Notes:

Crude oil and natural gas figures are net taxable values. Gasoline gallons include gasohol. Auto sale values are calculated from motor vehicle taxes collected on new and used vehicle sales. All figures are not seasonally adjusted, except for industrial production, leading indicators and employment/unemployment, Figures are based on the most recent available data. Annual figures are for calendar years. [‡ Double axis graphs: Graphs with two vertical axes show values for Texas on the left and values for the U.S. on the right. This method shows trends more clearly over the last year when data values are substantially different at state and national levels.]
