## FOREWORD

This pamphlet gives the fire record data for the cities and towns of Texas where there is an average annual net fire insurance premium volume of at least \$1,500 over the fire record period, with the exception that a city or town with a key rate of eighty cents or less shall qualify regardless of the amount of the premiums. Towns and villages which do not pay at least the average of \$1,500 are not included herein.

The premiums and losses paid on suburban, farm, and country property are not shown in this booklet.

The term "net premiums" as used herein, means premiums written less "return premiums" by reason of cancellations. There are no other deductions from the actual gross premiums shown on the policies.

The term "net losses," as used herein, means the total sum actually paid to claimants less any amount received back by the companies as salvage.

The following table shows the loss ratios of the cities and towns of Texas by which is determined the amount of the good fire record credit or bad fire record penalty which is to be applied on all policies effective on and after March 1st of each calendar year.

Loss Ratio	Credits	Penalties
1. Over 75%.....		15%
2. Over 65% to 75%, inclusive....		10%
3. Over 58% to 65%, inclusive....		5%
4. Over 52% to 58%, inclusive....		
5. Less than 52% to 45%, inclusive	5%	
6. Less than 45% to 38%, inclusive	10%	
7. Less than 38% to 31%, inclusive	15%	
8. Less than 31% to 24%, inclusive	20%	
9. Less than 24%.....	25%	

NOTE: Prior to 1936 the maximum good fire record credit was 15%; however, in that year the maximum credit was increased to 25% in those cities and towns whose fire insurance premiums totaled \$20,000 or more. In 1940 this qualification regarding the amount of the premiums was removed and the maximum 25% credit was applied to all cities and towns alike.

## PROTECTED AND UNPROTECTED CITIES AND TOWNS IN TEXAS
