

Prepared by the U. S. Army Topographic Command (AJSK), Washington, D. C. Compiled in 1954 by photogrammetric methods from aerial photographs taken 1952-1953. Photographs field annotated 1954. Revised by the U. S. Geological Survey in 1974 from aerial photographs taken 1973.

Area covered by dashed light-blue pattern is subject to controlled inundation.

100,000-foot grids based on Texas coordinate system, central and south central zones.

Location of geodetic control established by government agencies is shown on corresponding 1:250,000-scale Geodetic Control Diagram.

TO GIVE A STANDARD REFERENCE ON THIS SHEET TO NEAREST 100 METERS

SAMPLE POINT: QUAD

1. Read letters identifying 100,000 meter square in which the point lies.

2. Locate first vertical grid line to LEFT of point and read LARGE figure labeling the line either on the top or bottom margin of the line itself.

3. Locate first horizontal grid line BELOW point and read LARGE figure labeling the line either on the left or right margin, or on the top or bottom margin of the sheet.
