Message From the TMB President: Interstate Medical Licensure Compact

Zaafran

I am pleased to announce that, at the start of the month, physicians began applying for licensing through the Interstate Medical Licensure Compact. Just shy of 100 licenses have been issued through the IMLC as of the first Compact licensing date on March 18th.

The Compact is another pathway for physicians outside of Texas, and current Texas physicians, wishing to practice in multiple states, to expedite their licensure. There are several benefits to Compact licensing, including a more streamlined process and saving time for physicians managing multiple state applications.

Last June, Governor Greg Abbott signed [House Bill 1616](#) into law, which made Texas the 33rd state to join the Compact. As of this month, there are 37 member jurisdictions who have joined the Compact, including 35 states, and the District of Columbia and Territory of Guam.

The TMB stresses to those who are interested in gaining licensure through the Compact, either in Texas or with another member state, to please review all IMLC criteria carefully to ensure they qualify as application fees are non-refundable when applying through the Compact. ([See IMLCC website for additional details and FAQs](#)).

Physicians are responsible for making a self-determination of eligibility prior to applying with the Interstate Medical Licensure Compact Commission (IMLCC). Review the qualifying criteria closely. It should be noted there are additional criteria (like a stricter limit on national exam attempts) to meet for qualifying for licensure via the Compact than through the TMB's standard physician application process. There are two key areas of Compact eligibility: State of Principle Licen-

sure eligibility and general eligibility.

SPL Eligibility

In order to receive licensure through the Compact, you must:

- Hold a full, unrestricted medical license in a state that is a member of the Compact – this is called your State of Principal License (SPL). [See the map of states currently participating in the Compact](#).

In addition, at least ONE of the requirements below must apply:

- Your primary residence is in the SPL.
- At least 25% of your practice of medicine occurs in the SPL.
- Your employer is located in the SPL.
- You use the SPL as your state of residence for U.S. Federal Income Tax purposes.

In order to remain active within the Compact, you must maintain your SPL status at all times. You may re-designate your SPL to another state after you have re-

ceived your initial qualification – as long as the state is a participant in the Compact.

General Eligibility

In addition to having basic SPL status, there are several General Eligibility requirements. You must:

- Have graduated from an accredited medical school, or a school listed in the International Medical Education Directory.
- Have successfully completed ACGME- or AOA-accredited graduate medical education.
- Have passed each component of the USMLE, COMLEX-USA, or equivalent in no more than three attempts for each component.
- Hold a current specialty certification or time-unlimited certification by an ABMS or AOABOS board.

In addition, you must:

- Not have any history of disciplinary actions toward your medical license.
- Not have any criminal history.
- Not have any history of controlled substance actions toward your medical license.
- Not currently be under investigation.

The TMB has provided additional information on its website, including Frequently Asked Questions and a helpful qualification checklist at the following link: <https://www.tmb.state.tx.us/page/interstate-medical-licensure-compact>

We do anticipate many applications during this early phase, so processing times may see some delay. Turnaround times for licensing through this new pathway will improve. Please know staff are working hard to refine our processes, as well as those with the IMLCC.

I want to encourage those qualifying physicians who are interested in practicing in our great state of Texas to consider becoming licensed through the Compact, especially if they have a desire to practice in other member states.

PMC Stakeholder Meeting

As was [announced previously](#), the TMB is reviewing its rules regarding Pain Management Clinics in an effort to help clarify registration, exemptions and the enforcement process with respect to this area of medical practice.

Last fall, the Board held an informational meeting to gather input from a broad range of stakeholders including patients and physicians. The Board thanks all who provided important information and expertise. Stakeholders are encouraged to continue to provide feedback and the Board plans to hold another input session this spring to continue the discussions around the regulation of pain management.

Physician Reporting

At its March meeting, the Board approved for publication a proposed rule change ([§173.3, concerning Physician-Initiated Updates](#)) that seeks to make clear reporting requirements of certain events by physicians to the TMB that are required to be contained in the physician's online profile, and better align the Board's physician reporting rule with the existing language in state statute.

Currently, physicians are required to report certain information to the TMB every two years, upon renewal of their license. Some events like change of address, incarcerations and criminal convictions, are required to be reported to the Board within 30 days. The proposed rule adds to this medical malpractice claims required in Section 154.006(b)(16) of the state Occupations Code and disciplinary actions taken by other states against the licensee, which previously were required to be reported at the time of registration (renewal) of the license.

The Board's goal as it considers any rulemaking is to improve its processes while maintaining the right balance of regulation and public safety.

Respectfully,

Dr. Sherif Zaafran, M.D., FASA
