INTRODUCTION

AUG 15 1985

Dallas Public Library

For the tenth year, the Texas Research League has published this report to facilitate participation by the taxpaying public and school officials in the preparation and adoption of budgets for the next school year. This tenth edition also chronicles the financial impact of the new school finance system in H.B. 72 enacted by the Special Session of the legislature in the Summer of 1984. But the financial picture is not complete until the budgetary and tax policies adopted by trustees in 1,068 school districts are included.

For 1984-85 the legislature increased resources for public school education in Texas by a billion dollars. Local officials added another \$519 million by increasing local school property taxes. From reports filed with the Texas Education Agency and the State Property Tax Board, 29 items of information for local school districts in Texas are shown in the Appendix to this report and in Table 4 for the 50 largest districts. Information is presented to facilitate comparison with other school districts. Budgetary amounts have been computed to an amount per student or average and are listed by county within each of the 20 educational service regions. Regional and state totals and averages are printed at the end of each regional listing. Thus, school finance data for a particular district readily can be compared with neighboring districts within the same county, with the average for all districts within the region, and with the state average.

Districts with less than 12 grades are noted with an asterisk (*) following the district name. Districts which participate in a cooperative for special education are indicated by a letter (C) or by the letter (F) if the district is a fiscal agent for a cooperative. It should be noted that in these districts the students and dollars may not match, and dollar amounts per student may be distorted.

This report is made possible through the generous cooperation of the Texas Education Agency, the State Property Tax Board, and, of course, the many local officials who compiled and reported the data.

BENCH MARKS FOR 1985-86 SCHOOL
DISTRICT BUDGETS IN TEXAS

The Texas legislature met in special session during the summer of 1984 to enact many of the recommendations of the Select Committee including a complete overhaul of the foundation program. As opposed to other methods for equalizing state aid and local tax resources among school districts, a foundation program was retained but changed from one based on objects of expenditure (teachers salaries, transportation, operating expenses) to one based upon various educational programs (special, vocational, compensatory, bilingual, and regular education).

RECORD-BREAKING TAX INCREASES
AT STATE AND LOCAL LEVEL

For the 1984-85 school year, the legislature appropriated \$4.6 billion of state aid--up \$1 billion from the \$3.6 billion spent the previous year. The special session also enacted the largest tax bill in the state's history. But that was only half of the story; school trustees in 1,068 local school districts also enacted the largest school property tax increase in history by raising property tax levies by \$519 million.

Locally adopted school budgets estimated state aid of only \$4.2 billion, or \$379 million less than the legislature appropriated. Of the 1,068 districts, 477 adopted budgets calling for a deficit in general operating funds (expenditures exceeded revenue). Capital outlay totaling \$1.2 billion was budgeted for 1984-85 but only \$163 million was budgeted from bond sales leaving large gaps in capital projects accounts. To balance last year's budgets, which called for spending a total of \$10½ billion, school officials reported having \$2.3 billion of fund balances on hand at the beginning of the school year to offset the gross under estimates of state aid, bond sales, and other revenue. But the bottom line was the largest school property tax increase in history.

\$3,103 PER STUDENT
FOR CURRENT OPERATIONS

Excluding interest payments, an average of \$3,103 per student was budgeted for current operations in the 1984-85 school year, an increase of \$410 per student over the previous year.¹

¹These figures represent spending by the local district only and do not include substantial direct expenditures by the state, regional centers, and county units. These figures, therefore, are not comparable with per-student expenditure figures compiled in other states or with national averages.

In 514 school districts, the budget called for spending less than the \$3,103 average and these districts served 64.4 percent of the students in Texas. In 85 districts, current expenditures averaged less than \$2,500 per student. At the other extreme, eight districts authorized the expenditure of more than \$10,000 per student.

TOTAL CURRENT OPERATING EXPENDITURES	\$2,693.12	\$3,102.71	100.0%

Source: Official Budgets filed with the Texas Education Agency and based on 1983-84 level of enrollment of 2,747,836 students ADA.

As detailed in Table 1, direct instructional services averaged \$1,772 per student accounting for 57% of the total. Pupil services averaged \$465 per student, or 15.0% of the total. The third largest budget category was administration which averaged \$406 per student and accounted for 13.1% of total current operating expenses.

Plant maintenance and operation (custodial and maintenance employees, utilities, repairs, etc.) accounted for 12.4% of the operating budget or \$385 per student. Transportation expense accounted for \$90 per pupil (\$76 for regular transportation plus \$14 for transportation of exceptional children). Spending for guidance and counseling service was the equivalent of \$81 per pupil. Co-curricular activities averaged \$66 per student and food service, \$195 per student.

Per-student amounts budgeted by object of expenditure are shown in Table 2. Payroll expense comprised 80.1% of the total operating expense or 65.1% of the total budget including debt service and capital outlay. Current operating expenses accounted for 81.3% of the total budget. Debt service (interest and repayment of principal) required 7.1% or \$271 per ADA. The remaining 11.6%, or \$443 per student, was budgeted for capital outlay.

FUND BALANCES
\$2 BILLION

Each year school trustees adopt budgets calling for spending more than anticipated revenue and proposing to reduce fund

balances. When the year is over, however, revenues far exceed the amount anticipated. Instead of reducing the amount in the bank, the balance is even higher.

Two years ago the 1983-84 budgets proposed to cut balances in operating funds from \$981 million to \$822 million (see Table 3). It turned out that instead of cutting balances, the amount grew to \$1,118 million--the beginning balance on the 1984-85 budgets. Furthermore, when the audit reports became available, the \$981 million beginning balance in 1983-84 was shown actually to have been \$1.1 billion--an error of 17%.

Trustees must rely upon local property taxes to balance school budgets, and the conservative approach to revenue estimating is to err on the plus side. Nonetheless, any underestimate of revenues or understating of fund balances can result in a tax increase that was not needed.

The 1984-85 budgets called for spending \$10½ billion and anticipated revenues totaling \$9.6 billion, leaving a gap of \$868 million. Again, last year's budgets proposed to use \$703 million of the \$2.3 billion balance, leaving \$1.6 billion in the bank for next year's budget. Under the "truth in taxation" law, the unencumbered balance in the operating fund and in the interest and sinking fund must be published in the paper along with the effective tax rate before the adoption of the next year's tax rate.

INDIVIDUAL
DISTRICT FIGURES

The Appendix data for the 50 largest school districts is shown in Table 4. Houston ISD, the first district shown, had

171,870 students (ADA) in 1983-84. Using that figure, Houston budgeted \$429.16 per student for general administration in 1984-85, or 13.8% of total current operating expenses. Column 3 shows that \$1,743.95 was budgeted for direct instructional service, plus \$70.61 (column 4) for instructional-related service excluding administration. Houston budgeted \$353.37 for pupil services (column 5). Expenditures for management and operational control of cocurricular student activities were \$26.81 per ADA (column 6). Another \$80.23 per student was budgeted for transportation (column 7). Adding \$375.78 for plant maintenance and operation and \$20.27 for community service to the previous amounts gives a total current operating expense of \$3,100.19 per student shown in column 10. In addition, Houston budgeted \$177.33 per student for debt service and \$226.95 for capital outlay (column 12). Column 13 shows that beginning balances in operating funds on September 1, 1984, were shown as \$163.50 per student.

Column 14 on the second page of Table 4 shows that the total amount budgeted for payroll was the equivalent of \$2,572 per student. Payroll expense depends upon the level of salaries and the staffing pattern which are detailed in the following columns. The average salary paid classroom teachers in Houston ISD in 1983-84 was \$21,611. Houston had one classroom teacher for each 17.3 students in 1983-84 (column 16). Staffing ratios for other types of employees are shown in columns 17, 18, and 19. There were 3.4 administrators, 6.5 support persons, and 12.3 aides and secretaries per 1,000 students.

The market value of taxable property in Houston ISD in 1983 was the equivalent of \$381,478 per student as shown in column 20. The PAR figure of 165 in the next column indicates that per-student taxable property in Houston was 165% of the statewide average, or 65% higher than average. (A PAR figure of less than 100 indicates a district with taxable property per student less than average.)

Shown in columns 22 and 23, the Board of Trustees of Houston ISD adopted tax rates of 63.2¢ for maintenance and 5.3¢ for debt service (not shown) for a total rate of 68.5¢ per \$100 of appraised value.¹ Preliminary findings of the State Property Tax Board indicate that 1984 appraised values were 86.5% of full market value. The true tax rate shown in column 25 was 59.2¢ per \$100 of market value (68.5¢ times 86.5%). The property tax levied increased by 12% over the previous year (column 26). The tax levy was equal to \$1,954 per student (column 27) of which \$1,803 per student was levied for maintenance (column 28). Subtracting the local share of the foundation program cost and allowing 1½% for uncollectible taxes, Houston ISD had \$775 per student of local maintenance tax funds with which to enrich the Foundation Program level of school spending (column 29).

¹Houston ISD levied an additional 2¢ rate for the junior college.

PAYROLL COST

\$2,487 PER STUDENT

In 1984-85 local school districts budgeted the expenditure of \$6.8 billion for wages and salaries, which is equal to \$2,487 per student. For a class of 25 students, that is the equivalent of \$62,175 for the teacher and a proportionate amount for support, administrative, and other employees of the school.

Among individual districts the payroll cost varied widely from less than \$1,200 in five districts to more than \$6,000 per student in eight districts (see column 14 of Table 4 and the Appendix). Payroll expense is a function of two variables--the salary level and the staffing pattern. Salaries always are a major factor in adopting a school budget, but staffing patterns also will be crucial during the next few years as the curriculum changes mandated by H.B. 246 and the maximum class size required by H.B. 72 are implemented.

AVERAGE SALARY \$20,117
FOR CLASSROOM TEACHERS

For the 1983-84 school year, the salary actually paid to classroom teachers averaged \$20,117, which was 23.7% above the state-mandated minimum salary. Actual salaries vary among the districts as shown in column 15 of the Appendix.

The average salary for Texas classroom teachers has more than doubled since 1975. As shown in Table 5, the purchasing power of that salary declined during the 1970s, but has increased during the 1980s. In constant 1984 dollars, the average teacher's salary of \$17,362 in 1979-80 has increased by 16% over the last four years to \$20,117. The number of students assigned to each classroom teacher steadily dropped during the 1970s, remained constant during the early 1980s, but again dropped in 1983-84. Additional payroll dollars were spread among more teachers during the 1970s, whereas additional dollars during the early 1980s were used to increase salaries beyond the rate of inflation. In 1983-84 the pattern reverted back to a lower pupil-teacher ratio with salaries barely keeping pace with inflation.

For 1984-85 budgeted payroll expense was increased by 16.4% over the previous year. How much of that increase was designated for salary increases and what proportion was for more employees is not yet known. The minimum salary schedule prescribed by the state was changed to a simple minimum-wage schedule with ten steps that apply to all types of professional personnel. No longer is the amount of state aid dependent upon the state salary schedule. A supplemental salary increment is provided for teachers selected for various steps on the career ladder.

PUPIL-TEACHER RATIO
16.2 TO 1

The 1,068 local school districts employed 169,159 classroom teachers in 1983-84 for the 2,747,836 students resulting in a pupil-teacher ratio of 16.2 to 1. (See column 16 of Appendix.) The term "classroom teachers" consists only of professional teachers in the classroom and does not include counselors, librarians, and other support or administrative employees or aides. The school districts report professional personnel on a unit basis so that a principal who teaches one-third of the time would be counted as one-third of a classroom teacher.

A pupil-teacher ratio is not the same as average class size because teachers and students are not necessarily in a classroom the same number of hours each day. Students have study periods, recess, etc.; teachers have off-duty or preparation time, etc.

For example, if there were 250 students in 10 classes for 6 hours a day, the average class size would be 25. If the teachers are teaching only 5 hours a day, it would require 12 teachers for the 10 classes for a pupil-teacher ratio of 20.8. Special and vocational education, fine arts, math and science classes often have fewer students than the average which further reduces the pupil-teacher ratio. Small districts have below average pupil-teacher ratios simply because there are not enough students in the grade or program to fill the classroom. The average pupil-teacher ratio for the 50 largest school districts was 16.9 as compared to an average of 9.4 to 1 in the 83 school districts with fewer than 100 students.

OTHER PERSONNEL

In addition to 169,159 classroom teachers, school districts in 1983-84 employed 13,325 administrators, 13,888 support personnel, 44,357 aides and secretaries, and an unreported number of food service, maintenance, bus drivers, and other employees. Statewide, there were 4.8 administrators and 5.1 support persons per 1,000 students. Support persons include librarians, counselors, nurses, supervisors, and special service persons, while administrators include superintendents, principals, assistant principals, and administrative assistants.

As detailed in Table 6, staffing patterns vary widely by size of school district. Districts with more than 5,000 students average 4.3 administrators per 1,000 students. Ratios for smaller districts are higher with a ratio of 20.6 administrators per 1,000 students for districts with less than 100 students. The ratio for support personnel is the reverse pattern with the highest average ratio of 6.0 in the largest districts decreasing to 0.7 support persons per 1,000 students in the smallest districts.

H.B. 72 imposes a maximum size for classes in the lower grades beginning next year. Not more than 22 students will be permitted in any kindergarten, first or second grade class unless the Commissioner of Education finds that the limit would impose an undue hardship. Although the taxpayers provided funds with which to employ an average of one classroom teacher for 16.2 students in 1983-84, there were enough small classes and abbreviated teaching schedules that many classes had more than 22 students. The staffing pattern promises to be one of the major issues in preparing budgets for the coming school year.¹

¹For example, the new standard would require construction of 13 new elementary schools at a cost of \$28.9 million in the Dallas ISD. (See Dallas Morning News, June 4, 1985, p. 1A.)

Table 6

\$231,656 TAXABLE VALUE
FOR EACH STUDENT

School-aid programs try to provide financial resources for the education of students regardless of where they live, whereas taxable property seldom is distributed among local school districts in the same proportion as students. Districts with low per-student taxable property values are called "poor" districts for state-aid purposes. Other districts with larger amounts of taxable property compared to the number of students are called "rich" districts. To equalize, state-aid schemes provide funds inversely to the per-student property tax value.

The State Property Tax Board is charged by law with determining the market value of taxable property in each school district in Texas. For 1983 that value totaled \$636,554 million, and when divided by the 2,747,836 students (ADA), averaged \$231,656 of local tax base per student. The figure for each school district is shown in column 20 of the Appendix. The PAR figure in column 21 helps to determine if a district is "rich" (PAR greater than 100) or "poor" (PAR less than 100).

Relative wealth is a key factor in the budget process. "Rich" districts can fund a large part of their budget from local tax resources. "Tax poor" districts, on the other hand, cannot begin to finance their school programs even with the highest tax rate authorized by law, and must rely upon state aid. In between these extremes are most districts whose budgets are financed by various combinations of state aid and local taxes.

1984-85 PROPERTY TAXES
UP \$519 MILLION

Local property taxes imposed by school districts jumped by \$519 million to \$4.1 billion. School property tax increases were

widespread with almost 9 out of 10 districts raising tax levies (see Table 7). Eleven districts more than doubled taxes, while another 55 districts increased tax bills from 50 to 100%, and 173 schools posted increases from 25 to 50%. The 153 districts which reduced taxes account for 6.1% of property values, while the other 93.9% of taxable property was located in school districts that increased tax levies.

The percentage increase (or decrease) in property taxes levied is shown for individual districts in Table 4 and in the Appendix under column 26.

TAX EXEMPTIONS

\$780 MILLION +

Preliminary figures indicate that \$94½ billion of property value was exempt in 1984, (an additional \$22 billion of privately owned motor vehicles was exempted on a local-option basis). These exemptions reduced the property tax revenue of local school districts by \$780 million as tabulated in Table 8.

Table 7

PROPERTY TAX LEVIES BY TEXAS SCHOOL DISTRICTS
1983-84 TO 1984-85

<u>Percentage Change 1983-84 to 1984-85</u>	<u>Number of Districts</u>	<u>% Students of State Total</u>	<u>% Market Value in State 1983</u>

Over 100%	<u>11</u>	<u>0.3</u>	<u>0.2</u>
Total Increases	915	92.9%	93.9%
TOTAL	1,068	100.0%	100.0%

The largest revenue loss was attributable to productivity valuation of open-space land which more than tripled from \$129 million in 1981-82 to \$436 million in 1984-85. The second largest exemption was the \$5,000 and \$10,000 state-mandated homestead exemptions which reduced revenue by \$154 million.

A new exemption authorized in 1982-83 allowed local governments to exempt up to 40% of the value of a homestead.¹ Thus far, 251 districts reported granting some percentage of that exemption resulting in a revenue loss of \$118 million. Other new exemptions authorized were for farm and ranch implements, solar and wind-powered energy devices, and reductions under the Property Redevelopment and Tax Abatement Acts.

TAX RATES SOAR
AS INFLATION SUBSIDES

School taxes in 1984-85 averaged 62.2¢ per \$100 of market value. Thus, property selling for \$100,000 was taxed an average of \$622 for school purposes. Homeowners paid less if they qualified for one or more of the variety of homestead exemptions.

¹The exemption will be phased down to a maximum of 30% in 1985-86 and to 20% in 1988-89.

As shown in column 23 of Table 4 and the Appendix, school trustees adopted tax rates that averaged 74.0¢ per \$100 of appraised value. Preliminary studies by the State Property Tax Board show that appraisals ranged from less than 50% of market value in a half dozen school districts to more than 100% in 72 districts. The statewide average was 84%. Multiplying the 74.0¢ actual rate times the 84% average ratio indicates the "true"¹ tax rate averaged 62.2¢ per \$100 of market value. (See columns 23, 24, and 25 of Table 4, or the Appendix for comparable figures for each school district.)

True tax rates imposed by school districts ranged widely among the 1,068 districts, as shown in Table 9. At the low end, five districts levied a rate of less than 10¢ per \$100 of market value (or 0.1% of value). At the other extreme, six districts had true rates in 1984 of more than \$1.30 (or 1.3% of value). Property selling for \$100,000 would be taxed by the school for less than \$100 in five districts or more than \$1,300 in six districts.

Table 9

DISTRIBUTION OF 1984 SCHOOL TAX RATES

<u>1984 True Tax Rate per \$100 of Market Value</u>	<u>Number of Districts</u>	<u>% of Taxable Property</u>	<u>% of Students</u>
Under 30¢	35	4.0%	1.3%

90.0 - 99.9¢	60	3.8	4.5
\$1 and Over	69	2.6	3.6
Total	1,068	100.0%	100.0%

Over the past decade school tax levies have grown threefold from \$1.4 billion in 1975-76 to \$4.1 billion last year. As detailed in Table 10, the average tax rate adopted by school trustees steadily dropped from \$1.59 per \$100 of taxable value in 1975 to half that rate (71.1¢) in 1982, but climbed to 74.0¢ last year. The average level of assessment increased from 39.2% in 1975 to 84% in 1983 as the new law requiring 100% assessment became effective, and remained at the 84% level in 1984.

¹The term "true tax rate" is the same as "effective tax rate" used in earlier Bench Marks reports in this series. The term has been changed to avoid confusion with effective tax rate used in the "truth in taxation" law which is an equivalent rate based on appraised value, not market value.

As a result of this change in tax administration, the average true tax rate gradually fell from 62.3¢ per \$100 of market value in 1975 to 53.1¢ in 1981 as rapid inflation and economic growth produced many more dollars of revenue at lower true tax rates.

During the past three years, however, the rate of inflation has declined significantly. Various groups of taxpayers obtained exemptions from the tax. The change to 100% assessment forced more landowners to seek alternative productivity valuation for open-space land. Under these circumstances, the additional tax revenue was obtained by increasing the tax burden, and the true tax rate jumped from 53.1¢ in 1981 to 62.2¢ in 1984.

Table 10

GROWTH OF SCHOOL PROPERTY TAXES 1975-76 to 1984-85

	<u>Property Tax Levy (Millions)</u>	<u>Average Tax Rate</u>	<u>Level of Appraisal</u>	<u>True Tax Rate</u>
1975-76	\$1,434	\$1.59	39.2%	62.3¢

1983-84	3,627	0.728	84.2	61.3
1984-85	4,145	0.740	84.0	62.2

Note: Ratio for 1984-85 is preliminary subject to final appeal by local school officials to the State Property Tax Board.

NEW STATE-AID
SYSTEM

H.B. 72 retained the foundation program method for determining the amount of state aid for each school district, but substantially changed the structure of that program. Since 1949, objects of expenditure (salaries paid teachers and other professionals, transportation, and operating expenses) were used to determine the basic allowance for each district. The system recognized special and vocational education but used salaries and other expenses to determine the allowance for each district. Many other "programs" had been appended during the years.

H.B. 72 dropped salaries and other objects of expenditure in favor of broad educational programs, i.e., special, vocational, bilingual, compensatory, and regular education. Transportation

was retained and a variety of special provisions were included. For 1984-85 the foundation program is estimated to average \$2,223 per student of which the state will pay 73.9%, or \$1,642.

The program continues to heavily favor small districts with a foundation program cost of \$3,244 per student in the 83 districts with 100 or fewer students. That average is 50% more than the \$2,170 average for the 6 districts with more than 50,000 students.

As shown in Table 11, the distribution of per-student foundation program cost compared to local taxable wealth is U-shaped. The estimated 1984-85 foundation cost for both the poorest and richest groups of school districts was \$2,460. For the 181 districts with per-student taxable wealth between \$250,000 and \$349,999 the foundation program cost was \$2,075, or about \$400 a student less than both the poorest and richest districts.

Under a foundation program, equalization of state aid and local property tax resources is achieved by varying the proportion funded by the state, as shown in the second and third columns of Table 11. For the poorest group of districts, the state pays 92.9% of the foundation cost, or \$2,289 per student. For the most affluent group, the state's share was 27.7%, or \$683 per student.

The amount of local property taxes levied is shown in the next column with the total of state aid plus local taxes in the last column. The variations in per-student local tax levies was greater than the difference in state aid among different wealth groups of districts. Consequently, the poorest districts ended up with \$2,732 per student of state aid and local taxes as compared to \$5,117 for the most affluent districts.

Table 11

STATE SCHOOL AID AND LOCAL TAXES PER STUDENT 1984-85

Market Value Per ADA 1983	Foundation Program	% State	State Aid	Local Property Tax	State Aid Plus Local Tax
-----Amounts Per Student-----					
Under \$100,000	\$2,462	92.9%	\$2,289	\$ 443	\$2,732
\$100,000 - 149,999	2,391	87.8	2,099	749	2,848
150,000 - 199,999	2,268	83.2	1,888	1,059	2,947
200,000 - 249,999	2,103	78.3	1,646	1,371	3,017
250,000 - 349,999	2,075	69.7	1,446	1,745	3,191
350,000 - 599,999	2,150	55.2	1,188	2,366	3,554
Over \$600,000	2,464	27.7	683	4,434	5,117
Average	\$2,223	73.9%	\$1,642	\$1,509	\$3,151

With no limitation on the authority of affluent districts to increase property taxes, local school officials largely negated the effort of the legislature to equalize financial resources among the 1,068 school districts in Texas.

LOCAL

ENRICHMENT

The local share of the 1984-85 foundation program cost averaged \$581 per student. Excluding the levy for debt service, local school officials levied property taxes for maintenance and operations averaging \$1,264 per student. Allowing 1½% for uncollectible taxes, the \$1,264 levy was greater than the \$581 local share of the foundation program by \$664 per student. Thus schools levied additional taxes with which to "enrich" the foundation program level of educational expenditure.

Under the new system of granting state aid for programs, the legislature, the State Board of Education, and the Texas Education Agency can impose a wide range of new restrictions upon how state aid (and even some local funds) is spent. Property taxes beyond the local share of the foundation program (enrichment) can be spent as school officials wish. For property-poor districts with little enrichment funds, H.B. 72 provides state "enrichment equalization" aid totaling \$500 million in 1984-85. Another \$100 per student was provided for education improvement and the career ladder. One-quarter of this allotment can be spent for any legal purpose.

The per-student amount of enrichment from local property taxes is shown in column 29 of the Appendix for each school district. Local maintenance tax, local share, and enrichment are summarized by wealth-groups of districts in Table 12. For the 144 districts with market value of taxable property less than \$100,000 per student in 1983, local enrichment averaged \$116 per student. At the other extreme, in the 146 school districts with taxable values of more than \$600,000 per ADA, local enrichment averaged \$2,110 per student.

As shown in the last column of Table 12, the new state-aid system, local property taxes, federal, and other sources of revenue enabled the most affluent districts to spend 70% more per student than was spent by districts at the other end of the wealth spectrum (\$4,643 as compared to \$2,738).

Table 12

1984-85 SCHOOL PROPERTY TAX LEVIES, LOCAL ENRICHMENT
AND CURRENT OPERATING EXPENDITURES PER STUDENT

<u>Market Value Per ADA 1983</u>	<u>No. of Districts</u>	<u>Maint. Tax Levy</u>	<u>Local Share Foundation Program</u>	<u>Local Enrich- ment*</u>	<u>Current Operating Expense</u>
Under \$100,000	144	\$ 294	\$ 174	\$ 116	\$2,738
\$100,000 - 149,999	142	608	291	308	2,936
150,000 - 199,999	163	809	380	417	2,860
200,000 - 249,999	143	1,118	468	633	2,937
250,000 - 349,999	181	1,477	632	824	3,130
350,000 - 599,999	149	2,022	949	1,044	3,420
Over \$600,000	146	3,947	1,778	2,110	4,643
Average	1,068	\$1,264	\$ 581	\$ 664	\$3,102

*Maintenance tax levy less 1½% uncollectible less local share of foundation program equals local enrichment.

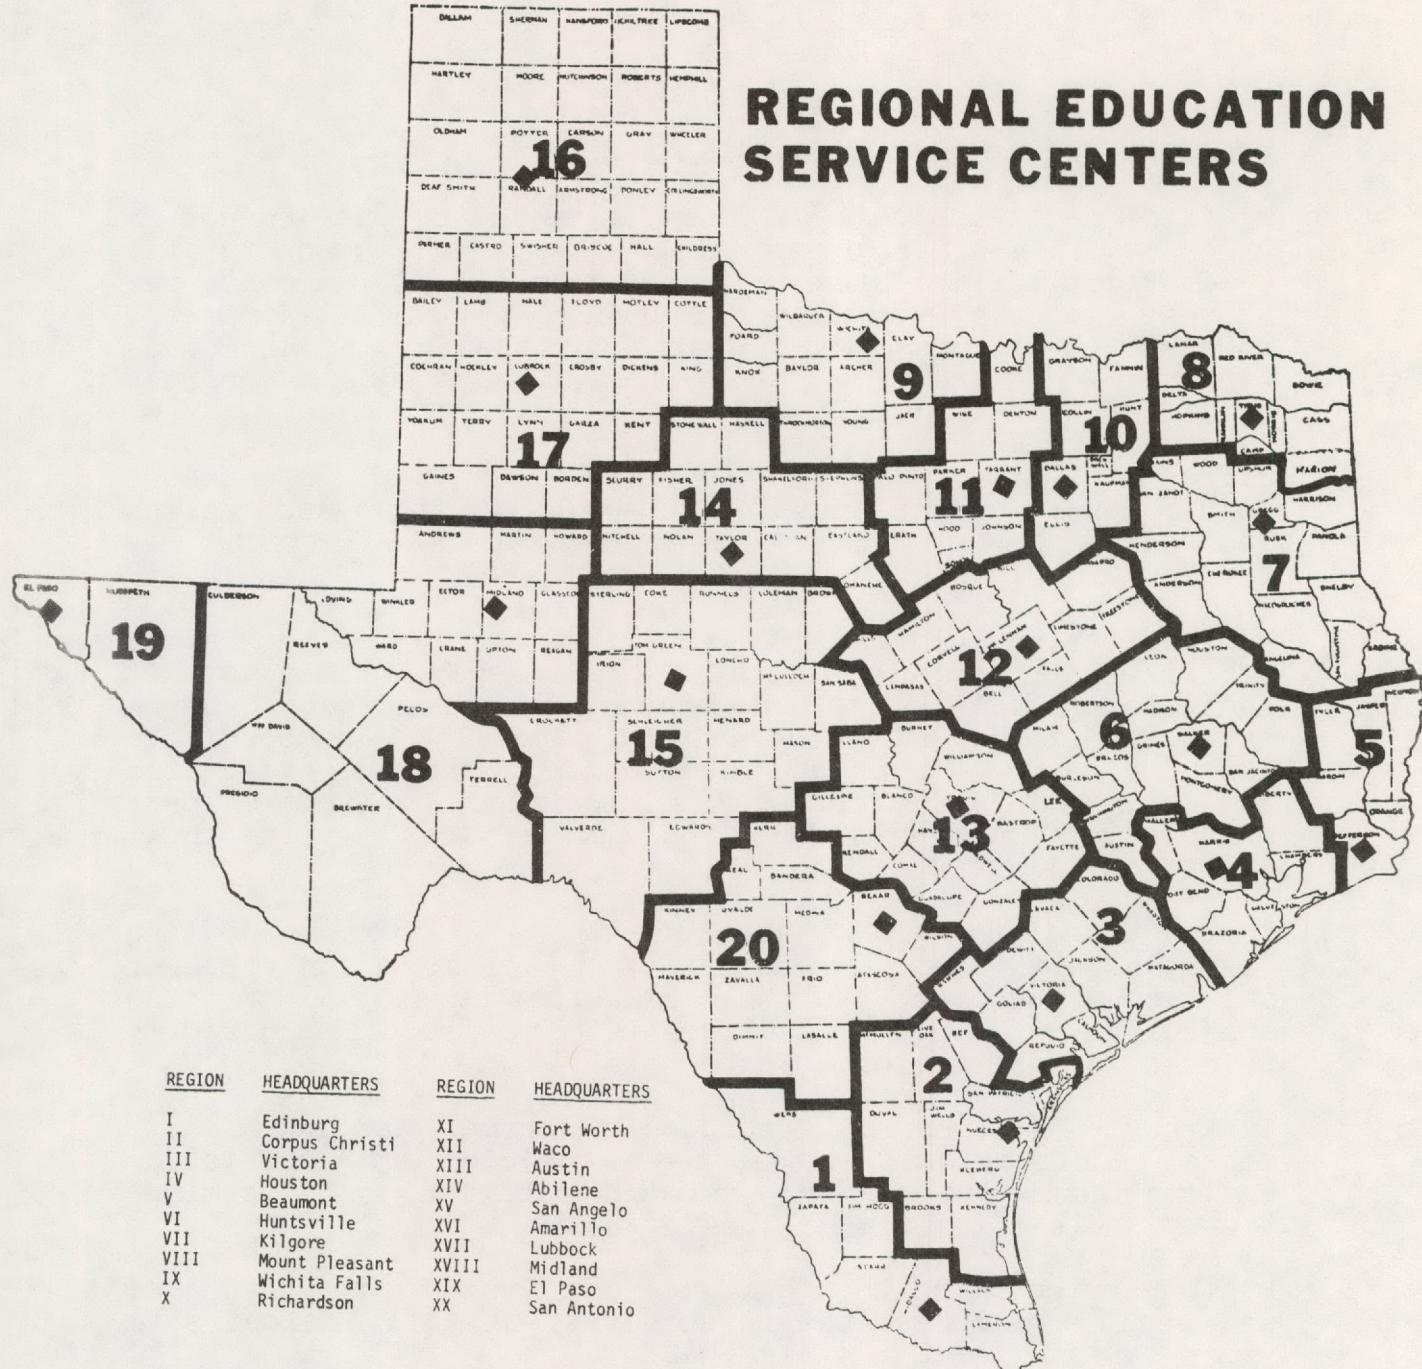

OUTLOOK FOR
1985-86 BUDGETS

As compared to the billion-dollar increase in state school funds last year, state aid for 1985-86 is estimated to increase by \$129 million. Only an estimated 492 districts will get more state aid in 1985-86. The other 576 districts are anticipated to receive less from the state; these primarily will be the more affluent districts as the local share of the foundation program will be increased by \$307 million.

Under a foundation program, greater equalization of state aid and local taxes is achieved by enlarging the foundation program and reducing local enrichment, thereby diverting local tax revenue from enrichment to the local share of the foundation program. H.B. 72 increased the local share by \$1.1 billion in 1984-85 and scheduled another \$307 million increase for 1985-86. This strategy presupposes that local taxes will remain about the same; but local officials actually increased school tax levies by \$519 million in 1984-85. This substantially negated the equalization improvement that the legislature tried to achieve.

APPENDIX

SEE INSIDE BACK COVER FOR
INDEX TO APPENDIX BY COUNTY

EXPLANATION OF APPENDIX COLUMNS

Figures for an annexed or consolidated district have been added to the receiving district. State totals are for 1,068 local school districts and exclude state schools, other special schools, and education service centers.

Col.

No.

* District operates less than 12 grades.

Coop. District participates in a cooperative for special education programs. F--district is fiscal agent for cooperative. C--district participates in cooperative. Dollar amounts per student may be excessive in fiscal-agent districts and understated in cooperative districts because special education students served and the dollars budgeted are reported by different districts.

1. Students (ADA) 1983-84. Compiled from Superintendent's Annual Report of students in average daily attendance during 1983-84. State total for 1,068 local districts is 2,747,836.
2. Administration. Covers overall administration of the entire school system and administration of a school or campus. It includes salaries of the superintendent, principals, administrative staff, and personnel who supervise and coordinate instruction, research and development, program evaluation and in-service education. Also included are fiscal, personnel, security, computer, and tax services. State total \$1,116,557,435.
3. Instructional Service. Includes those activities dealing directly with the instruction of pupils; i.e., teacher salaries, equipment in the classroom essential to the subject being taught, and furniture and supplies directly related to instruction. State total \$4,868,187,890.
4. Instructional Related. Includes resources and media services, instructional research and development, curriculum and personnel development, and communication and dissemination. State total \$183,171,647.
5. Pupil Service. Includes guidance and counseling, attendance and social work, and health services, as well as food services. State total \$847,106,648.
6. Cocurricular Activities. Incorporates activities which are student and curricular related, but not necessary to regular instructional services. Included are intramural athletics, interscholastic competition, student organizations, and special interest activities. The category includes costs necessary for management and operational control of cocurricular student activities. State total \$181,927,060.

7. Transportation. Includes the cost of providing management and operational services for regular school bus routes as well as special equipment or service for disabled pupils. Interest on bus warrants are included, but not repayment of principal, which is classified as debt service. The purchase of buses is classified as capital outlay. State total \$248,680,192.
8. Plant Maintenance and Operation. Encompasses those activities concerned with keeping the physical plant open, comfortable, and safe for use, and keeping the grounds, buildings, and equipment in an effective working condition and state of repair. State total \$1,058,663,547.
9. Community Service. Involves activities, other than regular education and adult education programs, relating to the community as a whole or some segment of the community, such as community recreation, civic activities, public libraries, care of children, community welfare, and services for non-public pupils. State total \$21,431,407.
10. Total Current Operating Expense. It is the total of columns 2 through 9 representing the amount budgeted for operating expenses during the 1984-85 fiscal year. State total \$8,525,725,827.
11. Debt Service. Includes repayment of principal and interest expense on bonds and other loans, except interest on bus warrants. State total \$743,873,361.
12. Capital Outlay. Includes expenditures for fixed assets such as land, buildings, furniture, vehicles, films, library books, etc., which have a useful life longer than the fiscal year (a two-year life is used). State total \$1,217,672,881.
13. Operating Fund Balance 9-1-84. The beginning balance in operating funds reported on 1984-85 budgets. Included are general operating, designated purpose, and cooperative funds and excludes construction and interest and bonded debt funds. State total \$1,114,498,821.
14. 1984-85 Payroll Per ADA. Wages and salaries comprise two-thirds of the total budget. This single figure provides a comparison of the payroll cost which is a combination of the level of salaries and the staffing pattern. Total payroll budgeted in 1984-85 was \$6,834,731,574 divided by 2,747,836 students equals a statewide average of \$2,487 per ADA.
- 15-16 Classroom Teachers 1983-84. Figures in column 15-16 pertain only to the 169,159 classroom teachers, which includes teachers in special or vocational education programs, but excludes administrative and support personnel such as librarians, counselors, nurses, etc. A part-time principal who teaches one-third of the time would be included as one-third unit.

15. Average Salary. The average salary for 169,159 classroom teachers based on reports to the Texas Education Agency. State total \$3,402,996,388 for an average salary of \$20,117 per classroom teacher.
16. Pupil/Teacher Ratio. The ratio of students per classroom teacher in 1983-84. The average was 16.2 to 1 (2,747,836 students divided by 169,159 teachers). Because students and teachers are not necessarily in a classroom teaching situation the same number of hours each day, the pupil/teacher ratio is not the same as average class size.
- 17-19 1983-84 Staff Per 1,000 ADA. The staffing pattern for other personnel are shown in the next three columns as the number of employees per 1,000 students ADA. Personnel counts are full-time equivalents.
17. Administrative. The number of superintendents, principals, and administrative assistants divided by the number of students and multiplied by 1,000. Statewide there were 13,325 administrative personnel for an average of 4.8 per 1,000 students.
18. Support. Instructional-related personnel who are not classroom teachers or aides (supervisors, counselors, librarians, nurses, physicians, and special service personnel) totaled 13,888, for an average ratio of 5.1 per 1,000 students.
19. Aides. Statewide there were 44,357 aides and secretaries for an average of 16.1 aides or secretaries per 1,000 students.
20. 1983-84 Market Value per ADA. Estimates by State Property Tax Board divided by ADA in 1983-84 school year. State average \$231,656 is based on a market value of \$636,554 million which excludes homestead exemptions and includes productivity value of qualified open-space land.
21. PAR. District market value per student divided by the state average and multiplied by 100. A PAR number of 100 indicates the district has an average market value per student. A figure above 100 indicates the district's value per student is above the state average.
22. 1984 Tax Rate--Maintenance. The tax rate adopted for operation and maintenance purposes. The difference between the tax rates in columns 22 and 23 is the tax rate levied for debt service.
23. 1984 Tax Rate--Total. The total tax rate adopted by the school district for the 1984-85 tax roll as reported to the State Property Tax Board.

24. Preliminary Ratio 1984. The ratio of 1984-85 appraised value to preliminary market value determined by the State Property Tax Board. Changes resulting from appeals to an appraisal panel are reflected but not any subsequent appeals by school officials to the State Tax Board which have not yet been heard. State average was 84.0%.
25. True Tax Rate. The school district total tax rate for 1984 (column 23) times the ratio in column 24 represents the true tax rate on market value. State average, 62.2¢ per \$100.

26-28 Tax Levy 1984-85

26. % Over Last Year. The percentage increase (or decrease) in the property tax levy for 1984-85 over the previous year. Statewide, the tax levy increased from \$3,627 million to \$4,145 million, or a 14.3% increase. The tax levy includes debt service levies on homestead exemptions in districts that do not grant full exemption, includes rollback taxes collected on agricultural land that has changed use, and excludes revenue lost from the tax freeze on houses owned by the elderly.
27. Per ADA--Total. The 1984-85 tax levy of \$4,145 million divided by 2,747,836 students for an average of \$1,509 per student.
28. Per ADA--Maintenance. The 1984-85 tax levy for maintenance purposes of \$3,474 million or an average of \$1,264 per student.
29. Local Enrichment Per Student 1984-85. The per student amount by which maintenance tax levy, adjusted for uncollectibles (1½%) exceed the Local Fund Assignment. This figure indicates an amount beyond the Foundation Program cost that the district can expend on its education program from local taxes. Statewide average was \$664 per ADA.
- B/B. School district was budget balanced or ineligible under the Foundation Program in 1984-85 and received per capita state aid but not Foundation aid.
