. The fund may support multiple programs within multiple agencies. The remaining unspent fund balances are determined to be restricted, committed, assigned or unassigned at fiscal year-end. Unassigned fund balances are then reported by the governmental function assigned to the agency.

Of the \$9 billion governmental funds total unassigned fund balance, \$11.7 billion is for the economic stabilization fund (ESF). The ESF was authorized by the Texas Constitution, Article III, Section 49g. This authorized a transfer to the ESF within 90 days after the end of the fiscal year. In November of each year, a transfer is made from the general revenue fund equal to 75 percent of the excess of the prior fiscal year net collections for oil and natural gas production taxes over 1987 collections. The transfer amount of each production tax is calculated separately and must be in excess of the 1987 threshold. An amendment to the Texas Constitution, passed in November 2014, amended the transfer to include the state highway fund. As of fiscal

2015, the ESF receives at least one-half of the 75 percent transferred with the remainder transferred to the state highway fund.

The ESF shall also receive a transfer from the general revenue fund, by the 90th day of each biennium, for one-half of any unencumbered positive balance remaining in the general revenue fund on the last day of the preceding biennium. The Texas Legislature may appropriate within the constitutional guidelines by a three-fifths vote of the members present in each house, amounts in the ESF that do not exceed the amount of any unanticipated deficit in a current biennium or anticipated revenue decline during the next biennium. The Texas Legislature may also appropriate any amount from the ESF for any purpose only if approved by at least two-thirds of the members present in each house.

The corpus of the permanent school fund (PSF) is classified as nonspendable, and the balance of the PSF is classified as restricted based on provisions in the Texas Constitution which limits the use of the PSF to the support of public free schools. The Texas Constitution, Article 7 describes the fund as permanent, specifically describes how the PSF may be spent and explicitly restricts the Texas Legislature from appropriating any part of the PSF to any other purpose. The Texas Constitution allows the PSF to be spent on 1) transfers to the available school fund in accordance with constitutional requirements, 2) expenses of managing the PSF land and investments, and 3) guaranteed bond payments in the event of default. Accordingly, the portion of the fund balance that is spendable is classified as restricted based on constitutional provisions that limit the use of the PSF to these purposes. The remainder of the fund balance is classified as nonspendable, in alignment with the PSF's permanent nature as described in the constitution.

Restrictions of net position are listed on the face of the government-wide and proprietary statements of

net position. Per GASB Statement No. 54, balances reported as restricted in the fund financial statements plus the nonspendable permanent fund corpus balances

are reported as restricted in the statement of net position. All other fund financial balances are reported as unrestricted in the statement of net position.

Governmental Fund Balances – Nonspendable, Restricted, Committed, Assigned and Unassigned

Restatements are grouped in table 14A by the following types of activity:

GASB Pronouncements and Related Items

The \$33.1 million restatement decrease is to record the effect of the implementation of GASB Statement No. 83, *Certain Asset Retirement Obligations*. The objective of the statement relates to accounting and financial reporting for certain asset retirement obligations (AROs) as a legally enforceable liability associated with the retirement of a tangible capital asset. The GASB statement establishes criteria for determining the timing and pattern of recognition of a liability and a corresponding deferred outflow of resources for the ARO. Additional details concerning the criteria can be found in Note 5 and Note 27.

Changes in the Reporting Entity

The \$24.5 million restatement increase in Discrete Component Units is primarily due to reporting of the University of North Texas Health Science Center Foundation as a new discretely presented component unit of University of North Texas.

Correction of Prior Year Errors

Government-wide activities

Governmental activities include a restatement decrease of \$4.4 million for adjustments to capital assets and accumulated depreciation or amortization. The remaining restatements primarily include increases of \$350.6 million to correct accounting errors in the prior period related to the valuation of mineral rights and recognition of reimbursements reported as expenditures.

Business-type activities include a restatement increase of \$5.5 million for adjustments to capital assets and accumulated depreciation or amortization. The remaining restatements primarily include increases of \$901 thousand to correct accounting

errors in the prior period related to unrecorded expenditures and adjustment to fund balance.

Discrete component units include restatement increase of \$458.6 thousand to correct accounting errors in the prior period due to accounting for unrecorded revenue.

Fund Financial Statements-Governmental

The restatements for governmental funds of \$11.7 million decrease in the general fund, primarily include correction of accounting errors in the prior period related to reimbursements reported as disaster expenses, unearned revenue, and overstatement of accruals of payables and payroll. The restatement of the State Highway Fund of \$868.3 thousand increase related to correction of overstated accruals. The restatement for Permanent School Fund of \$361.4 million increase primarily consists of adjustments to valuation of mineral rights from prior year of \$437.8 million offset by a \$76.4 million decrease adjustment to reflect the accumulated incentive allocation accrual due to private equity fund-offunds managers applicable to prior periods.

The restatements for other nonmajor governmental funds include a \$14.8 thousand increase in special revenue funds to correct unreported cash in fund from prior year. The \$338.3 million decrease in debt service funds is due to a change related to fund type classification. The amount is offset by the \$338.3 million dollar increase in the capital projects funds. The restatement of \$11.8 thousand decrease in the internal service fund reflects adjustments to derivative futures from prior year.

Fund Financial Statements-Proprietary

The restatements for colleges and universities of \$6.1 million increase primarily include correction

of accounting errors in the prior period related to unreported donated software. The restatement for other nonmajor enterprise funds of \$354.1 thousand increase primarily include a correction of accounting errors in the prior period related to unrecorded non-depreciable assets.

Fund Financial Statements-Fiduciary

The restatement for the pension and other employee benefit trust funds of \$2.3 million increase is a correction of accounting errors in the prior period for derivative futures and adjustments to capitalized assets.

Note 15

Commitments and Contingencies

Commitments

Outstanding Loan Commitments

The state makes loan commitments to political subdivisions for financing purposes. These loan commitments are provided from remaining current bond proceeds, future bond proceeds and federal drawdowns. The Texas Water Development Board had loan commitments of \$3.3 billion as of Aug. 31, 2019. The Texas Department of Transportation (TxDOT) has equity loan commitments of \$9.4 billion. The \$9.4 billion is used by the Grand Parkway Transportation Corporation to pay for certain costs related to development, construction, operation, maintenance and financing of projects in Harris County and possible extensions or expansions of the Grand Parkway in the Houston area.

Investment Funds

As of Aug. 31, 2019, state agencies, public employee retirement systems and institutions of higher education have entered into capital commitments with investment managers for future funding of investment funds. Investment funds include hedge fund pools, private investment pools, public market funds and other alternative investments managed by external investment managers. As of Aug. 31, 2019, the remaining commitment was \$60.2 billion.

Construction and Other Commitments

As of Aug. 31, 2019, TxDOT had contractual commitments of approximately \$16.8 billion for construction and comprehensive developments. These are not

recognized liabilities because the terms of the contracts or agreements were not met and benefits were not received as of the end of the fiscal year.

Additionally, TxDOT is party to several pass-through toll agreements with local entities. Under these agreements, the local entities will finance, design and construct certain roadway projects and may maintain them for a specified period of time. Upon completion of the projects, TxDOT will make payments (i.e., pass-through toll payments) to the entities based on traffic utilization of the roadways and other payment requirements governed by the agreements. Motorists traveling these roadways will not be required to pay a toll. Estimated payments under the agreements are included as notes payable as each project is completed. Liabilities for uncompleted agreements are not recognized. As of Aug. 31, 2019, the amount of unrealized payables for uncompleted passthrough toll agreements was \$51.2 million. In addition, TxDOT has equity grant commitments of \$173.4 million to various local toll project entities.

The University of North Texas System initiated approximately \$414.2 million in capital commitments for construction and renovation of various facilities in numerous stages of development.

Texas Parks and Wildlife Department had contractual commitments of approximately \$120 million for facilities and other improvements, building replacements, building maintenance and repairs, infrastructure and infrastructure maintenance and repairs.

Contingencies

Protested Tax Payments

As of Aug. 31, 2019, pending litigation filed by taxpayers seeking refunds of state taxes totaled \$146 million. The protested taxes include sales, franchise, insurance and other taxes. Although the outcome of these cases cannot presently be determined, adverse rulings in some of them could result in significant additional refunds.

Unpaid Claims and Lawsuits

A variety of cases that may affect the state were filed as of Aug. 31, 2019. These claims totaled \$358.4 million and include a number of lawsuits and claims significant to individual state agencies. Although the outcome of these cases cannot be determined, adverse rulings could result in additional liabilities. Additionally, TxDOT filed cases exercising eminent domain for \$505.2 million.

Federal Assistance

The state receives federal financial assistance subject to review or audit by federal grantor agencies. Entitlement to this assistance is generally conditional upon compliance with the terms and conditions of grant agreements and applicable federal regulations, including the expenditure of assistance for allowable purposes. Any disallowance as a result of the audits may become a liability of the state but is considered immaterial to its overall financial condition.

The Texas Office of the Attorney General and the Texas Health and Human Services Commission's Office of Inspector General investigate allegations of overpayments to Medicaid providers. Until investigations are completed, the total amount of overpayments to providers is potentially subject to recovery (amounts associated with the "open case list") and may represent a corresponding potential liability for the federal share of these payments - about 55 to 60 percent of that total.

An actual liability is realized only after a completed investigation substantiates an overpayment and the provider is notified of the results and given an opportunity to submit rebuttal or claims for offsets. The percent of total dollars on the open case list that are ultimately confirmed as overpayments cannot be reliably predicted. The state estimates the amounts that may become payable to the federal government will be immaterial to its overall financial condition.

Guaranteed Debt

In 1983, Texas voters approved a constitutional amendment that establishes the guarantee of the permanent school fund (PSF) for a defined capacity of up to \$123.2 billion in school district bonds as of Aug. 31, 2019. Approval by the state of Texas attorney general is required for each bond issuance and on approval by the Texas commissioner of education, bonds properly issued by a school district are fully guaranteed by the PSF. In 2011, legislation was enacted authorizing the use of PSF to guarantee revenue bonds issued for the benefit of certain open-enrollment charter schools designated as charter districts by the commissioner of education. In the event of a default by a school district or charter district, the PSF will transfer to the paying agent/registrar an amount necessary to pay the maturing or matured principal and/or interest to bondholders. As of Aug. 31, 2019, \$82.5 billion debt in outstanding bond issues was guaranteed by the permanent school fund for 847 school districts and \$1.9 billion for 15 charter districts within the state. Under statute, payments by the PSF on such guarantees are recoverable from the state of Texas. These dollar amounts represent the principal amount and do not reflect any subsequent accretions in value for compound interest bonds (zero coupon securities), nor do they include interest on current interest bonds or variable rate notes. These amounts also exclude bonds that were refunded and released from the bond guarantee program. From the inception of the program through Aug. 31, 2019, none of the school districts or charter districts with guaranteed debt have defaulted on the debt.

Arbitrage

Rebatable arbitrage is defined by Internal Revenue Code, Section 148, as earnings on investments

purchased with the gross proceeds of a bond issue in excess of the amount that would have been earned if the investments were invested at a yield equal to the yield on the bond issue. The rebatable arbitrage must be paid to the federal government. State agencies and institutions of higher education responsible for investments from bond proceeds carefully monitor their investments to restrict earnings to a yield less than the bond issue and, therefore, limit any state arbitrage liability. The state estimates that rebatable arbitrage liability, if any, will be immaterial to its overall financial condition.

Derivatives with Contingent Features

All of the Department of Housing and Community Affairs' (TDHCA) hedging derivative instruments include provisions that require posting collateral in the event its credit rating falls below a specified level as issued by Moody's Investor Service and Standard & Poor's. If TDHCA fails to post eligible collateral, the derivative instrument may be terminated by the counterparty. As of Aug. 31, 2019, the aggregate fair value of all derivative instruments with collateral provisions was negative \$5.6 million. If the posting requirements had been triggered, TDHCA would have been required to post eligible collateral equal to the aggregate fair value of the derivative instruments. TDHCA posted no collateral as of Aug. 31, 2019.

The Teacher Retirement System of Texas (TRS) derivative investments include provisions that require TRS to post collateral in the event that the fair value surpasses a specified contractual threshold. As of Aug. 31, 2019, the aggregate fair value of all derivative instruments with these provisions was \$15.4 million, and \$29.3 million was posted in collateral. TRS has not triggered any events that would require the posting of additional collateral to its counterparties.

Note 16

Subsequent Events

Primary Government

Bonds and Commercial Paper Issued/Refunded and Other Debt Financing

State agencies and institutions of higher education issued \$2.2 billion in new bonds and commercial paper and \$2.3 billion in refunding bonds since Aug. 31, 2019, as presented in table 16A. This routine activity finances state facilities, housing assistance programs, educational loans and refunds outstanding debt.

Bonds and Commercial Paper Issued/Refunded Subsequent to August 31, 2019

Other Subsequent Events

The Office of the Attorney General of Texas (OAG) began an independent assessment of the software development Child Support RISE beginning in June 2019. Findings were provided subsequent to August 31, 2019. The OAG consulted with involved principals including

the U.S. Department of Health and Human Services, Office of Child Support Enforcement and the Executive Steering Committee. Based on the forgoing, the OAG determined that there is evidence that the software under development valued at \$148.3 million is impaired under the guidance provided by Governmen-

tal Accounting Standards Board's statements. Additionally, certain application development stage activities are believed to be eligible for capitalization as a stand-alone software application. The extent of impairment and appropriate capitalization of the Child Support RISE development activities require further analysis and will be included in future reports.

On Oct. 28, 2019, the University of Texas System M.D. Anderson Cancer Center entered into an agreement, with Millennium Pharmaceuticals, Inc., a wholly owned subsidiary of Takeda Pharmaceutical Company Limited. M.D. Anderson received \$300 million on Nov. 15, 2019. The funding will support further research, development and manufacturing of technology, which is consistent with M.D. Anderson's educational and research missions and goals.

Note 17

Risk Management

The state of Texas is exposed to various risks of loss related to property, general and employer liability, net income and personnel. The state of Texas and its employees are covered by numerous immunities and defenses that limit some of these risks of loss, particularly in liability actions brought against the state or its employees. Remaining exposures are managed by self-insurance arrangements, contractual risk transfers, the purchase of commercial insurance or a combination of these risk financing techniques.

Estimates of liabilities for incurred but not reported claims are actuarially determined based on estimates of the ultimate cost of settling claims, using past experience adjusted for current trends and any other factors that would modify past experience. Claims liabilities include specific, incremental claims adjustment expenditures/expenses. In addition, estimated recoveries on unsettled claims, such as salvage and subrogation, are evaluated in terms of their estimated realizable value

and deducted from the liability for unpaid claims. Unallocated claim adjustment expenditures/expenses are not included in the liability for claims and judgments.

There were no significant reductions in insurance coverage in the past year. Also, in the past three years, settlements have not exceeded insurance coverage.

Property and Liability

The Texas Labor Code, Chapter 412, states that the State Office of Risk Management (SORM) shall operate as a full-service risk and insurance manager for state agencies and shall administer programs to reduce property and liability losses, including workers' compensation losses.

SORM administers the statewide workers' compensation program. The state does not carry commercial insurance for workers' compensation, but instead, uses the general revenue fund to account for its risk financing activities. Certain agencies are exempt from the SORM program or elect to purchase additional insurance coverage outside of the program. The University of Texas System (UT), Texas A&M University System (A&M) and Texas Department of Transportation administer separate self-insured workers' compensation programs.

Where applicable, certain agencies purchased fire and extended insurance coverage for buildings financed through the issuance of bonds. Other risks are addressed through a combination of interim financing and commercial coverage for fire and all other perils, as well as coverage for medical malpractice, torts, named windstorms, floods and other potential liabilities.

Health, Life and Dental

Insurance coverage is provided to active state employees and their dependents by one of three health plan administrators. All state employees not covered by insurance plans provided by UT and A&M are included in the Texas Employees Group Benefits Program (GBP) administered by the Employees Retirement System

of Texas (ERS). Public school employees and their dependents are covered by the Texas School Employees Uniform Group Benefits Program (TRS-ActiveCare) administered by the Teacher Retirement System of Texas (TRS). Risk of loss is retained with self-insured plans or transferred to the insurance carrier with health maintenance organization (HMO) plans.

Texas Employees Group Benefits Program

Claims for health, life, accidental death and dismemberment (AD&D), disability and dental insurance coverages are established under the GBP. These coverages are provided through a combination of insurance contracts, a self-funded health plan, a self-funded dental indemnity plan, HMO contracts and dental HMO contracts.

University of Texas System and Texas A&M University System

UT and A&M provide health insurance, dental insurance, vision insurance, life insurance, AD&D, long-term disability, short-term disability, long-term care and flexible-spending account coverages to all benefits-eligible employees. These insurance benefits are provided through both self-funded and fully insured arrangements.

Teacher Retirement System

TRS-ActiveCare is a health benefits program that offers options ranging from catastrophic coverage with reduced premiums to a comprehensive plan at higher premiums. TRS-ActiveCare covers members currently employed by public educational employers that participate in the plan.

TRS-ActiveCare offers employees of participating entities the option of three preferred provider organization plans and also offers employees of certain areas the option of choosing coverage under an HMO plan. In fiscal 2019, 1,088 entities participated in the program.

The risk associated with TRS-ActiveCare is retained by the plan's participants, and no risk is transferred to the plan's administrators, employers or the state.

Changes in Claims Liability Balances

Table 17A presents the changes in claims liability reported in various balance sheet/statement of net position liability accounts during fiscal 2019 and fiscal 2018. Claims and judgment amounts presented in Note 5 are also included in table 17A.

Changes in Claims Liability Balances Table 17A (Amounts in Thousands) **Beginning** Ending Increases Balance **Balance Decreases** 2019 \$920,907 * \$3,907,707 \$3,878,558 \$ 950,056 2018 \$922,695 \$3,694,299 \$3,695,087 \$921,907 * Beginning balance includes a decrease of \$1,000 due to a restatement

Of the fiscal 2019 claims liability ending balance, \$294.6 million relates to long-term claims liabilities, which are reported in Note 5. \$769.3 million relates to the state's health, life and dental insurance programs, and the remainder to miscellaneous claims and judgments, all of which are reported as accounts payable.

Note 18

Contested Taxes

The state may make a determination on a taxpayer's tax obligation and liability. Taxpayers may petition for a redetermination hearing before an administrative law judge if they wish to challenge a tax liability assessed by the state. If the request for a redetermination hearing is received by a specified date, the taxpayer does not have to pay the tax until 20 days after a final decision is made by the Comptroller's office in redetermination hearing and served on the taxpayer. As of Aug. 31, 2019, there was an estimated \$717.3 million of assess-

ments filed that are currently in the redetermination hearings process. Collectability of these assessments is dependent upon the Comptroller's office decision in the redetermination hearing. These assessments are not recognized as tax revenue until after a Comptroller's office decision becomes final. Therefore, these amounts are not included in the receivables reported in the financial statements.

Note 19

Component Units and Related Organizations

Component units are legally separate organizations for which the elected officials of the primary government are financially accountable. Component units can also be other organizations for which the nature and significance of their relationship with a primary government is such that exclusion would cause the reporting entity's financial statements to be misleading. In addition, component units can be organizations that raise and hold economic resources for the direct benefit of a government unit. Because of the closeness of their relationships with the primary government, some component units are blended as though they are part of the primary government. Other component units are discretely presented. None of the discrete component units for the state of Texas meet the criteria for major component unit presentation and those presented are for informational purposes of interested parties. The component units are reported for the fiscal year ended Aug. 31, 2019 unless indicated otherwise.

Blended Component Units

The state is financially accountable for the following legally separate entities. These component units are reported as if they are part of the primary government because they provide substantially all of their services directly to the state, or the component units' debts are expected to be repaid entirely or almost entirely with the resources of the state. The component units' financial data is blended in the appropriate funds within the financial statements.

Employees Retirement System of Texas (ERS) is a legally separate entity established by the Legislature to administer benefits for officers and employees of the state. ERS is governed by a six-member board of trustees. The six-member board is composed of three elected members and three members who are appointed respectively by the governor, the speaker of the Texas House of Representatives, and the chief justice of the Supreme Court of Texas. The state of Texas has the ability to impose its will upon ERS through its legislative and budget approval powers. Separate financial statements may be obtained by contacting ERS at P.O. Box 13207, Austin, Texas 78711.

Texas Treasury Safekeeping Trust Company

(Trust Company) is a legally separate entity established by the Legislature. The Texas Comptroller of Public Accounts is the single shareholder of the Trust Company and is charged with managing the Trust Company. The Trust Company is authorized to manage, disburse, transfer, safekeep and invest funds and securities provided by statute or belonging to state and local entities and gives the Comptroller's office direct access to services provided by the Federal Reserve System. Separate financial statements may be obtained by contacting the Trust Company at 208 E. 10th St., 4th Floor, Austin, Texas 78701.

Alamo Trust, Inc. (ATI), (formerly known as Alamo Complex Management), is a legally separate entity, whose amended bylaws ended the component unit relationship with Alamo Endowment (a discrete component unit of the Texas General Land Office (GLO)). ATI is reported for the fiscal year ended June 30, 2019. For fiscal year ended Aug. 31, 2019, the financial statements are not incorporated into the financial statements of the GLO.

Texas Private Activity Bond Surface Transportation Corporation (TxPABST) is a legally separate entity that acts on behalf of the Texas Department of Transportation (TxDOT) in the promotion and development of transportation facilities by issuing private activity bonds for projects developed under comprehensive development agreements (CDA) entered into by TxDOT. Bonds issued by TxPABST are not legal obligations of the state and are payable solely from payments received by or on behalf of a CDA developer. The Texas Transportation Commission appoints the voting majority of TxPABST's governing board, and has the ability to remove appointed board members at will. TxPABST does not have any financial activity, as its sole purpose is to issue debt on behalf of TxDOT. TxPABST does not issue separate financial statements. Information about TxPABST may be obtained by contacting TxPABST at 125 East 11th Street, Austin, Texas 78701.

Grand Parkway Transportation Corporation

(GPTC) is a legally separate entity that acts on behalf of TxDOT in the promotion and development of the Grand Parkway project by issuing bonds and entering into CDAs with developers for the design and construction of several segments of the Grand Parkway project. The Texas Transportation Commission (TTC) appoints the members of GPTC's governing board, all of whom must be TxDOT employees. The TTC has the ability to remove appointed board members at will. The financial activity of GPTC is reported in the financial statements of TxDOT. Information about GPTC may be obtained by contacting GPTC at 125 East 11th Street, Austin, Texas 78701.

Windham School District (WSD) is a legally separate entity that provides education to offenders within the Texas Department of Criminal Justice. The Texas Board of Criminal Justice serves as the board of trustees for the WSD. The primary government is able to impose its will on the WSD through its ability to mod-

ify or approve the budget of the WSD. WSD's entire debt is covered by the state of Texas through appropriations, and the state is liable for any and all outstanding debt. WSD does not issue separate financial statements. Information about WSD may be obtained by contacting the Texas Department of Criminal Justice at P.O. Box 13034, Austin, Texas 78711.

Friends of the Texas Historical Commission

(Friends) is a legally separate entity whose sole purpose is to support the activities of the Texas Historical Commission (THC). Friends is reported as a component unit due to it being closely related to the primary government. The THC has the power to appoint and remove the majority of the Friends board of trustees. The THC provides office space to Friends. In addition, the staff of Friends participates in programs sponsored by THC. Separate financial statements may be obtained by contacting Friends at P.O. Box 13497, Austin, Texas 78711.

Texas Tech Foundation Inc. (TTF) is a legally separate entity established to financially support and serve the fundraising needs of Texas Tech University System (TTUS). The governing board of TTF is appointed by the TTUS board of regents. The board of regents has the ability to impose its will on TTF through its ability to veto, override, or modify the decisions of TTF and its ability to modify or approve the budget of TTF. Separate financial statements may be obtained by contacting the TTUS Office of Institutional Advancement, located at 1508 Knoxville Avenue, Suite 315, Lubbock, Texas 79409.

Texas Tech Physician Associates (TTPA) is a legally separate entity established for the sole purpose of, and is operated exclusively for, the benefit of the Texas Tech University Health Science Center (TTUHSC) and TTUHSC at El Paso. The nine-member governing board of TTPA is appointed by TTUHSC. TTUHSC controls all financial and operational transactions of TTPA, and has the ability to remove board members at

will. Separate financial statements may be obtained by contacting TTPA at Provider Payor Relations, 3601 4th Street, Lubbock, Texas 79430.

The Angelo State University Foundation (ASUF) is a legally separate nonprofit organization created exclusively to provide financial assistance to Angelo State University (ASU) primarily from gifts and earnings on endowed funds. There is no appointment of board members. The Texas Tech University System Chancellor, ASU President, ASU Faculty Senate President and ASU Chief Financial Officer are non-voting ex-officio members on the board of directors. ASUF is closely related to ASU. Failure to include the financial information of ASUF would result in misleading financial statements. Separate financial statements may be obtained by contacting ASUF at 2601 W. Ave N, San Angelo, Texas 76909.

Texas State University Research Foundation

(TSURF) is a legally separate entity established to support the mission of Texas State University (TSU) and its objectives of promoting higher education, conducting research, providing public service and assisting in economic development in Texas. The key business officers of TSU compose the entirety of TSURF's officers and directors. TSU is able to impose its will on TSURF through its ability to modify or approve the budget of TSURF, its ability to modify or approve the rates or fees affecting revenues of TSURF and its ability to appoint, hire, reassign or dismiss those persons responsible for the day-to-day operations of TSURF. TSURF is reported for the fiscal year ended Feb. 28, 2019. Separate financial statements may be obtained by contacting TSU, Director of Accounting, General Accounting Office, 601 University Drive, JCK 589, San Marcos, Texas 78666-4684.

Harold M. Freeman Educational Foundation

(Freeman Foundation) is a legally separate entity formed through a trust to make the use of the Freeman Ranch available exclusively to TSU. The Freeman Ranch is used and operated solely for farm, ranch and game management, education, and research purposes in connection with the educational activities of TSU. There is no formal governing board for the Freeman Foundation. TSU acts as an active co-trustee to operate the ranch. Frost Bank operates as an inactive trustee to ensure the provisions of the trust are followed. Based on the Freeman Foundation being closely related to TSU, the Freeman Foundation is included as a blended component unit. Separate financial statements are not issued by the Freeman Foundation. Information about the Freeman Foundation may be obtained by contacting TSU, Director of Accounting, General Accounting Office, 601 University Drive, JCK 589, San Marcos, Texas 78666-4684.

Texas A&M Research Foundation (TAMRF) is a legally separate entity established to facilitate research and development within the Texas A&M University System (A&M). TAMRF is included as a blended component unit in the combined financial statements of A&M. This determination is based on the close relationship and joint agreements in effect between TAMRF and A&M in regard to research grant/contract administration. Complete financial statements of TAMRF may be obtained from their administrative offices at 400 Harvey Mitchell Parkway South, Suite 300, College Station, Texas 77845.

U.T. Southwestern Health Systems Inc. (SHSI) is a legally separate entity established to support the University of Texas Southwestern Medical Center (UTSWMC). Its four-member governing board is appointed by the UTSWMC. UTSWMC has the ability to impose its will on SHSI through its ability to remove appointed board members at will, its ability to modify or approve the budget of SHSI and its ability to modify or approve rates or fees affecting revenues of SHSI. Separate financial statements may be obtained by contacting SHSI at 5323 Harry Hines Boulevard, Dallas, Texas 75390.

U.T. Southwestern Moncrief Cancer Center (SW Moncrief) is a legally separate entity established to support the UTSWMC. Its four-member governing board is appointed by the president of UTSWMC. UTSWMC has the ability to impose its will on SW Moncrief through its ability to remove appointed board members at will, its ability to modify or approve the budget of SW Moncrief and its ability to modify or approve rates or fees affecting revenues of SW Moncrief. Separate financial statements may be obtained by contacting SW Moncrief at 400 West Magnolia Avenue, Fort Worth, Texas 76104.

Moncrief Cancer Foundation (Moncrief) is a legally separate entity established to support the UTSWMC. Its six-member governing board is appointed by the president of UTSWMC. UTSWMC has the ability to impose its will on Moncrief through its ability to remove appointed board members at will, its ability to modify or approve the budget of Moncrief and its ability to modify or approve rates or fees affecting revenues of Moncrief. Separate financial statements may be obtained by contacting Moncrief at 5323 Harry Hines Boulevard, Dallas, Texas 75390.

UTMB Healthcare Systems Inc. (Healthcare Systems) is a legally separate entity established to support the University of Texas Medical Branch at Galveston (UTMB). Its eight-member governing board is appointed by the UTMB. UTMB has the ability to impose its will on Healthcare Systems through its ability to remove appointed board members, its ability to modify the budget of Healthcare Systems, its ability to appoint, hire, reassign or dismiss those responsible for Healthcare Systems' day-to-day operations and its ability to unilaterally abolish Healthcare Systems. Separate financial statements may be obtained by contacting Healthcare Systems at 301 University Boulevard, Galveston, Texas 77555.

University Medical Branch Student Book Store and Hospitality Shop Inc. (Book Store) is a legally

separate entity established to operate the book store for UTMB. Its five-member governing board is appointed by UTMB. UTMB has the ability to impose its will through its ability to remove appointed board members at will and its ability to appoint, hire, reassign or dismiss those responsible for the Book Store's day-to-day operations. Separate financial statements may be obtained by contacting the Book Store at 301 University Boulevard, Galveston, Texas 77555.

Medical Branch Innovations, Inc. (MBII) is blended rather than discretely presented because it operates exclusively in support of the education, clinical, and research missions of UTMB. Its three-member board is appointed by UTMB. Separate financial statements may be obtained by contacting MBII at 301 University Boulevard, Galveston, Texas 77555.

University of Texas Physicians (UT Physicians) is a legally separate entity established to provide management services for the physician practice plan at the University of Texas Health Science Center at Houston (UTHSCH). Its five-member governing board is appointed by UTHSCH. UTHSCH has the ability to impose its will on UT Physicians through its ability to modify or approve the budget of UT Physicians, its ability to modify or approve rates or fees affecting revenues of UT Physicians and its ability to appoint, hire, reassign or dismiss those responsible for UT Physicians' day-to-day operations. Separate financial statements may be obtained by contacting UT Physicians at 7000 Fannin Street, Suite 860, Houston, Texas 77030.

University of Texas System Medical Foundation (Medical Foundation) is a legally separate entity established to support the medical residency programs at UTHSCH. Its three-member governing board is appointed by the UTHSCH. UTHSCH has the ability to impose its will on the Medical Foundation through its ability to modify or approve the budget of the Medical Foundation and its ability to appoint, hire, reassign or dismiss those responsible for the Medical

Foundation's day-to-day operations. Separate financial statements may be obtained by contacting the Medical Foundation at 6431 Fannin St., Suite JJL 310, Houston, Texas 77030.

University Physicians Group (UPG) is a legally separate entity established to provide health care education and research activity services to the University of Texas Health Science Center at San Antonio (UTH-SCSA). Its five-member governing board consists of the dean of the School of Medicine and four members elected by the physician practice plan board (physicians) at UTHSCSA. UTHSCSA has the ability to remove board members at will, the ability to modify or approve the budget of UPG, the ability to veto, overrule or modify the decisions of UPG's board, the ability to appoint, hire, reassign or dismiss those responsible for UPG's day-to-day operations and the ability to unilaterally abolish UPG. Separate financial statements may be obtained by contacting UPG at 8431 Fredericksburg Road, San Antonio, Texas 78229.

UT Health San Antonio Regional Physicians

Network (Corporation) is a legally separate entity established to provide, manage, coordinate and promote accountability for the quality, patient safety, cost and overall patient support for University of Texas Health Science Center at San Antonio. The corporation is governed by a seven-member board. The dean of the school of medicine serves as chair of the board of directors. Separate financial statements may be obtained by contacting the Corporation at 1999 Bryan St., Suite 900, Dallas, Texas 75201-3136.

M.D. Anderson Physicians Network (MDAPN) is a legally separate entity established to support the University of Texas M.D. Anderson Cancer Center (Cancer Center). MDAPN's nine-member board is appointed by the president of Cancer Center. The president may remove appointed board members at will. Separate financial statements may be obtained by contacting

MDAPN at 7007 Bertner Avenue, Suite 10.3212, Houston, Texas 77030.

M.D. Anderson Services Corporation (MDASC) is a legally separate entity established to support the Cancer Center. The seven-member board is appointed by the president of the Cancer Center. The president may remove appointed board members at will. Separate financial statements may be obtained by contacting MDASC at 7007 Bertner Avenue, Suite 10.3212, Houston, Texas 77030.

East Texas Quality Care Network (ETQCN) is a legally separate entity established to provide agency nursing services to the University of Texas Health Science Center at Tyler (UTHSCT). Its four-member governing board is appointed by UTHSCT. UTHSCT has the ability to remove board members at will, the ability to modify or approve the budget of ETQCN, the ability to modify or approve rates or fees affecting revenues of ETQCN, the ability to veto, overrule or modify the decisions of ETQCN's board, the ability to appoint, hire, reassign or dismiss those responsible for ETQCN's day-to-day operations and the ability to unilaterally abolish ETQCN. Separate financial statements may be obtained by contacting ETQCN at 11937 US Highway 271, Tyler, Texas 75708-3154.

University of Texas/Texas A&M Investment Management Co. (UTIMCO) is a legally separate entity established to provide investment management services to University of Texas System (UT) and Texas A&M University System (A&M). UTIMCO's nine-member board consists of at least three members of the UT board of regents, four members appointed by the UT board of regents (one of whom may be the Chancellor of UT) and two members appointed by the A&M board of regents. At least three members appointed by the UT board of regents and at least one member appointed by the A&M board of regents must have substantial background and expertise in investments. The corporation is blended rather than discretely presented

because it provides investment management services entirely or almost entirely to UT. Separate financial statements may be obtained by contacting UTIMCO at 210 West 7th Street, Suite 1700, Austin, Texas 78701.

University of Texas Fine Arts Foundation (Fine Arts) is a legally separate entity established to acquire the Suida-Manning Art Collection for the University of Texas at Austin (UT-Austin) Blanton Museum of Art. Fine Arts' three-member governing board is appointed by UT-Austin. UT-Austin has the ability to impose its will on Fine Arts through its ability to remove appointed board members at will, its ability to modify or approve Fine Arts' budget, its ability to veto, overrule or modify the decisions of Fine Arts and unilaterally abolish Fine Arts. Fine Arts' fiscal year end is Dec. 31, 2018. Separate financial statements may be obtained by contacting UT-Austin at Main Building, P.O. Box T, Austin, Texas 78713.

University of Texas Communication Foundation (UTCF) is a legally separate entity established to support the UT-Austin College of Communication. Its three-member governing board is appointed by UT-Austin. UT-Austin has the ability to impose its will on the UTCF through its ability to remove appointed board members at will, its ability to modify or approve the UTCF's budget, its ability to veto, overrule or modify the decisions of UTCF and unilaterally abolish UTCF. Separate financial statements may be obtained by contacting UT-Austin at P.O. Box 7322, Austin, Texas 78713.

Centro Global de Innovacion y Emprendimiento, A.C., Parque de Investigacion e Innovacion Technologica (CGIE) is a legally separate entity established to promote academic development in engineering, science, and business and cultural studies between UT-Austin and Mexico's academic institutions. CGIE is governed by a two-member board appointed by UT-Austin. UT-Austin is the sole corporate member. CGIE's fiscal year end is Dec. 31, 2018. Separate financial statements may

be obtained by contacting CGIE, A.C., Carlos Ross, Director, ross@cgie.org.mx.

The University of Texas at Austin - Mexico Institute, A.C. (Mexico Institute), is established to advance collaborative cross-disciplinary academic and scientific research partnerships in science, technology, engineering and mathematics and scholarly and cultural studies between UT-Austin and Mexico's academic institutions, the public and private sector stakeholders. Mexico Institute is governed by a four-member board appointed by UT-Austin. Mexico Institute's fiscal year end is Dec. 31, 2018. Separate financial statements may be obtained by contacting UT-Austin, Jorge Rene Pinon, Director for Institutional Relations - Mexico, 2275 Speedway, Austin, Texas 78712.

The Crow Museum of Asian Art - Foundation (CMAA Foundation), is established to support the Crow Museum of Art. Its five-member governing board is appointed by University of Texas Dallas (UT-Dallas). The foundation is blended rather than discretely presented because it is organized as a not-for-profit corporation. UT-Dallas is the sole corporate member. CMAA Foundation's fiscal year end is Dec. 31, 2018. Separate financial statements may be obtained by contacting the Crow Museum of Asian Art, 2010 Flora Street, Dallas, Texas 75201.

The Crow Museum of Asian Art - Trust (CMAA-Trust), is governed by UT-Dallas as sole trustee. CMAA - Trust is blended rather than discretely presented because it is organized as a not-for-profit corporation. UT-Dallas is the sole corporate member. CMAA - Trust's fiscal year ended is Dec. 31, 2018. Separate financial statements may be obtained by contacting CMAA - Trust, 2010 Flora Street, Dallas, Texas 75201.

Discretely Presented Component Units

The state is financially accountable for the following legally separate entities (component units); however, the component units do not provide services entirely or almost entirely to the state nor are the component units' debts expected to be repaid entirely or almost entirely with the resources of the state. The component units' financial data is discretely presented in the component unit column of the state's government-wide financial statements. Based on an analysis performed at year end, none of the discretely presented component units met the materiality threshold for presentation; however, omission of the following discretely presented component units would result in misleading financial statements.

Teacher Retirement System of Texas (TRS) is a legally separate entity established by the Legislature to administer retirement and disability annuities to employees and beneficiaries of public school systems and institutions of higher education. TRS is governed by a nine-member board of trustees, three of whom are direct appointments of the governor. The remaining trustees are appointed by the governor from lists prepared by various constituent groups. TRS is subject to the budget approval powers of the Texas Legislature, and therefore is fiscally dependent on the state of Texas. The active employees insurance program and 403(b) administrative program are reported in the component unit column of the government-wide financial statements; whereas the employee benefit trust fund and retired employees insurance are reported in the pension and other employee benefit trust funds financial statements. TRS has a blended component unit, Teacher Retirement Investment Company of Texas Ltd. (TRI-COT). It is a private company limited by shares in the United Kingdom that began operating in Nov. 2015. TRICOT was formed for the purpose of opening a London investment office to increase investment opportunities for the TRS portfolio. TRICOT serves the pension trust fund. Separate financial statements may be obtained by contacting TRS at 1000 Red River St., Austin, Texas 78701.

State Bar of Texas (State Bar) is a public corporation and an administrative agency of the judicial branch of government. The purpose of the State Bar is to ensure that public responsibilities of the legal profession are effectively discharged. The annual budget for the State Bar must be reviewed and approved by the Supreme Court, thus making the State Bar fiscally dependent on the state of Texas. The State Bar is reported for the fiscal year ended May 31, 2019. Separate financial statements may be obtained by contacting the State Bar at 1414 Colorado St., Austin, Texas 78701.

Texas State Affordable Housing Corporation (TSAHC) was incorporated under the Texas Nonprofit Corporation Act and is legally separate from the state. Its purpose is to serve the housing needs of low-income Texans, professional educators, firefighters and police officers who are first-time home buyers and are not afforded housing finance options through conventional lending channels. TSAHC provides single and multifamily loans to low and moderate income Texans. Prior to any bonds being issued by TSAHC, the issuance must be reviewed by the Bond Review Board, which is composed of the governor, lieutenant governor, speaker of the House of Representatives and the Comptroller. Separate financial statements may be obtained by contacting TSAHC at 2200 East Martin Luther King Jr. Blvd., Austin, Texas 78702.

OneStar National Service Commission and OneStar Foundation (OneStar) are legally separate nonprofit corporations that administer the AmeriCorps*Texas program. They serve as the state's liaison to and oversee Texas' participation in OneStar programs for the Corporation for National and Community Service (a federal agency), as well as prepare a comprehensive three-year national service plan for the state. The governor appoints all members of OneStar's boards. The governor can also remove any board member at will. OneStar performs all administrative duties of the OneStar National Service Commission,

Inc., as well as provides technical assistance, education, information and other support to the volunteer community. OneStar is reported for the fiscal year ended Dec. 31, 2018. The financial statements of OneStar can be obtained by contacting OneStar at 9011 Mountain Ridge Drive, Suite 100, Austin, Texas 78759.

Texas Low-Level Radioactive Waste Disposal Compact Commission (Commission) is a legally separate organization established to promote the health, safety and welfare of the citizens and environment of the states participating in the Texas Low-Level Radioactive Waste Disposal Compact (Compact), known as party states. There are currently two party states, Texas and Vermont, with Texas serving as the host party state. The mission of the Commission is to:

- Limit the number of radioactive waste disposal facilities;
- Effectively, efficiently and economically manage low-level radioactive waste; and
- Encourage the reduction of the generation thereof.

Since Texas serves as the host party state for the Compact, it is entitled to six voting members, whereas the other party state is only entitled to one voting member. The governor appoints the six members of the Commission serving on behalf of Texas. As host state, Texas has the authority to establish the disposal fees assessed at the facility for disposal of low-level radio-active waste generated in the party states. The Texas Legislature, with the approval of the governor, also has the authority to revise the portion of the Compact pertaining to the volume of waste the host state will dispose of without the consent of the nonhost party states. The financial statements of the Commission may be obtained by contacting the Commission at 505 West 15th Street, Austin, Texas 78701.

Texas Prepaid Tuition Scholarship Foundation (TPTSF) is a legally separate entity that was created to provide prepaid tuition scholarships to students meet-

ing economic or academic requirements. TPTSF is a direct-support organization of the Texas Guaranteed Tuition Plan and is authorized by the Texas Education Code. TPTSF is governed by a board composed of the Comptroller, a member appointed by the governor with the advice and consent of the Senate and three members appointed jointly by the Comptroller and the member who is appointed by the governor. The Comptroller serves as the Executive Director of the board and assigns and supervises employees responsible for the day-to-day operations of TPTSF. TPTSF does not issue separate financial statements. Information may be obtained by contacting the Texas Comptroller of Public Accounts, Educational Opportunities and Investments Division at 111 E. 17th Street, Austin, Texas 78774.

Texas Match the Promise Foundation (TMPF) is a legally separate entity established to implement the Texas Save and Match Program, which helps families save for college by offering competitive matching scholarships and tuition grants to Texas students who participate in the Texas Tuition Promise Fund. The Comptroller appoints TMPF's governing board, and can remove appointed board members at will. The Comptroller also assigns and supervises employees responsible for the day-to-day operations of TMPF. TMPF does not issue separate financial statements. Information may be obtained by contacting the Texas Comptroller of Public Accounts, Educational Opportunities and Investments Division at 111 E. 17th Street, Austin, Texas 78774.

Texas Windstorm Insurance Association (Association) is a legally separate organization established to provide an adequate market for windstorm and hail insurance in the seacoast territory of Texas and serves as an insurer of last resort. The commissioner of the Texas Department of Insurance (TDI) appoints the ninember board of directors, and the board is responsible and accountable to the commissioner. The state of Texas has the ability to impose its will on the Association through TDI commissioner approval of rates and maxi-

mum liability limits for windstorm and hail insurance policies issued by the Association. The Association is reported for the fiscal year ended Dec. 31, 2018. Separate financial statements may be obtained by contacting the Association at 5700 South Mopac Expressway, Building A, Austin, Texas 78749.

Surplus Lines Stamping Office of Texas (Stamping Office) is a legally separate nonprofit unincorporated organization created by the Legislature to assist TDI in the regulation of surplus lines insurance. TDI's commissioner appoints the board. The Stamping Office performs its functions under a plan of operation approved by order of TDI. The Stamping Office assesses each surplus lines insurance agent a stamping fee for the administrative funding of the Stamping Office. The state of Texas has the ability to impose its will upon the Stamping Office through the approval of the assessment rate that funds its operations. The Stamping Office is reported for the fiscal year ended Dec. 31, 2018. Separate financial statements may be obtained by contacting the Stamping Office at 805 Las Cimas Parkway, Suite 150, Austin, Texas 78746-6526.

Texas Health Reinsurance System (THRS) is a legally separate entity that reinsures risks covered under the health benefit plans of small employers' insurance carriers. TDI's commissioner appoints, supervises and controls the nine-member board. The state of Texas has the ability to impose its will through TDI commissioner approval of base reinsurance premium rates and the assessment rates against reinsured health benefit plans. Issuers are subject to commissioner approval. Senate Bill 1171-ENR-85R of the 85th Legislature called for approval of a Plan of Suspension of THRS. Following notice and hearing, TDI approved a Plan of Operation for THRS authorizing its wind down, suspension of operations and closeout. Final reporting for THRS will be in fiscal year 2019.

Texas FAIR Plan Association (TFPA) is a legally separate entity established to administer the Fair Access

to Insurance Requirements Plan, which delivers property insurance to Texas residents in underserved areas. The 11-member governing board is appointed by TDI's commissioner. The commissioner may remove appointed board members at will. TFPA is reported for the fiscal year ended Dec. 31, 2018. Separate financial statements may be obtained by contacting TFPA at 5700 South Mopac Expressway, Building A, Austin, Texas 78749-1461.

Texas Boll Weevil Eradication Foundation Inc. (TBWEF) is a legally separate entity that establishes and implements a boll weevil eradication program for Texas. It is governed by 21 board members. The Texas Department of Agriculture's (TDA) commissioner appoints five of the board members. Although TDA must approve the TBWEF's budget, assessment fees and debt, a financial benefit or financial burden does not exist between the TBWEF and the primary government. Therefore, the primary government is not financially accountable for the TBWEF. However, based on the TBWEF's financial relationship with the TDA, omitting the TBWEF would result in incomplete financial statements. The TBWEF is reported for the fiscal year ended Dec. 31, 2018. Separate financial statements may be obtained by contacting TDA at P.O. Box 12847, Austin, Texas 78711-2847.

Texas Agricultural Finance Authority (TAFA) is a legally separate entity that provides financial assistance for the expansion, development and diversification of agricultural businesses, and primarily benefits the citizens of Texas. TAFA is governed by a board of directors composed of the Commissioner of Agriculture, Deputy Commissioner of Agriculture Designee, the Director of the Institute for International Agribusiness studies at Prairie View A&M University, and nine members appointed by the Commissioner of Agriculture. The commissioner of TDA administers TAFA with the assistance of the board of directors. If there are insufficient funds to pay TAFA's bond obligations, the primary

government is obligated to transfer money from the state treasury to TAFA in an amount sufficient to pay those obligations. Separate financial statements may be obtained by contacting TDA at P.O. Box 12847, Austin, Texas 78711-2847.

Texas Water Resources Finance Authority
(Authority) is a legally separate entity created by the
Legislature as a governmental entity and body politic
and corporate for the purpose of increasing the availability of financing for water-related projects, and primarily benefits the citizens of Texas. A board of directors, composed of the three members of the Texas Water
Development Board (TWDB), governs the Authority.
The members of the TWDB are appointed by the governor. TWDB, through a sales and servicing agreement,
wholly manages the Authority's operations. Financial
statements may be obtained by contacting TWDB at

Texas Appraiser Licensing and Certification Board (TALCB) is a legally separate entity statutorily created as an independent subdivision of the Texas Real Estate Commission (TREC) to serve the real estate community in Texas. The governor appoints the members of the governing board. TREC provides administrative support to TALCB, but has no authority to approve or modify its budget or to set its fees. Although TREC is not financially accountable for TALCB, to exclude it would result in the presentation of incomplete financial statements. Financial statements can be obtained by contacting TREC at P.O. Box 12188, Austin, Texas 78711-2188.

P.O. Box 13231, Austin, Texas 78711-3231.

Texas Disaster Relief Fund (TDRF), a legally separate nonprofit corporation, was established to help the Office of the Governor provide disaster relief. The services provided by TDRF assist the Office of the Governor in responding to the needs of the citizens before, during and after a disaster in Texas. The corporation's financial statements for the year ended Dec. 31, 2018, may be obtained by contacting the Office of the Governor at P.O. Box 12428, Austin, Texas 78711.

Texas Health Services Authority (THSA) is a legally separate entity created for the improvement of the Texas health care system. THSA promotes and coordinates the electronic exchange of health information throughout the state to ensure information is available to health care providers and to improve patient safety and quality of care. The board of directors consists of 11 members and is appointed by the governor, with the advice and consent of the Senate. The Governor may order the dissolution of the corporation at any time he declares that the purpose of the corporation has been fulfilled or that the corporation is inoperative or abandoned. THSA is reported for the fiscal year ended Sept. 30, 2018. THSA's financial statements may be obtained by contacting THSA at 901 South Mopac Expressway, Bldg. 1, Suite 300, Austin, Texas 78746.

Beacon State Fund (BSF) is a legally separate organization established to support the goals of the Governor's Commission on Women (GCW) in promoting issues affecting the women of Texas through distributing of information, holding media campaign events and supporting community outreach programs, which are consistent with the goals of the commission. The board is elected annually by the current board of directors at its annual meeting. The Office of the Governor provides reasonable use of its office facilities and personnel. BSF is reported for fiscal year ended Dec. 31, 2018. Financial statements may be obtained by contacting the Office of the Governor, P.O. Box 12428, Austin, Texas 78711.

State Agency Council (SAC) is a legally separate organization established to support the goals of the GCW by honoring women who have made significant contributions to Texas through their work in state government, providing opportunities for professional development to its state agency representatives and supporting community outreach programs consistent with the goals of GCW. The director of GCW appoints the board and has operational influence on the activities of the corporation. SAC is reported for the fiscal year

ended Dec. 31, 2018. Financial statements for the SAC may be obtained by contacting the GCW at P.O. Box 12428, Austin, Texas 78711.

Texas Governor's Mansion Administration (TGMA) is a legally separate nonprofit organization established to support the financial administration of catering and facility and other expenses associated with the use of the official residence of the governor of the state for events and operations. TGMA is closely related to the state of Texas because the Office of the Governor provides administrative services, including accounting services, to TGMA. TGMA is reported for the fiscal year ended Dec. 31, 2018. Separate financial statements for TGMA may be obtained by contacting the Office of the Governor at P.O. Box 12428, Austin, Texas 78711.

Robert G. Carr and Nona K. Carr Scholarship Foundation (Carr Foundation) is a legally separate entity established for the sole purpose of providing scholarships to students of ASU, a campus within the Texas Tech University System (TTU). The TTU board of regents serves as the governing board for the Carr Foundation, and has the ability to appoint, hire, reassign or dismiss those persons responsible for the day-to-day operations of the Carr Foundation. Separate financial statements may be obtained by contacting the Carr Foundation at P.O. Box 11007C, ASU Station, San Angelo, Texas 76909.

University of North Texas Foundation (UNTF) is a legally separate entity established to raise funding for scholarships for students of the University of North Texas System (UNT), as well as provide funding for the benefit of the UNT. The majority of endowments supporting the UNT scholarships and other University programs are owned by the UNTF. Therefore, the UNTF is closely related to the UNT, and failure to include its financial activities would lead to incomplete financial statements. Separate financial statements may be obtained by contacting the UNTF at 1155 Union Circle #311250, Denton, Texas 76203-5017.

University of North Texas Health Science Center Foundation (UNTHSCF) is a legally separate entity established to raise funding for scholarships for students of the University of North Texas Health Science Center (UNTHSC), as well as provide funding for the benefit of UNTHSC. The majority of endowments supporting the UNTHSC scholarships and other university programs are owned by the UNTHSCF. Therefore, the UNTHSCF is closely related to UNTHSC, and failure to include its financial activities would lead to incomplete financial statements. Separate financial statements may be obtained by contacting the UNTHSCF at 3500 Camp Bowie Blvd., Fort Worth, Texas 76107-2699.

The Alamo Endowment (TAE) is a legally separate entity established to provide resources and support for the preservation and maintenance of the Alamo Complex. The Texas General Land Office (GLO) appoints the voting majority of TAE and can impose its will through its ability to remove board members at will. GLO can also impose its will through its ability to appoint, hire, reassign or dismiss those persons responsible for the day-to-day operations of TAE. TAE is reported for the fiscal year ended June 30, 2019. Separate financial statements may be obtained by contacting TAE at P.O. Box 2099, San Antonio, Texas 78297.

Related Organizations

Related organizations are legally separate, fiscally independent entities for which the state appoints a voting majority of the board, but the state is not financially accountable for the entity.

Texas Economic Development Corporation

(TxEDC) operates as a nonprofit corporation to assist, promote, develop and advance economic development in the state of Texas. TxEDC is no longer reported as a component unit, but is included because a majority of the board is appointed by the Office of the Governor (Office), but the Office is not financially accountable for TxEDC.

Texas Mutual Insurance Company (Texas Mutual) operates as a domestic mutual insurance company providing workers' compensation insurance in the state of Texas and also serves as the insurer of last resort. The commissioner of insurance regulates this entity to the same extent as a private mutual insurance company. The governor, with the advice and consent of the Senate, appoints five of the nine members of Texas Mutual's board of directors.

Texas Title Insurance Guaranty Association (TTIGA) is a legally separate nonprofit organization created for the purpose of providing funds for the protection of holders of covered claims as defined in the Texas Insurance Code. This applies to all title insurance written by title insurance companies authorized to do business in Texas. The nine-member board of directors is appointed by TDI's commissioner.

Texas Life and Health Insurance Guaranty Association (TLHIGA) is a legally separate entity created to protect persons against failure in the performance of contractual obligations under life, accident and health insurance policies and annuity contracts due to the impairment or insolvency of the member insurer that issued the policies or contracts. TDI's commissioner appoints TLHIGA's nine-member board of directors.

Midwestern State University Charitable Trust (Trust) is a nonprofit organization with the sole purpose of educational and other activities of Midwestern State University (MSU). It is governed by a board of trustees of no less than three members. This board appoints individuals to fill vacancies on the board as they occur with the approval of the MSU board of regents. The Trust's board of trustees serves under the direction of the board of regents, which has the power by majority vote to appoint or remove any or all of the trustees.

Charter School Finance Corporation is a nonprofit organization with the sole purpose of issuing revenue bonds for authorized open-enrollment charter schools for the acquisition, construction, repair or renovation

of education facilities at those schools. The Texas Public Finance Authority appoints the board of directors in consultation with the commissioner of the Texas Education Agency and subject to the governor's approval.

Texas State University System Foundation Inc. (TSUSF) is a nonprofit corporation organized for the purpose of providing financial support for the universities and colleges within the Texas State University System. The TSUSF provides funds for student scholarships and faculty awards and assists the chancellor in performing his/her duties. The Foundation's sevenmember board of directors is appointed by the chairman of the TSUS board of regents.

Operation Game Thief Committee is a nonprofit corporation established to administer the Operation Game Thief Program (The Program). The Program facilitates the apprehension and prosecution of persons who violate Texas laws intended to protect the state's natural or cultural resources and the public safety of persons using those natural or cultural resources. The Program also pays rewards and death benefits authorized by Texas statute. The Texas Parks and Wildlife Department's executive director appoints the members of the committee.

Parks and Wildlife Foundation of Texas, Inc. (Foundation) is a legally separate nonprofit organization established to manage and conserve the natural and cultural resources of Texas and to provide hunting, fishing and outdoor recreation opportunities for the use and enjoyment of present and future generations. The Foundation provides private support to the Texas Parks and Wildlife Department (Department), but the Department is not financially accountable for the Foundation, nor is the Foundation fiscally dependent on the Department. The Foundation is governed by a group of trustees, the majority of whom are appointed by the chairman of the Department.

The Texas Higher Education Foundation (THEF), formerly known as the College for all Texans, is established to support the Texas Higher Education

Coordinating Board (THECB) program initiatives. THECB is unable to impose its will on THEF and there is no financial benefit or burden relationship between THECB and THEF.

River Authorities are political subdivisions created by Texas statute. The Texas Constitution, Article XVI, Section 59, authorizes the Legislature to create districts that conserve and develop natural resources of the state. The conservation and development of the state's natural resources includes the control, storing, preservation and distribution for irrigation, power and all other useful purposes of storm waters, flood waters and the waters of rivers and streams; the reclamation and irrigation of arid, semiarid and other lands needing irrigation; the reclamation of drainage of overflowed lands and other lands needing drainage; the conservation and development of forests, water and hydro-electric power; the navigation of inland and coastal waters; and the preservation and conservation of all such natural resources of the state. The state of Texas appoints the voting majority for the following 17 river/water authorities:

- · Angelina and Neches River Authority
- Brazos River Authority
- Central Colorado River Authority
- Guadalupe-Blanco River Authority
- Lavaca-Navidad River Authority
- Lower Colorado River Authority
- Lower Neches Valley River Authority
- Nueces River Authority
- · Red River Authority
- Sabine River Authority
- San Antonio River Authority
- San Jacinto River Authority
- Sulphur River Basin Authority
- Trinity River Authority
- Upper Colorado River Authority
- Upper Guadalupe River Authority
- Upper Neches River Municipal Water Authority

Note 20

Deficit Fund Balances/Net Position of Individual Nonmajor Funds

Proprietary Funds

The Texas Prepaid Tuition Plans, that consist of the Texas Guaranteed Tuition Plan (Plan) and the Texas Tuition Promise Fund (TTPF), reported a deficit of \$270.6 million. The Plan deficit of \$416.1 million is due to the difference between the present value of actual and projected contract benefit payments and actual and projected contributions from account holders and investment earnings on those contributions to the Plan. The Plan was closed to new enrollment in 2003 when tuition was deregulated. Over the life of the Plan, actual tuition and required fees for Texas public four-year colleges and universities grew at a higher percentage rate than the Plan's investment return. The TTPF had a surplus of \$145.5 million. The TTPF surplus cannot be used to offset the Plan's deficit.

The Grand Parkway Transportation Corporation (GPTC), a blended component unit of the Texas Department of Transportation, reported a deficit of \$202 million. The deficit is primarily due to the total expenses exceeding the total revenues by \$58.5 million. The largest expense in fiscal 2019 included \$64.1 million of amortization and \$218.1 million of interest. Interest was capitalized as intangible assets prior to substantial completion of the five segments of the System in March 2016. Starting April 2016, interest was reported as expense. Amortization of intangible assets began in fiscal 2016.

The **Texas Windstorm Insurance Association**, a discretely presented component unit of the state, reported a deficit of \$267.7 million. The deficit is due to significant claim activity from Hurricane Harvey that affected the Texas coast in 2017. The deficit amount was reduced from fiscal 2018 to fiscal 2019.

Note 21

Tobacco Settlement

The state of Texas settled a lawsuit against certain tobacco manufacturers in 1998. The settlement included monetary and injunctive relief. The settling tobacco manufacturers agreed to remit annual payments to the state. Estimates made at the time of the agreement projected that these payments could total \$15.3 billion over the first 25 years of the agreement. The court-ordered annual payment amounts are subject to adjustments based on the tobacco companies' domestic cigarette sales, the agreed inflation adjustment and any other court-ordered factors. A revenue accrual of \$275.5 million is based on the payments received in December 2019. Tobacco settlement revenues were \$462.8 million in fiscal 2018 and \$453 million in fiscal 2019. As of fiscal 2019, cumulative actual tobacco settlement revenues were \$11 billion.

During fiscal 2019 the state of Texas has filed an additional lawsuit against certain tobacco manufacturers seeking the court enforcement of the settlement agreement. The pending litigation relates to the sale of four cigarette brands, whose sales have not been included in the annual payments since 2015. Although the outcome of this case cannot presently be determined, favorable ruling based on other states' outcomes could result in significant additional income, totaling \$125 million.

Note 22

Donor-Restricted Endowments

The state of Texas has donor-restricted endowments with net appreciation of 3.6 billion on investments available for authorization for expenditure by the governing board. Details for the amounts of the net appreciation on investments and how they are reported are presented in table 22A.

Donor-Restricted Endowments (Amounts in Thousands) Donor-Amount of Net Restricted Reported in Appreciation **Endowments Net Position** \$3,509,179 True Endowments Expendable Term Endowments 55,282 Expendable

\$3,564,461

True endowments require the principal to be maintained inviolate and in perpetuity. Term endowments allow the principal to be expended after the passage of a stated period of time and all conditions of the endowment are met. Expendable funds are those funds that may be expended for either a stated purpose or for a general purpose as per the endowment gift terms. Non-expendable funds are those required to be retained in perpetuity.

The majority of the state's endowments are the results of donations made to institutions of higher education. The Uniform Prudent Management of Institutional Funds Act, Texas Property Code, Chapter 163, provides general guidelines on how endowments should be maintained. An institution may appropriate for expenditures or accumulate as much as the institution determines prudent for the uses, benefits, purposes and duration of the endowment. Each institution sets the amounts and/or percentage of net appreciation on endowment investments that are authorized for expenditure in its spending plan.

Net appreciation on related investment balances for the University of North Texas Foundation and University of North Texas Health Science Center Foundation, discrete component units of the University of North Texas System have a combined ending net appreciation balance of \$27 million. These amounts are not included in table 22A.

Note 23

Taxes Receivable and Tax Refunds Payable

Taxes receivable and tax refunds payable, as reported on the balance sheet - governmental funds, are detailed by tax type in the tables 23A and 23B.

\$ 520,347

Texas franchise tax receivables represent balances due as of Aug. 31, 2019, for business-type activity that occurred in calendar year 2018. The franchise tax payments were due May 15, 2019; however, taxpayers were allowed to extend the filing date to November 2019.

Franchise taxes are considered earned when the business-type activity occurs. Franchise tax applies to certain for-profit entities doing business or chartered in Texas and is based on the total revenue, that is, income reported to the federal Internal Revenue Service (IRS) with various deductions, limitations, and exceptions. There are no required quarterly estimated payments under this tax. Annual franchise tax reports and tax payments are due May 15 unless it falls on a weekend or holiday then the next business day. Generally the tax earned during the first eight months of calendar year 2019 is not due until May 2020. As a result, the taxes receivable and related revenue that are earned in this eight month period are not measurable and are not accrued at fiscal year-end.

Note 24

Termination Benefits

Health Care Related Termination Benefits

Health care continuation under the Consolidated Omnibus Budget Reconciliation Act (COBRA) is provided for both voluntary and involuntary terminations. COBRA members are allowed to remain in their eligible insurance program for 18 months or 29 months if disabled. Covered dependents are eligible to remain in the program for 36 months. COBRA plan administrators for the state include the Employees Retirement System of Texas, the University of Texas System and the Texas A&M University System.

For self-insured and fully-insured plans, the insurance carrier performs the billing and collections process for COBRA participants. If the plan is self-insured, the insurance carrier then forwards the premium to the plan administrators, net of a 2 percent administrative fee, which is intended to cover costs related to the billing and collection functions. The plan administrators are responsible for any claims or administrative costs associated with COBRA participants that exceed these payments. For fiscal 2019, the cost to the state was approximately \$27.1 million for 4,114 COBRA participants.

For the fully-insured health maintenance organization health insurance plans, the insurance carrier retains all premiums and is liable for all claims and expenses. Premium and expense information is not available for these plans.

Non-Health Care Related Termination Benefits

Generally, state employees are not awarded severance pay. Institutions of higher education and agencies with specific statutory authority may offer voluntary or involuntary termination payments for separation. In addition to termination payments, agencies may also offer career counseling and outplacement services.

Note 25

Segment Information

Primary Government

A segment is a separately identifiable activity reported as or within enterprise funds for which revenue bonds or other revenue-backed debt instruments are outstanding and for which related expenses, gains, losses, assets and liabilities can be identified. To qualify as a segment, an activity must also be subject to an external requirement to separately account for this revenue stream. Segment disclosure is not required for an activity whose only outstanding debt is conduit debt or if an individual fund is both a segment and reported as a major fund. Therefore, the following programs have met the requirements for disclosure as a segment. These following programs were funded by the issuance of revenue

bonds, which require revenues, expenses, gains, losses, assets and liabilities to be separately accounted for:

- The Single Family Bond Program was created to originate below-market rate loans for eligible low- and moderate-income residents who are purchasing a residence.
- The Residential Mortgage Revenue Bond Program (RMRB) was created to purchase single-family loans, while proceeds from the remaining RMRB bond issues are used to purchase pass-through certificates created through the origination of single-family loans.
- The Collateralized Home Mortgage Revenue
 Bond Program was created to purchase passthrough certificates created through the funding
 of loans made to finance the purchase by eligible
 borrowers of new and existing single-family
 residences in the state. The Collateralized Home
 Mortgage Revenue Bonds were fully redeemed
 during fiscal 2019 and have no assets at the end
 of the year.

Note 26

Service Concession Arrangements

The state of Texas has ten arrangements that fit the criteria of a service concession arrangement (SCA). As the transferor in these arrangements, the state retains ownership rights and title to all assets associated with an SCA.

All ten of these arrangements were entered into by the Texas Department of Transportation (TxDOT). The fees the operator collects are in the form of tolls. Project maintenance and operations will transfer back to TxDOT once the arrangements have ended.

A general description of each SCA, including status, term and duration, is presented in table 26A.

These arrangements were entered into to:

- improve mobility by expanding existing road capacity and introducing managed toll lanes, traditional toll lanes and other strategies aimed at reducing traffic congestion;
- enable the state to deliver these projects faster than would be possible using traditional funding sources; and
- shift the majority of the financial risk to the operator.

In the year an SCA project opens for traffic, TxDOT records the capital assets acquired under the SCA at their acquisition value with a corresponding entry to deferred inflows of resources. The deferred inflows of resources balance will then be reduced and revenue will be recognized in a systematic manner over the term of the arrangement, beginning when the infrastructure assets are placed into operation.

Up-front concession payments received are recorded as assets (cash and cash equivalents) with an offset to deferred inflows of resources. Revenue is recognized and the deferred inflows of resources are reduced in a systematic and rational manner over the term of the arrangement. SCA amounts reported as of Aug. 31, 2019, are presented in table 26B.

Service Concession Arrangements

	\$377,592	\$12,351,126	\$11,332,722

^{*} The balance of cash and cash equivalents is the amount of unspent up-front concession payments.

^{**} The deferred inflows of resources balance that relates to up-front payments received is recorded in governmental fund financials as other financing sources in the year received.

In some cases, TxDOT is obligated to make contributions of public funds to the SCA project during the construction period for portions of the project's design, construction or right-of-way costs. Outlays of TxDOT funds related to SCA projects are recorded as additions to construction in progress as they are incurred.

The Grand Parkway Transportation Corporation (GPTC) is a blended component unit of TxDOT. In fiscal 2013, GPTC and TxDOT entered into an arrangement that fits the criteria of a SCA. Pursuant to this arrangement, GPTC is responsible for the design, construction, financing and operation of Segments D (Harris County) and E, F1, F2, G, H and I of the Grand Parkway (State Highway 99) for a period until the bonds or other debt secured is fully repaid. GPTC will be entitled to all toll revenues during the operations period. At the end of the arrangement, operation of the roadway will be transferred to TxDOT.

The objective of this arrangement is to deliver this project in partnership with TxDOT more quickly than would be possible under a traditional structure.

As of Aug. 31, 2019, the Texas Transportation Commission has outstanding toll equity grant commitments and toll equity loan commitments totaling \$173.4 million and \$9.4 billion, respectively. Payments of these amounts are made subject to executed financial assistance agreements between TxDOT and the applicable public or private entity. The toll equity loan commitment is related to a toll equity loan agreement (TELA) with the GPTC. This agreement makes a loan available to be drawn on in the event revenues and certain reserves are insufficient to pay certain debt service or operations and maintenance cost of the toll systems of aforementioned entities. The GPTC funds financed by TELA-supported debt are to be used to pay for certain costs relating to the development, construction, operation, maintenance and financing of Segments D (Harris County), E, F1, F2, G, H and I and the predevelopment of possible extensions or expansions of the

Grand Parkway. The maximum amount of money that can be paid by TxDOT to GPTC under the TELA is equal to the aggregate amount of cost that are authorized under Article VIII, Section 7a of the Texas Constitution and Section 222.103 of the Texas Transportation Code, i.e. the "Eligible Costs". As of Aug. 31, 2019, no drawdowns of funding have been requested by GPTC under this arrangement.

GPTC has recognized an intangible asset in the amount of \$2.6 billion for its costs of design, construction and right-of-way acquisition for the year ended Aug. 31, 2019. This amount is reported as business-type activities.

Note 27

Deferred Outflows of Resources and Deferred Inflows of Resources

In fiscal 2019, the state reported deferred outflows of resources and deferred inflows of resources in connection with its hedging derivative instruments, service concession arrangements, bond refunding, pensions, other postemployment benefits other than pensions, government acquisitions, irrevocable split-interest agreements, direct borrowings/placements obligations, asset retirement obligations, and various types of revenues earned but not available at the fiscal year end.

Table 27A presents the balances of deferred outflows of resources and deferred inflows of resources as of Aug. 31, 2019 for governmental activities, business-type activities and governmental funds.

Deferred outflows of resources in business-type activities of \$605.8 million related to hedging derivatives in a liability position. The hedging derivative liability of \$606.8 million is disclosed in Note 7.

Deferred outflows of resources in business-type activities of \$38.7 million represent the unamortized balance of the excess consideration over the net position acquired in the acquisition of various university assets.

Deferred inflows of resources in governmental activities of \$11.3 billion were related to service concession arrangements (SCA) entered into by the Texas Department of Transportation (TxDOT) with non-state entities. This amount reflects the unamortized balance

of up-front concession payments received and capital improvements acquired from these entities. Details of the state's SCA are disclosed in Note 26.

Deferred outflows of resources of \$169.7 million in governmental activities were related to losses TxDOT and Texas Public Finance Authority incurred in bond refunding transactions. TxDOT and several universities also had bond refunding transactions in fiscal 2019 in business-type activities for \$152.6 million in deferred outflows of resources related to losses.

Deferred inflows of resources in governmental activities of \$3.2 million was related to a gain TxDOT incurred on a bond refunding transaction. Several universities also reported \$6.8 million deferred inflows of resources related to bond refunding gains in business-type activities.

Deferred inflows of resources of \$715.9 million in governmental funds were related to various types of revenues earned but not available within 60 days of fiscal year end.

The state reported \$16 billion of deferred outflows of resources and \$5.5 billion of deferred inflows of resources related to pensions in governmental activities. The state also reported \$3.7 billion of deferred outflows of resources and \$751.5 million of deferred inflows of resources related to pensions in business-type activities. Details of the state's pensions are disclosed in Note 9.

The state reported \$3.6 billion of deferred outflows of resources and \$24.5 billion of deferred inflows of resources related to OPEB in governmental activities. The state also reported \$3.4 billion of deferred outflows of resources and \$3.9 billion of deferred inflows of resources related to OPEB in business-type activities. Details of the state's OPEB are disclosed in Note 11 in fiscal 2019

The state reported \$483 thousand of deferred outflows of resources and \$1.1 million of deferred inflows of resources related to direct placement obligations and \$58.7 million of deferred inflows of resources related to split-interest agreements in business-type activities.

The state implemented GASB Statement No. 83, Certain Asset Retirement Obligations, in fiscal 2019. As a result, in fiscal 2019, the state reported \$1.7 million of deferred outflows of resources related to asset retirement obligations in governmental activities and \$7 million of deferred outflows of resources and related to asset retirement obligations in business-type activities.

Note 28

Nonexchange Financial Guarantees

The state of Texas has two active programs that extend nonexchange financial guarantees to other entities.

Article VII, Section 5 of the Texas Constitution and the Texas Education Code, Title 2, Subtitle I, Chapter 45 provides for the guarantee of school district bonds by the permanent school fund (PSF). The PSF is also authorized for use to guarantee revenue bonds issued for certain open-enrollment charter schools designated by the commissioner of education. In the event of default by a school district or charter school district, funds may be withheld from state money payable to the district or school in an amount necessary for payment of principal and/or interest. Guarantees extend through maturity dates of the bonds. At this date, no school districts or charter school districts have defaulted on their guaranteed bond indebtedness. As of Aug. 31, 2019, the total principal debt guaranteed by the PSF on bond issues is approximately \$84.4 billion.

The Texas Credit Enhancement Program (TCEP) was established to provide a guarantee fund for issuing tax exempt revenue bonds to provide financing for the acquisition, construction, repair or renovation of Texas charter school facilities within federal program guidelines. A consortium consisting of the Texas Public Finance Authority Charter School Finance Corporation (CSFC), the Texas Charter Schools Asso-

ciation and the Texas Education Agency was awarded a federal grant to create the guarantee fund. The CSFC is a nonprofit corporation, in which the directors are appointed by the Texas Public Finance Authority (TPFA) in consultation with the commissioner of education and subject to the approval of the governor pursuant to section 53.351 of the Texas Education Code. TPFA provides administrative and staff support for CSFC. Reimbursement periods commence on the date of a guarantee payment and end 12 months following such payment. Borrowers will reimburse CSFC within the guarantee period by making level monthly principal repayments for each guaranty period during the reimbursement period. Guarantees extend through maturity dates of the bonds. At this date, no charter schools have defaulted on their guaranteed bond indebtedness. As of Aug. 31, 2019, \$9.1 million of available grant funds have been committed.

Note 29

Tax Abatements

The state of Texas provides tax abatements under the following programs: agricultural or timber programs, Research and Development Tax Credit Programs, Texas Enterprise Zone Programs, Texas Data Center Sales Tax Exemption Program, and Certified Rehabilitation of Certified Historic Structures Program. All abatement amounts are based on estimates.

Information related to these programs is presented in table 29A-D below:

Tax Abatement Programs

	Research and Development Tax Credit Program				
	Exemptions	Credits			
Purpose of Program	Provide a sales and use tax exemption or a franchise tax credit; but not both to encourage economic development in Texas. Election is not permanent and can be changed.				
Tax being abated	Sales and Use Tax	Franchise Tax			
Authority granting abatement	Texas Tax Code	Texas Tax Code			
	Section 151.3182.	Section 171.654.			
	Expires Dec. 31, 2026				
Criteria to be eligible	Must be for purchase, lease, rental, storage or use of deprecent research expenditures.	iable tangible personal property directly used in qualified			
How taxes are reduced/amount of abatement is determined	Purchase of qualified items are not subject to the state's sales and use tax of 6.25 percent	Generally equal to 5 percent of the difference between the qualified research expenses in the reporting year an 50 percent of the average qualified research expense in the three preceding tax periods. Unused credits can be carried forward.			
Provision for recapture	Whenever the Comptroller or the registrant cancels or otherwise terminates the registration number, the registrant will be required to pay the tax, penalty, and interest due from the date of purchase on all ineligible tax-free purchases.	N/A			
Additional commitment by the state other than to reduce taxes	No other commitments are made	No other commitments are made			
Amount of Taxes Abated	\$ 158,000	\$ 210.192			

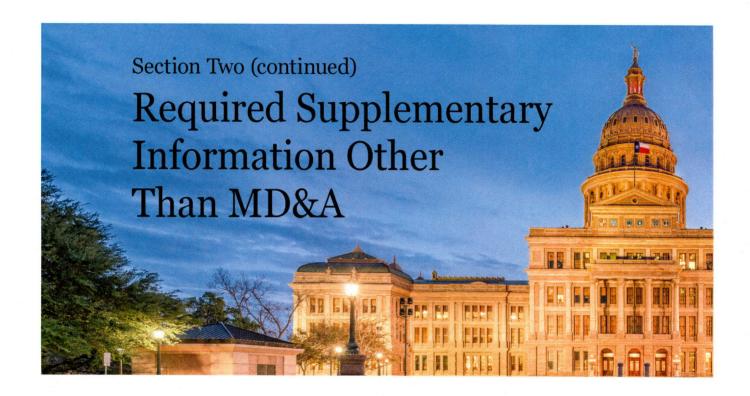

(In Thousands)			
	Texas Enterprise Refunds	e Zone Programs Refunds	
Purpose of Program	Allows local communities to partner with the state to encourage job creation and capital investment in economically distressed areas. Local communities can nominate a new or expanding business as an "enterprise project".		
Γax being abated	Sales and Use Tax	Hotel Occupancy Tax	
Authority granting abatement	Texas Tax Code Section 151.429	Texas Tax Code Section 151.429	
Criteria to be eligible	Nominated projects that are approved are eligible to apply for state sales and use tax refunds on qualified expenditures. The nominating community files the application on behalf of the companies receiving the refunds.	A hotel proposed to be constructed by a municipality or a nonprofit municipally sponsored local government corporation created under the Texas Transportation Corporation Act, Chapter 431, Transportation Code, that is within 1,000 feet of a convention center owned by a municipality having a population of 1,500,000 or more, including shops, parking facilities, and any other facilities ancillary to the hotel. Texas Government Code Section 2303.003.	
How taxes are reduced/amount of abatement is determined	Level and amount depend on the capital investment and jobs created at the qualified business site. Abatements last from one to five years, in addition to a 90-day window prior to the application date. Employment and capital investment commitments must be incurred and met within this time frame. Rebates range from: \$25,000 for a project investing \$40,000 in capital and creating 10 jobs to \$3.75 million for a project investing \$250 million in capital and creating 500 or more jobs.	Qualified hotel projects within approved enterprise zones can receive refunds of state sales and use taxes paid or collected and all hotel occupancy taxes collected by the hotel during the first ten years after the project is open for initial occupancy.	
Provision for recapture	Rebate is conditioned on project maintaining at least the same level of employment of qualified employees as existed at the time it qualified for the refund for a period of three years from that date. If the Comptroller's Office certifies that the level of employment has not been maintained, the Comptroller's Office shall assess that portion of the refund made attributable to any such decrease in employment, including penalty and interest from the date of the refund.	N/A	
Additional commitment by the state other than to reduce taxes	No other commitments are made	No other commitments are made	
Amount of Taxes Abated	\$ 45,086	\$ 13,495	

Tax Abatement Programs Table 29D

(In Thousands)

	Other Programs			
	Texas Data Center Program	Certified Rehabilitation of Certified Historic Structures		
	<u>Exemption</u>	Credit		
Purpose of Program	Sales and use tax exemption on certain goods and services necessary and essential to the operation of single-operator data centers.	Earn franchise tax credit for expenses incurred for the rehabilitation of a certified historic structure in which the entity has an ownership interest.		
Tax being abated	Sales and Use Tax	Franchise Tax		
Authority granting abatement	Texas Tax Code Sections 151.359 and 151.3595	Texas Tax Code Section 171.904-171.909		
Criteria to be eligible	Data center must be single-occupant Obtain exemption through application Required to create at least 20 qualifying jobs Make capital investment of at least \$200 million over a five year period beginning on the date the data center is certified by the Comptroller of Public Accounts as a qualifying data center.	Acquire certificate of eligibility from the Texas Historical Commission. Rehabilitation/certified costs exceed \$5,000 in the year the structure is placed in service		
How taxes are reduced/amount of abatement is determined	Qualified items are not subject to the state's sales and use tax of 6.25 percent at the time of purchase or as a refund.	Amount is limited to 25 percent of the total eligible cost and expenses incurred. May not exceed the amount of franchise tax due. May carry credit forward no more than five years. An entity that has established eligibility may assign or sell credits to another entity.		
Provision for recapture	Each entity or person that has their registration number revoked is liable for the state sales and use tax, including penalty and interest from the date of purchase, on all tax-free purchases made under the qualified data center exemption.	N/A		
Additional commitment by the state other than to reduce taxes	No other commitments are made	No other commitments are made		
Amount of Taxes Abated	<u>\$ 70,926</u>	\$ 72,193

Note to Budgetary Comparison Schedule

The budgetary comparison schedule presents comparisons of the legally adopted budget with actual data on a budgetary basis. Since accounting principles applied for purposes of developing data on a budgetary basis differ significantly from those used to present financial statements in conformity with generally accepted accounting principles (GAAP), a reconciliation of these differences is presented in the table below.

August 31, 2019 (Amounts in Thousands)		
	General Fund	State Highway Fund
Excess of Revenues and Other Financing Sources Over		
Expenditures and Other Financing Uses –		
Actual Budgetary Basis	\$15,011,872	\$8,552,364
Basis of Accounting Differences:		
Receivables and Unearned Revenues	(429,433)	353,056
Payables	(531,814)	(520,106)
Perspective Differences:		
Beginning Cash Balances Reported as Other Financing Sources	(11,169,079)	(6,412,101
Revenues and Other Financing Sources Not Budgeted	424,133	(510
Expenditures and Other Financing Uses Not Budgeted	(203,112)	(159,018
Excess of Revenues and Other Financing		
Sources Over Expenditures and Other		
Financing Uses – GAAP Basis	\$ 3,102,567	\$1,813,685

The major reconciling items between the budgetary comparison schedule actual and the GAAP financial statements are:

- Basis of Accounting Differences: Revenues and expenditures are reported on the cash basis of accounting in the budgetary comparison schedule but are reported on the modified accrual basis on the GAAP financial statements. Therefore, unearned revenues, receivables and payables are included as reconciling items.
- Perspective Differences: Certain revenues and expenditures, including debt service and the disproportionate share portion of the Federal Medical Assistance program are not budgeted by

- the Legislature. The activity for these programs is excluded from the budgetary comparison schedule.
- The beginning cash balances are included as other financing sources in the budgetary comparison schedule. The beginning fund balances are not included as financing sources on the GAAP financial statements.
- Entity Differences: Budgets are not established for sources from capital leases. These financing

sources are not included in the budgetary comparison schedule.

Excess of Actual Budgetary Basis Expenditures over Final Budget

General fund – The \$583 million variance in health and human services is the result of increased expenditures made from the excess of federal revenues received over estimates by agencies in this particular function.

Major special revenue fund – state highway fund – The \$868 thousand variance in public safety and corrections are the result of expenditures made from available beginning cash balance in the fund.

Basis of Budgeting

The state's budget is prepared on a cash basis. The Texas Constitution limits appropriation bills to two years. The Legislative Budget Board (LBB) is required by statute to adopt an estimated rate of growth for the next biennium and calculate a limit on the amount of state tax revenue, not dedicated by the Texas Constitution that is available for spending in the next biennium. If the Legislature, by adoption of a resolution approved by a record vote of a majority of the members of each

house, finds that an emergency exists and identifies the nature of the emergency, the Legislature may provide appropriations in excess of the adopted limit. The Governor's Budget Office and LBB initiate the process by submitting budget requests to the Legislature. At final passage of the General Appropriations Act by the Legislature, it is sent to the Comptroller of Public Accounts (Comptroller) for certification. If the Comptroller certifies that appropriated amounts are available in the affected funds, the bill is sent to the governor. If not certified, the Legislature may pass the bill with a four-fifths majority vote. The governor has the option of vetoing the total bill or specific line-item appropriations, but does not have the authority to reduce an item of appropriation. Upon approval by the governor, the bill becomes law and is the budget authority for state agencies to spend state funds. The Comptroller is responsible for controlling, accounting and reporting expenditures in accordance with the expenditure budgets.

Legal Level of Budgetary Control

The Texas Constitution requires the Comptroller to submit a *Biennial Revenue Estimate* to the Texas Legislature prior to each regular session. This document contains an itemized estimate of beginning cash balances, anticipated revenues based on laws then in effect and estimated expenditures from prior appropriations. The Texas Constitution also requires the Comptroller to submit supplementary revenue estimates at any special

session of the Legislature and at other necessary times to show probable changes.

The level of legal control for the budget is established at the strategy (line item) level by agency. For example, "Highway Patrol" and "Vehicle Inspection Program" are two of the strategies for the Texas Department of Public Safety. The legal level of budgetary control is defined as the level at which the governing body must approve any over-expenditure of appropriations or transfers of appropriated amounts. Agencies are authorized limited transfer authority between strategies, not to exceed 20 percent, by the General Appropriations Act. Transfers and expenditures are monitored against the original budget by the Comptroller's office to ensure the agency's authorized budget is not exceeded.

The level of legal control for all agencies is documented in the *Appropriation Summary Report*, which is available by request from the Comptroller's office. This separate document includes budget and actual data by appropriation line item for each state agency. State agencies cannot exceed approved appropriations. In certain emergency situations, the governor may authorize additional appropriations from deficiency and emergency appropriation reserves. Unexpended appropriations generally lapse 60 days after the fiscal year unless they are encumbered during the 60-day "lapse" period. Other appropriations referred to as "reappropriated unexpended balances" represent the continuation of a prior year's balances for completion of a program.

Schedules of Changes in Net Pension Liability and Related Ratios

For each of the fiscal years presented, the measurement date for the information on the schedules of changes in net pension liability and related ratios was the prior fiscal year-end.

The schedules of changes in net pension liability and related ratios for the state's Employees Retirement System of Texas Plan (ERS Plan), Law Enforcement and Custodial Officer Supplemental Retirement Plan (LECOS Plan) and Judicial Retirement System of Texas Plan Two (JRS2 Plan) are presented in tables RSI-2, RSI-3 and RSI-4, respectively:

Notes to Schedule:

- * There are no assets accumulated in a trust that meets the criteria in Paragraph 4 of GASB Statement No. 75 to pay related benefits.
- ** Included Changes in benefit terms: Adopted in January 2018 and effective January 1, 2019, prescription drug coverage for all Medicare-primary participants is provided through a self-funded Employer Group Waiver Plan with Commercial Wrap (EGWP plus Wrap).
- *** Included Changes in Assumptions or Other Inputs: Changes of assumptions and other inputs reflect the changes in the discount rate each period.
 The following are the discount rates used in each period:

FY 2019 - 3.96% FY 2018 - 3.51%

FY 2018 - 3.517

FY 2017 - 2.84%

In fiscal 2018, amounts reflect a 1-percentage-point decrease in the assumed rate of general inflation and adjustments to assumptions for expenses, assumed per capita health benefit costs and assumed trend for health benefit costs, retiree contributions and expenses.

In fiscal 2019, the Assumed Per Capital Health Benefit Costs were updated to reflect the changes in benefit terms due to the implementation of EGWP plus Wrap.

**** This schedule is intended to present 10 years of information.

Currently only two years of information are available. Information for future years will be added when it becomes available.

Contributions in relation to the statutoril required contributions	y 478,578	790,189	319,320

Significant Factors Affecting the Comparability of Amounts Reported

Pension Plans

The state implemented GASB Statement No. 68, Accounting and Financial Reporting for Pensions, an amendment of GASB Statement No. 27, in fiscal 2015. The state implemented GASB Statement No. 82, Pension Issues-an amendment of GASB Statements No. 67, No. 68, and No. 73, in fiscal 2017. Paragraph 7 of GASB Statement No. 82 is not applicable to the state. All pension schedules related to ERS, LECOS, JRS2, TRS and TESRS Plans present information in accordance with the GASB Statement No. 68 and 82 standards. The state implemented GASB Statement No. 73, Accounting and Financial Reporting for Pensions and Related Assets That Are Not within the Scope of GASB Statement 68, and Amendments to Certain Provisions of GASB Statements 67 and 68, in fiscal 2017. Pension schedule for JRS1 Plan presents information in accordance with GASB Statement No. 73.

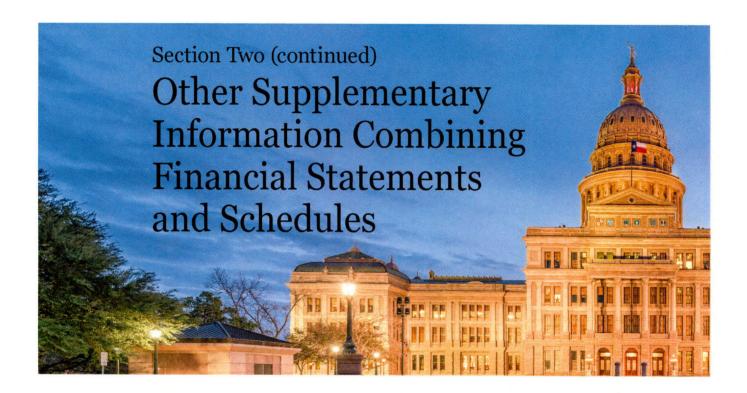

A new set of assumptions were adopted for Aug. 31, 2017 actuarial valuations used to determine contributions rates; these changes include asset valuation methods, inflation, salary increase, investment rate of return and tables related to retirement age and mortality which are included in RSI tables RSI-9 through RSI-11 related to ERS, LECOS and JRS2 plans, respectively.

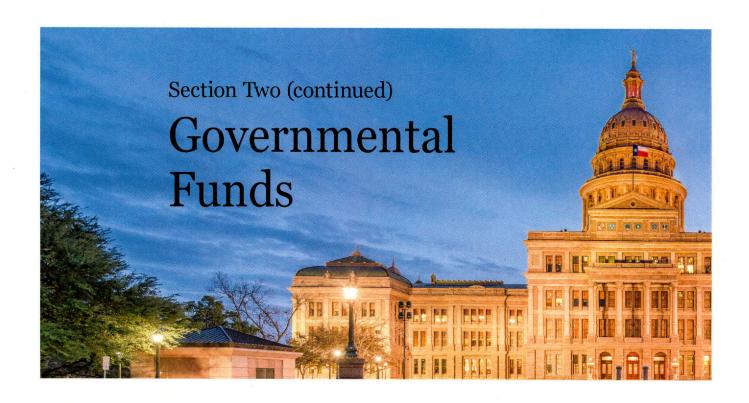

There have been no changes in the actuarial assumptions and methods since the prior valuation for TRS Plan. For the JRS1 Plan, membership continues to decrease as a result of new judicial officers participating in JRS2 Plan.

OPEB Plans

The state implemented GASB Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions, in fiscal 2018. More detailed information on each OPEB plans' actuarial methods, assumptions and benefits may be obtained from Note 11.

Nonmajor Special Revenue Funds

The **Property Tax Relief Fund** is outside the general revenue fund. The proceeds of the fund are from allocations of the computation of motor vehicle sales tax, collection of all tobacco products tax increases and calculated amounts from franchise taxes. The fund was established with the intent of reducing school district property taxes.

The **Texas Motor Vehicles Fund** receives revenues from motor vehicle registrations, title certificates, special vehicle permits, specialty license plates and other transportation-related permits. The funds are used for operations, administration and enforcement.

The **Water Development Funds** receive proceeds from the sale of Texas Water Development bonds for

the purpose of aiding and making funds available to various political subdivisions for projects and other authorized purposes. The funds also receive gifts or grants for the purpose of assisting economically distressed areas. Monies in the funds are invested.

The **Judicial Fund** receives revenues from judicial fees, penalty fees and court filing fees to support the judicial branch of the state, including child support, court management and basic legal services for the indigent.

The **Available School Fund** receives distributions from the permanent school fund based on total return of investment assets, allocations of motor fuel taxes and appropriations made by the Texas Legislature. The fund is to be used for the support of public schools.

Nonmajor Debt Service Funds

The **Texas College Student Loan Bonds Interest and Sinking Fund** receives deposits from the Texas opportunity plan fund for payment of current interest and principal and establishment of a reserve.

The **Texas Department of Transportation Texas Mobility Fund** receives proceeds from the sale of general obligation bonds and the revenues dictated by statute to provide for the debt service requirements of those bonds. The bond proceeds provide a method of financing for the construction, reconstruction, acquisition and expansion of state highway projects. The proceeds remain in the fund until transferred to the state highway fund.

The **Texas Public Finance Authority G.O. Bond Funds** receive proceeds and accrued interest from the sale of general obligation bonds and provide the debt service requirements for those bonds.

The **Texas Public Finance Authority Commercial Paper Funds** receive deposits of any accrued interest on the sale of notes and pledged revenues necessary to make debt service payments.

The Texas Department of Transportation State
Highway Debt Service Fund receives proceeds and
accrued interest from the sale of revenue bonds and
provides the debt service requirements for those bonds.

Nonmajor Capital Projects Funds

The **Texas Public Finance Authority Adminis- tration Project Funds** utilize long-term financing for various state construction, repair or renovation projects. Funds are also used to refinance purchases of equipment by various state agencies.

The **Texas Parks and Wildlife Department Project Funds** are used for the acquisition and development of state park sites. Revenues from park entrance fees are used for the repayments of long-term debt incurred.

The **Texas Facilities Commission Project Funds** are used to administer the state's major and minor building construction programs.

The **Texas Juvenile Justice Department Project Funds** are used to pay for minor construction and repairs of the former Texas Youth Commission buildings and facilities.

The **Texas Health Agencies Project Funds** are used to pay for the cost of construction, repair and remodeling for certain mental health facilities and other health related projects.

The **Texas Department of Public Safety Project Funds** are used to finance construction of new Department of Public Safety buildings and crime lab facilities in various state locations.

The **Texas Department of Transportation Project Funds** are used for public road and highway development, construction and improvement projects. The funds are also used to establish, acquire, operate, maintain and dispose of airports and air navigation facilities.

The **Texas Historical Commission Project Funds** are used to provide financial assistance to counties for the repair and renovation of courthouses.

The **Texas Mobility Capital Project Funds** are used to provide a method of financing construction, reconstruction, acquisition and expansion of state highways and other transportation projects.

Nonmajor Permanent Funds

The **Permanent Health Fund** for Higher Education was established by the Legislature from a portion of the money received in the settlement of The State of Texas v. The American Tobacco Co., et.al. The corpus of the account was designated by the Legislature to be preserved. Distributions of earnings on the account are to be transferred to other accounts and used for health care costs, tobacco education and enforcement.

The National Research University Fund was established by the Legislature to provide a dedicated, independent and equitable source of funding to enable emerging research universities to achieve national prominence as major research universities. The fund consists of appropriations and transfers under the Texas Constitution and amounts provided by law, gifts, grants and interest. The Texas Constitution required that balances

in the permanent higher education fund be transferred to the national research university fund on Jan. 1, 2010. Funds are allocated to eligible universities based on an equitable formula.

The Permanent Fund Supporting Military and Veterans Exemptions (Perm Fund Supporting MIL/VET Exempt) was established by the Legislature to receive gifts, grants and investment returns for distributions to higher education institutions to offset the cost of the exemptions to certain veterans and/or dependents. Distributions are determined by the Legislative Budget Board based on each institution's respective share of the aggregate cost to all institutions of the exemptions. The Texas Treasury Safekeeping Trust Company determines the amount available for distribution from the fund.

Nonmajor Enterprise Funds

The **Texas Water Development Board Funds** include water development funds, agricultural water conservation funds and water pollution control revolving funds that receive proceeds from bonds issued by the Texas Water Development Board to provide assistance to political subdivisions.

The **Texas Department of Housing and Community Affairs** issues bonds to assist in financing the purchase of homes or the construction of rental housing for families with low to moderate incomes. Loan payments and rentals provide the revenue for debt service payments.

The **Texas Transportation Commission** receives proceeds from the sale of bonds used to finance a portion of the costs of planning, designing, engineering, developing and constructing the initial phase of the Central Texas Turnpike System.

The Veterans Land Board Loan Program Funds receive proceeds from the sale of bonds used to administer, originate and service loans from land, housing and home improvement for those qualifying veterans.

The Texas Department of Criminal Justice Institutional Division accounts for the proceeds of the institutional division's commissary operations and other miscellaneous revenue.

The **Texas Prepaid Tuition Plans** include the Texas Guaranteed Tuition Plan, which is closed to new enrollment, and the Texas Tuition Promise Fund. The Texas Tuition Promise Fund allows families to prepay tuition and school-wide required fees at Texas public colleges and universities.

The **Grand Parkway Transportation Corporation**, a blended component unit of the Texas Department of Transportation, is authorized to assist and act on behalf of the agency in the development, financing, design, construction, reconstruction, expansion, operation and/or maintenance of the Grand Parkway toll project.

Colleges and Universities - Major Enterprise Fund

There are six university systems and five independent universities in Texas' primary government presented in a single-column as a major fund on the basic financial statements. Schedules were prepared to report the breakdown of the following universities:

University of Texas System
Texas A&M University System
Texas Tech University System
University of Houston System
Texas State University System
University of North Texas System
Texas Woman's University
Stephen F. Austin State University
Texas Southern University
Midwestern State University
Texas State Technical College

State of Texas Compre	hansiya Annual E	inancial Report - 2	010	

Pension and Other Employee Benefit Trust Funds

The **Teacher Retirement System Trust Account** is for the accumulation of resources for pension benefit payments for qualified employees of public education in Texas.

The **State Employees Retirement System** (S.E.R.S.) **Trust Account** is for the accumulation of resources for pension benefit payments to qualified state employees or beneficiaries.

The Law Enforcement and Custodial Officer
Supplement Retirement Fund provides supplemental retirement and death benefits for members of the
Employees Retirement System of Texas who completed
or more years of service or became occupationally
disabled or died while serving as commissioned law
enforcement officers of a state agency.

The Judicial Retirement System - Plan Two Trust Fund accounts for receipt of monies for retirement and death benefits for certain state-paid judges and judicial officers.

The **Texas Emergency Services Retirement System Fund** accounts for the accumulation of resources for pension, death and disability benefits for eligible fire and emergency services personnel who serve without monetary reward.

The Retired School Employees Group Insurance Trust receives contributions and other funds authorized to be deposited in the fund to pay insurance premiums, to reimburse for claims paid by a non-state entity and to pay administrative expenses. The Teacher Retirement System of Texas, as trustee, administers the fund for public school retirees and their dependents. The public school entities are not considered part of the reporting entity for the state of Texas.

The **State Retiree Health Plan Trust** accounts for the receipt of monies for postemployment health care, life and dental insurance benefits provided under the Group Benefits Program. The Employees Retirement System of Texas, as trustee, administers the fund for retired employees of the state and other non-state entities as specified by the Legislature.

The **Deferred Compensation Trust Fund** receives employee deferrals in accordance with Internal Revenue Code 457, appropriations by the state for the administration of the deferred compensation plan, trust income, and fees. The state of Texas is the only employer participating in the plan.

The **State Employee Cafeteria Plan Trust Fund** receives salary reduction payments and makes disbursements for benefits included in a cafeteria plan, other than Employees Uniform Group Insurance Program coverages. The fund also receives appropriations by the state for the administration of the cafeteria plan.

The **Texa\$aver Administrative Trust Fund** receives deferrals, purchases qualified investments and pays expenses associated with administration of the deferred compensation plan.

Private-Purpose Trust Funds

The Tobacco Settlement Permanent Trust (Political Subdivisions) holds the portion of the money received in the settlement of the State of Texas v. The American Tobacco Co., et. al., designated for the exclusive benefit of other political subdivisions. Other political subdivisions include cities, counties and/or local hospital districts that are responsible for indigent health care. The fund is administered by the Treasury Operations Division of the Texas Comptroller of Public Accounts.

The **Texas Insurance Companies Assets Account**- **Reserve and Custodial Fund** holds assets in trust for claims associated with insurance company liquidations.
Additionally, the fund holds certain insurance company statutory deposits. Most balances are normally held outside the Treasury. The Department of Insurance administers the fund.

The **Catastrophe Reserve Trust Fund** is a state fund created to provide relief to insurance companies within the state in the event of certain catastrophic losses. Certain property insurers authorized to transact property insurance in Texas make payments to the fund.

The Inmate Trust and Employee Service Option Fund holds funds for offender commissary accounts along with the Texas Department of Criminal Justice employee commissary contributions.

The **Texas College Savings Plans** receive money contributed by account holders, money acquired from private sources and income from investment of deposits. The plans may be used only to pay costs of program administration and operations, make payments to state, private or independent institutions of higher education and make refunds to account holders.

Agency Funds

The **Texas Public Finance Authority Bond Escrow Account** is used to hold funds for various defeased or refunded bonds.

The Life, Health, Accident and Casualty Insurance Companies Trust Account holds cash or securities deposited with the state by insurance companies as required by law.

The **Texas Workers' Compensation Self-Insurance Fund** is used to deposit certified self-insurer security deposits. These deposits may be applied to the selfinsurer's incurred liabilities for compensation. The City, County, Metropolitan Transit Authority (MTA) and Special Purpose District (SPD) Sales

Tax Trust Account is used to record the receipt of local sales and use tax collected by the Texas Comptroller of Public Accounts for each city, county, metropolitan transit authority and special purpose district authorizing the collection.

	State of Texas Comprehensive Annual Financial Report – 2019

Discretely Presented Component Units

A statement of net position and a statement of activities were prepared to report the breakdown of the following discretely presented component units:

Teacher Retirement System of Texas

State Bar of Texas

Texas State Affordable Housing Corporation

OneStar National Service Commission Inc. and OneStar Foundation, Inc.

Texas Low-Level Radioactive Waste Disposal Compact Commission

Texas Prepaid Tuition Scholarship Foundation

Texas Match the Promise Foundation

Texas Windstorm Insurance Association

Surplus Lines Stamping Office of Texas

Texas Health Reinsurance System

Texas FAIR Plan Association

Texas Boll Weevil Eradication Foundation Inc.

Texas Agricultural Finance Authority

Texas Water Resources Finance Authority

Texas Appraiser Licensing and Certification Board

Texas Disaster Relief Fund

Texas Health Services Authority

Beacon State Fund

State Agency Council

Texas Governor's Mansion Administration

Robert G. Carr and Nona K. Carr Scholarship Foundation

University of North Texas Foundation/University of North Texas

Health Science Center Foundation

The Alamo Endowment

^{*} Prior years are subject to revisions.

^{**} Highway miles = centerline miles under the jurisdiction of the state (miles traveled in one direction regardless of the number of lanes in a roadway). Texas Department of Transportation (TxDot) transitioned to a new roadway inventory system (GRID) in 2015, due to this there were no mileage changes between 2014 and 2015. Mileage for 2019 is not available until June, 2020.

^{***} Number of bridges are the bridges owned by the state. TxDot also works on off-system bridges (county and city-owned bridges).

Off-system bridges are not included in the number of bridges total.
