Road and highway infrastructure is reported on the modified basis. Assets are depreciated over the estimated useful life of the asset using the straight-line method.

All capital assets acquired by proprietary funds or trust funds are reported at cost or estimated historical cost, if actual historical cost is not available. Donated assets are reported at fair value on the acquisition dated. Depreciation is charged to operations over the estimated useful life of each asset, using the straight-line method.

#### **Other Receivables – Current and Noncurrent**

The disaggregation of other receivables as reported in the financial statements is shown in Note 24, "Disaggregation of Receivables and Payables Balances."

## LIABILITIES

#### Accounts Payable

Accounts Payable represents the liability for the value of assets or services received at the balance sheet date for which payment is pending.

#### **Other Payables – Current and Noncurrent**

The disaggregation of other payables are reported in the financial statements is shown in Note 24, "Disaggregation of Receivables and Payables Balances."

#### Employees' Compensable Leave Balances

Employees' compensable leave balances represent the liability that becomes "due" upon the occurrence of relevant events such as resignations, retirements, and uses of leave balances by covered employees. Liabilities are reported separately as either current or non-current in the statement of net assets. These obligations are normally paid from the same funding source from which each employee's salary or wage compensation was paid.

#### Capital Lease Obligations

Capital lease obligations represent the liability for future lease payments under capital lease contracts contingent upon the appropriation of funding by the Legislature.

Liabilities are reported separately as either current or non-current in the statement of net assets.

#### **Bonds Payable – General Obligation Bonds**

General obligation bonds are accounted for in the long-term liabilities adjustment column for governmental activities and in proprietary funds for business-type activities. These payables are reported as long-term liabilities (current for amounts due within one year) and long-term liabilities (noncurrent for amounts due thereafter in the statement of net assets/balance sheet). The bonds are reported at par, net of unamortized premiums, discounts, issuance costs and gains/(losses) on bond refunding activities.

For governmental activities, bond proceeds are accounted for (when received) as an "other financing source" in the governmental fund receiving the proceeds. Payment of principal and interest is an expenditure recorded in the debt service fund. All bond transactions and balances for business-type activities are reported in proprietary funds. (If the agency issues deep discount bonds the following disclosure is needed):

Deep discount bonds (zero coupon, capital appreciation or compound interst bonds) do not pay interest until the maturity of related principal. Bonds are initially reported at the "discounted" value. Accretion (the difference between the discounted value and the par [maturity] value of the bonds payable) is amortized and the discounted bond value equals par value. Annual accretion amortized is recognized as an addition to bonds payable. (For governmental activities only, there is an operating statement effect in the first and last year of the bonds, none in the interim years.)

#### **Bonds Payable – Revenue Bonds**

Revenue bonds are accounted for in proprietary funds for business-type activities and in the long-term liabilities adjustment column for governmental activities. These payable are reported as long-term liabilities (current for amounts due within one year) and longterm liabilities (noncurrent for amounts due thereafter in the statement of net assets/balance sheet). These bonds are reported at par, net of unamortized premiums, discounts, issuance costs and gains/(losses) on bond refunding activities.

For governmental activities, bond proceeds are accounted for (when received) as an "other financing source" in the governmental fund receiving proceeds. Payment of principal and interest is an expenditure recorded in the debt service fund. All bond transactions and balances for business-type activities are reported in proprietary funds. (If the agency issues deep discount bonds the disclosure cited for general obligation bonds is needed.)

#### **FUND BALANCE/NET ASSETS**

The difference between fund assets and liabilities is 'net assets' on the government-wide, proprietary and fiduciary fund statements, and the 'fund balance' is the difference between fund assets and liabilities on the governmental fund statements.

#### **Reservations of Fund Balance**

Fund balances for governmental funds are classified as either reserved or unreserved in the fund financial statements. Reservations are legally restricted to a specific future use or not available for expenditure.

#### **Reserved** for Encumbrances

This represents commitments of the value of contracts awarded or assets ordered prior to year-end but not received as of that date. Encumbrances are not included with expenditures or liabilities. They represent current resources designated for specific expenditures in subsequent operating periods.

#### Unreserved/Undesignated:

Other represents the unappropriated balance at year-end.

#### Invested In Capital Assets, Net Of Related Debt

Invested in capital assets, net of related debt consists of capital assets, net of accumulated depreciation and reduced by outstanding balances for bond, notes, and other debt that are attributed to the acquisition, construction, and improvement of those assets.

#### **Restricted** Net Assets

Restricted net assets result when constraints placed on net asset use are either externally imposed by creditors, grantors, contributors, and the like, or imposed by law through constructional provisions or enabling legislation.

#### **Unrestricted** Net Assets

Unrestricted net assets consist of net assets, which do not met the definition of the two preceding categories. Unrestricted net assets often have constraints on resources, when are imposed by management, but can be removed or modified.

## INTERFUND ACTIVITIES AND BALANCES

The agency has the following types of transactions between funds:

- (1) Transfers: Legally required transfers that are reported when incurred as 'transfers in' by the recipient fund and as 'transfers out' by the disbursing fund.
- (2) Reimbursements: Reimbursements are repayments from funds responsible for expenditures or expenses to funds that made the actual payment. Reimbursements of expenditures made by one fund and another that are recorded as expenditures in the reimbursing fund and as a reduction of expenditures in the reimbursed fund. Reimbursements are not displayed in the financial statements.
- (3) Interfund receivables and payables: Interfund loans are reported as interfund receivables and payables. If repayment is due during the current year or soon thereafter, the blance is classified as "current". Balances for repayment due in two (or more) years are classified as "noncurrent.
- (4) Interfund Sales and Purchases: Charges or collections for services rendered by one fund to another that are recorded as revenues of the recipient fund and expenditures or expenses of the disbursing fund.

The composition of the agency's interfund activities and balances are presented in Note 12.

## Note 2: Capital Assets

Revenue received from the sale of Surplus Property has been transferred to unappropriated general revenue in accordance with HB7, Sec. 20.

## Employees' Compensable Leave

If a state employee has had continuous employment with the state for at least six months, the state employee is entitled to be paid for all unused vacation time accrued in the event of the employee's resignation, dismissal, or separation from state employment. Expenditures for accumulated annual leave balances are recognized in the period paid or taken in governmental fund types. For these fund types, the liability for unpaid benefits is recorded in the statement of net assets. Both an expense and liability for business-type activities are recorded in the proprietary funds as the benefits accrued to employees. No liability is recorded for non-vesting accumulating rights to receive sick pay benefits. This obligation is usually paid from the same funding source(s) from which the employee's salary or wage compensation was paid.
