Acknowledgments

The Texas Uniform Crime Reporting Program has been made possible by a grant from the State of Texas through the Criminal Justice Division of the Governor's Office.

This report on Crime in Texas during 1997 was compiled from data submitted to the Texas Department of Public Safety's Uniform Crime Reporting Section by 928 Texas Sheriffs and Chiefs of Police whose jurisdictions cover 99.9% of Texas' population. This publication is the result of their excellent cooperation.

Special appreciation is extended to the Federal Bureau of Investigation's Uniform Crime Reports Section and to the members of the Crime Records Committees of the Texas Police Association and the Sheriff's Association of Texas for assistance provided to the Texas UCR Program.

THE UCR PROGRAM

THE TEXAS UNIFORM CRIME REPORTING PROGRAM

PURPOSE OF UCR

The objective of the Uniform Crime Reporting program is to produce reliable crime statistics for law enforcement administration, operation, and management. This information is also available as a measure of the fluctuations in the type and volume of crime in Texas. The means utilized to attain these objectives are: to measure the extent, fluctuation, distribution, and nature of crime through the collection of data on the eight serious Crime Index Offenses; to measure the total volume of serious crime known to police; to show the activity and coverage of law enforcement agencies through arrest counts and police employee strength data.

HISTORY OF UCR

The National Program

The Uniform Crime Reporting program of the Federal Bureau of Investigation grew from the need for a national view of law enforcement statistics. In the 1920's, the International Association of Chief's of Police (IACP) formed the Committee on Uniform Crime Records to develop a uniform system of police statistics. The IACP's voluntary national crime collection program began, in 1930, with the participation of 400 police agencies representing some 20 million citizens in 43 states. In that same year, the U.S. Congress authorized the Federal Bureau of Investigation to serve as the national clearinghouse for the crime statistical information collected by the program.

In UCR, crime reports are obtained from law enforcement agencies throughout the nation based on uniform classifications and procedures of reporting. In an effort to provide as complete a picture of crime in the United States as possi-

ble, the Committee on Uniform Crime Records of the IACP chose to obtain data only on offenses that become known to police. A meaningful overview of crime was made available through examination of the seven Crime Index offenses selected for their seriousness, frequency of occurrence and likelihood of being reported: murder, forcible rape, robbery, aggravated assault, burglary, larceny-theft and motor vehicle theft. By mandate of the U.S. Congress, arson became the eighth index offense in 1979.

In the early planning stages of UCR, it was recognized that the differences among state and local criminal codes precluded the possibility of creating a national crime total based upon an aggregate of local statistics. To provide for national uniformity, the IACP adopted standardized definitions of crimes to overcome the problems posed by the variations in state and local definitions of crimes. Reporting agencies were required to interpret local criminal acts in the context of the standard national definitions before submitting their crime totals. Because of the differences among the state codes, there is no possibility in a program, such as UCR, to distinguish between crimes by designations such as 'felony' or 'misdemeanor.'

The Texas Program

On January 1, 1976, the State of Texas adopted the Uniform Crime Report as its official statewide crime report. The Department of Public Safety accepted the responsibility to collect, validate and tabulate UCR reports from all reporting jurisdictions in Texas. To handle this task, the Uniform Crime Reporting Section was established within the Identification and Criminal Records Division (now Crime Records Service) to coordinate the collection, processing and publication of information regarding the extent of major crime in Texas.

METHOD OF DATA COLLECTION

Reporting Procedures

Law enforcement agencies report the number of known index crime offenses from their records of complaints from victims, reports from witnesses and from crimes discovered by the agency during its operations. Reports that are later determined to be unfounded are eliminated from the totals. The resulting number of 'offenses known to law enforcement officials' is reported without regard to whether arrests were made, stolen property recovered or prosecution took place. Agencies report additional information on the value of property stolen and recovered, the circumstances surrounding homicides, family violence, hate crimes, and reports of persons arrested for all crimes. The arrest reports are categorized on the basis of age, sex, race and ethnic origin.

Each contributing agency compiles and submits its own crime reports to the UCR program on a monthly basis. To maintain quality and uniformity in the data received, UCR field representatives provide training on detailed procedures for scoring and classifying offenses.

Verification Procedures

A major concern in the collection of crime statistics is the validity and uniformity of the data received. With the receipt of voluntary monthly reports from 928 jurisdictions, the problem of attaining uniformity is readily apparent. Each incoming report is examined for accuracy and reasonableness through the use of numerous cross-checking procedures. While minor errors are corrected by the UCR report verifiers, unusual variations are brought to the attention of the submitting agency by direct contact of a UCR field representative.

Field Representation

In compliance with national guidelines and in an effort to ensure the accurate reporting of crime information, the Texas Uniform Crime Reporting Program has assigned five persons to assist local agencies in crime reporting procedures. Based in Austin, each field representative is assigned a specific area (see map in Appendix), and is responsible for assisting local police agencies in the resolution of reporting problems, and contacts non-reporting agencies to enlist their participation in the program.

A great deal of the success of Texas' UCR Program has been due to the full-time field staff assigned to assist local agencies in crime reporting procedures. The program's philosophy is that personal contact is invaluable to the accuracy and uniformity of UCR data received. To further this process, a full-time trainer conducts on-site training programs for local agencies.

Offense Estimation

The Texas UCR program enjoys a high rate of participation among Texas' law enforcement jurisdictions. In 1997, 928 Texas Law Enforcement agencies submitted reports to the DPS' UCR Section. The population covered by these agencies represented 99.9 percent of Texas' total population. Because UCR relies upon the voluntary participation of these agencies to give a true picture of the total crime in Texas, it is necessary to estimate the crime totals for the non-reporting agencies. Using the known crime experiences of similar population areas within the state, crime volumes for non-reporting agencies are proportionally estimated. Through this application of standardized estimating procedures, index crime totals are directly comparable between specific years.

ADVISORY GROUPS

The IACP Committee on Uniform Crime Records continues to serve in an advisory capacity to the FBI in the operation of UCR. The National Sheriff's Association, in 1966, established a Committee on Uniform Crime Records to advise the Uniform Crime Reporting Program. This Committee actively encourages full participation in UCR.

Committees on Crime Records within the Texas Police Association and the Sheriff's Association of Texas are active in promoting interest in UCR, fostering widespread use of uniform crime statistics, and lending assistance to contributors when the need exists. The FBI also actively assists in the development of police statistical programs that are compatible with the national system. Nationally, state statistical programs provide the advantage of increased coverage of local law enforcement agencies and, thereby, help to assure the completeness and quality of crime information.

The Texas Uniform Crime Reporting Program is directly made possible by a grant from the State

of Texas through the Criminal Justice Division of the Governor's Office.

ADDITIONAL UCR COLLECTIONS

Family Violence

Violence within Texas families has recently been recognized as a growing threat to the safety of Texans. In an effort to quantify the incidents of abuse occurring within Texas families, the 71st Texas Legislature directed the Department of Public Safety to collect information on family violence incidents. This data collection commenced with calendar year 1991 and is included here in Chapter Five.

Hate Crime Data Collection

Under mandate of state and federal law, in 1992, the Texas UCR program began collecting hate crime information. The Hate Crime Statistics Act of 1990 directed the U.S. Attorney General to collect data, "about crimes that manifest evidence of prejudice based on race, religion, sexual orientation, or ethnicity."

Shortly after passage of the national law, the Texas Legislature amended the Texas Government Code to require the Department of Public Safety to, "Establish and maintain a central repository for the collection and analysis of information relating to crimes that are motivated by prejudice, hatred, or advocacy of violence." The passage of this law impacted every law enforcement agency in Texas through the requirement that, "Local law enforcement agencies shall report offenses described by Subsection (a) in the form and manner and at regular intervals as prescribed by rules adopted by the department." The results of this effort are illustrated in Chapter Six.

Campus Crime

In 1990, the federal Crime Awareness and Campus Security Act was enacted into law. The act requires eligible educational institutions to maintain certain crime and arrest data in accordance with UCR definitions. Index Crime reports from Texas campus police departments are available in Chapter Nine of this report.

Incident Based Reporting

Since its inception, the UCR program has provided a steady, reliable stream of information

about crime in this nation. However, because UCR is a summary-based-reporting system, data about individual crime incidents are not available. The summary-based methodology, despite its reliability, is limited in many aspects in the current age of information-processing speed. Limitations of the summary system include a lack of information on offenses, arrests, and victim/offender relationships.

To take advantage of current information technology capabilities, the FBI, in conjunction with the National UCR Conference, undertook a major enhancement of the UCR program. The resulting *Blueprint for the Future of the Uniform Crime Reporting Program: Final Report of the UCR Study*, released in 1985, outlined the emerging Incident Based Reporting (IBR) system. With its implementation, IBR will collect data on the circumstances of each crime incident in electronic form. The full detail allowed by computerized data base searches of IBR data will greatly enhance the speed, availability, accuracy, and usefulness of crime statistics.

The Texas Incident Based Reporting System (TIBRS) includes all national data elements as well as Texas-specific data. Although still many years from full implementation, the TIBRS is now beginning to collect some information that will become available in the future.

CRIME FACTORS

Statistics gathered under the Uniform Crime Reporting Program are submitted by the law enforcement agencies of Texas and are used to project a statewide picture of crime. Awareness of factors which influence the resulting crime statistics is necessary in order to draw fair conclusions. As these crime factors influence the crime experience of each community, comparisons of crime statistics between communities should not be made without consideration of the individual factors present.

Crime is a social problem of grave concern in which the police are limited in their role of suppression and detection. As stated by the President's Commission on Law Enforcement and Administration of Criminal Justice,

The fact that the police deal daily with crime does not mean that they have unlimited power to prevent it, or reduce it, or deter it. The police did not create and

cannot resolve the social conditions that stimulate crime... They do not enact the laws that they are required to enforce, nor do they dispose of the criminals they arrest. The police are only one part of the government; and the government is only one part of society. The criminal process is limited to case by case operations, one criminal or one crime at a time.

Set forth below are some of the conditions which affect the crime types and volume that occur in differing jurisdictions:

- Crime reporting practices of the citizenry.
- Public attitudes toward law enforcement and crime.
- The size, density and demographic composition of a jurisdiction's population.
- Economic status of the population and area unemployment rates.
- Population stability including the number of commuters, transients, and seasonal population variations.
- Climate.
- Cultural conditions, such as educational, recreational, and religious characteristics.
- Community family values.
- Law enforcement employment standards and relative strength.
- Policies of the prosecuting officials and the courts.
- The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.

TEXAS CRIME
ANALYSIS

TEXAS CRIME ANALYSIS 2

CRIME MEASUREMENTS

Crime affects every Texan in some fashion. To gain a measurement of crime trends, Texas participates in the Uniform Crime Reporting (UCR) program. UCR makes possible the analysis of crime trends primarily through the Crime Index.

The Crime Index

To track the variations in crime, the UCR data collection program uses a statistical summary tool referred to as the Crime Index. Rather than collecting reports of all crimes that were committed in a particular year, UCR collects the reports of seven index crimes. The crimes in this group are all serious, either by their very nature or because of the frequency with which they occur, and present a common enforcement problem to police agencies. Crimes within this index can be further categorized as violent crimes, which include murder, forcible rape, robbery and aggravated assault, or as property crimes, which consist of burglary, larceny-theft,

and motor vehicle theft. By reducing the overall occurrence of crime to this Crime Index, the annual comparison of crime trends is simplified. Although arson is an index crime in that the number of reported offenses are collected, arson is not a part of the Crime Index.

Offense Estimation

Because a few Texas law enforcement agencies experienced difficulty in finalizing their 1997 crime reports prior to state and national release deadlines, it has been necessary to estimate the number of offenses for 0.1% of the state's population. As the methodology for this estimation process has remained the same throughout the Texas UCR program, it is possible to compare crime trends from year to year without the results being skewed by changes in the number of reporting agencies. No attempt, however, is made to estimate for unreported or under-reported crimes. A full discussion of reporting practices and other factors affecting crime trends can be found in Chapter One's section on Crime Factors.

CRIME TRENDS

Texas crime trends are analyzed using two separate methods: crime volume and crime rates. Crime volume is merely the aggregate sum of the Crime Index. By comparing the crime volume from year to year, trends in the number of crimes committed can be studied. Crime rates, however, are compiled to compensate for changes in the size of Texas' population and to show the number of people affected by crime in a given population. Texas crime rates are generally expressed as the number of crimes per 100,000 residents.

Crime Volume

During calendar year 1997, there was an estimated total of 1,064,914 index offenses in Texas. The crime volume decreased 2.5 percent when compared to 1996.

In addition to the above offenses, there were 8,786 cases of arson reported which represented a decrease of 13.1 percent from 1996.

Annual Crime Trends

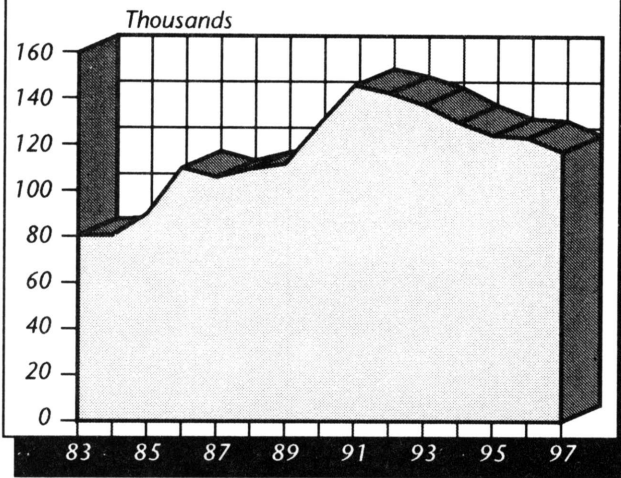

Monthly crime variations show that, in general, crime occurrences peak in the summer month of July. Individual crime trend graphs are located in the section on each index crime.

TYPE OF CRIME

Crime analysis generally looks at the two categories of crime discussed above: Violent crimes (or crimes against persons) and property crimes. In 1997, 11 percent of the Crime Index was made up of violent crimes and 89 percent were property crimes.

Violent Crime Offenses 1983 - 1997

Violent Crimes

Violent crimes involve the element of personal confrontation between the perpetrator and the victim. Because of their nature, violent crimes are considered to be more serious than property crimes. An estimated 117,087 violent crimes occurred during 1997—a 5 percent decrease from 1996. The 1997 violent crime rate was 602.3 crimes per 100,000 Texans—a 6.5 percent decline from the rate posted in 1996.

Violent Crime by Offense

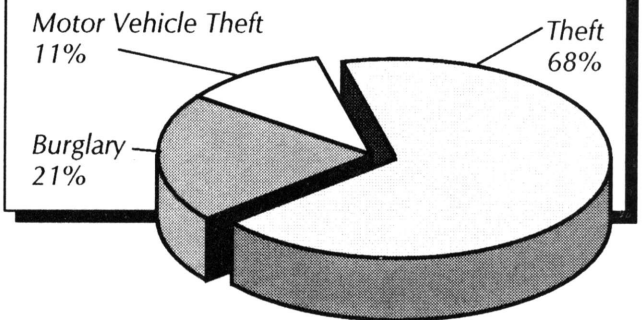

Property Crimes

The number of property crimes occurring during 1997 was estimated at 947,827. Property crimes decreased 2.2 percent from 1996. Burglary accounted for 21 percent of all property offenses, larceny-theft accounted for 68 percent, and motor vehicle theft accounted for 11 percent. The 1997 property crime rate was 4,875.9 crimes per 100,000 Texans—a decrease of 3.7 percent when compared to the rate for 1996.

CLEARANCES

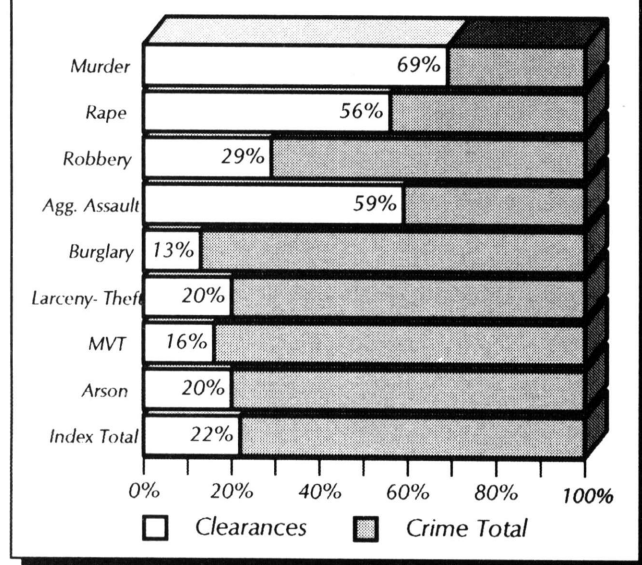

For Uniform Crime Reporting purposes, an offense is cleared when a law enforcement agency has identified the offender, there is enough evidence to charge him, and he is actually taken into custody. The arrest of one person can clear several crimes or several persons may be arrested in the process of clearing one offense. Clearances are also recorded in exceptional circumstances when some element beyond law enforcement control precludes formal charges against the offender.

Law enforcement officers cleared 22 percent of all index offenses reported to them in 1997, by arrest or exceptional means. Of the violent crimes reported, 51 percent were cleared while 18 percent of all property crimes were cleared.

The relatively high clearance rate for violent crimes compared to the non-violent property crimes is, in part, attributable to the element of confrontation between the victim and the perpetrator which contributes to identification of the offender.

In 1997, persons under the age of 18 represented 19 percent of all cases solved—they accounted for 11 percent of all violent crime clearances and 22 percent of property crimes. The involvement rate of persons under 18 years of age was 6 percent for murders, 10 percent for forcible rape, 14 percent for robbery, and 11 percent for aggravated assault. In the non-violent crime categories, this age group accounted for 19 percent of the solved burglaries, 23 percent of the thefts, and 18 percent of the motor vehicle thefts.

TEXAS CRIME CLOCK, 1997

Note: As the most aggregate representation of UCR data, the Crime Clock should be viewed with care. The Crime Clock conveys the relative frequency of Index Crimes. This display does not imply any regularity in the commission of crimes, but rather, the clock represents the annual ratio of crimes to fixed time intervals.

ESTIMATED CRIME IN TEXAS

The offenses in this chart were compiled from reports submitted to the UCR program by Texas law enforcement agencies. Because reporting compliance has varied, it has been necessary to estimate offenses for non-reporting jurisdictions. The reporting compliance for 1997 reporting agencies covered 99.9% of Texas' inhabitants. Previous editions of *Crime in Texas* have estimated crime in non-reporting jurisdictions based on an average of the reporting agencies in the same population group or by projecting annual totals from agency reports that cover less than 12 months. This same logic is followed here. The term 'Rate' refers to the number of crimes per 100,000 population.

- There were an estimated 77,239 aggravated assaults. Of these, 22 percent were committed by the use of hands, fists, and feet.
- Residential burglaries accounted for 68 percent of all burglaries reported.
- The estimated number of motor vehicle thefts were 101,687, for a total dollar loss of \$658,083,771.
- Three law enforcement officers were feloniously killed in the line of duty. Six were killed in duty related accidents.
- There were 5,072 assaults on officers reported with 94 percent cleared.
- In 1997, there were 331 hate crime incidents reported with 361 victims, 420 offenders and 360 offenses.
- Family violence incidents totaled 181,773 during 1997. There were 195,670 victims and 192,419 offenders.

INDEX CRIME

ANALYSIS

INDEX CRIME ANALYSIS

3

MURDER

DEFINITION

Murder and nonnegligent manslaughter, as defined in the UCR program, is the willful killing of one human being by another.

This offense category includes any death due to a fight, argument, quarrel, assault or commission of a crime. Attempted murder and assaults with the intent to kill are not counted as murder, but are included in UCR as aggravated assaults. Suicides, accidental deaths, and justifiable homicides are also excluded from the murder classification.

The classification of this offense, as well as for all Index Crimes, is based solely on police investigation and not upon determinations by courts, medical examiners, coroners, juries, or other judicial bodies.

ANALYSIS

Volume

The reported number of murders committed in Texas in 1997 was 1,328. This represented a 10 percent decrease in the number of murders when compared with 1996. More persons were murdered in Texas in August than in any other month, while the fewest were killed during October. Property loss during the commission of the crime of murder amounted to \$262,135.

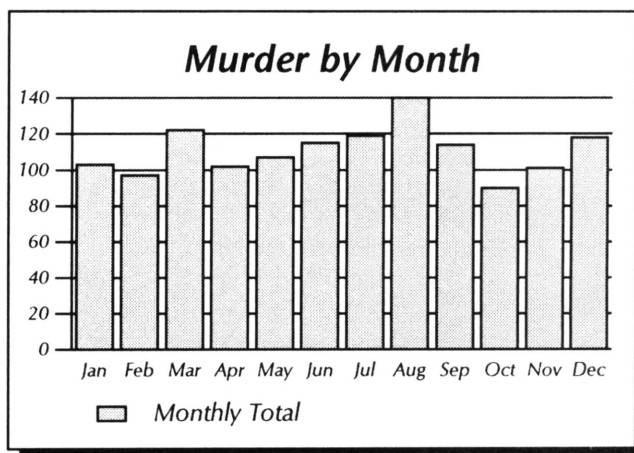

Rate

The murder rate for Texas in 1997 was 6.8 murders for every 100,000 persons. The change in the murder rate from 1996 was a decrease of 11.7 percent.

Clearance Rate

Texas law enforcement agencies continue to be successful in solving a greater percentage of

murders than any other Index Crime. In 1997, 69 percent of all murders were cleared by arrest or exceptional means.

Nature

Of the murders committed in 1997, 67 percent were rendered by the use of firearms. Knives or cutting instruments were the means of murder in 14 percent of the reported cases. The use of strong-arm weapons (hands, feet and fists) accounted for 6 percent of the murders. Blunt

objects were employed in 5 percent of the murders and in the remaining 8 percent, the murder weapon of choice was listed as unknown or other.

Of the murders in which firearms were the instrument, handguns accounted for 73 percent of the weapons (or 49 percent of all murders). Shotguns were the murder means in 8 percent of the firearm murders, rifles were used in 7 percent and firearms whose type was not stated accounted for the remaining 12 percent.

Persons Arrested

When compared to 1996 statistics, the number of persons arrested for the crime of murder in Texas decreased 20 percent. Of the persons arrested for murder, 91 percent were male; 9 per-

cent were age 16 and under (by contrast, in 1983 juveniles accounted for 7 percent of murder arrestees); 65 percent were White; 35 percent were Black; 63 percent were not hispanic; and 37 percent were hispanic.

Justifiable Homicide

Statistics on murder circumstances, victims, and victim/offender relationships on these pages include justifiable homicides. Justifiable homicide is the intentional killing of person without evil design and under such circumstances of necessity or duty as to render the act proper. In 1997 there were 65 justifiable homicides, of which, 43 were felons killed by private citizens, and 22 were felons killed by police.

Murder Circumstances

Supplementary homicide information on murder circumstances is collected in two broad categories: felony type and non-felony type. While, in Texas, all murders are felonies, felony type circumstances refer to murders which occur in conjunction with the commission of another crime. Non-felony circumstances are murders that do not occur during the commission of another crime.

MURDER VICTIMS

Law enforcement agencies participating in UCR provide additional homicide information so that an in-depth analysis of murder is possible. Through the Supplemental Homicide Reporting system, information is provided that identifies the age, sex, race and ethnic origin of both victims and offenders; the relationship of the victim to the offender; the murder weapon; and the circumstances of the offense.

Based on the information about murder victims it can be determined that 77 percent of murder victims, in 1997, were male and 23 percent were female. The age group with the greatest number of murder victims for both males and females is the 20 to 24 age group.

RAPE

DEFINITION

Rape, as defined in the Uniform Crime Reporting program, is the carnal knowledge of a female forcibly and against her will. Statistics reported in this crime category include assaults to commit forcible rape, however, statutory rape (rape against a female under the age of consent) and sexual assaults on males are excluded.

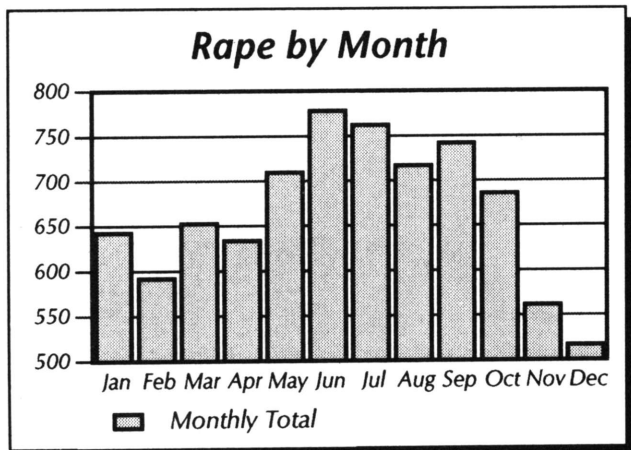

ANALYSIS

Volume

The estimated number of rapes committed in Texas in 1997 was 8,007. This represented a decrease of 44 percent in the number of rapes when compared with 1996. More rapes were committed in Texas in June than in any other month, while the fewest rapes were committed during December. Property loss during the commission of the crime of rape amounted to \$315,774.

Rate

The rape rate for Texas in 1997 was 41.2 rapes for every 100,000 persons. The rape rate decreased 5.9 percent from 1996.

Clearance Rate

Statewide, Texas law enforcement agencies continue to be successful in clearing or solving by arrest 56 percent of all rapes that were reported. Of the attempts to commit forcible rape, 49 percent were cleared and, of the rapes by force, 57 percent were cleared.

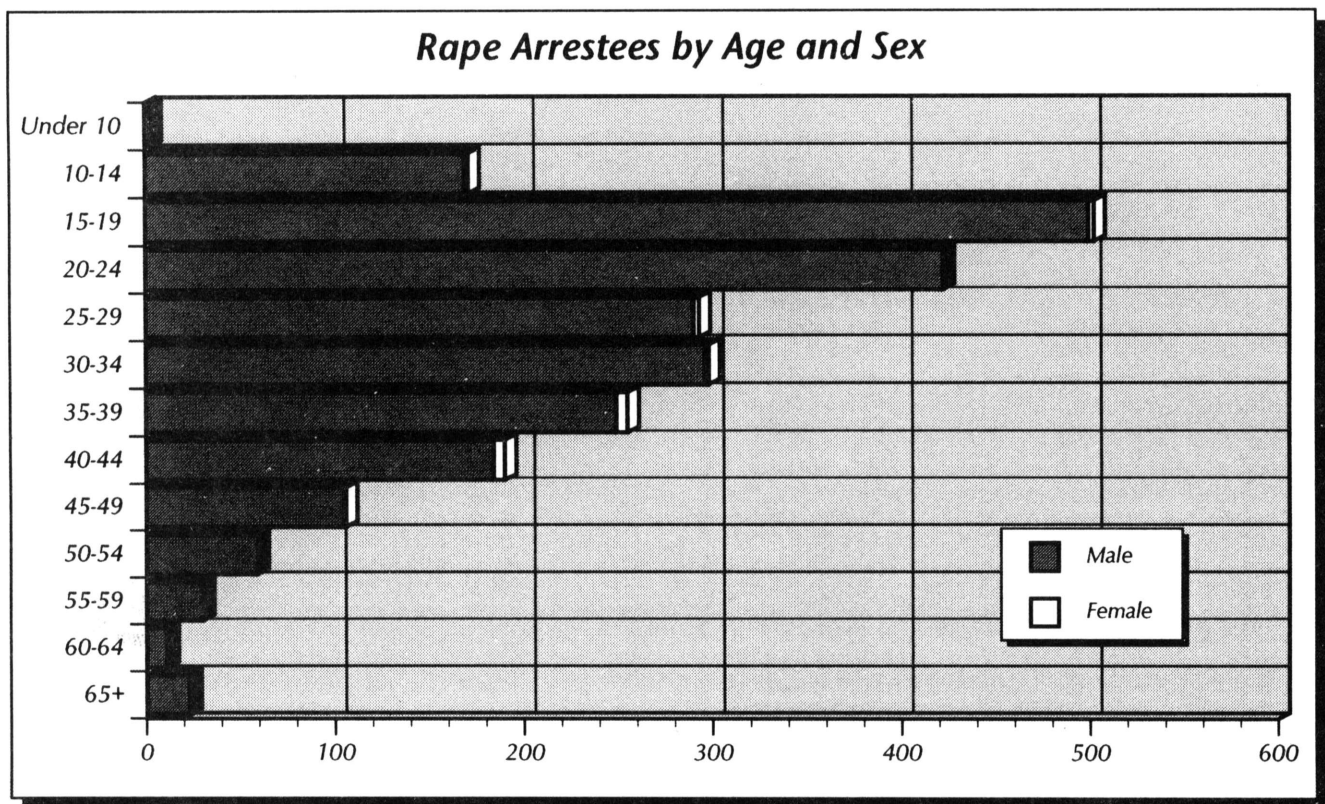

Nature

Forcible rape differs from other violent crimes because, in many cases, the victim is hesitant to report the offense to police. The rigors of court procedures, embarrassment and fear of any accompanying stigma exert a deterrent effect upon the victim's willingness to contact the police. The presence of prior relationship between the victim and offender may make the determination of force difficult to establish, while the usual clandestine nature of this crime presents a problem in verification. As attitudes towards the reporting of rape change, trends in the number of reported offenses can be expected to change correspondingly.

Of all reported forcible rapes during 1997, 13 percent were attempts to commit forcible rape and 87 percent were rapes by force.

Persons Arrested

When compared with 1996, the number of persons arrested for forcible rape decreased 9 percent to 2,361. Of the forcible rape arrestees in 1997, 15 percent were juveniles (16 and under) and the remainder were adults; 99 percent were male; 73 percent were white, 27 percent were black, and the remainder were other races; 67 percent were not hispanic and 33 percent were hispanic. The age group 15 to 19 was the highest group in terms of the number of those arrested. Because, by definition, the crime of rape is limited to the carnal knowledge of a female by a male, the overwhelming majority of persons arrested for this crime are male. The small number of females arrested for rape, 24 persons in 1997, are generally arrested as accomplices.

ROBBERY

DEFINITION

Robbery, in the Uniform Crime Reporting program, is defined as the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force, threat of force or violence, or by putting the victim in fear.

Robbery is a violent crime that frequently results in injury to the victim. Included in this category are assaults to commit robbery and attempted robberies.

ANALYSIS

Volume

The estimated number of robberies committed in Texas in 1997 was 30,513. This represented a 7 percent decrease in the number of robberies when compared with 1996. More robberies were committed in Texas in July than in any other month, while the fewest robberies were committed during the month of April.

Rate

The robbery rate for Texas in 1997 was 157.0 robberies for every 100,000 persons. The change in the rate of robbery from 1996 was a decrease of 8.5 percent.

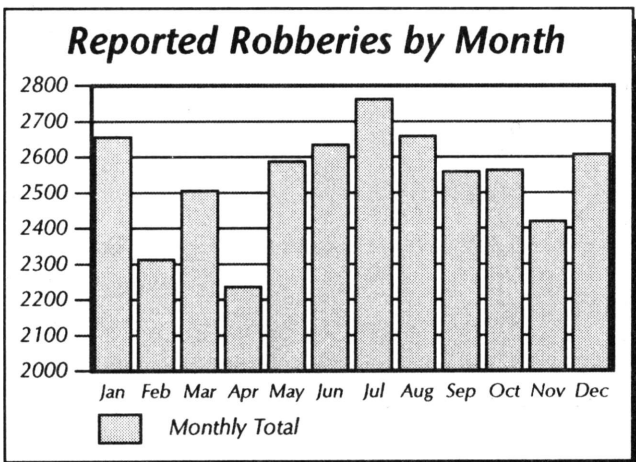

Clearance Rate

Statewide, Texas law enforcement agencies were successful in clearing or solving by arrest 29 percent of all robberies that were reported. Of the robberies by type of weapon used, strong-armed robberies experienced the highest rate of clearance (36 percent), while robbery by firearm was the classification with the lowest rate of clearance (22 percent).

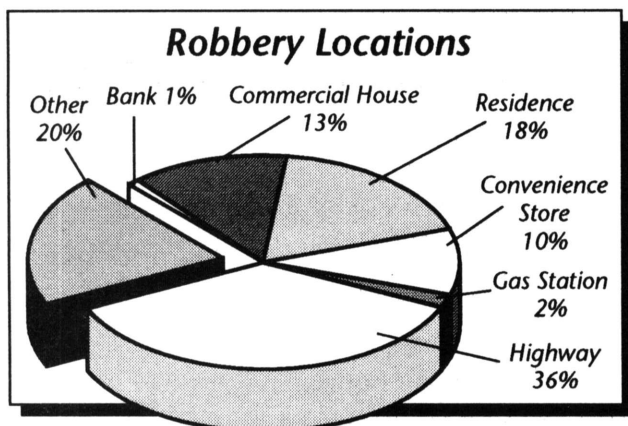

Nature

In 1997, property loss during the commission of robberies amounted to \$40,301,732. The state total was a 4 percent decrease from the property loss experienced in 1996. The value of property stolen during robberies averaged \$1,321 per incident. Average dollar losses ranged from \$696

taken during robberies of convenience stores to \$6,873 per bank robbery. The impact of this violent crime cannot be measured in terms of monetary loss alone. While the object of robbery is money or property, the crime involves force or threat of force and many victims suffer serious personal injury.

Robberies on streets or highways accounted for more than one third (36 percent) of the offenses in this category. Robberies of commercial and financial establishments accounted for 26 percent of the total and robberies occurring at residences, 18 percent. The remainder were miscellaneous types.

Of all reported robberies in 1997, 42 percent were committed with the use of firearms. Strong-arm tactics accounted for 38 percent, knives or cutting instruments were used in 9 percent and other weapons made up the remainder.

Persons Arrested

Statewide arrests for robbery in 1997 amounted to 7,282 persons. When compared with 1996, the number of persons arrested for robbery decreased 8.1 percent. Of the robbery arrestees in 1997, 21 percent were juveniles with the remainder being adults; 89 percent were male; 54 percent, were white; 45 percent, were black; 70 percent were not hispanic and 30 percent were hispanic. The age group reflecting the largest number of robbery arrestees was the 15-to-19-year-old bracket.

AGGRAVATED ASSAULT

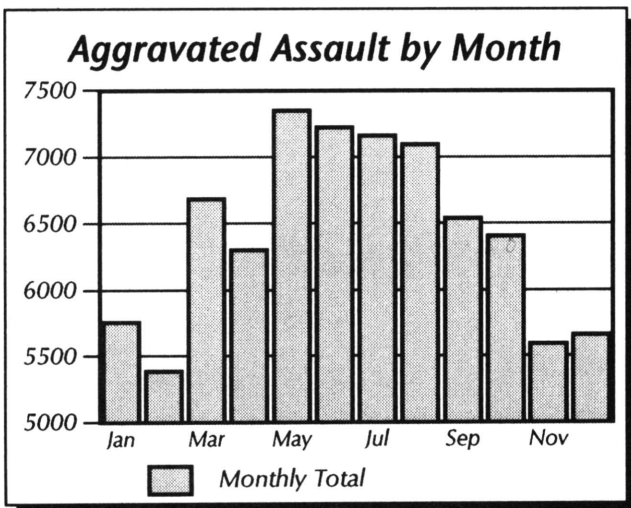

DEFINITION

Aggravated Assault is defined in the Uniform Crime Reporting program as an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Statistics for aggravated assault include attempts to commit aggravated assault.

ANALYSIS

Volume

The estimated number of aggravated assaults committed in Texas, in 1997, was 77,239. This represented a decrease of 4.1 percent in the number of aggravated assaults when compared to 1996. More aggravated assaults were committed in Texas in May than in any other month, while the fewest aggravated assaults were committed during February.

Rate

The aggravated assault rate for Texas in 1997 was 397.3 aggravated assaults for every 100,000 persons. The change in the rate of aggravated assault from 1996 was a decrease of 5.7 percent.

Nature

Of all reported aggravated assaults in 1997, 22 percent were committed with the use of firearms. Other dangerous weapons accounted for 34 percent of the aggravated assaults. Strong-arm weapons (hands, feet, fist, etc.) accounted for 22 percent and knives or cutting instruments made up the remaining 22 percent.

The use or attempted use of a dangerous weapon in an assault or the serious injury inflicted by hands, fists or feet is what separates this index offense from assaults categorized as 'simple assaults'. Texans reported 297,657 simple assaults in 1997.

Clearance Rate

Statewide, Texas law enforcement agencies were successful in clearing or solving by arrest 59 percent of all aggravated assaults that were reported. Of the aggravated assaults by type of weapon used, strong-arm and knife assaults experienced the highest rate of clearance (65 percent), while aggravated assault by firearm showed the lowest rate of clearance (49 percent).

compared with 1996, the number of aggravated assault arrests decreased 5 percent. Of the aggravated assault arrestees in 1997, 14 percent were juveniles (16 and under); 81 percent were male; 71 percent were white; 29 percent were black and the remainder were other races; 33 percent were hispanic and 67 percent were not hispanic. The age group that contributed the highest number of aggravated assault arrestees was the 15-to-19-year-old bracket for both males and females.

Persons Arrested

Texas law enforcement agencies arrested 24,356 persons for aggravated assault in 1997. When

BURGLARY

DEFINITION

Burglary, for Uniform Crime Reporting purposes, is the unlawful entry of a structure with the intent to commit a felony or a theft. While the use of force to gain entry is not required to classify an offense as burglary, attempted forcible entries to commit burglary are counted in this crime's statistics.

ANALYSIS

Volume

The estimated number of burglaries committed in Texas in 1997 was 200,966—this number represents a 1.6 percent decrease when compared with the number of crimes in 1996. More burglaries were committed, in Texas, in July than in any other month. The month with the fewest burglaries was February.

Rate

The 1997 burglary rate for Texas was 1,033.8 burglaries for every 100,000 persons. The change in the burglary rate from 1996 was a decrease of 3.2 percent.

Nature

Of all reported burglaries in 1997, 68 percent occurred at residences. Forcible entry accounted for 64 percent of all burglaries, while 31 percent were unlawful entries without force and the remainder were forcible entry attempts. Offenses, for which the time of occurrence was known, were nearly evenly divided between day and night, but the value lost was greater during the day (55 percent) than at night (45 percent).

Value

In 1997, Texas burglary victims suffered losses totaling \$273,741,487. This total represented a decrease of 1.3 percent when compared to the 1996 total burglary losses. The average dollar loss per burglary was \$1,363. The average loss for residential offenses was \$1,313, while for non-residential property, it was \$1,468.

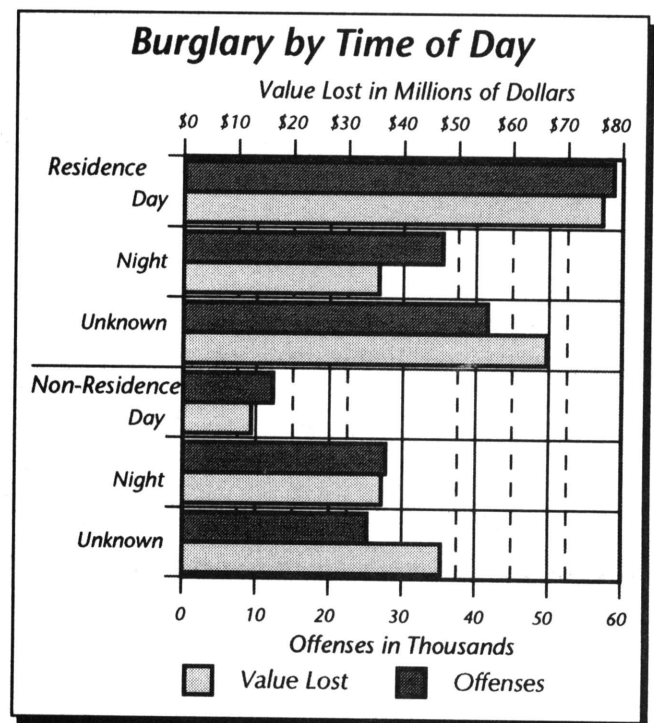

Clearance Rate

Statewide, Texas law enforcement agencies were successful in clearing or solving by arrest 13 percent of all burglaries reported. Burglaries classified as unlawful entry - no force and forcible entry had the highest rate of clearance (14 percent). Attempted forcible entries had the lowest rate of clearance (12 percent).

Persons Arrested

In 1997, 21,762 arrests for burglary were made by Texas law enforcement agencies. When compared to 1996, the number of persons arrested for burglary decreased 5.9 percent. Of the burglary arrestees, 36 percent were juveniles (16 and under) with the remainder being adults; 92 percent were male; 77 percent were white; 23 percent were black and the remainder were other races; 65 percent were not hispanic and 35 percent were hispanic. The age group that contributed the largest number of burglary arrestees was the 15-to-19 year-old group.

LARCENY THEFT

DEFINITION

Larceny-Theft, in the Uniform Crime Reporting program, is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Larceny-Theft includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, and other things of value in which no use of force, violence or fraud occurs.

In the UCR program, this crime classification does not include embezzlement, 'con' games, forgery, and the passing of worthless checks. Motor vehicle theft is not included in this category as it is a separate index crime offense.

ANALYSIS

Volume

The estimated number of thefts committed in Texas in 1997 was 645,174, making this the largest crime category of the Index Crimes. The volume of theft in 1997 decreased 2.2 percent from 1996. More thefts were committed in Texas in July than in any other month, while the fewest thefts

were committed during February. It is reasonable to expect that many offenses in this category, particularly where the value of goods stolen is small, are never reported to police agencies.

Rate

The 1997 theft rate for Texas was 3,319.0 thefts for every 100,000 persons. The change in the theft rate from 1996 was a decrease of 3.7 percent.

Nature

In 1997, theft victims suffered losses totaling \$380,199,660. This total represents an increase of 3.7 percent when compared with 1996 total theft losses. The average dollar loss per theft was \$589, up from \$556 in 1996. Thefts in the 'under \$50' category accounted for 40 percent of all reported thefts (but only 3 percent of the value lost), while thefts of values greater than \$200 accounted for 38 percent of the total (and 91 percent of the total value lost). The remainder of the thefts were between \$50 and \$200—these thefts accounted for 22 percent of the volume (and 6 percent of the value lost).

For data collection, larceny-theft is divided into nine categories: pocket-picking, purse-snatching, shoplifting, thefts from motor vehicles, theft of motor vehicle parts, theft of bicycles, theft from buildings, theft from coin-operated machines, and all other thefts (except motor vehicles). Of the nine theft categories, the highest average theft was thefts from buildings which yielded an average \$875 per reported occurrence. Theft from motor vehicles averaged \$469 per report, while the average purse-snatching resulted in a \$307 loss and the average loss to victims of pocket-picking was \$291. The lowest average value lost to theft was shoplifting with an average of \$112.

Clearance Rate

Statewide, Texas law enforcement agencies were

successful in clearing or solving by arrest 20 percent of all reported thefts. As with other non-violent property crimes, theft is primarily a crime of opportunity. The factors of opportunity and stealth work in the favor of perpetrators and against police detection, thereby reducing available solutions for this offense.

Persons Arrested

Texas law enforcement agencies made 106,183 larceny-theft arrests in 1997. When compared with 1996, the number of persons arrested for theft decreased 4 percent. Of the theft arrestees, 29 percent were juveniles (16 and under); 63 percent were male; 73 percent were white; 26 percent were black; 67 percent were not hispanic and 33 percent were hispanic. The age group with the largest number of theft arrestees was the 15-to-19 year-old group.

MOTOR VEHICLE THEFT

DEFINITION

Motor Vehicle Theft, for UCR purposes, is the theft or attempted theft of a motor vehicle. A motor vehicle is defined as a self-propelled vehicle that travels on the surface but not on rails. Specifically excluded from this category are motor boats, construction equipment, airplanes, and farming equipment.

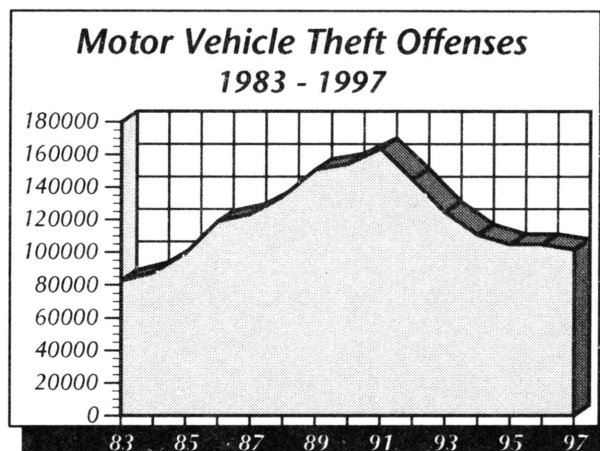

ANALYSIS

Volume

The estimated number of motor vehicle thefts committed in Texas in 1997 was 101,687. The volume of motor vehicle theft decreased 2.2 percent when compared with 1996. More motor vehicle thefts were committed in July than in any other month, while the fewest motor vehicle thefts were committed during February.

Rate

The 1997 motor vehicle theft rate for Texas was 523.1 motor vehicle thefts for every 100,000 persons. The change in the motor vehicle theft rate from 1996 was a decrease of 4.6 percent.

Nature

In 1997 motor vehicle theft victims suffered losses totaling \$658,083,771. This total value loss represents an increase of 3.9 percent when compared to 1996 total motor vehicle theft losses. The average dollar loss per motor vehicle theft was \$6,474, up from \$6,038 in 1996. Of the types of motor vehicles that are reported to be stolen, 66 percent are automobiles, 28 percent are trucks and buses, and the remainder are classed as 'other vehicles.' The 'other vehicles' classification includes all other motor vehicles included in the UCR definition, such as snowmobiles, motorcycles, motor scooters, trail bikes, mopeds, golf carts and the like.

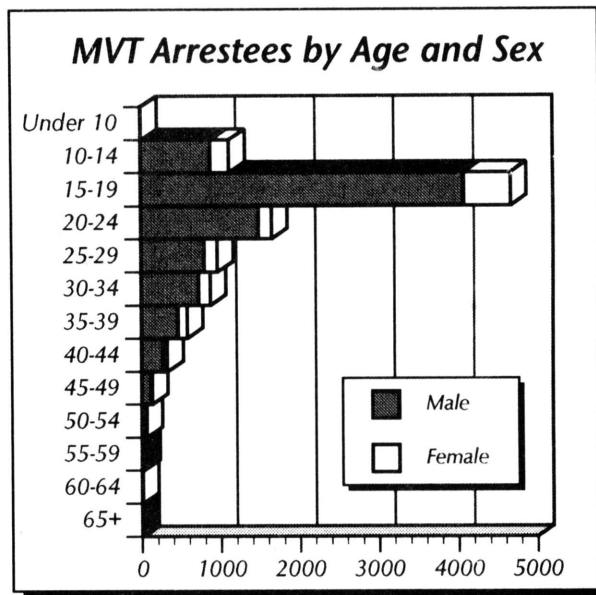

Clearance Rate

Statewide, Texas law enforcement agencies were successful in clearing or solving by arrest 16 percent of all motor vehicle thefts that were reported. Persons under 18 years of age accounted for 18 percent of the motor vehicle thefts that were cleared.

Of the three vehicle types for which information is collected, automobiles show the highest rate of clearance at 17 percent. Thefts of trucks and buses were cleared at a 14 percent rate, and the 'other vehicle' classification shows a 12 percent clearance rate.

Recoveries

In 1997, 67 percent of the reported motor vehicle thefts were recovered. Out of the recovered vehicles, 77 percent were stolen locally and recovered locally. The remaining 23 percent were stolen locally and recovered by another jurisdiction.

Persons Arrested

In 1997, Texas law enforcement agencies arrested 10,404 persons for motor vehicle theft. When compared with 1996 the number of motor vehicle theft arrests decreased 8.1 percent. Of the motor vehicle theft arrestees in 1997, 32 percent were juveniles (16 and under); 86 percent were male; 68 percent were white; 31 percent were black; 67 percent were not hispanic and 33 percent were hispanic. The age group that contained the largest number of motor vehicle theft arrestees was the 15-to-19 year-old group.

ARSON

DEFINITION

For Uniform Crime Reporting purposes, arson is defined as any willful or malicious burning or attempt to burn, with or without intent to defraud, a house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded from data collection.

ANALYSIS

Volume

The reported number of arsons committed in Texas in 1997 was 8,786. The volume of arson offenses decreased 13.1 percent in comparison with 1996. Because the U.S. Congress did not mandate arson to be an Index Crime until 1979, information on offenses before that year is incomplete.

Rate

The 1997 arson rate for Texas was 45.2 arsons for every 100,000 persons. The change in the arson rate from 1996 was a decrease of 14.3 percent.

Nature

Structures were the most frequent targets of arsonists in 1997, comprising some 46 percent of the reported incidents and 76 percent of the property value lost to arson. Mobile property constituted 40 percent of the reported arsons, but only 23 percent of the value lost. The 'other' category (crops, timber, fences, signs, etc.) formed the remaining 14 percent of the arsons and 1 percent of the value lost.

Residential property was involved in 64 percent of the structural arsons in 1997, with 70 percent of such arsons directed at single occupancy dwellings. Of all targeted structural property, 17

percent of the properties were uninhabited at the time the arson occurred. Motor vehicles composed 97 percent of all mobile property at which arsons were directed.

In 1997, arson victims suffered losses totaling \$92,410,766. This total value loss represents a 31 percent decrease when compared with 1996 total arson losses. The average dollar loss per arson was \$10,518—down from \$13,246 in 1996. Industrial/manufacturing property was the classification with the highest average loss per offense, \$28,698. Single occupancy residences showed an average loss of \$14,286, motor vehicle arsons averaged a loss of \$5,845 and the 'other' group (crops, timber, fences, signs, etc) had the lowest average loss of \$677.

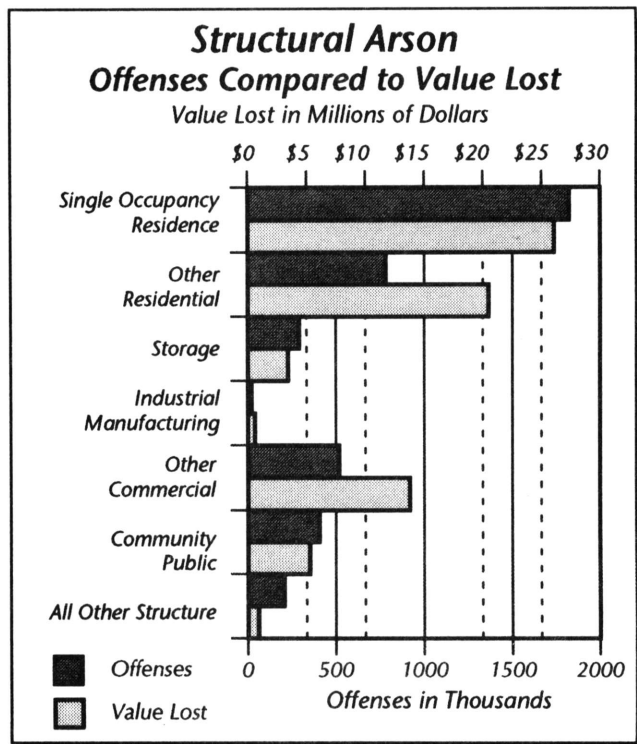

Clearance Rate

Statewide, Texas law enforcement agencies were successful in clearing or solving by arrest 20 percent of all arsons that were reported. Of the various property classifications, community/public (churches, jails, schools, colleges, hospitals, etc.) had the highest clearance rates (42 percent). Industrial/manufacturing showed the lowest clearance rate (5 percent) of any property class.

Of all arson clearances, 45 percent involved persons under the age of eighteen. Persons in this age group accounted for 79 percent of the community/public structure arson clearances, 55 percent of the all structure category clearances and 36 percent of the 'other' category (crops, timber, fences, signs, etc.)

Persons Arrested

Texas law enforcement agencies arrested 937 persons for the crime of arson in 1997. When compared with the previous year, the number of persons arrested for arson decreased 16.6 percent. Of the persons arrested for arson in 1997, 47 percent were juveniles (16 and under); 86 percent were male; 84 percent were white; 15 percent were black; 71 percent were not hispanic and 29 percent were hispanic. The age groups that contained the highest number of arson arrestees was the 10-to-14-year old and 15-to-19-year-old group.

DUI ARRESTS

DEFINITION

For UCR purposes, Driving Under the Influence (DUI) is the driving or operating any motor vehicle or common carrier while under the influence of liquor or narcotics.

ANALYSIS

Volume

As with all Part II non-index crimes, information on the number of reported crimes is not collected by the UCR program for this offense. However, the number of persons arrested for this crime is collected.

The number of arrests for DUI in Texas, in 1997, was 85,174. The volume of DUI arrests decreased .2 percent in comparison with 1996. In Texas, DUI arrests peaked in 1983 when 149,621 persons were arrested and the change in the number of DUI arrests from 1983 to 1997 was a decrease of 43 percent.

Rate

The 1997 DUI arrest rate for Texas was 438.2 arrests for every 100,000 persons. The change in

the DUI arrest rate from 1996 was a decrease of 1.8 percent. As with the number of arrests, the DUI arrest rate peaked in 1983 at 951.5 arrests for every 100,000 Texans. The change in the DUI arrest rate from 1983 to 1997 was a decrease of 53.9 percent.

Nature

Any consideration of the number and rate of DUI arrests must be reconciled with the fact that many factors control the ability of law enforcement personnel to detect drunken drivers. Among the significant factors which drive the DUI arrest rate are these: media coverage of the DWI problem, public awareness, availability of funds for patrol officer overtime, and the skill and training in DUI detection of law officers.

Persons Arrested

Of the 85,174 persons arrested for DUI in 1997, only .3 percent were juveniles (16 and under); 88 percent were male; 92 percent were white; 8 percent were black; 59 percent were not hispanic and 41 percent were hispanic. The age group with the highest number of DUI arrestees was the 25-to-29 year-old group. Of all DUI arrests, 6,522 or 7.7 percent, were of persons who were under the legal age to purchase alcohol in Texas, which is 21.

DRUG ABUSE ARRESTS

DEFINITION

For UCR purposes, drug abuse encompasses all violations of the narcotic drug laws. These are offenses such as unlawful possession, sale, use, growing and manufacturing of narcotic drugs.

In this report these violations are summarized to include all drug abuse arrests (grand total drug abuse), sale and manufacturing arrests, and drug possession arrests.

As with all Part II non-index crimes, information on the number of reported crimes is not collected by the Texas UCR program for these offenses. However, the number of persons arrested for these crimes is collected.

The 1997 drug abuse arrest rate for Texas was 506.0 arrests for every 100,000 persons. The change in the drug abuse arrest rate from 1996 was an increase of 7.7 percent.

GRAND TOTAL DRUG ABUSE

ARRESTS

WEAPONS ARRESTS

DEFINITION

Weapons: Carrying, Possessing includes all violations and attempted violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. As with all Part II non-index crimes, the UCR program collects only reports of arrests for this offense.

ANALYSIS

As indicated in the murder section, firearms are the murder weapon of choice in 67 percent of all Texas murders. The percentage of juveniles arrested for murder has increased from 5 percent in 1983 to 14 percent in 1997. In light of these facts, this section focuses on trends in weapon possession.

Volume and Rate

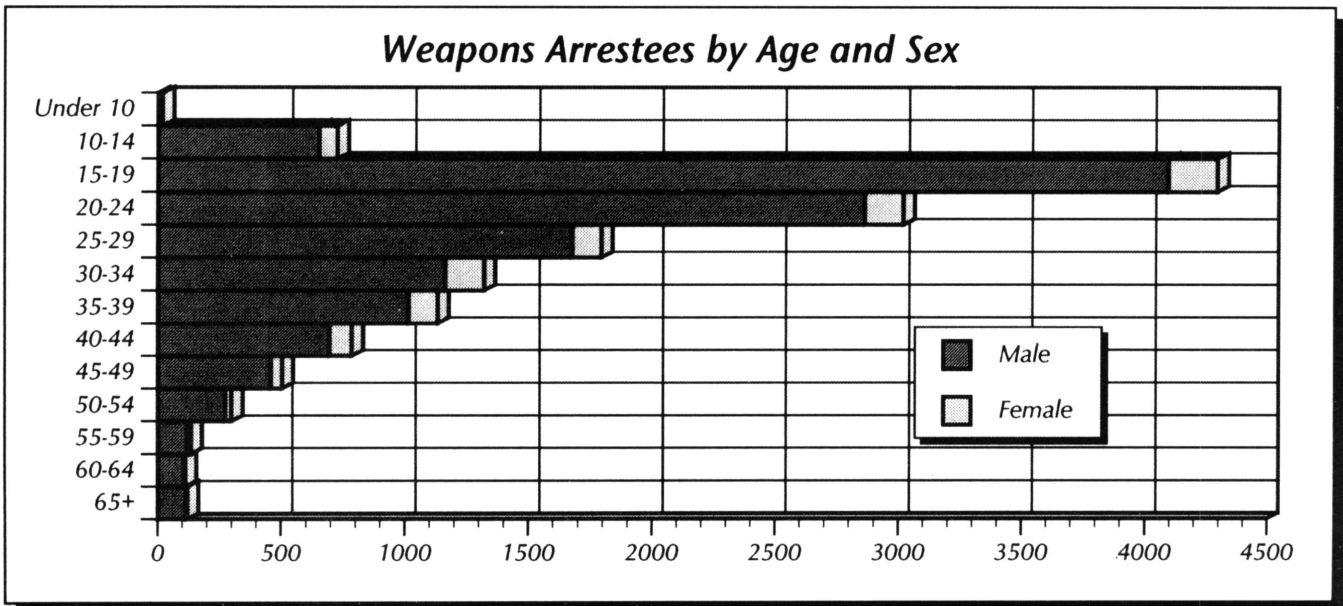

In 1997, 14,236 arrests for weapon violations were reported. The number of arrests decreased 9.4 percent over 1996. The 1997 weapons arrest rate was 73.2 arrests for every 100,000 persons. The change in the arrest rate from 1996 was a decrease of 10.6 percent.

Persons Arrested

Of the persons arrested for weapons violations in 1997, 14 percent were juveniles (16 and under); 93 percent were male; 71 percent were white; 28 percent were black; 69 percent were not hispanic and 31 percent were hispanic. The age group with the highest number of arrestees for both male and female was the 15-19 year-old group.

In this report's base year of 1983 there were 20,160 weapons arrests. Of this total, 5 percent were juveniles, and 91 percent were male.

FAMILY VIOLENCE

FAMILY VIOLENCE 1997

5

DEFINITION

The Texas Family Code defines Family Violence as an act by a member of a family or household against another member that is intended to result in physical harm, bodily injury, assault, or a threat that reasonably places the member in fear of imminent physical harm. The law excludes the reasonable discipline of a child and defines abuse as physical injury that results in substantial harm or genuine threat; sexual contact, intercourse, or conduct; or compelling or encouraging the child to engage in sexual conduct.

By definition and for the purposes of family violence reports, 'Family' includes individuals related by consanguinity (blood) or affinity, marriage or former marriage, biological parents of the same child, foster children, foster parents, and members or former members of the same household (including roommates).

ANALYSIS

Victims

Incidents of family violence in 1997 involved 195,670 victims. Of the victims whose sex was known, 24 percent were male and 76 percent were female. The age group with the highest number of victims was the 25-to-29 year-old bracket.

Of the victims whose ethnicity was known, 35 percent were hispanic and 65 percent were not hispanic. For the victims whose race was known, 75 percent were listed as white, 24 percent were black, and less than 1 percent were American Indian or Alaskan Native and Asian or Pacific Islander. Of the White victims, 76 percent were female, 76 percent of the Black victims were female, 74 percent of the American Indian or Alaskan Native victims were female and 78 percent of the Asian or Pacific Islander victims were female.

Offenders

In 1997, 192,419 offenders were involved in incidents of family violence. Of the offenders whose sex was known, 79 percent were male and 21 percent were female. The age group showing the highest number of offenders was the 30-to-34 year-old bracket.

Of the offenders whose ethnicity was known, 35 percent were hispanic and 65 percent were not hispanic. Of the offenders whose race was known, 73 percent were white, 26 percent were black, and less than 1 percent were American Indian or Alaskan Native and Asian or Pacific Islander. An examination of offenders by race finds that 79 percent of the white offenders were male, 79 percent of the black offenders were male, 78 percent of the American Indian or Alaskan Native offenders were male, and 74 percent of the Asian or Pacific Islander offenders were male.

Officers

A serious problem inherent to police intervention and investigation of family violence is the potential for law officers to be assaulted. In 1997, during the course of reported family violence incidents, 884 Texas law officers were assaulted. By contrast, Uniform Crime Reports for 1997 listed 5,072 assaults on law officers during all types of police activity.

Offenses

Offense information in the family violence program is collected according to federal UCR guidelines and do not necessarily conform to Texas state definitions. Complete offense definitions are available in the appendix to this publication. Family violence offense information falls into six general categories: assaults, homicides, kidnapping/abductions, robberies, forcible sex offenses, and non-forcible sex offenses. Of the six main categories, assaults accounted for 98% of all offenses. Information for each individual crime is represented in the chart on the next page.

Of the apparent major injuries, severe lacerations were the most common at 33 percent. Possible internal injuries were reported in 32 percent of the apparent major injury reports, and apparent broken bones were noted in 13 percent of the apparent major injury cases.

Injuries

For the purposes of this family violence report, the police officers who responded to the disturbance calls determined the extent of injuries and all injuries were considered to be apparent injuries. If later medical attention indicated that the injuries were more or less severe than noted by the responding officer, this information is not included in the family violence report. The majority of reported injuries (50%) were considered to be minor injuries. In another 46 percent of family violence reports, 'no injury' was recorded. Major injuries were reported in 4 percent of the cases.

Weapons

The most common weapon involved in family violence cases was physical force through the use of hands, feet, and fists (strong-arm), which accounts for 75 percent of the incidents. The Texas Family Violence law considers the use of threats and intimidation to be serious enough to report and, thus, 11 percent of the reports were listed as involving no weapons. Knives or cutting instruments (4 percent), blunt objects (3 percent), firearms (2 percent) and other (5 percent) account for the remaining cases. Considered as other weapons were motor vehicles, poison, explosives, fire, drugs, unknown, and miscellaneous weapons.

HATE CRIME

HATE CRIME

6

DEFINITION

The Texas Hate Crimes Act, Subchapter D Chapter 411.046 of the Texas Government Code, defines hate crimes as crimes that are motivated by prejudice, hatred, or advocacy of violence including, but not limited to, incidents for which statistics are or were kept under Public Law 101-275 (the federal Hate Crimes Statistics Act). The federal law further defines hate crimes as crimes that manifest evidence of prejudice based on race, religion, sexual orientation, or ethnicity, and added in 1997, disability.

Violation against selected groups within Texas has been recognized as a threat to the safety of Texans. In an effort to quantify these incidents of bias crimes, the Texas Hate Crimes Act directed every law enforcement agency within Texas to report bias offenses to the Department of Public Safety.

ANALYSIS

Volume

The total number of reported Texas hate crime incidents in 1997 was 331. This represents a decrease of 54 percent when compared to 1996. These incidents involved 361 victims, 420 offenders, and resulted in a total of 360 offenses.

Bias Motivation

In 1997, the largest percentage of hate crime reports were racial in nature. The second most commonly reported bias motivation was sexual orientation, the third most common bias motiva-

tion was religion, the fourth most common form of hate crime was ethnic/national origin and the fifth most common was disability.

Location

Residences and homes were the most frequently occurring locations of bias crimes during 1997. The second most common locations were highways, roads, streets and alleys, and the third most common were parking lots and garages.

Offenders

In 1997, 420 offenders were involved in incidents of hate crimes. Because hate crime incidents can be perpetrated by multiple offenders, the following chart displays the suspected offenders' race totaling to 337.

Victims

Information on the victims of hate crimes is limited to victim type. While bias motivation information identifies the offender's bias, it is important to note that the victim may not actually belong to the group the offender sought to harm. For this reason, information on the victims' actual group membership is not recorded.

Victim type, in the hate crime data collection program, is listed as: individual, business, financial institution, government, religious organization, society/public, other and unknown. Of these victim types, individuals were reported to be the main hate crime target.

Offenses

Offense information in the hate crime data collection program are defined in accordance with federal Uniform Crime Reporting definitions and do not necessarily conform to Texas state definitions. Complete offense definitions are available in the appendix to this publication.

Hate crime offense information falls into the eight index crimes—murder, rape, robbery, ag-

LAW ENFORCEMENT EMPLOYEE DATA

The Texas Uniform Crime Reporting program collects pertinent data relating to the police agencies of the state. Information regarding law enforcement employee strength, employment trends, law officers assaulted in the line of duty, and law officers killed in the line of duty is discussed in this section.

Commissioned Personnel

Texas' law enforcement community employed 43,432 full-time sworn officers as of October 31, 1997. The average number of officers for every 1,000 inhabitants of Texas was 2.23. The law officer rate decreased 1.3 percent from 1996.

Civilian Employees

The 928 Texas agencies reporting law enforcement employee data employed 26,640 civilian workers. Civilian employment has increased 7.1 percent over 1996 and now makes up 38 percent of the Texas law enforcement work force.

LAW ENFORCEMENT OFFICERS ASSAULTED

The killing or assaulting of a law officer creates a serious detrimental effect on the security of society. As the possibility of being assaulted may discourage persons from considering law enforcement careers, attacks on police officers reduce their ability to combat crime. As such, violence towards police equals violence towards society.

In 1997, 5,072 Texas Law Officers were assaulted in the line of duty. The number of officers assaulted decreased 2.3 percent over the number of assaults in 1996. Assaults resulted in injury to the officer in 30 percent of the cases while 94 percent of the assaults were cleared.

GLOSSARY OF TERMS

Adult—In Texas, an adult is a person 17 years of age or over. National law provides that adults are age 18 or over. Unless otherwise indicated, this publication follows the state definition.

Affinity—The connection existing, as a consequence of marriage, between married persons and the kindred of the other.

Cleared by Arrest or Exceptional Means—For Uniform Crime Reporting purposes, an offense is cleared by arrest or solved when at least one person is arrested, charged with the commission of an offense and turned over to court for prosecution. In certain situations police are not able to follow these three steps and, if the following four conditions can be met, the offense can be cleared exceptionally: (1) the investigation has definitely established the identity of the offender; (2) there is enough information to support an arrest, charge, and turning over to the court for prosecution; (3) the exact location of the offender is known so that he could be taken into custody; (4) there is some reason outside the police control that prevents the arresting, charging, and prosecuting of the offender.

Consanguinity—Kinship or blood relationship; the relationship of persons who are descended from a common ancestor.

Crime Factors—Conditions that affect the amount and type of crime that occurs in a geographical area.

Crime Index—The sum of seven index offenses used to measure the extent, fluctuation and distribution of crime in a given geographical area. Crime classifications used in the Crime Index are: murder, rape, robbery, aggravated assault, burglary, larceny-theft and motor vehicle theft. While arson is also an index offense, it is not part of the Crime Index.

Crime Rate—The number of offenses per 100,000 inhabitants. To calculate a crime rate, divide the population by 100,000 and then divide the number of offenses by that answer. The

crime rate is useful in determining the relative frequency of crime without regard to fluctuations in population.

Ethnicity—In UCR, race and ethnic origin are counted as two separate designations. The ethnic origin categories were adopted from the U.S. Department of Commerce and are hispanic and not hispanic. Included as hispanic are all persons of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

Family—Individuals related by blood, affinity, marriage, former marriage, biological parents of the same child, foster children, foster parents, members of the same household or former members of the same household.

Family Violence—An act by a member of a family or household against another member that is intended to result in physical harm, bodily injury, assault or a threat that reasonably places the member in fear of imminent physical harm. The reasonable discipline of a child is excluded from consideration as family violence.

Hate Crime—A crime that is motivated by prejudice or hatred based on race, religion, sexual orientation or ethnicity.

Hierarchy Rule—When several offenses are committed simultaneously by one person or group of persons the hierarchy rule in UCR mandates that only the most serious offense is recorded for statistical purposes. Arson is an exception to this rule.

Index Crime—A crime for which reports of offenses committed are collected. Index crimes are murder, rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft and arson.

Intimidation—Putting a victim in reasonable fear of bodily harm through the use of threatening words or other conduct.

Juvenile—In Texas, a juvenile is a person 16 years of age or under.

Non-Violent Crime—Property crimes; the index offenses of burglary, larceny-theft and motor vehicle theft.

Part I Offenses—The first of two categories of index offenses established for crime reporting purposes. Part I Offenses are by their nature more serious and/or occur most frequently. For Part I Offenses, the reports of offenses committed are collected without regard to whether an arrest was made.

Part II Offenses—The second of two categories established for crime reporting purposes. Part II Offenses are generally less serious in nature and/or occur less frequently than Part I Offenses. Monthly tabulations of Part II Offenses are limited to arrest information only.

Personal Weapon—The use of hands, feet, fists and teeth as a weapon to commit a crime; also termed strong-arm.

Prejudice—An unreasonable and unjustifiable negative attitude toward a group and its individual members.

Race—In UCR, race and ethnic origin are counted as two separate designations. The racial categories were adopted from the U.S. Department of Commerce and are as follows: *White*—A person having origins in any of the original peoples of Europe, North Africa or the Middle East; *Black*—A person having origins in any of the black racial groups of Africa; *American Indian or Alaskan Native*—A person having origins in any of the original peoples of North America who maintains cultural identification through tribal affiliation or community recognition; *Asian or Pacific Islander*—A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent or the Pacific Islands.

Strong-Arm Weapons—The use of hands, feet, fists and teeth as a weapon to commit a crime. Also termed personal weapons.
