Message From the TMB President: Board Accomplishments Since Previous Session

Zaafran

As the regular session of the 87th Texas Legislature comes to a close, state agencies will be looking ahead to implementing many newly enacted laws. We will be sure to provide a summary of those bills that impact our licensees in the TMB bulletin.

With much of the effort and attention placed on responding to COVID-19 for well over a year now, it is easy to lose sight of the additional work and accomplishments of the Texas Medical Board in the two years since the previous legislative session.

For example, even during the height of the pandemic, the Board managed to issue 4,862 physician licenses over the past fiscal year, and 13,275 total across all license types. Physician licenses were issued in an average of 31 days – *20 days sooner than the legislature mandates*. This work was in addition to the ongoing pandemic response efforts of the agency. To date, over 4,000 emergency licenses have been issued and 100 Texas retirees reactivated to respond to the COVID-19 disaster in our state. This speaks volumes to the dedication of our agency staff to get the job done even in the most difficult of circumstances.

On the enforcement side, 9,000 complaints were processed, with nearly 2,000 investigations opened and 2,449 completed the previous year. This, too, represents a sizeable workload in recent years that staff successfully undertook.

For much of the interim, the Board was tasked with implementing its Sunset bill ([HB 1504](#), 86th Legislature), which continued the TMB until September 1, 2031.

The Board completed the process of adopting rules to fully implement the bill's many provisions, including ex-

pediting licensing for out-of-state physicians who hold a full license in good standing in another U.S. state or Canada, new criminal history background checks, and increased flexibility for the Board when issuing non-disciplinary remedial plans.

The Board also took the initiative to further streamline the enforcement process. Recent changes allow the Board to better dedicate resources to high priority cases by identifying potential violations earlier in the process that can be efficiently resolved without a formal disciplinary proceeding. This expedited process is reserved for cases involving administrative violations, like failing to timely complete continuing education or an advertising issue.

Several bills specific to continuing medical education on the topic of opioids were also passed the previous session. The Board convened an Opioid Taskforce in the fall of 2019 to specifically bring stakeholders together to discuss the new requirements which included the involvement of patients, physician groups, hospitals, fellow regulatory agencies and elected officials.

Board Accomplishments, Cont.

As a result of the meetings, the Board adopted rules requiring two hours of CME in the topic of prescription of opioids and other controlled substances.

Board staff also worked over the interim to make further technology updates to its online applications for our licensees. The statutorily required Texas Medical Jurisprudence (JP) Exam underwent significant updates to make it license-specific, the fee to take the exam was lowered, and the exam was moved to an online portal so that it no longer has to be taken at a testing site, saving applicants and licensees time and money.

Another way the Board increased efficiencies, while reducing costs, was through its online licensing systems. Staff have worked to create a better user experience and added features. The Board recently transitioned to

electronic licenses to allow for more enhanced licensee control. Licensees are now able to access and obtain a copy of their license as needed for their credentialing and professional purposes.

The Board has tackled a lot in a few short years, and in months following this legislative session, we'll continue to work with our dedicated staff to fulfill our mission and protect the health and safety of our fellow Texans now and in the future.

Respectfully,

Dr. Sherif Zaafran, M.D., FASA

Texas Medical Board President

COVID-19 Vaccination Updates

At the end of March, officials announced all adults across the state are eligible for COVID-19 vaccinations. On April 24, the Texas Department of State Health Services (DSHS) [notified vaccine providers](#) that they should resume using the Johnson & Johnson COVID-19 vaccine, as the vaccine's benefits outweigh its risks.

Earlier this month, the CDC approved the use of the Pfizer COVID-19 vaccine for adolescents age 12 years and older. Following this expansion, state officials are encouraging pediatric providers to enroll in the state's COVID-19 vaccine program. For additional information, and how to enroll in the program, see the DSHS announcement: <https://www.dshs.texas.gov/immunize/covid19/COVIDPediatricProvider.pdf>

Many large vaccine providers have reduced their vaccine requests as shots have become more widely available at smaller, more convenient locations around the state like pharmacies and doctors' offices. A number of retail pharmacies and other sites are accepting walk-ins with no appointment needed.

People can register with the Texas Public Health Vaccine Scheduler at [getthevaccine.dshs.texas.gov](https://www.dshs.texas.gov), which will match them with a vaccine appointment through a participating public health entity in their county.

For more information and the latest updates on vaccines and their availability, visit the DSHS vaccine information page at the following link: <https://www.dshs.texas.gov/coronavirus/immunize/vaccine.aspx>

The emergency rule will remain in place for 60 days (until June 30, 2021 at 11:59 p.m.) or for the duration of

the time period that the Governor's disaster declaration of March 13, 2020 in response to the COVID-19 pandemic is in effect, whichever is shorter, pursuant to Section 2001.034 of the Texas Government Code.
