Introduction
By
William O. George
Assistant Geologist
United States Geological Survey

This publication contains records of 330 wells, 22 springs, and 143 test wells, drillers' logs of 3 wells, and 248 chemical analyses of water obtained from water wells in Roberts County, Texas.

On September 12, 1939, the Work Projects Administration started an inventory of the water resources of the county with a project sponsored by the State Board of Water Engineers in cooperation with the Federal Geological Survey, with C. R. Follett as project superintendent. In November Mr. Follett resigned to accept a position with the Board of Water Engineers, and was replaced by C. V. Foster, who completed the project in May, 1940. The duration of the project was unusually long because of a severe winter which made transportation difficult.

The analyses were made by chemists employed on Work Projects Administration Project 10443 under the direction of Dr. E. P. Schuch, Director of the Bureau of Industrial Chemistry of The University of Texas, and E. W. Lohr, Chemist of the Quality of Water Division of the Geological Survey; the Bureau of Industrial Chemistry furnished laboratory space and equipment. This release was typed by typists employed on that project.

The records serve as a guide to land owners, well drillers, and others who need information regarding wells and springs, the depth to ground water in different parts of the county, and the quantity and chemical character of the water yielded by wells and springs. They afford a basis for the more intensive investigation that is now being carried on by the State Board of Water Engineers in cooperation with the Geological Survey. The purpose of this investigation is to determine the distribution and extent of available ground-water supplies and the safe yield of the underground reservoirs.

These projects are a part of a State-wide investigation of the underground water resources of Texas, and are sponsored by the Texas State Board of Water Engineers in cooperation with the United States Department of the Interior, Geological Survey. Acknowledgment of their cordial interest and cooperation is due the 16th field office of the Work Projects Administration and the commissioners of Roberts County.

Records of wells and springs in Roberts County, Texas

(All wells are drilled unless otherwise noted in "Remarks" column)

a/ Measuring point was usually top of casing, top of pipe clamp or top of well curb;
it was above ground level unless below ground indicated by minus (-) sign.

b/ B, bucket; C, cylinder; W, windmill; G, gasoline; E, electric; H, hand; number
indicates horsepower.

See "Logs of W. P. A. test wells" for all records of test wells
(Chemical analyses of water from these wells are in the table of analyses)

Medium white sand and gravel	3	47
Coarse-grained river sand	12	59
Coarse-grained sand and light-gray clay - -	8	67
Coarse-grained brown sand	3	70
December 15, 1939.		

Logs of W. P. A. test wells in Roberts County--Continued

	Thickness (feet)	Depth (feet)
<u>Well 252</u>		
Edge of sink, B. F. Jackson tract, NE $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 188, blk. M-2, B. S. & F. sur.,	775	
feet south of well 251.		
Sandy gray top soil - -	1	1
Fine-grained brown sand	9	10
Fine-grained brown sand, some sandy white lime	12	22
Fine-grained brown sand	27	49
Coarse-grained sand, some small gravel - - -	6	55
Sand and heavy gravel -	3	58
December 18, 1939.		

	Thickness (feet)	Depth (feet)
<u>Well 256</u>		
In draw, E. C. Meador tract, NE $\frac{1}{4}$ SW $\frac{1}{4}$ sec. 168, blk. M-2, B. S. & F. sur., 6 $\frac{3}{4}$ miles west of Miami.		
Sandy gray clay - - -	1	1
Sandy red clay - - -	34	35
Sandy red clay and white sandstone - - - -	10	45
Sandy red clay and caliche	15	60
December 6, 1939.		

	Thickness (feet)	Depth (feet)
<u>Well 257</u>		
In sink, E. C. Meador tract, NE $\frac{1}{4}$ SW $\frac{1}{4}$ sec. 168, blk. M-2, B. S. & F. sur., 400 feet north of well 256.		
Sandy gray clay - - -	3	3
Sandy red clay - - -	18	21
Sandy red clay and caliche	5	26
Sandy red clay - - -	2	28
Sandy red clay and caliche	1	29
Reddish-brown clay and caliche - - - -	3	32
Sandy red clay and soft white limestone - - - -	8	40
Sandy red clay with sandy lime spots - - - -	6	46
Caliche, some sandy red clay	1	47
December 6, 1939.		

	Thickness (feet)	Depth (feet)
<u>Well 258</u>		
In sink, E. C. Meador tract, SE $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 168, blk. M-2, B. S. & F. sur., 300 feet east of well 256.		
Sandy gray clay - - -	4	4
Sandy red clay - - -	24	28
Sandy brownish-red clay and lime - - - - -	2	30
Sandy brick-red clay, some soft lime - - - - -	9	39
Sandy brown clay with lime spots - - - - -	4	43

	Thickness (feet)	Depth (feet)
<u>Well 258--Continued</u>		
Sandy red clay, lime, and white sand - - - -	7	50
Sandy white lime and red clay	4	54
Caliche and red clay -	1	55
December 12, 1939.		

	Thickness (feet)	Depth (feet)
<u>Well 259</u>		
In draw, E. C. Meador tract, NE $\frac{1}{4}$ SW $\frac{1}{4}$ sec. 168, blk. M-2, B. S. & F. sur., 500 feet east of well 256.		
Sandy gray clay - - -	2	2
Sandy red clay - - -	19	21
Sandy red clay and caliche	2	23
Sandy red clay - - -	6	29
Sandy brown clay and soft lime - - - - -	2	31
Sandy red clay and lime	5	36
Sandy gray clay - - -	5	41
Sandy red clay and lime	6	47
December 12, 1939.		

	Thickness (feet)	Depth (feet)
<u>Well 261</u>		
South edge of sink, side of County Road, NW $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 157, blk. M-2, B. S. & F. sur., 6 miles west of Miami.		
Sandy brown top soil -	2	2
Silty grayish-brown clay	6	8
Caliche and red clay -	19	27
September 16, 1939.		

	Thickness (feet)	Depth (feet)
<u>Well 262</u>		
Gentle slope, side of County Road, SW $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 157, blk. M-2, B. S. & F. sur., 6 miles west of Miami.		
Silty brown top soil -	2	2
Silty reddish-brown clay	1	3
Pink powder caliche -	6	9
Caliche and red clay -	17	26
September 19, 1939.		

	Thickness (feet)	Depth (feet)
<u>Well 263</u>		
In sink, side of County Road, NW $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 157, blk. M-2, B. S. & F. sur., 6 miles west of Miami.		
Gummy brown top soil -	3	3
Silty, sandy reddish-brown clay with rust spots -	12	15
Silty grayish-brown clay with rust spots - -	8	23
Silty red clay - - -	20	43
September 15, 1939.		

Logs of W. P. A. test wells in Roberts County--Continued

	Thickness (feet)	Depth (feet)
<u>Well 264</u>		
In sink, side of County Road, NW $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 157, blk. M-2, B. S. & F. sur., 200 feet north of well 263.		
Gummy brown top soil -	4	4
Sandy reddish-brown clay with rust spots - -	12	16
Yellowish-gray clay with rust spots - - -	4	20
Silty light-red clay -	28	48
Red clay, some caliche -	3	51
Silty red clay - - -	3	5 $\frac{1}{4}$
Powder and rock caliche, some red clay - - -	10	64
September 15, 1939.		

	Thickness (feet)	Depth (feet)
<u>Well 265</u>		
In sink, side of County Road, NW $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 157, blk. M-2, B. S. & F. sur., 200 feet north of well 264.		
Gummy brown top soil -	4	4
Sandy reddish-brown clay with rust spots - -	11	15
Silty brownish-gray clay with rust spots - -	5	20
Sandy gray clay - - -	2	22
Silty red clay - - -	20	42
Silty bright-red clay -	3	45
Caliche powder and rocks, some red clay - - -	15	60
September 14, 1939.		

	Thickness (feet)	Depth (feet)
<u>Well 266</u>		
In sink, side of County Road, NW corner sec. 157, blk. M-2, B. S. & F. sur., 6 miles west of Miami.		
Brown top soil - - -	2	2
Silty, sandy reddish-brown clay with caliche spots -	5	7
Silty, sandy brown clay -	9	16
Sandy gray clay with rust spots - - - - -	2	18
Fine silty sand - - -	3	21
Silty red clay with rust spots - - - - -	14	35
Silty red clay - - -	5	40
September 15, 1939.		

	Thickness (feet)	Depth (feet)
<u>Well 267</u>		
In draw, side of County Road, NW $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 157, blk. M-2, B. S. & F. sur., 200 feet east of well 268.		
Sandy brown top soil -	2	2
Silty, sandy reddish-brown clay - - - - -	11	13

	Thickness (feet)	Depth (feet)
<u>Well 267--Continued</u>		
Silty red clay - - -	14	27
Red clay and caliche -	6	33
September 15, 1939.		

	Thickness (feet)	Depth (feet)
<u>Well 272</u>		
Red Deer Creek valley, M. W. O'Loughlin tract, NE $\frac{1}{4}$ NE $\frac{1}{4}$ sec. 155, blk. M-2, B. S. & F. sur., 6 miles southwest of Miami.		
Sandy brown top soil -	1	1
Fine-grained brown sand -	2	3
Sandy gray clay - - -	4	7
Sandy brown clay - - -	9	16
Medium-grained sand - -	2	18
Sand and small gravel -	3	21
Sand and brown clay - -	2	23
Sand and river gravel -	3	26
Rock - - - - -		26
December 20, 1939.		

	Thickness (feet)	Depth (feet)
<u>Well 273</u>		
Red Deer Creek valley, M. W. O'Loughlin tract, NW $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 138, blk. M-2, B. S. & F. sur., 5 $\frac{1}{4}$ miles southwest of Miami.		
Sandy gray soil - - -	3	3
Sandy brown clay - - -	7	10
Fine-grained brown sand -	4	14
Sand and small gravel -	14	28
Sand, red clay, and small gravel - - - - -	3	31
Medium sand, some small gravel - - - - -	2	33
Sand and soft lime - - -	14	47
January 2, 1940.		

	Thickness (feet)	Depth (feet)
<u>Well 274</u>		
Red Deer Creek valley, M. W. O'Loughlin tract, NE $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 138, blk. M-2, B. S. & F. sur., 5 $\frac{1}{2}$ miles southwest of Miami.		
Sandy brown soil and clay -	4	4
Fine-grained brown sand and clay - - - - -	3	7
Sandy dark-brown clay -	3	10
Fine-grained brown sand and clay - - - - -	6	16
Medium brown sand - -	4	20
Medium to coarse sand, some gravel - - - - -	2	22
Sand and soft white lime -	4	26
Medium brown sand - -	4	30
Rock - - - - -		30
January 4, 1940.		

	Thickness (feet)	Depth (feet)
<u>Well 276</u>		
Gentle slope, M. W. O'Loughlin tract, NE $\frac{1}{4}$ SE $\frac{1}{4}$ sec. 138, blk. M-2, B. S. & F.

Partial analyses of water from wells and springs in Roberts County, Texas

(Analyzed at The University of Texas under the direction of Dr. E. P. Schoch, Director of the Bureau of Industrial Chemistry, and E. W. Lohr, Chemist, U. S. Department of the Interior, Geological Survey; by D. F. Riddell, and H. T. Davidson, Chemists; and Martin Wieland, Jack Ramsey and J. H. Raby, Assistant Chemists. Nitrate and fluoride determined by E. W. Lohr. Results are in parts per million. Well numbers correspond to numbers in table of well records.)
