MEMORANDUM

January 8, 1996

To: Texas DHI Members

From: Michael Tomaszewski
Professor, Extension Dairy Specialist,
and TDHIA State Coordinator

A handwritten signature in black ink, appearing to read "Michael Tomaszewski", written over the printed name in the "From:" field.

Subject: 1995 Annual Summary

Your 1995 annual summary depicts the actions of your association during the past year. You have continued to grow and provide new services and programs to meet the changing needs of your association. Increased feed prices, low slaughter prices coupled to no increases in milk prices has resulted in a difficult time for dairy producers. Although official enrollment is down this year, total enrollment is up.

This increased enrollment is due to many new and innovative programs that were initiated by your association. One was the inclusion of independent service providers within the DHI system. The service providers offers an alternative to members from whom they are able to receive service. This is part of the new environment in which you, as well as DHI, is working. We continue to service herds in New Mexico and, for the first time, they have been included in the summary. Changes will continue that require us to continue to evaluate new ways to meet your management needs.

Texas has had its first 27,000 pound herd. In addition, two other herds surpassed the 25,000 pound hurdle.

The new lab line has been working exceedingly well. Very little breakdowns have been experienced due to the simplified design of the new equipment. The truck route has continued resulting in supplies being delivered on a timely manner to supervisors as well as the movement of sample to your lab in superior condition.

Software development continues to be a major developmental effort of your Association. We have been able to design programs to meet your management needs. With advanced power and prices decreasing drastically for that computing power, computing will be moved to your dairy. On-farm processing will continue as well as the collection of more data at cow side. The challenges faced by DHI is how to interface with that alternative source for data.

DHI is changing. TDHIA has changed to provide you with a cost effective service with programs to meet your ever-changing information management needs. Do not hesitate to contact your directors or staff if you have questions, concerns or comments.

1995 TDHIA AVERAGES FOR DAIRY GOATS

In order for a herd to appear in this listing, it must have completed an official testing year. To be official, the herd must have had 10 tests conducted between October 1, 1994, and September 30, 1995, with none of the test days being greater than 75 days apart.

PRODUCTION AWARDS

The DHIA recognizes members of the association by the size of their herds that have the highest averages for milk, milkfat and protein. There are separate categories for 2X and 3X milkings.

High Texas Herd

1995
Less than 160 Cows
2X
Milk

1995 TOP GUN RESULTS

Each year the Texas DHIA publishes their list of outstanding herds. In 1993 the Texas DHIA began publishing the results of the herds participating in the Texas Herd Monitoring Program. This year, 1995, the herd monitor program included 64 herds, representing 17 states and 3 different dairy records processing centers. The herds ranged in size from 31 to 3600 cows. Some of the herds are using bST, some are not. All of the herds feed a TMR or a variation there of. The herds are milked in stanchion barns, herringbone parlors, and parallel parlors. The herds represent a cross section of the better dairy herds in the nation and are very typical of the regions in which they are located. These herds represent a group of managers who do ordinary things extraordinarily well. The herd summary information is divided into 4 categories; overall, Texas herds, northern herds and southern herds. Southern herds are located in states that border the Gulf of Mexico. Northern herds are located in New York, Vermont, Ohio and Idaho. The production variables for each category are summarized below. These parameters are representative of the variables which are monitored monthly in all the herds participating in the Texas DHIA herd monitor program. The herds (7) located in New York were eliminated from the year end analysis this year because of the changes in their processing center which made data unavailable from September 29th through year end. In order to included in the year end herd rankings the herd had to be participating in the Texas DHI herd monitor program for at least 10 test periods.

Rolling herd average milk in the monitor herds peaked in April and May, by year end most herds were approximately 1,000 lower in rolling herd average than at their peak. A number of factors contribute to this but include lower peak (45-100 DIM) milk in 1995 than 1994; a larger percentage of cows with extended (> 70%) dry periods, and longer days open as result of poorer conception rates.

SUPERVISOR LENGTH OF SERVICE

Many times, those individuals that make the DHI program "click" are not appreciated nor rewarded. In a small way, the Texas DHIA wants to say THANKS to those important people that have made our program a success in Texas. One year of service had to be completed to be on this list.

Name	Years of Service
Joe Hoyt	20
Homer McCain	19
Alice Jisha	15

Texas DHIA Annual Meeting
Waco Convention Center
January 16, 1996

The annual meeting of the Texas DHIA was called to order by Vice-President Bryant Fisher. Mr. Fisher discussed the affairs of the association. The current unaudited financial condition was presented. The accounting firm employed by the association had not completed the year ending report. As such, it will be discussed at the next Board meeting.

The State Coordinator report was giving by Michael Tomaszewski. He emphasized that this year TDHI will emphasize quality and consistency. Software development has resulted in TDHIA capitalizing on a new product and service that we did not have before. In addition, the monitoring program has proved very successful.

Dennis Carr, Scott Anderson and Mike Potter each presented their regional reports. Generally, all areas are experiencing a decrease in herds due to sell-outs and bankruptcies. Attention will be paid to increase membership and provide new services.

Awards were presented.

Election of Directors was held and the following were elected:

Directors:

Region 1	Robbie Watson
Region 2	Bob Stryk
Region 3	Roy Koetter

Associate Directors:

Milton Arnold	CEA
Joe Hoyt	Supervisor

With no further business, the meeting was adjourned.

1994-95 OFFICERS AND DIRECTORS - TEXAS DAIRY HERD IMPROVEMENT ASSOC.
