Picturing Texans

An index to the portraits and photographs showing recognizable individuals published in Texas pictorial historical and genealogical references (mug books) before 1941.

Version 1.0
1 June 2011

Introduction: Once upon a time, several decades ago, it occurred to me that an index to the portraits in early Texas mug books would have been handy for researchers and historians who were trying to flesh out and illustrate the history of the state. While there was hardly ever any difficulty finding usable images of Stephen, Sam, Jim, Davy, and lots of the other big time revolutionary guys, finding a portrait of a judge or a lumber dealer or a preacher, particularly a member of a minority group or from a small town, was much more difficult. While several excellent indexes were created during the Depression, including those of names found in mug books and newspapers, these rarely reported if the item included a portrait. Well, that was then and this is, oh yeah, the computer age.

This index was created to help researchers locate images of Texans that they might find useful. The operable word in the previous sentence is “help.” This index was created over several months a few hours at a time. In most cases only one or two of the publications were available at any one time, and, anyway, I made no effort to compare images that purport to show the same person to see if the two are actually the same image or, for that matter, actually depict the same individual.

The user will find many errors in the following entries. In some cases I have simply screwed up, but in others I have repeated the errors in the original sources as best as I possibly could. Please try all the possible spellings for the surname of the individual you seek, not to mention all possible forms of the person’s given name—initials, abbreviations, nicknames, creative spelling of common names, etc. The section on Names below provides some indication of how I chose to organize and style the entries.

Source Material: Initially I looked at the list of books of biographies indexed, beginning in the Depression, by various workers and maintained by the Texas State Archives. From this list I deleted all works published after 1940, all non-book sources, and all publications whose catalog entry indicated no or very few portraits. I also decided to ignore academic institution yearbooks and military unit histories. But I added to my list the suggestions of colleagues from around the state. I also added likely sounding sources found by searching Google Books and Heritage Quest on the Web. I then examined each item available in San Antonio libraries or as full-text files on the Web and, where appropriate, indexed the portraits in the books. The majority of locally available works are housed at the DRT Library at the Alamo, Institute of Texan Cultures, San Antonio Public Library (Texana/Genealogy Collection), and Trinity University. The librarians and their staffs of these institutions were, as they always have been, universally helpful in making materials in their care available and, more important, making me aware of sources that I didn’t realize exist. Version 1.0 (June 2011) makes use of about 100 sources.
Names: Well, it’s pretty straightforward. Names are listed alphabetically by surname as spelled in the source. Experienced researchers will realize that just because you know that the person you are looking for was named Haynes doesn’t mean you shouldn’t also check under Haines and Hanes. Identical names are combined into a single listing—this doesn’t imply that all the references apply to the same individual, just that the entry includes individuals whose names are rendered the same in different sources. A question mark in the listing means that some part of the name cannot be determined in the source. One or more letters in parentheses in a name indicates that the name is spelled differently in the various sources or in different places in the same source. Diacriticals have not been reproduced, and suffixes have been retained only when both father and son are included in the same source.

With a few exceptions, entries that probably represent the same individual, but with different given names, are listed individually. Thus, while I can’t imagine that they don’t represent the same fellow, there are separate entries for R.C. Buckner, Robert C. Buckner, and Robert Cooke Buckner. On the other hand, where I am pretty sure that no one would become confused, I have consolidated several versions of a name into one entry. Thus S.F. Austin, Stephen F. Austin, and Stephen Fuller Austin will all be found listed under the latter. Married women will be listed under the husband’s surname with (1) the husband’s given name and Mrs., (2) the wife’s given name and Mrs., or (3) the wife’s given name and her maiden name in parentheses. Researchers looking for women who were married should check under the husband’s surname and search for her maiden surname. This system pretty much fails, by the way, in the case of wives of Swedish origin because the surname convention for Swedish women (and men for that matter) was undergoing significant change at this period. Version 1.0 (June 2011) includes approximately 19,000 entries representing about 17,500 individual names.

Image Quality: I have been reliably informed that today any kid walking down the street can use computer software to overcome any defect in any type of image. Therefore, I have not made any (OK, maybe a few) comments about image quality in the various sources. As a general rule, however, sources published before about 1885 tend to use engravings or lithographs and, as such, present fairly high quality for reproduction. Images published after about 1895 tend to be halftones and, at best, are difficult to reproduce well. That said, ask the kid if you need to reproduce any of these later images.

Help: I know I have made many errors and missed many useful sources. I would appreciate it very much if users would go to the trouble of pointing these out to me. Correspondence gratefully received at <davhaynes@juno.com> Should any user wish to submit an already done portrait index for incorporation into the present list, well, what can I say—DO IT.
