Agricultural Statistics

Support and cooperation from Texas farmers, ranchers and agribusinesses are the keys to accurate, reliable agricultural statistics. The National Agricultural Statistics, Texas Field Office appreciates the many individuals who provided the survey data which were the foundation for the estimates in this summary. We hope it will be a useful source of information to everyone involved in agriculture.

Texas Agricultural Statistics (2006) provides data on cash receipts, prices, livestock and livestock products, field crops, major vegetables, citrus fruits, peaches, grapes and pecans. The two most recent years of district and county level data are included for all major crop and livestock items.

The funding for the collection of county-level data was provided by the Texas Legislature through a cooperative program between the Texas Department of Agriculture and the United States Department of Agriculture, National Agricultural Statistics Service, Texas Field Office.

**STATE OF TEXAS
OFFICE OF THE GOVERNOR**

Greetings:

As Governor, I am pleased to extend thanks to all involved in the Texas agriculture industry. Your goal to provide Texans, and the world, with quality agricultural products is to be commended, and I say thank you on behalf of all Texans for a job well done.

Texas is renowned for its agriculture despite the challenging conditions that you face as agricultural producers. From our high quality produce to our first rate textile materials; the Lone Star State stands second to none, largely thanks to the hard work of farmers and ranchers to ensure the success of the agriculture industry.

The Texas Field Office of the National Agricultural Statistics Service continues to support our global leadership in agriculture by maintaining statistical information that is vital to understanding our present and future needs of the industry. The utility of these statistics is proven everyday as they help ensure industry-wide success. Let us continue to work hand in hand so that Texas remains a leader in agriculture, renowned the world over for its diversity and quality.

Sincerely,

A large, stylized signature of the name "Rick Perry" in black ink.

Rick Perry
Governor

TEXAS DEPARTMENT OF AGRICULTURE

TODD STAPLES
COMMISSIONER

To My Fellow Texans:

People worldwide know everything is bigger in Texas; of course this truth applies to Texas agriculture, too. Generating more than \$85 billion annual statewide economic activity, Texas' agricultural industry continues to bloom, boom and grow.

Texas agriculture supplies more variety than what you will find in the supermarket. From Texas wines and agricultural fuels to feeding kids and supplying one of every seven Texas jobs, the Lone Star State's agricultural industry supplies a vast array of services and support.

Texas agriculture presents many of the reasons that make it easy to GO TEXAN, and people around the globe are pulling up stakes and heading to Texas to raise families, launch careers or spend their golden years. Upon arrival, they find the most spirited people and state in the world: Texans are happy to share their hearts and their heartland.

Of course, sharing Texas is some of what Texas agriculture is all about. We send pieces of home all over the world in the form of cotton bales, livestock, grains and produce. As you will see in the following pages, the 2006 Texas Agricultural Statistics bulletin records our industry's economic impact as we share Texas with the world.

Please join me in congratulating those whose successes are recorded in these pages, thanking those who work so hard to make it all possible, and supporting our industry's efforts to surpass these accomplishments next year!

Sincerely,

Todd Staples
Commissioner

United States Department of Agriculture
National Agricultural Statistics Service
Texas Field Office
Cooperating with the Texas Department of Agriculture

A Message from the Director:

Texas agriculture producers provide people of the U.S. and the world a consistent supply of quality food and fiber products. Agriculture production during 2006 was no exception as producers proved agriculture's importance in Texas with over \$16.1 billion in cash receipts. The Texas Field Office of USDA's National Agricultural Statistics Service is proud to serve the agriculture industry by providing the necessary data about the crop and livestock production here in Texas. This publication contains a compilation of statistics to help improve the quality of agriculture marketing and to support efforts in establishing State and national policies.

This bulletin is provided in cooperation with the Texas Department of Agriculture. While we take tremendous pride in providing this service, we are also mindful of the cooperation provided by the thousands of farmers, ranchers, and agribusiness operators that provide the raw data for this publication. We owe each and every individual a large "Thank You".

I also want to take this opportunity to assure our data reporters that the individual information they provide is protected by Federal Law, Title 7, U.S. Code. These individual data are only used to produce the statistical summaries you can find on the following pages. This law protects the individual information provided from being disclosed to any other person, business or organization - public or private.

It is always a pleasure to visit with the agriculture producers of Texas, whether in person as I travel around the state or over the phone. The feedback you provide to us on ways that the Texas Field Office of USDA's National Agricultural Statistics Service can provide better service is also appreciated. Our goal is to always improve our products and services - to be of service to Texas agriculture.

Regards,

David S. Abbe
State Director

2006 Agricultural Summary

January began with unseasonably warm and windy conditions. Harvest was virtually completed across the Plains and North Texas during this period. Irrigation was in full force as most areas of the state experienced extreme drought conditions. These unfavorable, dry conditions eventually led to an uprise of wildfires, as persistent winds aided in the progression of these fires. Fire crews from surrounding states were stationed throughout many portions of the state to confront the dangers of this issue. Herd reduction and liquidation were common due to high feed prices, lack of winter forage, and slim prospects of adequate rainfall in the near future. Land preparations were active for various crops, however, many producers indicated that an increase in moisture was desperately needed before those activities could be completed. Towards the end of the month, isolated showers crossed southern and eastern portions of the state and slightly improved conditions. Cotton ginnings were ongoing as most areas anticipated it to last around another month.

February started much the same way as January, with above normal temperatures and dry conditions. Midway through the month, a cold front passed through the state and contributed to the development of much needed rainfall. However, the resulting rainfall was minimal as the vast majority of the state only received around a half inch or less. Around the end of the month, many locations received moisture in the form of misty rains and fog. The additional moisture was beneficial to some areas, but it did little to ease drought conditions overall. There was some limited green-up in wheat fields, but much of the crop remained in bad shape. Only a handful of cotton gins were still operating as they worked to complete ginning of the previous year's record crop. Vegetable harvest continued, but there were some reports of frost damage on spinach. Wildfires continued to be a serious threat throughout the state as new fires continued to emerge. Herds were highly supplemented and hay became more scarce and higher priced. Many producers also continued to reduce the size of their herds in response to this growing shortage of available hay and stock water.

The beginning of **March** was signaled by a drastic change in scenery as high temperatures skyrocketed into the upper 80's and 90's nearly statewide. Wichita Falls had the distinction of being the state's hotspot with the thermometer topping out at 98 degrees. The record breaking heat was a result of very low humidity. Many of areas that were fortunate enough to receive the increased rainfall at the end of February were now beginning to see improvements in grasses. Supplemental feeding was still necessary in all areas but decreased in locations that experienced this pasture improvement. Planting of corn began in the Blacklands along with several other areas in the southern region of the state. Producers began watering grapes for the first time in the season. By the middle of the month, a massive wildfire broke out in the Panhandle. Numerous structures were destroyed and many towns were evacuated as over 600,000 acres were burned. This disaster, which began just east of Amarillo, was possibly one of the worst fires in Texas history. As further assessment was conducted after fires were put out, it was estimated that 840,000 acres were scorched; killing approximately 10,000 cattle and horses. Wheat in the Blacklands began showing some promise after a few weeks of showers, and heading began in the San Antonio-Winter Garden area. Peaches and pecans began to bud out in some areas of the state. Towards the end of the month, a cold front passed through the state and contributed to another increase in rainfall. There were also some minute amounts of early spring snowfall associated with this cold front. The increased moisture was extremely beneficial to areas recovering from the devastating wildfires. Also, pasture green-up progressed and stock water levels increased in many areas. Despite the positives associated with this cold front, freezing temperatures caused many concerns of freeze damage to early emerging crops. Also, summer crop planting was delayed as producers waited for fields to dry.

April began with scattered showers moving through many areas of the state. These showers provided relief to cotton producers in the Rio Grande Valley and Coastal Bend as this was the first rain since pre-planting for many in these areas. Springtime temperatures were in effect as highs in the 80's were common in all areas with some reports of 90's in southern locations. Pasture green-up progressed northward as temperatures rose. However, freeze damage from the ending of March was noticed in some wheat fields that headed out and also in newly emerged corn and sorghum. Grapes were included in this list as many vineyards in the Trans-Pecos area and the Edwards Plateau were severely damaged. In the Plains, warmer temperatures and winds as high as 35-50 mph sapped soil moisture that had improved from recent rains. Later in the month, more inclement weather replaced the heat across areas of the Blacklands, Edwards Plateau, Upper Coast, and Central and Eastern Texas. In the hardest hit locations, dangerous straight-line winds and baseball sized hail caused extensive structure and crop damage. Many areas experienced much cooler temperatures, which in return decreased the evaporation rate of soil moisture. Small grain producers began cutting wheat for hay in many regions as there were some reports of rust in some eastern areas of the state. Although planting of corn was in full swing in the Panhandle, some other fields around the state were at a total loss due to the effects of the weather. In many cases, cattle were grazing on undesirable weeds such as huisache due to lack of adequate forage. Spring calving and lambing began to wrap up.

May started with continued rains to most areas of the state. The cotton crop in the Rio Grande Valley was a loss due to the severe drought over the last few months. Pecan growers in the Blacklands and Edwards Plateau began spraying for pecan nut case bearer. A little later, thermometer readings dropped into the 30's in the northern Panhandle as a late-spring cold front swept through that area. There were numerous reports of high winds, large hail, and tornadoes. Small grain fields and summer crops were damaged in many areas. Although the increased moisture from the storms was very beneficial to many pastures around the state, horn fly populations began to increase in cattle herds. Around the end of the month, torrential downpours pounded southeast Texas and coastal areas. Rain accumulations of six inches were common in eastern counties of the Upper Coast. One location in the region was swamped with as much as 16 inches of rainfall. As weather permitted, some producers in eastern areas began their second hay cutting while South Texas growers were only cutting their first hay crop on irrigated land. Planting of cotton continued at a rapid pace in the Panhandle and Southern Plains. Many drought stricken fields in the Rio Grande Valley and Coastal Bend were disasterized out. Corn in North Central Texas began tasseling, and fields in southern regions began setting ears. Despite these positives, corn in the Blacklands began to show drought stress. Concerns with potential Mexican rice borer problems arose in some areas. Also, pecan nut case bearer problems were reported in some locations. Pasture conditions were generally holding steady, and cattle were in fairly decent shape.

The beginning of **June** started off much the same way as May ended. Rains averaged from mostly 3 to 10 inches around the state. There were reports of hail damage in some areas. The resulting rain provided much needed relief from extreme heat across the state. However, the additional moisture came too late for most corn and dryland cotton fields in the Rio Grande Valley. This proved to be the same along the Upper Coast and Coastal Bend as corn was too far along to benefit from the increased moisture. Grain harvest of a much reduced wheat crop began in the Panhandle. Baling and grazing of wheat was ongoing in various locations around the state. The heat was brutal across most areas of the state as temperatures rocketed to the triple-digits a little later in the month. Some locations even saw the thermometer crack the 110 degree mark. Corn producers in drought stricken areas across the Blacklands and southern regions began cutting for silage and hay as the grain yield potential dropped below acceptable levels. Thrip infestations were a problem in cotton fields. Towards the end of the month, rainfall dropped to more modest levels. High winds and hail accompanied precipitation in the Pan

handle, which damaged some newly emerged crops. Small grain harvest neared completion in the High Plains, where yields were poor even in some irrigated fields. Corn silage yields decreased along with prospects for good grain yields. Sorghum yields improved in the Blacklands due to recent rains. Peanuts began pegging in the Southern High Plains, but there were some reports of pod rot due to excessive moisture applied to pivots. Pecan nut development began in the Trans-Pecos as there was some damage from the recent hail storms. Pastures were generally very dry and further deteriorating in spite of the rains. Unfortunately, there were once again some reports of rangeland fires in the High Plains. Hay continued to be in short supply, and supplemental feeding continued across most areas of the state.

As **July** commenced, most areas of the state received light to moderate rainfall. Growers in the High Plains continued to heavily irrigate land, as the recent rains weren't enough to makeup for the persistent hot and dry conditions. Also, replanting of dryland cotton acreage began across many areas of the Plains. Some counties completely zeroed out their fields due to unfavorable conditions. In response to this misfortune, some growers in the Southern High Plains planted sorghum as an alternative crop. Corn harvest for silage neared completion in the Blacklands. Later in the month, rain accumulations decreased as temperatures gradually increased back into the hundreds. Harvest of corn began in the Northern High Plains, where there were some growing concerns about high aflotoxin. Peanuts were pegging at an intense rate in heavily irrigated areas of the Southern High Plains. Soybean harvest neared completion in the Blacklands, with very low yields reported. Pecans were at the expansion stage in the Trans-Pecos area. Due to the very hot and dry conditions, pastures were reported to be "January brown" in areas of the Plains. Around month's end, heavy rains of mostly 4 to 6 inches fell along the Upper Coast and Louisiana border. One county in the Upper Coast reported as much as 10 to 12 inches of rainfall. However, most areas of the state remained relatively dry. The heavy rains along the Upper Coast contributed to lint losses in cotton.

August began with most areas of the state failing to receive a trace of precipitation. In fact, areas such as the Lower Valley reported that this month was one of the hottest on record, according to local meteorologists. Long-term hot and dry conditions in the High Plains forced some growers to abandon corn fields, along with an increase of cotton abandonment. Harvest of wine grapes was completed in the Trans-Pecos area, where production was dramatically down from normal levels. There were widespread reports of decreases in feed supplies and available pasture for livestock, along with stock tanks and creeks going dry. Some locations had little or no hay locally, which caused producers to shop outside the state. The majority of the soybean crop in the Blacklands was baled for hay. Also, some soybean acreage along the Upper Coast was destroyed by recent, excessive rains that rotted the seeds in the pods. Army worms and grasshoppers in East Texas further reduced forage. Pecans were in the water to nut-filling stage in the Trans-Pecos area. In the Northern High Plains, additional rainfall around the end of the month contributed to a reduction in cotton boll shedding. It also helped an otherwise fair sorghum crop in this area progress from a pre-boot to soft-dough stage. Livestock producers in the Plains and Trans-Pecos area also reaped the benefits of the recent moisture as they experienced an increase in grass green up.

The beginning of **September** was signaled by a small increase in moisture as most areas received light rainfall. These rains were especially beneficial to the Southern High Plains as sub-soil moisture was stored. However, the resulting cooler temperatures in the High Plains contributed to an increase in earworm and armyworm pressure. Also, there were some reports of blight and web blotch in the peanut crop. Planting of oats began in the Cross Timbers and Blacklands. Many growers along the Upper Coast began spraying soybean fields due to problems of Asian Soybean Rust, stinkbugs, and snails. Forage growth increased in the Northern

Low Plains, causing many ranches that intended to start early culling and shipping yearlings to hold off a little while longer. Towards the middle of the month, cotton leaf disease increased in the Southern High Plains. Around the end of the month, pecans began splitting in the Trans-Pecos area. Haying was in full swing in the Northern High Plains, and producers in South East Texas were getting their last cuttings for the year. Cattle sales decreased somewhat in the Blacklands due to improved grazing conditions.

October started as most areas in Central and Eastern Texas were dry once again. In the Northern High Plains, producers followed up corn harvest with wheat planting. Producers along the Coastal Bend harvested soybeans while spraying for soybean rust was ongoing along the Upper Coast. In the Trans-Pecos area, pecan nut filling was completed as planting of fall onions began. However, concerns began to arise as many producers experienced a dramatic increase in aphids. There was change in scenery later in the month as virtually all areas of the state received at least a quarter-inch of rainfall. Although the increase in moisture was beneficial to small grains, harvest was delayed in the High Plains and along the Upper Coast as fields were too wet for activities. Hail storms were detrimental to the Western Trans-Pecos area as several thousand acres of cotton and pecans were severely damaged. Rainfall continued to increase as the month progressed. Some areas northeast of Houston received over 18 inches in one week, which caused flooding and forced livestock producers to move cattle to higher ground. Towards the end of the month, a light freeze crossed sections of the High Plains. High winds were prevalent with gusts up to 60 mph in isolated localities. Although these winds slowed activities for a few days, cotton harvest was in full swing in the Plains. Producers in the San-Antonio Winter Garden prepared fields, planted fall vegetables, and harvested cabbage, cucumbers, and green beans. Supplemental feeding decreased in some areas of the state as pastures improved due to recent rainfall.

November began as most areas of the state experienced light to moderate rainfall. In the Southern High Plains, previous high winds helped drain moisture from the soil which allowed for the progression of cotton harvest. Overall, sub-soil moisture was mostly short to adequate. Producers in the Northern High Plains planted small grains behind harvested cotton, with the anticipation of wheat prices continuing to rise into the spring. In South Central Texas, the pecan crop was almost a total loss due to recent dry conditions along with squirrel problems. Many producers in the Blacklands hauled water to livestock as water supplies continued to decline. Supplemental feeding of livestock also continued as hay remained in short supply.

December commenced as many producers experienced very low temperatures and snow for the first time of the growing season. For the most part, the cold front had a negative effect on agricultural activities but did actually improve insect problems. The combination of dry and cold weather forced many producers to consider culling and reducing livestock as herds continued to decline in body condition. In South Texas, range and pasture conditions continued to decline as forage quality suffered from heavy frost and dry soil conditions.

^{1/} A **farm** is defined as "any establishment from which \$1,000 or more of agricultural products were sold or would normally be sold during the year". Government payments are included in sales. Institutional farms, experimental and research farms, and Indian Reservations are included as farms. Places with their entire acreage enrolled in the Conservation Reserve Program, set-aside, or other government programs are considered operating farms. **Land in farms** is all land operated by farms during the year. It includes crop acreage, wasteland, woodland, pasture, land in summer fallow, idle cropland, and land enrolled in the Conservation Reserve Program and other set-aside or commodity acreage programs. It excludes public, industrial and grazing association land and nonagricultural land. It excludes all land operated by establishments not qualifying as farms.

Source: Economic Research Service, USDA. ^{1/} Final sector output is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the national economy and is the sum of the income from production earned by all factors-of-production. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. ^{2/} A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales. * Revised.

1/ Ratio of prices received by farmers to the index of commodities and services, interest, taxes and wage rates. 2/ Ratio of the index of prices received by farmers, after adjustment for government payments, to the index of prices paid for commodities and services, interest, taxes and wage rates. * Revised.

**UNITED STATES GOVERNMENT PAYMENTS AS PERCENTAGE OF CASH RECEIPTS FROM MARKETINGS,
INDEX OF PRICES RECEIVED, PRICES PAID, PARITY RATIO AND ADJUSTED PARITY RATIO, 2002-2006**

| Year | Government payments as percent of cash receipts from marketings | 1910-14 = 100 | | | Parity ratio ^{1/} | |
|----------------|---|-----------------------|------------------------|-------------------|----------------------------|------------------------|
| | | Prices received index | | Prices paid index | Actual | Adjusted ^{3/} |
| | | Actual | Adjusted ^{2/} | | | |
| [1] | [2] | [3] | [4] | Percent | [5] | [6] |
| 2002 | 5.62 | 620 | 655 | *1,643 | 38 | 40 |
| 2003 | *6.95 | 677 | *724 | *1,696 | 40 | 43 |
| 2004 | *5.43 | *753 | *794 | *1,774 | *42 | 45 |
| 2005 | *10.19 | *732 | *807 | *1,888 | 39 | 43 |
| 2006 | 6.72 | 734 | 783 | 1,976 | 37 | 40 |

1/ Parity ratios are computed monthly by dividing the index of prices received for all farm products by the index of prices paid for Commodities and Services, Interest, Taxes and Wage Rates (both monthly indexes using a 1910-14 base). The annual parity ratio is a straight average of the twelve individual (January through December) monthly ratios. 2/ Adjusted to include government payments by multiplying column 2 by the ratio of [(100 + column 1 value)/100]. 3/ The adjusted ratio includes government payments to farmers. * Revised.

^{1/} An operation is any place having one or more milk cows on hand during the year, excluding cows used to nurse calves. Percent reflect average distributions based primarily on end-of-year surveys.

TEXAS MILK COWS:
Number of Milk Cow Operations, Inventory and Production of Milk and Milkfat, 2002-2006

| Year | Number of operations | Annual average number of milk cows ^{1/} | Production of milk and milkfat ^{2/} | | | | |
|------------|-------------------------|---|--|---------------|---|-----------------------|---------|
| | | | Per milk cow | | Percent of fat in all milk produced | Total | |
| | | | Milk | Milkfat | | Milk | Milkfat |
| | <u>Thousands</u> | | | <u>Pounds</u> | <u>Percent</u> | <u>Million pounds</u> | |
| 2002 | 1.9 | 317 | 16,719 | 619 | 3.70 | 5,300 | 196.1 |
| 2003 | 1.8 | 319 | 17,649 | 646 | 3.66 | 5,630 | 206.1 |
| 2004 | 1.7 | 319 | 18,837 | 695 | 3.69 | 6,009 | 221.7 |
| 2005 | 1.5 | 320 | 20,131 | 747 | 3.71 | 6,442 | 239.0 |
| 2006 | 1.3 | 335 | 21,328 | 798 | 3.74 | 7,145 | 267.2 |

^{1/} Average number during year excluding heifers that have not freshened. ^{2/} Excludes milk sucked by calves.

TEXAS MILK AND CREAM: Marketings, Income and Value, 2002-2006

| Year | Combined marketings of milk and cream | | | | Used for milk, cream and butter on operations where produced | | Gross producer income ^{3/} | Value of milk produced ^{2/ 4/} |
|----------|---------------------------------------|-------------------------------|-------------------|-------------------------------|--|---------------------|-------------------------------------|---|
| | Milk utilized | Average returns ^{1/} | | Cash receipts from marketings | Milk utilized | Value ^{2/} | | |
| | | Per 100 pounds milk | Per pound milkfat | | | | | |
| 2002 ... | Million lbs. | Dollars | | 1,000 dols. | Million lbs. | | 1,000 dollars | |
| 2002 ... | 5,276 | 12.90 | 3.49 | 680,604 | 2 | 258 | 680,862 | 683,700 |
| 2003 ... | 5,611 | 13.00 | 3.55 | 729,430 | 2 | 260 | 729,690 | 731,900 |
| 2004 ... | 5,986 | 16.30 | 4.42 | 975,718 | 2 | 326 | 976,044 | 979,467 |
| 2005 ... | 6,417 | 15.30 | 4.12 | 981,801 | 2 | 306 | 982,107 | 985,626 |
| 2006 ... | 7,124 | 13.30 | 3.56 | 947,492 | 2 | 266 | 947,758 | 950,285 |

^{1/} Cash receipts divided by milk for milkfat represented in combined marketings. ^{2/} Valued at average return per 100 pounds of milk in combined marketings of milk and cream. ^{3/} Cash receipts from marketings of milk and cream plus value of milk used for home consumption. ^{4/} Includes value of milk fed to calves.

TEXAS MILK AND CREAM: Quantity Used and Marketed, Price and Cash Receipts, 2002-2006

| Year | Total milk produced | Milk used where produced | | Milk marketed by producers | | |
|-----------------------|---------------------|-----------------------------|---------------------------------|--|----------------------|---------------|
| | | Fed to calves ^{1/} | Used for milk, cream and butter | Sold to plants and dealers as whole milk ^{2/} | | |
| | | | | Quantity | Price per 100 pounds | Cash receipts |
| <u>Million pounds</u> | | | | | | |
| 2002 | 5,300 | 22 | 2 | 5,276 | 12.90 | 680,604 |
| 2003 | 5,630 | 17 | 2 | 5,611 | 13.00 | 729,430 |
| 2004 | 6,009 | 21 | 2 | 5,986 | 16.30 | 975,718 |
| 2005 | 6,442 | 23 | 2 | 6,417 | 15.30 | 981,801 |
| 2006 | 7,145 | 19 | 2 | 7,124 | 13.30 | 947,492 |

^{1/} Excludes milk sucked by calves. ^{2/} Includes sales directly to consumers by producers who sell only milk from their herds; includes milk produced by institutional herds.

TEXAS MANUFACTURED DAIRY PRODUCTS: Production of Specified Products, 2002-2006

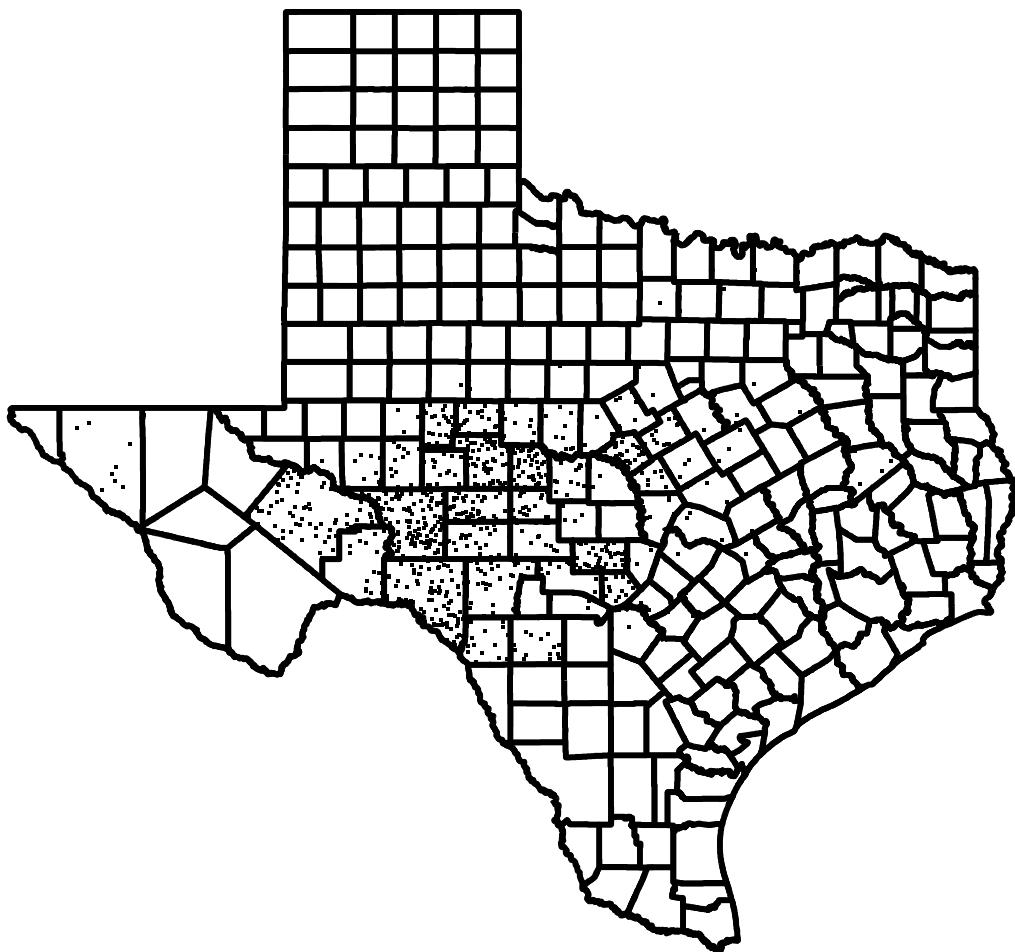

| Product | 2002 | 2003 | 2004 | 2005 | 2006 |

T/ Sheep and lambs shorn in both spring and fall are counted only once. Include fed sheep and lambs shorn. * Data suppressed due to confidentiality.

TEXAS SHEEP AND LAMBS: Inventory, Lamb Crop and Disposition, 2002-2007^{1/}

| Year | On hand January 1 | Lamb crop | | Inship- ments of sheep and lambs | Marketings | | Farm slaughter, sheep and lambs | Deaths | |
|------------|----------------------|-------------------|---|---|------------|-------------------|--|--------|-------|
| | | Number | Percent of January 1 ewes 1 year + | | Sheep | Lambs | | Sheep | Lambs |
| | | <u>1,000 head</u> | | <u>Percent</u> | | <u>1,000 head</u> | | | |
| 2002 | 1,130 | 540 | 75 | 128 | 182 | 485 | 2 | 39 | 50 |
| 2003 | 1,040 | 520 | 79 | 106 | 81 | 398 | 2 | 40 | 45 |
| 2004 | 1,100 | 520 | 77 | 57 | 116 | 390 | 2 | 41 | 58 |
| 2005 | 1,070 | 560 | 86 | 52 | 73 | 408 | 2 | 41 | 68 |
| 2006 | 1,090 | 520 | 75 | 34 | 110 | 346 | 2 | 46 | 70 |
| 2007 | 1,070 | | | | | | | | |

^{1/} Balance sheet estimates. Total of marketings, farm slaughter, deaths and sheep and lambs on hand end-of-the year equals total lamb crop, inshipments and on hand at the beginning of the year. ^{2/} Includes custom slaughter for use on farms where produced and state outshipments; excludes interfarm sales within the state.

TEXAS SHEEP AND LAMBS: Inventory by Class and Value, January 1, 2003-2007

| Classes | | 2003 | 2004 | 2005 | 2006 | 2007 |
|--|---------------|--------|---------|---------|---------|---------|
| Breeding sheep and lambs | 1,000 head | 820 | 840 | 840 | 870 | 820 |
| Ewes 1 year old and older | 1,000 head | 660 | 675 | 650 | 690 | 675 |
| Rams 1 year old and older | 1,000 head | 40 | 45 | 45 | 45 | 40 |
| Replacement lambs under 1 year old | 1,000 head | 120 | 120 | 145 | 135 | 105 |
| Market sheep and lambs | 1,000 head | 220 | 260 | 230 | 220 | 250 |
| All sheep and lambs | 1,000 head | 1,040 | 1,100 | 1,070 | 1,090 | 1,070 |
| Value per head | Dollars | 79.00 | 96.00 | 105.00 | 114.00 | 106.00 |
| Total value | 1,000 dollars | 82,160 | 105,600 | 112,350 | 124,260 | 113,420 |

TEXAS WOOL: Production and Value, 2002-2006

| Item | | 2002 | 2003 | 2004 | 2005 | 2006 |
|---------------------------------|---------------|-------|-------|-------|-------|-------|
| Sheep shorn ^{1/} | 1,000 head | 850 | 800 | 810 | 800 | 700 |
| Weight per fleece | Pounds | 7.0 | 7.0 | 6.9 | 6.9 | 7.0 |
| Total wool production | 1,000 pounds | 5,950 | 5,600 | 5,600 | 5,550 | 4,900 |
| Price per pound | Dollars | .68 | .90 | 1.02 | .96 | .91 |
| Total value | 1,000 dollars | 4,046 | 5,040 | 5,712 | 5,328 | 4,459 |

^{1/} Includes shearing at commercial feed yards; sheep and lambs shorn both spring and fall are counted only once.

TEXAS SHEEP AND LAMBS: Production and Income, 2002-2006

| Item | | 2002 | 2003 | 2005 | 2005 | 2006 |
|-----------------------------|---------------|--------|--------|--------|--------|--------|
| Production ^{1/} | 1,000 pounds | 48,860 | 61,867 | 51,626 | 56,455 | 51,199 |
| Marketings ^{2/} | 1,000 pounds | 71,150 | 58,170 | 61,760 | 58,330 | 55,700 |
| Price per 100 pounds: | | | | | | |
| Sheep | Dollars | 35.30 | 39.60 | 43.40 | 52.10 | 37.10 |
| Lambs | Dollars | 75.90 | 97.10 | 110.00 | 113.00 | 92.40 |
| Cash receipts ^{3/} | 1,000 dollars | 44,766 | 50,428 | 57,893 | 60,133 | 43,559 |
| Value of home consumption | 1,000 dollars | 197 | 259 | 336 | 328 | 234 |
| Gross income | 1,000 dollars | 44,963 | 50,687 | 58,229 | 60,461 | 43,793 |

^{1/} Adjustments made for inshipments and changes in inventory. ^{2/} Excludes custom slaughter for use on farms where produced and interfarm sales.

^{3/} Includes receipts from marketings and sales of farm slaughter.

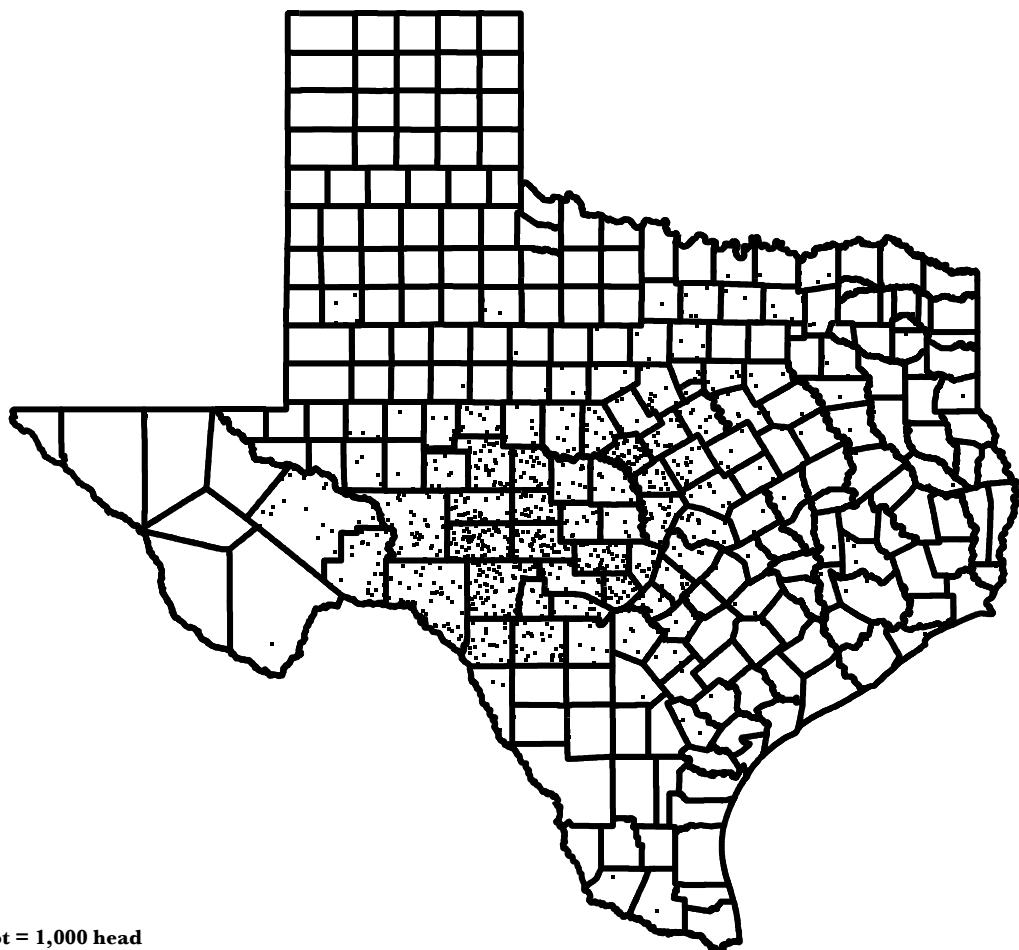

TEXAS SHEEP AND LAMBS: Inventory, Lamb Crop and Losses, 2002-2006

| Item | | 2002 | 2003 | 2004 | 2005 | 2006 |
|--|--|-------|-------|-------|-------|-------|
| <u>1,000 head</u> | | | | | | |
| January 1 Inventory: | | | | | | |
| All sheep and lambs | | 1,130 | 1,040 | 1,100 | 1,070 | 1,090 |
| Lamb crop ^{1/} | | 540 | 520 | 520 | 560 | 520 |
| Total Losses: | | | | | | |
| Sheep | | 39 | 40 | 41 | 41 | 46 |
| Lambs (after marking, docking or branding) | | 50 | 45 | 58 | 68 | 70 |
| Predators ^{2/}: | | | | | | |
| Sheep | | 14 | 18 | 20 | 21 | 22 |
| Lambs (after marking, docking or branding) | | 34 | 31 | 43 | 48 | 48 |
| All other causes ^{3/}: | | | | | | |
| Sheep | | 25 | 22 | 21 | 20 | 24 |
| Lambs (after marking, docking or branding) | | 16 | 14 | 15 | 20 | 22 |

^{1/} Lambs marked, docked or branded includes lambs born during the period January 1 through December 31. ^{2/} Includes ravens, vultures, wolves, pigs and other animals. ^{3/} Includes diseases, weather, theft and unknown.

^{1/}Totals may not add due to rounding. ^{2/}Data from federally inspected slaughter plants.

**TEXAS COMMERCIAL LIVESTOCK SLAUGHTER:
Live Weight and Red Meat Production, 2002-2006**

| Year | Total live weight ^{1/} | | | | Total red meat production ^{2/} |
|---------------------|---------------------------------|--------|-----------------|---------|---|
| | Cattle | Calves | Sheep and lambs | Hogs | |
| <i>1,000 pounds</i> | | | | | |
| 2002 | 7,675,296 | 8,863 | 42,692 | 121,127 | 4,880,000 |
| 2003 | 7,671,294 | 12,424 | 48,998 | 114,550 | 4,845,400 |
| 2004 | 7,342,725 | 8,159 | 36,665 | 97,575 | 4,608,900 |
| 2005 | 7,482,947 | 5,802 | 8,457 | 98,564 | 4,686,900 |
| 2006 | 7,816,688 | 5,969 | 7,694 | 96,548 | 4,926,900 |

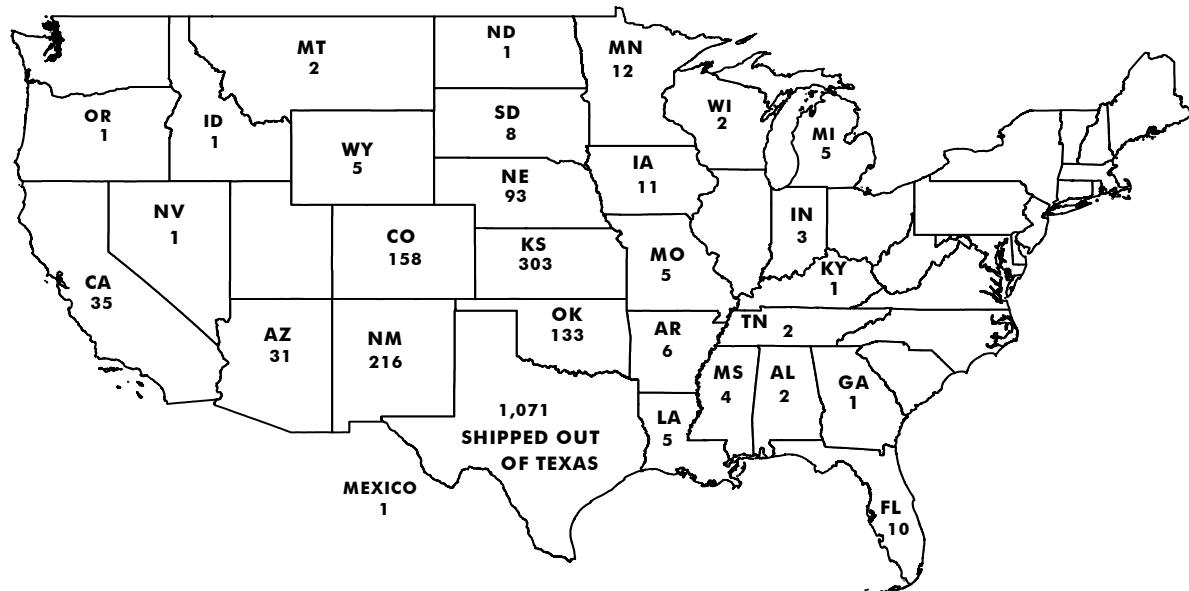

^{1/}Includes slaughter in federally inspected and in other slaughter plants, but excludes animals slaughtered on farms. ^{2/}Includes total beef, veal, pork, lamb and mutton; excludes farm slaughter.

CATTLE AND CALVES: Movement Out of and Into Texas on Health Certificates, 2006 ^{1/}

Texas Animal Health Commission (TAHC) and U.S. Department of Agriculture/Animal and Plant Health Inspection Service/Veterinary Services (USDA/APHIS/VS) tabulate head counts from health certificates. These tabulations include truck and rail movements out of and into Texas. Under Texas law, all livestock must have a health certificate unless consigned to a state or federally inspected slaughtering establishment or specifically approved livestock market.

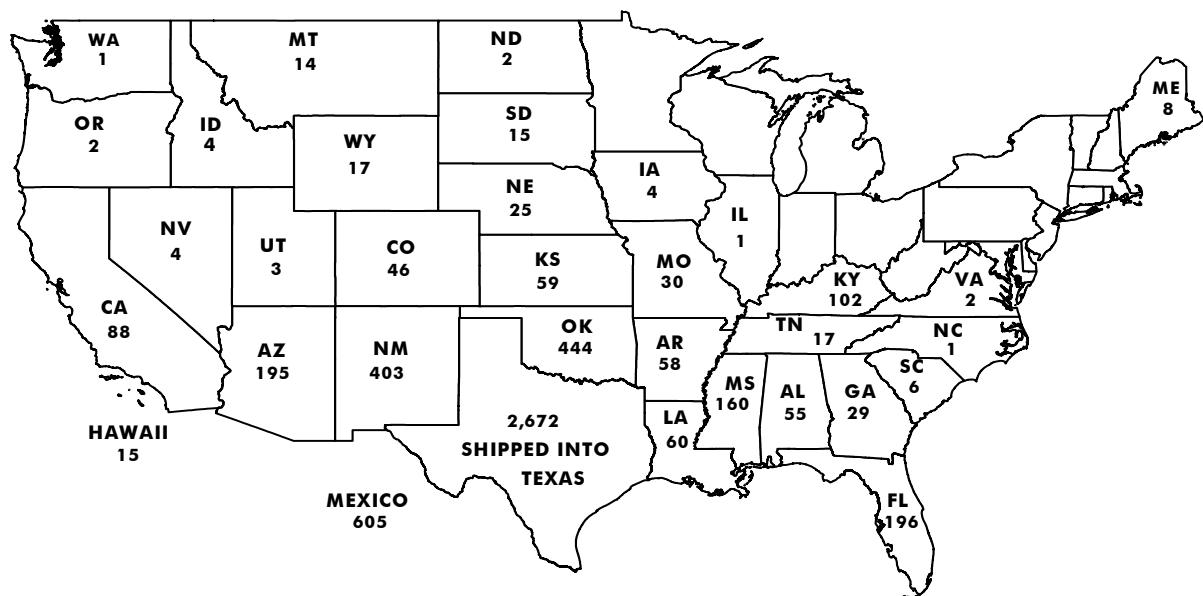

OUTSHIPMENTS (1,000 Head)

Destination of cattle and calves as designated on health certificates tabulated by TAHC and USDA/APHIS/VS, 2006. Data include animals designated for slaughter and reflect movement to other states and countries, including Mexico. States receiving less than 500 head are not shown.

INSHIPMENTS (1,000 Head)

Origin of cattle and calves as designated on health certificates tabulated by TAHC and USDA/APHIS/VS, 2006. Data exclude animals designated for slaughter and reflect movement from other states and countries, including Mexico. States sending less than 500 head are not shown.

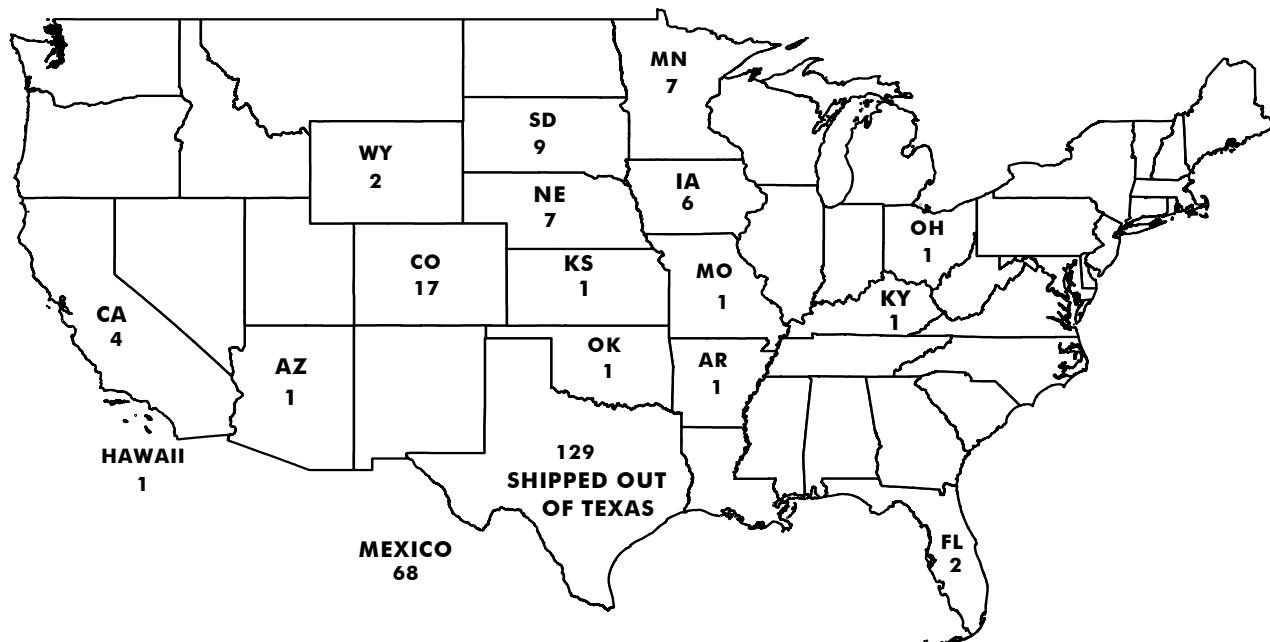

^{1/} Cattle tabulations do not include dairy cattle.

SHEEP AND LAMBS: Movement Out of and Into Texas on Health Certificates and Sheep Scabies Inspection Certificates, 2006

Texas Animal Health Commission (TAHC) and U.S. Department of Agriculture/Animal and Plant Health Inspection Service/Veterinary Services (USDA/APHIS/VS) tabulate health certificates and sheep scabies inspection certificates. These tabulations include truck and rail movements out of and into Texas. Under Texas law, all livestock must have a health certificate unless consigned to a state or federally inspected slaughtering establishment or specifically approved auction market.

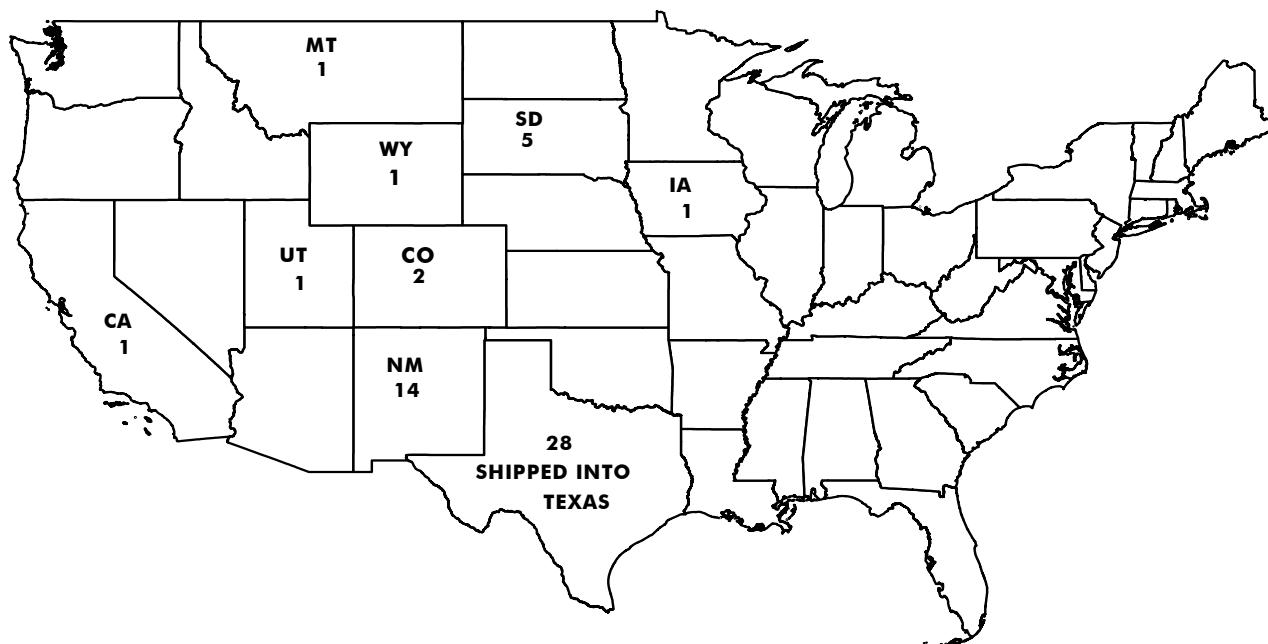

OUTSHIPMENTS (1,000 Head)

Destination of sheep and lambs shipped out of Texas (truck and rail) as designated on health certificates or sheep scabies inspection certificates tabulated by TAHC and USDA/APHIS/VS, 2006. Data include animals designated for slaughter and reflect movement to other states and countries, including Mexico. States receiving less than 500 head are not shown.

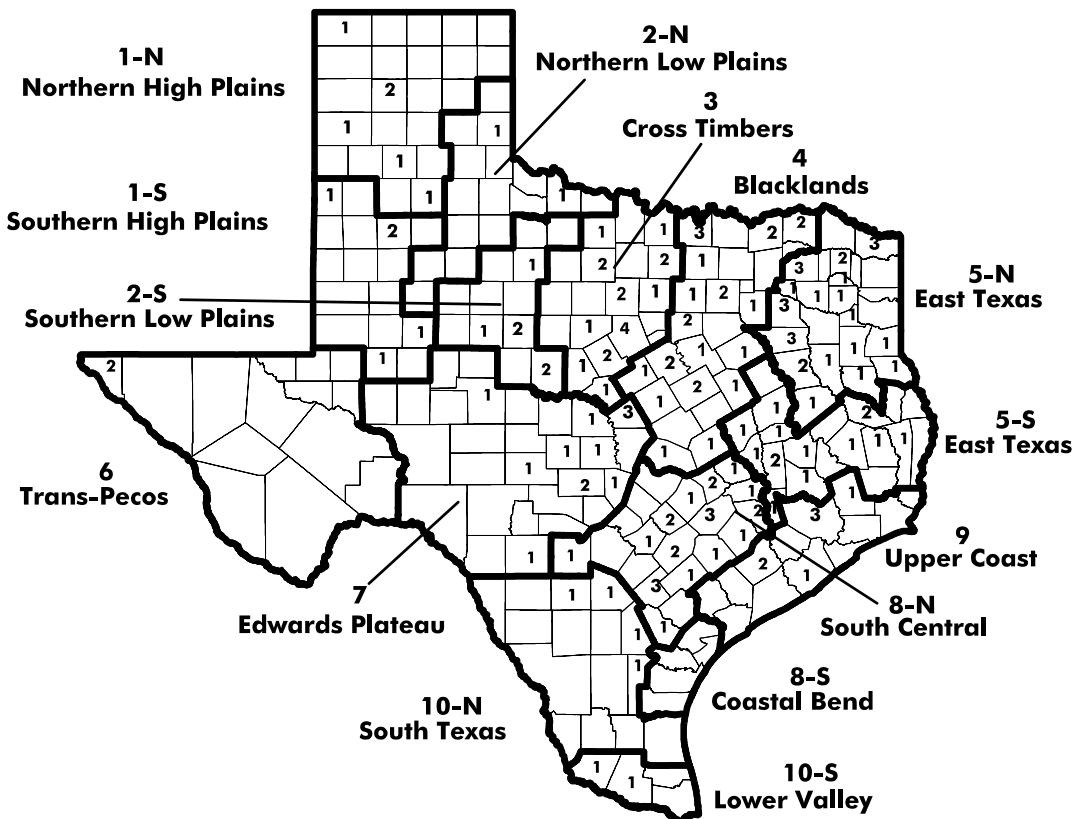

INSHIPMENTS (1,000 Head)

Origin of sheep and lambs shipped into Texas (truck and rail) as designated on health certificates or sheep scabies inspection certificates tabulated by TAHC and USDA/APHIS/VS, 2006. Data exclude animals designated for slaughter and reflect movement from other states only. States sending less than 500 head are not shown.

TEXAS LIVESTOCK AUCTION MARKETS

There are 154 state inspected livestock auctions in Texas. The map below shows the distribution of state inspected auctions as of December, 2006. Counts of livestock are taken from inspection receipts filed by auction inspectors of the Texas Animal Health Commission (TAHC). Monthly tabulations are available through the cooperation of the TAHC.

Vegetables, Fruit and Pecans

Texas Vegetable, Fruit and Pecan Summary

Vegetables

Texas continued to be one of the five leading states in production of fresh market vegetables. In 2006, the State ranked fifth in production, with 3.6 percent of the U.S. total. Texas producers harvested 85,100 acres of commercial fresh and processed vegetables, down 3.2 percent from the year before. The value of production from this acreage totaled \$378 million, up 2 percent from 2005. Production of fresh and processed vegetables, at 18.7 million cwt, increased 1.5 percent from 2005. The top three vegetable cash crops were tomatoes, head lettuce and onions.

Citrus

Texas grapefruit production for the 2006-2007 season totaled 7.1 million boxes, up 37 percent from the previous season. The 2006-2007 all orange production totaled 1.98 million boxes, up 24 percent from the previous season.

Pecans

The 2006 Texas pecan crop was estimated at 47 million pounds, down 18 million pounds from the 2005 crop. Prices increased from the previous year, averaging \$1.60 per pound. Production of native varieties totaled 14 million pounds, down 1 million from the 15 million pounds produced in 2005. Production of improved varieties totaled 33 million pounds, down from 50 million pounds in 2005. The year 2006 was a cyclical lighter production year.

Peaches

Texas utilized peach production for 2006 was estimated at 750 tons, down from 8,350 tons in 2005. Utilized production is the total of peach sales for fresh market and processing, as well as peaches consumed on the farm. Total production for Texas peaches in 2006 was 1,590 tons, down from 8,750 tons in 2005. Production decreased because of the second year of severe drought, lack of chilling hours over the winter, hail storms and insect damage reduced the size of the fruit or killed the peach trees.

Grapes

Texas only utilized 3,200 tons of grapes in 2006, a 63 percent decrease from the previous season. An estimated 2,900 bearing acres were available for harvest, the same as 2005. Yield averaged 2.45 tons per acre, a decrease from 3.3 tons the previous year. The total estimated value of the 2006 crop was \$3.8 million with an average value per ton of \$1,200. Weather conditions were unfavorable for grape producers in the state. The major contributing factor in this year's decrease in production was the winter freeze. Along with the severely damaging effects of this winter freeze, many producers also lost the majority of their grapes due to drought and hail damage. Some producers reported that they received two different hail storms.

STATE RANKING BY PRODUCTION FOR SELECTED VEGETABLE CROPS, 2006
