## U.S.-Mexico Trade: Exports and Imports Up in Quarter 1 2004

In the first quarter of 2004 figures for U.S.-Mexico trade marked an increase over the same period in 2003 (See Table 1). If this trend continues, 2004 may be a bright point after three years of almost flat end-of-year totals (2001-2003). In the year 2000, trade between the countries had peaked to a historical high of \$247.6 billion in total trade.

The difference in this year's first quarter is the increase in U.S. exports to Mexico. The previous three years for the same periods had lackluster increases and in some months decreases.

U.S. imports, on the other hand, have remained consistently on the increase. Even in the last three years imports have had increases.

Although U.S. exports were up, the U.S. registered a trade deficit with Mexico (\$10.5 billion), but was less compared to Q1 2003 (\$10.8 billion).

Table 1

Imports	33.5	36.4	2.9	8.7	
Tota!	56.2	62.3	6.1	10.9	

The trade of goods between the U.S. and Mexico has predominately been at the border. Historically, the percentage of the dollar value of goods in trade between them has been in the 80s. The first quarter of 2004 showed that percentage to be 83.0 percent.

The border continues to be the conduit between the trading partners. Table 2 exhibits the dollar value of the trade activity which took place on the border in this first quarter.

Table 3 provides a look at the total dollar value of trade activity—U.S. exports plus U.S. imports—at the individual border ports of entry on the U.S.-Mexico border for Quarter 1 2004. A comparison with the same period in 2003 is also provided.

On the back page, Tables 4 and 5 provide the dollar value of U.S. exports to Mexico and U.S. imports from Mexico for the same time periods.

In subsequent issues of the *Border Business Indicators*, these trends in trade activity will be reviewed. In addition, the composition of trade or type of goods that comprise these dollar values will be examined.
