NOTES

This report contains information for the year 1991 as well as some historical information. It is published as a two volume set.

Information on availability of this publication and other publications may be obtained from the Railroad Commission of Texas, Publication Sales, P.O. Box 12967, Austin, Texas 78711-2967 (telephone 512-463-7255).

Please note the following explanations of terms and abbreviations used in this report.

All gas volumes reported in thousand cubic feet (MCF) at a standard base pressure of 14.65 pounds per square inch absolute and a standard base temperature of 60 degrees fahrenheit.

All liquid volumes reported in barrels of 42 U.S. gallons.

GAS WELL GAS PRODUCTION is **WET GAS**, which includes **LEASE CONDENSATE (BBL)** converted to gas equivalent (MCF).

Production and well count data for 1990 has been revised to include additional data received by mid-February, 1992.

Production and well count data for 1991 includes all reports received by mid-February, 1992.

Data for producing oil wells prior to 1990 is based on preliminary production reports filed for the month of December for each year; beginning in 1990, producing oil well counts are based on producing status in December, as described below under **PROD WELLS EOY**.

PROD WELLS EOY - Producing oil wells at end of year; consists of oil wells classed as producing (prorated, marginal, exempt, and new pool exempt) in December of production year. Oil production is reported by lease, not by individual well.

TOTAL WELLS EOY - Total oil wells at end of year; consists of all wells, except plugged wells, on record at the end of production year (includes producing, shut-in, injection, service, etc.)

PROD WELLS 1991 - Producing gas wells for production year; consists of all gas wells having production during 1991.

TOTAL WELLS 1991 - Total gas wells at end of year; consists of all wells on record at the end of 1991 (includes wells plugged during that year, as well as producing, shut-in, injection, service, etc.)

A - Associated 49(b) Field.

C - Gas cycling reservoir gross production reported.

F - One or more wells from this reservoir are producing "full well stream" to plant; hydrocarbon liquid totals may be partial.

M - Multiple county field - county listed is discovery well county.

N - Gas production data prior to 1970 is not included in cumulative totals.

N/A - Not available
