Directory of Services

Government Publications
Texas State Documents

MAR 12 1990 ✓

Dallas Public Library

The Texas Department of Mental Health and Mental Retardation offers a coordinated system of services throughout the state to persons who have mental illness and/or mental retardation and to their families. The Department seeks to meet each person's unique needs in the best possible setting for that person. The *1990 Directory of Services* contains a comprehensive list of the Department's mental health and mental retardation services by geographic location as part of TDMHMR's efforts to make services readily accessible.

The *Directory of Services* provides addresses, telephone numbers and descriptions of programs offered by TDMHMR facilities and centers and community MHMR centers so that persons can receive the services they need for as long as they need them. For example, the *Directory* can be used to locate hospitals for persons with mental illness, residential facilities for persons with mental retardation, a special unit for emotionally disturbed youth, a substance abuse treatment center for adolescents, genetic screening and counseling services, and state and community outreach centers. Services available from this network of programs include residential care; 24-hour emergency care; day treatment and outpatient services; supervised community homes; diagnosis and evaluation; vocational and pre-vocational training; alcohol and substance abuse treatment; respite care; family counseling; genetic screening and counseling; specialized care for children, adolescents, the elderly and others; and more.

The goal of TDMHMR is to provide the best possible ongoing mental health and mental retardation care for the citizens of this state. We hope that the *1990 Directory of Services* provides the information you need to access that care.
