REFUGIO COUNTY AND PART OF GOLIAD COUNTY, TEXAS

Introduction

by

Samuel F. Turner
Associate Hydraulic Engineer
Geological Survey
United States Department of the Interior

• • •

The purpose of this survey was to obtain information concerning existing wells and the quantity and quality of water they yield, and to put down test holes where additional information was needed.

This project was part of a statewide Works Progress Administration project known as a "Statewide Inventory of Water Wells," sponsored by the State Board of Water Engineers. The Division of Ground Water of the Geological Survey, United States Department of the Interior, cooperated in the technical direction of the project and the Bureau of Industrial Chemistry of The University of Texas furnished laboratory space and equipment and supervised the chemical analyses.

The analyses were made by chemists employed on Works Progress Administration Project 6507-5112 at Austin, Texas, sponsored by the State Board of Water Engineers. Typists employed on this project typed and assembled this release.

The field work in Refugio and part of Goliad Counties was started on December 19, 1935, and completed April 1, 1937. This work was done as Project 2082 of Administrative Field Office 10 of the Works Progress Administration, San Antonio, Texas. R. A. Muenster and E. J. Michal, engineers, were project superintendents. Mr. Muenster started the work in Refugio County. The project was shut down on May 3, 1936, when the work in Refugio County was about 65% complete, due to the lack of funds. When more money was available, the project was reopened on February 1, 1937, with Mr. Michal as project superintendent. Work in Refugio County was completed in March, 1937, and Mr. Michal started work in Goliad County. When the work in Goliad County was about 10% complete, the project was closed because labor was not available to complete the project.

Both Mr. Muenster and Mr. Michal should be given credit for their interest in the work and for the many extra hours they spent on the project. The San Antonio office of the Works Progress Administration made this work possible by their constant help and cooperation.

This release contains the well records and well logs obtained by the project superintendents, logs of the test wells drilled by the W.P.A. labor, and the chemical analyses of water from privately-owned wells. Locations of all wells listed are shown on the maps in the release. The part of the work done by Mr. Muenster, pages 3 to 41 of this report, was published June 10, 1936. The remainder of the report, pages 42 to 91, represents the part of the work done by Mr. Michal.

The test wells were drilled by W.P.A. labor using a soil auger, drop auger, churn drill, and a sand bucket. Samples were collected at one-foot intervals by the well driller in charge of the party. The project superintendents studied these samples and compiled the logs.

Records of wells in Refugio County, Texas

(Topographic situation is usually flat or slightly rolling. All wells are bored or drilled unless otherwise noted in Remarks).

No.	Distance from Courthouse at Refugio	Owner	Driller	Date comple- ted	Depth of well (ft.)	Diameter of well (in.)	Height of measuring point a- bove gro- und(feet)a/

a/ Measuring point is the point from which water level measurement was made and was usually top of casing, top of pump base or top of water pipe clamp.

b/ T., turbine; Cf., centrifugal; C, cylinder; Gas, gas lift; O, diesel or semi-diesel; G, gasoline engine or tractor; W, windmill; H, hand.

Records obtained by R. A. Muenster
Project Superintendent
(Chemical analyses of water from these
wells are given in the table of analyses)

No.	Water Level	Above + below - measur- ing point	Date of measure- ment.	Pump and kind and amount of power b/	Use of water c/	Remarks
1	(feet) -26.2	Feb. 11, 1936	None	N	Water rose 5 $\frac{1}{2}$ feet in 1/2 hour.	
2	-36.9	Mar. 9, 1936	C,W	D,S	Reported capacity 5 gallons a minute.	
3	-36.5	Feb. 15, 1936	None	N	Water rose 24 inches in 1/2 hour.	
4	-30.4	Feb. 27, 1936	C,W	D,S		
5	-27.0	Jan. 17, 1936	None	N	Hit hard sandstone at 15 feet in a hole 100 feet north.	
6	-15	e/	C,W	D,S	Well originally flowed 9 feet above ground but head declined rapidly.	
7	--	--	None	N	Dry hole	
8	--	--	C,W	D,S	Slight sulphur taste reported.	
9	--	--	Gas	D,S	Water raised by jetting with natural gas.	
10	--	--	C,W	D,S		
11	--	--	C,W	D,S	Water has slight taste and odor of sul- phur.	
12	-28.0	Jan. 9, 1936	C,H	D,S		
13	-21.6	Jan. 9, 1936	C,H	D		
14	-14.5	Jan. 9, 1936	None	N	Water rose 26 inches in 30 minutes and 12 $\frac{1}{2}$ feet in 4 hours.	
15	--	--	None	N	Dry hole	
16	-24.5	Jan. 8, 1936	C,H	D		
17	Flows	Jan. 25, 1936	None	D	Water from sand at 400 feet unfit for domestic use. Reported flow of 35 gallons a minute at 26 $\frac{1}{2}$ feet above ground when well was completed.	
18	do .	Jan. 24, 1936	None	D,S	Screen at bottom of casing.	
19	+8	e/	C,W	D	Screen and perforated pipe at bottom. Reported flow of 60 gallons a minute in 1930.	
20	+10	e/	None	D	Water has odor and taste of sulphur.	

c/ I, irrigation; Ind, industrial; P, public; D, domestic; S, stock;
N, not used.

d/ No water sample collected for analysis.

e/ Water level reported and no date given.

Logs of test wells in Refugio County, Texas, drilled by W. J. A. labor.

Samples examined and classified by R.A. Muenster,

Project Superintendent

Well 1

Located $2\frac{1}{2}$ miles north of courthouse at Refugio
in northeast corner of George E. Straub property.

	Thickness (feet)	Depth (feet)		Thickness (feet)	Depth (feet)
Black sand-----	4	4	Silty sand and caliche balls--	$1\frac{1}{2}$	23
Yellow clay-----	2	6	Clay and caliche balls-----	$1\frac{1}{2}$	24
White dry sand-----	1	7	Yellow clay-----	$\frac{1}{2}$	25
Fine sand-----	3	10	Yellow sand-----	1	26
Coarse damp sand-----	2	12	Yellow clay-----	21	47
Silty sand and clay-----	2	14	Gray clay and caliche balls---	3	50
White sand and clay-----	4	18	Water sand-----	1	51
Gray clay and caliche balls-----	2	20	Water found at 50 feet and stood at 26.2		
Yellow sand and clay-----	1	21	feet below ground level 12 days after		
Silty sand-----	$\frac{1}{2}$	21	well was completed.		

Well 3

Located 2 miles north of courthouse
and $\frac{1}{4}$ mile east of John Buckley Residence

Black sand-----	4	4	Sandy clay-----	1	34
Yellow clay-----	5	9	Silty sand-----	1	35
Gray clay-----	3	12	Sandy clay-----	1	36
Yellow clay-----	6	18	Gray clay-----	2	38
Red clay-----	7	25	Yellow clay-----	3	41
Silty sand-----	1	26	Clay and caliche-----	3	44
Sandy clay-----	$\frac{1}{2}$	27	Sandy clay-----	1	45
Silty sand-----	2	29	Sandy clay, caliche balls,		
Gray clay-----	1	30	sandstone and water-----	1	46
Silty sand-----	3	33	Water level was 36.5 feet below ground		
			level 3 days after well was completed.		

Well 7

Located $1\frac{1}{2}$ mile north of courthouse and
1000 feet north of Heard and Heard barn.

Gray sand-----	1	1	Coarse white sand-----	4	20
Black gumbo-----	3	4	Fine white sand-----	2	22
Gray clay-----	3	7	Clay-----	3	25
Yellow clay-----	4	11	Struck caliche and considerable		
Sand and clay (mixed)-----	5	16	rock at 25 feet. No water found.		

Well 14

Located $3\frac{1}{4}$ mile northeast of courthouse
on Lot 8, Block 7, Shelly addition.

Black gumbo-----	3	3	Soft sandstone-----	3	27
Gray clay-----	4	7	Water reached at $2\frac{1}{2}$ feet.		
Gray sand-----	9	16	Water level was 14.5 feet below ground		
Yellow clay-----	8	24	level 4 hours after well was completed.		

Logs of W. P. A. Test wells - continued.

Well 15

Located $\frac{1}{2}$ mile northeast of courthouse
on Lot 9, Block 105, Refugio.

	Thickness (feet)	Depth (feet)		Thickness (feet)	Depth (feet)
Black gumbo-----	3	3	Yellow clay-----	4	15
Gray clay-----	2	5	Red clay-----	3	18
Yellow clay-----	4	9	Yellow sand-----	1	19
Red clay-----	2	11	At 19 feet hard sandstone was encountered and hole was abandoned. No water found		

Well 23

Located $\frac{1}{2}$ mile east of courthouse
on west edge of Ryals Estate; 400 foot north of road.

Black sand-----	1	1	White caliche-----	1	15
Gray clay-----	1	2	Red clay-----	1	16
Dry white clay-----	4	6	Yellow clay-----	1	17
Yellow clay-----	1	7	Yellow sand-----	1	18
Caliche-----	1	8	Gray clay-----	1	19
Yellow clay-----	2	10	White sand-----	2	21
White caliche-----	2	12	Red sand-----	4	25
Yellow sand-----	1	13	Red clay-----	2	27
Yellow clay-----	1	14	Stopped at 27 feet. Dry hole.		

Well 24

Located 1 mile east of courthouse
on southeast corner of Ryals Estate.

Black sand-----	3	3	Red clay and sand-----	3	23
Gray clay and caliche-----	5	8	Red clay and caliche-----	1	24
Caliche-----	3	11	Caliche-----	3	27
Yellow clay-----	9	20	Dry hole--stopped drilling at 27 feet.		

Well 25

Located $2 \frac{3}{4}$ miles east of courthouse
on Austwell road, $\frac{1}{2}$ mile west of O'Connor Ranch house

Black gumbo-----	2	2	Fine golden sand-----	1	20
Gray clay-----	2	4	Yellow clay-----	6	26
Clay and caliche-----	$4\frac{1}{2}$	$8\frac{1}{2}$	Gray clay-----	8	34
Sandy clay-----	$4\frac{1}{2}$	13	Hit water sand and water at $3\frac{1}{4}$ feet		
Fine white sand-----	$6\frac{1}{2}$	$19\frac{1}{2}$			

Well 26

Located 4 miles east of courthouse
on south side of Austwell road.

Black gumbo-----	4	4	Yellow clay-----	$1\frac{1}{2}$	$32\frac{1}{2}$
Gray clay-----	6	10	Gray clay-----	$4\frac{1}{2}$	37
Yellow clay-----	$4\frac{1}{2}$	$14\frac{1}{2}$	Red clay-----	$2\frac{1}{2}$	$39\frac{1}{2}$
Gray clay-----	$4\frac{1}{2}$	19	Hit grey clay, silty sand and water at $39\frac{1}{2}$ foot.		
Silty sand-----	12	31			

Well 27

Located 5 miles east of courthouse
on Austwell road.

Black gumbo-----	$5\frac{1}{2}$	$5\frac{1}{2}$	Gray clay-----	$2\frac{1}{2}$	$13\frac{1}{2}$
Yellow clay-----	$5\frac{1}{2}$	11	Silty sand-----	$6\frac{1}{2}$	20

No water found as hole was not finished.

Logs of W. P. A. Test wells - continued.

Well 28

Located 6 miles east of courthouse
on Austwell Road

Thickness (feet)	Depth (feet)	Thickness (feet)	Depth (feet)
Black gumbo-----	3	Caliche stone-----	1
Gray clay-----	1	Silty sand-----	1 $\frac{1}{2}$
Silty sand-----	6	Gray clay-----	3 $\frac{1}{2}$
Silty clay-----	17	Well was not completed.	33

Well 45

Located on Bedville Highway 6 $\frac{1}{2}$ miles
northwest of courthouse

Black sand-----	1	Sand and clay-----	5 $\frac{1}{2}$
Dark clay-----	2	Clay and caliche-----	1 $\frac{1}{2}$
Yellow clay-----	1	Fine white sand-----	2
Clay and caliche-----	3	Coarse silty sand-----	4
Silty sand-----	16	Clay and silty sand-----	4
Gray clay-----	4	White water sand-----	2
Hard silty sand-----	2	Water found at 46 foot and rose 4 feet in 30 minutes.	4
	29		

Well 49

Located 6 miles northwest of courthouse
and 100 feet north of well 48

Gray sand-----	1	Gray clay-----	1
Yellow clay-----	4	White hard caliche-----	1 $\frac{1}{2}$
Clay and caliche-----	1	Fine silty sand-----	9 $\frac{1}{2}$
Silty sand-----	2	Hard silty sand-----	1 $\frac{1}{2}$
Silty sand and caliche-----	2	Sandstone-----	1 $\frac{1}{2}$
Rod silty sand-----	3	White sand-----	5
Rod sand and clay-----	1	Sand and caliche-----	4
White silty sand-----	1	Hard sandstone was found at 43 feet.	43
Silty sand and clay-----	2	No water found	
Clay and caliche-----	2		
	19		

Well 51

Located 5 3/4 miles northwest of courthouse
on Bedville road.

Black sand-----	1	Caliche and sand-----	2
Red clay and mixed sand-----	4	Gray clay-----	1 $\frac{1}{2}$
Yellow sand-----	2	Hard caliche-----	2 $\frac{1}{2}$
Pure white caliche-----	5	Gray sand and clay-----	1
Caliche and sand-----	1 $\frac{1}{2}$	Hard caliche stone-----	2 $\frac{1}{2}$
Gray clay-----	1 $\frac{1}{2}$	Hit rock and hole was abandoned.	2 $\frac{1}{2}$
	15		

Well 56

Located 2 3/4 miles northwest of courthouse

Black gumbo-----	2 $\frac{1}{2}$	Silty sand-----	2 $\frac{1}{2}$
Gray clay-----	3 $\frac{1}{2}$	Silty sand and caliche-----	2 $\frac{1}{4}$
Sandy clay-----	2	Hard silty sand-----	3 $\frac{1}{2}$
Clay and caliche-----	$\frac{1}{2}$	Yellow clay-----	1 $\frac{1}{2}$
Gray clay-----	1 $\frac{1}{2}$	Clay and sand-----	9
Yellow clay-----	15	Water sand at 48 feet.	
Sandy clay-----	2	Water rose 4 feet in one hour and	
Sandy caliche-----	1	stood 43.7 feet below ground level 3	
Sandy clay-----	4	days after well was completed.	
	32		

Logs of W. P. A. Test wells - continued

Well 58

Located 2 3/4 miles northwest of courthouse on Beville road.

	Thickness (feet)	Dooth (foot)		Thickness (feet)	Dooth (feet)
Black sand-----	3	5	Fine silty sand-----	5	3 1/2
Gray sand-----	9 1/2	12 1/2	Sandy clay-----	5	38 1/2
Silty sand-----	3 1/2	16	Silty sand-----	5	4 1/2
Caliche-----	1	17	Sandstone-----	1/2	44

Red clay-----	3 1/2	15	Hard sandstone-----	1	37
Gray clay-----	2 1/2	17 1/2	Hard soapstone-----	1	38
Yellow clay-----	2	19 1/2	Hard silty sand-----	8	46
Clay and sand-----	3	22 1/2	Hit hard white rock and abandoned hole. No water found.		

Well 61

Located 3 3/4 miles northwest of courthouse on Beville road

Black sand-----	1	1	Clay and caliche-----	5	26
Yellow clay-----	2 1/2	3 1/2	Sandy clay-----	10	36
Gray clay-----	3	6 1/2	Hard sandstone-----	3 1/2	39 1/2
Clay and caliche-----	1 1/2	8	Silty sand and caliche-----	1/2	40
Gray clay-----	5	13	White hard rock-----	1/2	40 1/2
Yellow clay-----	6	19	Silty sand and clay-----	1/2	41
Sandy clay-----	2	21	Silty sand and caliche. No water found.		

Well 62

Located 4 1/2 miles northwest of courthouse on Beville road.

Black sand-----	4	4	Silty sand-----	3	16
Sandy clay-----	5 1/2	9 1/2	Yellow sand-----	15	31
Coarse silty sand-----	1	10 1/2	White water sand-----	4	35
Gray clay-----	2 1/2	13	Struck wet cavity quick-sand at 31 foot and stopped drilling at 35 foot.		

Well 63

Located 5 miles northwest of courthouse on Beville road.

Black sand-----	2	2	Clay and caliche-----	1 1/2	20 1/2
Yellow clay-----	3	5	Silty sand-----	4 1/2	25
White caliche-----	1	6	Fine white sand-----	1 1/2	26 1/2
Silty sand-----	2	8	Fine yellow sand-----	1	27 1/2
White caliche-----	4	12	Silty sand and clay-----	1 1/2	29
Clay and caliche-----	1/2	12 1/2	Fine white water sand-----	3	32
Yellow clay-----	2 1/2	15	Found water at 31 feet.		
Red clay-----	5	20			

Logs of W. P. A. Test wells - continued.

Well 71

Located 1 3/4 miles northwest of courthouse on Beeville road.

	Thickness (feet)	Depth (feet)		Thickness (feet)	Depth (feet)
Black sand-----	3	3	Sandy clay-----	1	25 $\frac{1}{2}$
Gray sand-----	5	8	Silty sand-----	$\frac{1}{2}$	26
Gray clay and caliche-----	3	11	Sandy clay-----	1	27
Yellow clay-----	2	13	Yellow clay-----	3	30
Clay and caliche-----	1	14	Gray clay and caliche-----	3	33
Yellow clay-----	3	17	Red clay-----	4	37
Red clay-----	3	20	Sandy clay and caliche-----	$5\frac{1}{2}$	42 $\frac{1}{2}$
Red clay and caliche-----	1	21	Found water at 42 $\frac{1}{2}$ feet and water stood at 38.6 feet below ground level 3 days after well was completed.		
Red sand-----	3	24			
Red clay-----	1	25			

Well 73

Located 2 $\frac{1}{4}$ miles northwest of courthouse on Beeville road.

Black sand-----	2	2	Silty sand-----	2	10
Gray clay-----	3	5	Clay and caliche-----	1	11
Caliche-----	3	8	Struck hard sandstone and abandoned the hole.		

Well 75

Located in northwest part of Refugio.

Black sand-----	2	2	Caliche-----	3	11
White joint clay and caliche-----	4	6	Yellow sand (water at 20 foot)-----	10	21
Yellow sand-----	2	8			

Well 79

Located 3/4 mile northwest of courthouse
and 200 yards west of Calvary Cemetery.

Yellow sand-----	7	7	Caliche and silty sand-----	4	21
Gray clay-----	4	11	White water sand-----	$\frac{1}{2}$	21 $\frac{1}{2}$
Silty sand-----	5	16	Water rose within 19.9 feet of ground surface in 15 minutes.		
Water sand-----	1	17			

Well 85

Located 1 $\frac{1}{2}$ miles southwest of courthouse on State Highway 128.

Black gumbo-----	2	2	Silty sand-----	16	23
Gray clay-----	5	7	Hole filled with rain water and was not completed.		

Well 86

Located 1 mile southwest of courthouse on State Highway 128.

Silty sand-----	$6\frac{1}{2}$	$6\frac{1}{2}$	White water sand-----	3	27
Silty clay-----	$3\frac{1}{2}$	10	Struck water at 27 feet, but could not obtain sample - on account of caving hole.		
Silty sand and clay-----	1 $\frac{1}{4}$	24			

Well 89

Located 2 $\frac{1}{2}$ miles southwest of courthouse on State Highway 128.

Yellow clay-----	4	4	White sand-----	3	28
Silty sand (white)-----	20	24	Struck water at 28 feet but could not obtain water sample because of caving hole.		
White flinty hard rock-----	1	25			

Logs of W. P. A. Test wells - continued

Well 112

Located 2 miles southeast of Woodsboro
125 yards north of Willow or Gratz creek.

	Thickness (foot)	Depth (foot)		Thickness (foot)	Depth (foot)
Yellow sand-----	1	1	Gray clay-----	5	15
Gray clay-----	3	4	Silty sand and clay-----	4	19
Caliche clay-----	4	8	White water sand-----	$\frac{1}{2}$	$19\frac{1}{2}$
Yellow clay-----	2	10	Hit rock at $19\frac{1}{2}$ feet. Water stood 16.1 feet below ground surface 15 minutes after well was completed.		

Well 120

Located $4\frac{1}{4}$ miles southeast of Woodsboro on Bayside road.

Gray clay-----	1	1	Silty sand-----	$4\frac{1}{2}$	$9\frac{1}{2}$
Caliche clay-----	4	5	Water sand-----	$1\frac{1}{2}$	11

Hit water at $9\frac{1}{2}$ feet.

Well 121

Located $4\frac{1}{4}$ miles southeast of Woodsboro on Bayside road.

Gray clay and sand-----	8	8	Water sand-----	1	22
Silty sand-----	13	21	Water found at 21 feet and rose to $19\frac{1}{2}$ feet.		

Well 134

Located $5\frac{3}{4}$ miles southeast of Woodsboro
and 1 mile east of Bonnie View School.

Black gumbo-----	4	4	Clay and caliche-----	$5\frac{1}{2}$	14
Yellow clay (with some mica)-----	$2\frac{1}{2}$	$6\frac{1}{2}$	Silty sand and clay-----	2	16
Silty sand-----	1	$7\frac{1}{2}$	Silty sand-----	9	25
Yellow clay-----	1	$8\frac{1}{2}$	Found white water sand and water at 25 feet.		

Well 136

Located $6\frac{3}{4}$ miles southeast of Woodsboro
and $1\frac{1}{2}$ miles southeast of Bonnie View School.

Black gumbo-----	6	6	White water sand-----	4	22
Silty sand-----	2	8	Hard silty sand-----	3	25
Gray clay-----	5	13	White water sand-----	2	27
Silty sand and clay-----	5	18	Water rose 24 inches in 15 minutes.		

Well 147

Located $6\frac{1}{2}$ miles southeast of Woodsboro on Bayside road.

Black gumbo-----	5	5	Gray clay-----	11	33
Gray clay-----	2	7	Silty sand-----	1	$3\frac{1}{4}$
Yellow clay-----	7	14	White water sand at $3\frac{1}{4}$ feet.		
Silty sand-----	7	21	Water stood at 27.6 feet below ground surface 3 days after well was comple- ted.		
Yellow sand-----	1	22			

Well 154

Located $3\frac{3}{4}$ miles northeast of Bayside
and $1\frac{1}{2}$ miles east of Richardson School.

Black gumbo-----	2	2	Red clay-----	$10\frac{1}{2}$	$41\frac{1}{2}$
Gray clay-----	5	7	Grey sandy clay-----	$3\frac{1}{2}$	45
Silty sand-----	8	15	Water was found at 45 feet and rose 14 feet in $1\frac{3}{4}$ hours. Water stood 24.8 feet 19 hours after well was completed.		
Yellow clay-----	10	25			
Caliche and silty sand-----	$1\frac{1}{2}$	$26\frac{1}{2}$			
Yellow clay-----	$4\frac{1}{2}$	31			

Logs of W. P. A. Test wells - continued

Well 159

Located $2\frac{1}{4}$ miles northwest of Bayside.

	Thickness (feet)	Depth (feet)		Thickness (feet)	Depth (feet)
Black gumbo-----	$7\frac{1}{2}$	$7\frac{1}{2}$	Silty sand-----	6	23
Caliche and clay-----	$2\frac{1}{2}$	10	Fine water sand-----	$1\frac{1}{2}$	$24\frac{1}{2}$
Yellow silty clay-----	3	13	Caliche and clay-----	$5\frac{1}{2}$	30
Silty sand-----	3	16	Clay and sand-----	2	32
Clayey gravel-----	1	17	Water found at 30 feet.		

Well 163

Located $1\frac{1}{4}$ miles northwest of Bayside

Black gumbo-----	7	7	Silty sand-----	1	17
Gray clay-----	3	10	Gray silty clay-----	6	23
Yellow clay-----	3	13	Gray clay-----	2	25
Yellow sand-----	1	14	Water sand-----	1	26
Gray clay-----	2	16	Found salt water at 26 foot and water rose 37 inches in 30 minutes.		

Partial analyses of water from wells in Refugio County, Texas.

(Analyzed at the State University under the direction of Dr. E. P. Schoch, Director of the Bureau of Industrial Chemistry, by J. E. Stullken, C. R. Stewart, and D. F. Riddell, Chemists, and J. A. Harmaza, Roy Brown and Jack Ramsey, Assistant Chemists. Results are in parts per million. Well numbers corresponds to numbers in table of well records)

		Depth below measuring point (ft.)	Date of measurement				
749	1	39.4	Oct. 14, 1937	C,W	D, Ind	43-54	Iron casing. Owner reports dry, caving sand at 15 to 35 feet.
750	0.5	34.1	Oct. 6, 1937	C,E, $1\frac{1}{2}$	P	—	Iron casing. Drilled to supply C.C.C. camp in Goliad State Park.
751	1	62.3	Oct. 8, 1937	C,W	P	—	Iron casing. Altitude, 162 feet.
752	2.5	9.5	Oct. 6, 1937	A,E, 15	P	—	Concrete curb. Located on river bank. Well supplies two reservoirs.
753	—	59	e/	T,E, 25	P	—	City well 2. <u>Altitude, 219 feet.</u> <u>Altitude, 208 feet.</u>
754	2	14.0	Oct. 13, 1937	C,W	D,S,I	70-88	Located near Coleto Creek, $\frac{1}{4}$ mile west of Weesatche. See log.

c/ A, air-lift; D, domestic; Ind, industrial; Of, oil field; P, public; S, stock; N, not used.

d/ No water sample collected for analysis.

e/ Water level reported.

Logs of test wells drilled by W. P. A. labor in Refugio County, Texas
 Samples examined and classified by Emil J. Michal,
 Project Superintendent.

Thickness (feet)	Depth (feet)
---------------------	-----------------

Well 207

In west ditch of State Highway 44, John Keating survey, at Inari, $18\frac{1}{2}$ miles northeast of Refugio.
 Black top soil - - - - - 2 2
 Bluish-gray clay - - - - 5 7
 Gray clay and sand - - - - 5 12
 Bluish-gray sand and clay - 2 14
 Grayish-yellow sand - - - - 3 17
Struck rock at 17 feet. Mar. 15, 1937.

Well 209

West side State Highway 44, Jas. Power & Jas. Hewitson survey, $17\frac{1}{2}$ miles northeast of Refugio.
 Black top soil - - - - - 3 3
 Grayish-yellow clay - - - - 2 5
 Bluish-gray clay and sand - 2 7
 Brownish-yellow clay and sand - - - - - 1 8
 Gray sand and clay - - - - 3 11
 Light-gray sand - - - - - 3 14
 Light-yellow sand - - - - - 2 16
 Grayish-yellow sand - - - - 1 17
 Grayish-white sand - - - - 1 18
 Light yellow sand - - - - - 2 20
 Gray sand - - - - - 1 21
 Yellow sand - - - - - 5 26
 Yellow sand and clay - - - - 1 27
 Bluish-gray clay and yellow sand - - - - - 2 29
 Yellowish-gray sand - - - - 4 33
 Grayish-white sand - - - - 1 34
Struck water at 34 feet. Caving at 34 feet. Water level, 33.1 feet below top of ground $\frac{1}{2}$ hour after hole completed. Mar. 13, 1937.

Well 212

West side State Highway 44, Jas. Power & Jas. Hewitson survey, $15\frac{1}{2}$ miles northeast of Refugio.
 Black top soil - - - - - 4 4
 Bluish-gray clay and caliche - - - - - 8 12
 Yellow clay, sand and caliche - - - - - 4 16
 Grayish-yellow clay, sand and caliche - - - - - 4 20
 Bluish-gray clay, sand and caliche - - - - - 6 26
 Gray sand and clay - - - - - 4 30
Struck water at 29 feet.

Thickness (feet)	Depth (feet)
---------------------	-----------------

Well 212--Continued

Water level, 29.0 feet below top of ground 2/3 hour after hole completed.
Mar. 12, 1937.

Well 213

Alongside State Highway 44, Jas. Power & Jas. Hewitson survey, 14 miles northeast of Refugio.
 Black top soil - - - - - 3 3
 Bluish-gray clay and caliche - - - - - 8 11
 Bluish-gray clay with yellow ferruginous streaks - - - - 3 14
 Bluish-gray and brown clay - 3 17
 Light-gray clay and gray sand - - - - - 1 18
 Gray clay and sand - - - - - 1 19
 Yellowish-gray clay and sand - 1 20
 Yellowish-gray silty sand - - 3 23
 Gray clay and sand - - - - - 1 24
Struck water at 24 feet. Water level, 22.7 feet below top of ground 2/3 hour after hole completed. Mar. 12, 1937.

Well 241

In west ditch of State Highway 44, 50 feet north of culvert at Vidaurri, Juan & Juan Jose Garza & Jose Vidaurri survey, $12\frac{1}{2}$ miles northeast of Refugio.
 Black top soil - - - - - 2 2
 Yellow clay, sand and caliche - - - - - 1 3
 Yellow clay - - - - - 2 5
 Bluish-gray clay with yellow ferruginous streaks and caliche - - - - - 7 12
 Yellow clay and sand - - - - 1 13
 Grayish-white sand - - - - 4 17
Struck water at 17 feet. Caving at 17 feet. Water level, 15.1 feet below top of ground $\frac{1}{2}$ hour after hole completed. Mar. 8, 1937.

Well 245

In west ditch of State Highway 44, 835 feet south of north line, John H. Peoples survey, $10\frac{1}{2}$ miles northeast of Refugio.
 Light-gray clay with reddish-yellow ferruginous streaks - 1 1
 Light-gray clay and sand with red streaks - - - - - 2 3

Bluish-gray clay with yellow streaks- - - - -	1	18
Bluish-gray clay - - - -	5	23
Gray clay and sand- - - -	2	25
Struck water at 25 feet. Water level, 24.2 feet below top of ground $\frac{1}{4}$ hour after hole completed. Feb. 18, 1937.		

Well 597

In west ditch of State Highway 35, 10 feet north of Arenas County line, Luke A. Falvel survey, $12\frac{1}{2}$ miles southwest of Tivoli.

Black top soil- - - - -	2	2
Bluish-gray clay with iron-yellow streaks- - - - -	3	5
Bluish-gray clay with brown streaks- - - - -	3	8
Grayish-brown clay- - - -	3	11
Brown clay- - - - -	4	15

Well bored in ditch, which is 2 feet deep. Struck water at 15 feet. Water level, 12.8 feet below bottom of ditch 3/4 hour after hole completed.

Feb. 19, 1937.

Well 602

Alongside Refugio-Austwell road, Robert Rogers Heirs survey, $12\frac{1}{2}$ miles southwest of Tivoli.

Black top soil- - - - -	2	2
Black top soil and caliche- -	2	4
Top soil and sandy clay- -	5	9
Top soil, clay and caliche- -	2	11
Yellow clay- - - - -	2	13
Gray and yellow clay - - -	3	16
Gray clay- - - - -	5	21
Gray clay and quicksand- -	3	24

Struck water at 24 feet. Water level, 17.9 feet below top of ground $\frac{1}{4}$ hour after hole completed. Feb. 17, 1937.

Logs of W. P. A. test wells in Refugio County--Continued

Thickness (feet)	Depth (feet)
---------------------	-----------------

Well 604

Alongside Refugio-Austwell road, John Roome survey, 14 miles southwest of Tivoli.

Black top soil- - - - -	2	2
Gray clay- - - - -	3	5
Gray clay and caliche - - -	3	8
Yellow clay- - - - -	6	14

Gray clay and sand- - - -	2	21
Gray clay, sand and caliche- -	1	22
Gray clay and sand- - - -	1	23
Gray clay, sand and caliche- -	4	27
Struck rock at 27 feet. Feb. 17, 1937.		

Partial analyses of water from wells in Refugio County, Texas

(Analyzed at the University of Texas under the direction of Dr. E. P. Schuch, Director of the Bureau of Industrial Chemistry; by J. E. Stulken, D. F. Riddell, H. T. Davidson, Floyd H. Ward and F. G. Steer, Chemists; and J. A.

Harmaza, Martin Wieland, and Jack Ramsey, Assistant Chemists. Nitrate determined by E. W. Lohr, U. S. Geological Survey. Results are in parts per million. Well numbers correspond to numbers in table of well records.)
