# BIENNIAL REVENUE ESTIMATE

2012-2013 Biennium | 82nd Texas Legislature | January 2011

January 10, 2011

The Honorable Rick Perry, Governor  
The Honorable David Dewhurst, Lieutenant Governor  
The Honorable Joseph R. Straus, III, Speaker of the House  
Members of the 82nd Legislature

Ladies and Gentlemen:

In accordance with Article III, Section 49a of the Texas Constitution, I present herewith my revenue estimate for the remainder of fiscal 2011 and the upcoming 2012-13 biennium.

For 2012-13, the state can expect to have \$72.2 billion in funds available for general-purpose spending. This represents a 2.9 percent decrease from the corresponding amount of funds available for 2010-11.

General Revenue-related tax and fee collections in 2012-13 are estimated to reach \$77.3 billion, with tax revenues accounting for 87 percent of the total. Approximately 64 percent of state tax revenue will come from the sales tax. Other significant sources of General Revenue include motor vehicle sales and rental taxes, the franchise tax, the oil and natural gas production taxes, insurance taxes, and lottery proceeds. Reserved from \$77.3 billion is \$866 million representing oil and natural revenues that will be deposited to the Economic Stabilization (Rainy Day) Fund.

Offsetting the anticipated revenue collections of \$77.3 billion for 2012-13 is the ending 2010-11 General Revenue-related balance, projected to be a *negative* \$4.3 billion. This projected ending balance is a reflection of worse-than-expected revenue collections due to the recession – notably, the all-important sales tax which was battered by rapidly rising unemployment and contracting state and national economies.

In addition to the General Revenue-related funds, the state stands to collect \$100.5 billion in federal receipts and other revenues dedicated for specific purposes and therefore unavailable for general-purpose spending. State revenue collections from all sources and for all purposes should total \$177.8 billion.

The state's fiscal condition, severely impacted by declining state revenues, has been strengthened, however, by recent budgeting decisions by the Texas Legislature. Dollars flowing rapidly into the state's Economic Stabilization Fund associated with oil and natural gas tax revenues during the mid- and late- 2000s were not spent but retained in the Fund. In 2007, the Legislature moved \$3 billion from the General Revenue Fund into the Property Tax Relief Fund and, more recently, state leadership has instructed agencies to trim their budgets in response to economic conditions and the effect on state finances.

With respect to the recent recession, the State of Texas is emerging from what may have been the worst economic downturn since the end of World War II. While the economy and, subsequently, revenue collections, declined markedly, the state has fared somewhat better than other states during the recession. State payroll employment, which contracted by approximately four percent, held up better than national employment which declined by over six percent; the state unemployment rate, currently 8.2 percent, has spiked above a pre-recession low of 4.3 percent, but has stayed well below the current national rate of 9.8 percent. The state, while experiencing falling home sales and increased levels of foreclosures, avoided severe declines in property values.

This revenue estimate is based on my latest economic forecast, which indicates that the Texas economy will grow over the next two years, but at a modest pace.

The Honorable Rick Perry, Governor  
The Honorable David Dewhurst, Lieutenant Governor  
The Honorable Joseph R. Straus, III, Speaker of the House  
Members of the 82nd Legislature

January 10, 2011

Page Two

From the previous Texas payroll employment peak in the summer of 2008 to the bottoming of employment in the Fall of 2009, the state lost 431,300 jobs, or 4.1 percent of its employees. Through November 2010, the state had added back 220,400 of those lost jobs, and is on track to gain back all payroll jobs lost by the second half of fiscal 2012. The state expects to see net job growth of 146,000 in fiscal 2011, 205,000 in fiscal 2012, and 259,000 in fiscal 2013.

The Texas economy, in inflation-adjusted terms, grew by 3.3 percent in fiscal 2008, declined by 1.5 percent in 2009, and resumed growth in 2010, increasing year-over-year by 3.0 percent. This happened after annual growth in both fiscal 2006 and 2007 exceeded 4.0 percent. Looking forward, the Texas economy is expected to increase by 2.6 percent in 2011 compared to the previous year, and by a further 2.8 percent in 2012 and 3.4 percent in 2013—reflecting a growing population and revival of business activity.

Transfers to the Economic Stabilization Fund are projected to total \$1.2 billion over the three-year fiscal period 2011-13. After the fiscal 2013 transfer, the balance for this fund is expected to total \$9.4 billion, absent any appropriations during the upcoming legislative session.

Given the tentative nature of the recovery, continuing low levels of activity in the housing and lending markets, as well as cautious consumers exhibiting substantially increased rates of savings, I believe the estimates herein are prudently conservative.

In closing, the national and Texas economies appear to have turned the corner, however a strong period of growth has yet to begin. In the event there are changes in agency spending patterns within this biennium, or funds are received from the federal government, or from other state agencies, or significant changes occur in economic conditions, this estimate will be updated—all to ensure that your deliberations are based on the most accurate and timely information available.

Sincerely,

Susan Combs  
Texas Comptroller

c: John O'Brien, Director, Legislative Budget Board

# Revenue Overview

The State of Texas will have an estimated \$72.2 billion available for general purpose spending in the 2012-13 biennium, 2.9 percent below the corresponding amount of funds available for 2010-11. This figure represents the sum of the 2010-11 ending balance, 2012-13 tax revenue, and 2012-13 non-tax receipts, less estimated transfers to the Econom-

ic Stabilization Fund (ESF) and adjustments to General Revenue-related dedicated account balances.

Aside from certain fund balances, only four funds affect the discretionary spending detailed in the General Appropriations Act. These funds, which are referred to as “General Revenue-related funds,” are the General Revenue Fund, the Available School Fund, the State

**FIGURE 1**  
**Flow of Major Revenues** For the 2012-13 Biennium

Note: Totals may not sum because of rounding.  
SOURCE: Susan Combs, Texas Comptroller of Public Accounts.

Textbook Fund, and the Foundation School Fund Account. The remaining funds depend upon federal receipts or revenues that are dedicated by the constitution or by statute. A prime example is the constitutionally dedicated Permanent University Fund.

The state's tax system is the main source of General Revenue-related funding. Tax collections in 2012-13 will generate \$67.3 billion; and non-tax revenues will

produce an additional \$10.0 billion. Factoring in the estimated negative \$4.3 billion ending balance carried forward from 2010-11, these three sources total \$73.0 billion. Against this amount, \$866 million must be placed in reserve for future transfers to the ESF.

Taking all state revenue sources into account, the state is expected to collect \$177.8 billion in revenue for all state funds in 2012-13. ♻

# Texas Economic Outlook

The Texas economy, which in fiscal 2009 joined the national recession, has begun a recovery from what has been the nation's worst recession since the end of the Second World War.

Following a rapid expansion in the mid-to-late 2000s, where Texas employment grew by an annualized average of 3.0 percent from 2004 through 2007 and real (inflation-adjusted) Gross State Product (GSP) averaged 4.0 percent annual growth, the state's economy slowed in 2008. In fiscal 2009, employment contracted by 1.7 percent as the recession hit the state and GSP declined by 1.5 percent. Nonfarm payroll jobs, which peaked at 10.64 million in August 2008, declined by 431,300—or 4.1 percent—before it bottomed in the fall of 2009. (See **Figure 1.**)

In Texas, recessions in 1982 and 1985 resulted in the loss of about 3 percent of the state's nonfarm payroll employment when measured from the peak of employment to the subsequent trough. In each of these business cycles it took approximately 2 years from the first decline in employment to the time that all jobs lost had been regained. The recession of 2001 affected Texas employment somewhat differently. While overall employment dipped by slightly over 2 percent—lower than the previously mentioned recessions—the time to cycle from peak to bottom to back up to the former peak stretched to over 3 years.

Jobs are now returning to Texas payrolls. Over 220,000 jobs have been added, from the September 2009 bottom through November 2010. That is slightly more than 50 percent of the 431,300 jobs lost during the recent decline. In contrast, the nation as a whole has regained 951,000 of the 8.36 million jobs lost—or about 11 percent. It is expected, however,

that it will be the second quarter of calendar year 2012 before the remainder of Texas jobs lost will be regained and the previous employment peak of 10.64 million surpassed. The Comptroller's office expects net job growth of 146,000 in fiscal 2011, followed by another 205,000 jobs in 2012 and a further 259,000 in 2013. This estimate is based on the Comptroller's Winter 2010-11 economic forecast, which indicates that the growth of the Texas economy over the next two years will be modest, growing an average of 3.1 percent per year during the 2012-13 biennium. (See **Table 1.**)

## Texas Continues to Outpace National Employment Growth

The relative advantage of Texas job growth over that of the nation has been long-standing. For the fiscal year ending August 2010, Texas added 134,000 jobs. Not only did Texas add more jobs than any other state over that year, but Texas' 1.7 percent growth rate also led the 10 most populous states (three of which lost jobs) and was 3rd among all 50 states. Even with growing employment, an expanding labor force kept the state's unemployment rate stubbornly high—between 8.1 and 8.3 percent in fiscal 2010, and ending the year at 8.1 percent. This was better than the nation's unemployment rate that averaged 9.7 percent over the year. Fiscal 2010's average Texas unemployment rate of 8.2 percent was the highest since 1987. The state's average unemployment rate is expected to change little in fiscal 2011, but it should improve to 7.7 percent in 2012 and 7.1 percent in 2013. Job growth will only marginally outpace labor force growth that is fueled by net migration and natural population increase.

As Texas emerged from recession in fiscal 2010, real GDP grew at a rate of 3.0 percent, drawing in part from renewed job growth and resurgent oil and natural gas sector activity. The state economy grew on average at an anemic 0.7 percent per year between fiscal 2008 and 2010 (declining by 1.5 percent in 2009), following an

average annual expansion of 4.0 percent in the previous two years. Texas growth was weak, but the national economy contracted by 0.6 percent per year over the same period.

With the headwind presented by a fragile national economy, the economic recovery in Texas will continue

at a comparatively slow rate, with real GSP advancing by 2.6 percent in fiscal 2011 and 2.8 percent in 2012. Although growing moderately, this pace is about one percentage point slower than is typical during a period of economic recovery. The rate of growth is forecast to reach 3.4 percent in 2013.

## Spending is Slow to Recover; Consumers are Saving More

During previous bouts of economic weakness, renewed consumer spending helped bring the economy into recovery. Yet even with the job gains in Texas, the unemployment rate remains high. Further, the savings rate which had been falling for some years (and therefore reflecting greater consumption on the part of households) steadied at below 2 percent of income immediately prior to the onset of the recession. The rate jumped to over 5 percent during the downturn and remains at that level.

The Consumer Confidence Index at present is more than 30 percent below its baseline level in the West South Central states (which includes Texas) and nearly 50 percent below the baseline nationally. If consumer optimism remains low, purchases of houses, automobiles, and large ticket items will remain muted.

The challenges faced by consumers impacted Texas revenues. After the 2.8 percent fall in fiscal 2009, retail sales subject to the sales tax continued to decline by another 3.1 percent in fiscal 2010. Reflecting this anemic consumer spending, Texas saw an overall 6.6 percent decline in state sales tax collections during 2010. Motor vehicle sales tax collections increased by 2 percent, but this was a small improvement over the substantial 22.5 percent decline in fiscal 2009.

## Texas Industrial Performance

Eight of the state's eleven major industries added jobs during fiscal 2010. The fastest rate of job growth was in the mining and logging industry, which is dominated by the oil and natural gas sector of the industry. The industry with the greatest job loss rate was information services, which includes broadcast media, telecommunications, and Internet-based services. The industry that added the most jobs was education and health services, at 57,300, followed by professional and business services with 42,100 jobs. Construction (down 16,600) and infor-

2009	2010*	2011*	2012*	2013*
912.9 (1.5)	940.1 3.0	964.1 2.6	990.9 2.8	1,024.7 3.4
1,222.7 0.9	1,271.0 3.9	1,327.2 4.4	1,382.7 4.2	1,452.6 5.1
959.4 0.8	979.1 2.1	1,023.7 4.6	1,067.0 4.2	1,114.4 4.4
10,404 (1.7)	10,301 (1.0)	10,447 1.4	10,652 2.0	10,912 2.4

6.8	8.3	8.2	7.7	7.1
60.03	72.75	70.73	67.97	70.04
4.98	4.10	3.82	3.93	4.20
12,874.3 (3.4)	13,161.5 2.2	13,466.8 2.3	13,850.0 2.8	14,254.5 2.9
213.8 (0.3)	217.5 1.7	219.9 1.1	223.8 1.8	228.3 2.0
3.5	3.3	3.3	4.5	6.5

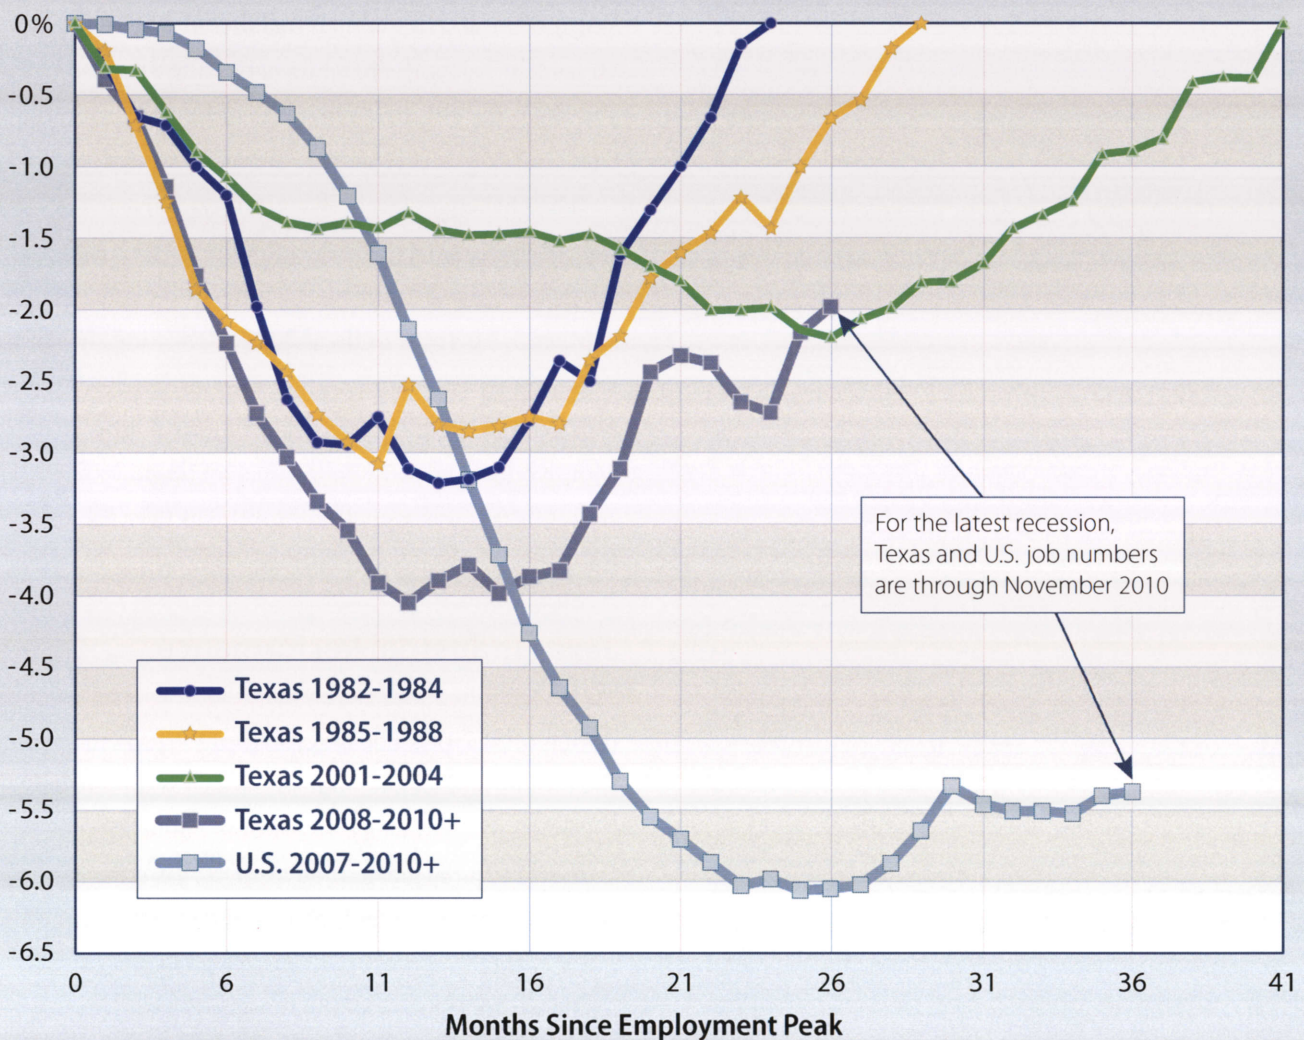

mation (down 12,900) lost the largest number of jobs. Education and health services job growth was fueled by ambulatory health care services, a broad group of outpatient care providers. Professional and business services advanced largely because of hiring in administrative and support services, including the employment services sector which often adds temporary and part-time jobs when the economy begins to emerge from a recession.

### Manufacturing

After two years of job losses grounded in a national recession, weak international markets, subdued oil and natural gas drilling activity in 2009, and shrinking payrolls, the Texas manufacturing industry saw new hiring for automobile, aerospace, and drilling rig fabrication during fiscal 2010. Most of the job growth was associated with the demand for oil and natural gas drilling

FIGURE 2

### Nonfarm Employment Impacts in Recent Recessions: Percent Cumulative Decline in Employment from the Pre-Recession Peak

SOURCE: Susan Combs, Texas Comptroller of Public Accounts.

rigs, with an increase of 13,400 jobs in the fabricated metals sector, a robust 11.8 percent gain. With continued and often substantial losses in many manufacturing sectors, these jobs were the lion's share of the 17,800 net manufacturing jobs added in 2010. Relocation of some automobile manufacturing to Texas boosted hiring in motor vehicle manufacturing by 4.6 percent. Aerospace manufacturing had a 4.9 percent growth rate, adding 2,400 jobs.

Manufacturing employment increased by 2.2 percent overall during the year, despite double-digit percentage losses in the manufacturing of communications equipment (down 12 percent) and in printing and related publishing (down 11 percent).

Although the U.S. domestic demand for goods and services remained in neutral through most of fiscal 2010, Texas export markets more than recovered the severe losses of 2009. Texas exporters faced a 16 percent decline in the value of their sales in 2009, but rebounded with a 22 percent increase in 2010, exceeding the previous record sales level in 2008. With an estimated \$196 billion in Texas exports in fiscal 2010, exports accounted for 15 percent of GSP. Chemicals, electronics, nonelectrical machinery, and petroleum products accounted for about two-thirds of the total. Texas has led all other states in the value of export trade since 2002.

In the 2012-13 biennium, Texas' manufacturing industry is expected to continue the improvements seen in fiscal 2010 and 2011. Employment growth will be stable and moderate, and the industry should add over 49,000 jobs in the biennium.

## Mining and Logging

The number of oil and natural gas drilling rigs operating in Texas at the end of fiscal 2009 was 366, but by the end of 2010 the count had nearly doubled to 714. Although far from its record level, this increase was indicative of a turnaround in the state's oil and natural

gas industry. Mining and logging employment grew by a robust 11.8 percent, or 23,300 jobs, in fiscal 2010, while all other Texas industries combined for job growth of just 1.1 percent. This industry is more than five times as concentrated in Texas as it is nationally, as measured by the industry's share of total wages paid. In addition to the economic impact from exploration activities within the state, Texas is the headquarters for many of the nation's oil and natural gas firms. The broader oil and natural gas industry, which includes mining, petrochemicals, petroleum refining, and oil/natural gas-related manufacturing, accounts for 15 percent of the total Texas economy, buttressing for the state economy when rising oil and natural gas prices dampen consumer and business spending.

Despite the Texas mining and logging industry's relatively strong employment gains in fiscal 2010 and 2011, it is expected job growth will be slower in the 2012-13 biennium, with the industry adding just 4,000 jobs.

## Construction

Among the Texas goods-producing industries, construction was the only industry to lose jobs during fiscal 2010. A sustained weakness in the building of single-family and multi-family residences was exacerbated by tight credit and shrunken investment in business structures. All sectors of construction except building equipment contractors lost jobs, but the silver lining is that 2010 saw some stability returning to an industry that in 2009 lost 91,000 jobs, a decline of more than 13 percent. Construction lost 16,600 jobs in 2010, with the largest losses in heavy and civil construction (down 4,800 jobs) and specialty trade contractors (down 7,400). The lone subsector that added jobs was building equipment contractors, where employment increased by 3,300.

Texas fared better than the many states where housing had been overvalued and prices subsequently dropped precipitously, but fiscal 2010 mortgage defaults

in Texas kept home foreclosures slightly higher than normal—still less than half the national rate—and increased the inventory of homes on the market. Consequently, total housing starts in Texas declined by 2 percent in 2010. The losses were concentrated in multi-family starts, which fell 34 percent. Single-family starts, which had fallen markedly the previous year, saw an increase of 11 percent, but that volume was not nearly enough to offset losses in multi-family projects. According to F.W. Dodge, the nonresidential building construction of offices, fabrication facilities, and warehouses in Texas (as measured in square feet) declined another 30 percent during 2010. While the U.S. construction industry saw another year of job losses (down 4.7 percent), Texas' total construction employment fell by a less severe 2.8 percent, or 16,600 jobs, to reach a total of 569,000 in August 2010.

In fiscal 2011, Texas' construction industry is expected to lose an additional 8,000 jobs, then return to job growth in fiscal 2012. In the 2012-13 biennium, the industry should add almost 37,000 jobs.

## Service-Providing Industries

Texas' service-providing industries, which account for more than 84 percent of the state's total nonfarm employment, uncharacteristically underperformed the goods-producing industries in the rate of job growth in fiscal 2010 but still accounted for 80 percent of the added jobs. Six of the eight service-providing industries had job expansions during the year, but the growth rates were small by historical standards. Over the past twenty years, average annual growth in service-providing jobs has been 2.2 percent, ranging from losses in fiscal 2002 and 2009 to 4.0 percent growth in 1997. The 1.2 percent rate of job growth in fiscal 2010 was welcome, but comparatively anemic.

Education and health services was the fastest growing Texas industry in fiscal 2010, adding 57,300 jobs for a 4.3 percent increase, and accounted for 44 percent

of the state's employment growth. In 2010 the health care/social assistance sector accounted for 89 percent of the industry's jobs, and a larger share of the year's job growth. The ambulatory health care services subsector's growth rate was 5.9 percent. The education services component is considerably smaller than health care, largely because this segment only includes private education services.

The professional and business services industry rebounded from an 8.3 percent employment loss during fiscal 2009 to post a healthy gain for fiscal 2010. While the growth was less robust than education and health services, professional and business services added 42,100 jobs, a 3.4 percent growth rate. Within this industry, employment services posted the largest percentage gain at 7.5 percent, with most of the increase due to the hiring of temporary and part-time workers.

The financial activities industry saw modest employment gains in fiscal 2010, advancing by 0.7 percent or 4,200 jobs. The finance and insurance sector includes credit intermediation (depository institutions and related activities), securities and other financial activities, and insurance. Credit intermediation was the only subsector with job gains, increasing by a strong 2.6 percent, a considerable improvement over the previous year's weak growth. The real estate and rental and leasing sector lost a small share of its jobs in 2010, primarily due to job losses of 4.8 percent in rental and leasing services.

Employment in the trade, transportation, and utilities industry declined marginally, by 0.3 percent or 7,000 jobs, during fiscal 2010. Wholesale trade lost 0.8 percent of its jobs during the year, an improvement from the 7 percent loss in fiscal 2009. Retail trade's job loss was 0.4 percent in 2010, down from a loss of over 3 percent in the previous year. Motor vehicle dealers were the most improved retail trade subsector, increasing employment by 4.7 percent, which was a reflection on the year's improved car and truck sales. The warehousing and storage subsector added jobs at a 3.6 percent rate, but truck

transportation trimmed 2.7 percent of its jobs. Employment in the air transportation industry also declined, by 2.1 percent. The industry's smallest sector, utilities, increased employment by 2.1 percent in fiscal 2010.

The information services industry, the smallest service-providing industry, lost 12,900 jobs during fiscal 2010. The industry has been losing employment since the "dot-com" bust at the end of 2000, and has shed over 30 percent of its workforce since that time. Losses during fiscal 2010 were spread over publishers, Internet services, telecommunications and data services.

On the other hand, the leisure and hospitality industry turned upward in fiscal 2010, posting a gain of 1.4 percent or 13,600 jobs, following a 0.4 percent job loss in 2009. The industry had strong 2010 job growth from the accommodation subsector (5.1 percent), after losing about the same share of jobs in 2009.

Other services, an industry comprised of services that do not fit neatly into the primary service-providing industries, gained 600 jobs in 2010, an increase of 0.2 percent, following a loss of 4,000 jobs in 2009.

In the 2012-13 biennium, all eight Texas service-providing industries are expected to add jobs. In total the gain will be 374,000 jobs, compared to a gain of 90,000 for the goods-producing industries. Professional and business services will be the leading industry, with a 95,000 net job gain, followed by Trade, Transportation and Utilities (+ 87,000) and Education and Health Services (+ 66,000).

## Forecast Summary and Concerns

Texas' economic growth in the 2012-13 biennium, as measured by real GSP, is expected to average 3.1 percent annually, outperforming the 2010-2011 biennium when the average annual growth is estimated to be 2.8 percent. Personal income will increase by 4.3 percent annually, outpacing average annual inflation of 1.9 percent per year. Population is expected to grow by 1.7 percent each year, to an average of 26.5 million in fiscal 2013. In

current-dollar terms, the state's GSP will increase from \$1.33 trillion in fiscal 2011 to \$1.45 trillion in 2013.

The Comptroller's economic forecast assumes relative stability and consistency in the future. It does not incorporate the possible impacts of unanticipated one-time or highly unusual events which could jolt the economy, putting the brakes once again on economic performance and reducing future revenue collections.

The forecast envisions a moderate recovery from a severe downturn. As previously noted, Texas does appear to be improving at a faster pace than the nation as a whole. While several items are of note and must be watched—consumer spending that is still tentative and not full strength and hiring yet to reach the pace seen during full recovery—there are more indicators pointing toward a sustained recovery than another contraction.

In addition, the economic forecast assumes stable crude oil and natural gas prices during the upcoming biennial period. If the price of oil, however, were to rise and remain above \$100 per barrel, the near-term implications could be positive for the state. In the longer-term, Texas (and U.S.) businesses and households would be burdened by increasing prices.

The economic forecast underlying this revenue estimate assumes a relatively weak dollar and a gradual recovery of international markets, a positive for growth in Texas exports. The state is the largest exporting state in the country.

Job growth has performed adequately following the employment bottom in Fall 2009. Since that point, as mentioned earlier, over 220,000 jobs have been added to Texas payrolls, though overall employment remains well below the all-time peak of 10.64 million seen in 2008.

In summary, although there are potential concerns, the Texas economic forecast on which the revenue estimate is based is grounded in the economic conditions, from fiscal 2011 through fiscal 2013, expected to be the most probable—tempered, moderate growth. ☺

# Available Revenue

The 82nd Legislature will have an estimated \$72.2 billion available for general purpose spending in the 2012-13 biennium, 2.9 percent below the corresponding amount estimated for 2010-11. (See **Table 2.**) This figure represents the sum of the 2010-11 ending balance, 2012-13 tax revenue, and 2012-13 non-tax receipts, less estimated transfers or reserves to the Economic Stabilization Fund and adjustments to General Revenue-dedicated account balances.

## The 2010-11 Ending Balance

The estimated ending certification balance for the 2010-11 biennium will be a *negative* \$4.3 billion after setting aside a required \$369 million, associated with fiscal 2011 crude oil and natural gas production tax revenue, to be transferred to the Economic Stabilization Fund (ESF) during 2012.

## Transfers to the Economic Stabilization Fund

Transfers from state oil production and natural gas tax collections to the ESF should total \$1.2 billion over the three-year period 2011-13. As required by the Texas Constitution, estimated transfers to the ESF have been deducted from available revenues and balances. In addition to the fiscal 2011 transfer of \$451 million from fiscal 2010 tax collections, this estimate anticipates that an additional \$763 million will be transferred to the ESF in 2012-13 (associated with 2011 and 2012 collections). After the fiscal 2013 transfer, and accounting for any appropriations and interest earnings, the ESF balance should reach \$9.4 billion, absent any appropriations by the 82nd Legislature.

## Tax Revenue

The state's tax system is the main source of General Revenue-related funding. Taxes are expected to yield \$67.3 billion during the upcoming biennium, contributing 87 percent of total net revenues. Compared with the \$62.7 billion collected in 2010-11, total General Revenue-related tax collections in 2012-13 are expected to increase by 7.4 percent.

Since 1988, state sales tax revenues have accounted for more than half of all state General Revenue-related tax collections. The franchise tax and the motor vehicle sales and rental taxes are the next largest sources of General Revenue, each providing over \$5.8 billion in the 2012-13 biennium (additional revenues from those taxes are dedicated to the Property Tax Relief Fund).

### Sales and Use Taxes

The state's largest source of tax revenue is the limited sales and use tax, imposed at a rate of 6.25 percent of the price of a broad range of items purchased within or brought into the state. The tax is paid by both businesses and consumers and applies generally to purchases of goods unless specifically exempted, and to selected services.

The limited sales and use tax is deposited to the General Revenue Fund, with exceptions for taxes collected from the sales of motor lubricants (deposited to the State Highway Fund) and from the sales of sporting goods (deposited to dedicated accounts for the Parks and Wildlife Department and the Texas Historical Commission).

Other sales taxes include the boat and boat motor sales and use tax; a 2 percent surcharge on fireworks dedicated to the Volunteer Fire Department Assistance

Account; and a 2 percent surcharge on certain diesel trucks (1 percent if the model year is after 1976) and off-road diesel equipment dedicated to the Emissions Reduction Plan Account.

In fiscal 2010, Texas sales tax revenues totaled \$19.6 billion, a decline of 6.6 percent from the previous year. Revenue collections also fell in fiscal 2009, by 2.6 per-

cent, to \$20.9 billion from fiscal 2008 revenues of \$21.5 billion.

With the onset of the economic recession and decline in Texas employment, consumers curtailed their retail spending. Likewise, business spending slowed substantially, particularly in the construction and oil and natural gas-related sectors.

**TABLE 2**

In fiscal 2010, sales tax collections from the retail trade sector were 5.9 percent below the pre-recession peak level reached in fiscal 2008. Collections from the other major sectors supported mainly by consumer spending remained essentially flat, with revenues from information services up by 0.3 percent and restaurant revenues up 0.6 percent.

Much more dramatic tax revenue collection declines occurred in the sectors reflecting business spending. Relative to the peak collection year of fiscal 2008, fiscal 2010 sales tax revenues dropped 29 percent in the oil and natural gas mining sector, 28 percent in construction, 21 percent in manufacturing, 17 percent in wholesale trade, and 28 percent in real estate and rental and leasing.

In recent months, a gradual economic recovery with relatively modest employment gains has been underway, though employment levels remain well below the 2008 peak. Sales tax revenues have also resumed growth, with year-over-year total revenue increases recorded for nine consecutive months. Nonetheless, monthly sales tax revenues remain below the levels reached in late fiscal 2008 and early fiscal 2009.

General Revenue-related sales tax revenues are forecast to reach \$20.2 billion in fiscal 2011, a 3.3 percent increase from fiscal 2010. Collections are expected to rise by 3.9 percent to \$21.0 billion in fiscal 2012, and by another 4.5 percent to \$21.9 billion in fiscal 2013. The 2012-13 biennium total of \$42.9 billion represents an 8.0 percent increase over 2010-11.

Recent court decisions regarding the sale for resale exemption policy have narrowed the sales tax base, resulting in lower projected revenue. Longstanding policy has been that otherwise taxable items are exempt when purchased for resale, and resale construed to require that items physically convey to a subsequent purchaser.

However, these court decisions now suggest that if a contract between a contractor and an exempt entity

asserts ownership of a taxable item by the exempt entity when it is delivered to the contractor, the item is not subject to tax even if it is used or consumed by the contractor and is not conveyed to the exempt entity. For example, furniture, office supplies, electricity, and other taxable items used by a contractor and allocated as indirect costs during the performance of a contract with an exempt entity may potentially be purchased tax free for resale, even though the items are used by the contractor and are not physically conveyed to the contractor's customer.

### *Franchise Tax*

The state has now completed three collection cycles under the franchise tax as modified by the Legislature in 2006 (HB 3, 79th Legislature 3rd Called Session). Collections, partially deposited to General Revenue and the remainder to the Property Tax Relief Fund, in the 2008-09 biennium were \$8.7 billion and for fiscal 2010 were \$3.9 billion. By comparison, in the 2006-07 biennium, under the prior franchise tax provisions (and with all revenue deposited to General Revenue), collections were \$5.7 billion.

The extensive modifications to the tax became effective for tax reports due in calendar 2008 and later. The types of businesses subject to the tax has been extended beyond corporations and limited liability companies to include most partnerships, business associations, trusts, and other businesses with liability protection. The extension of taxability to a broader range of businesses, including the affiliates of those businesses, added approximately 180,000 taxpayers, as reflected in the 2009 tax reports.

The former franchise tax was collected under the provisions in effect since 1992. Those provisions required all corporations, including subchapter S corporations, banks, savings and loan institutions, and limited liability companies doing business in Texas, to calculate their tax liability with reference to two tax bases: taxable

capital (net worth) and earned surplus. Earned surplus was essentially a company's modified federal taxable income apportioned to Texas. The tax rates were 0.25 percent on taxable capital and 4.5 percent on earned surplus. However, the earned surplus tax was paid only to the extent that it exceeded the tax liability on net worth. In practice, taxpayers paid the higher of their net worth tax or their earned surplus tax.

The base for the revised franchise tax is known as "taxable margin," defined as the smallest of three calculated values: (1) 70 percent of total revenue; (2) total revenue less the cost of goods sold; or (3) total revenue less compensation. Taxpayers with less than \$10 million in total revenue may opt to use an "EZ" calculation that applies a 0.575 percent rate to total revenue apportioned to Texas. A firm's tax base is apportioned to Texas using the ratio of receipts in Texas to receipts everywhere. The tax rate is 1.0 percent for a business not primarily engaged in wholesale or retail trade. For a business primarily engaged in wholesale or retail trade, the tax rate is 0.5 percent.

Provisions existed under the prior tax to provide tax relief to small businesses. Taxpayers with gross receipts of \$150,000 or less, or whose calculated tax was less than \$100, owed no tax. Such provisions for small businesses are a component of the modified franchise tax, as well. A taxpayer whose calculated liability is less than \$1,000 owes no tax. Initially, taxpayers with total revenue of \$300,000 or less had no tax liability, and tax discounts were provided to taxpayers with total revenue between \$300,000 and \$900,000. Under the provisions of HB 4765, 81st Legislature, Regular Session (2009), for 2010 and 2011, the revenue threshold below which no tax is owed was raised to \$1 million. That threshold is set to change to \$600,000 beginning in 2012.

In the package of 2006 legislation that created the current franchise tax, HB 2 created the Property Tax Relief Fund, which would be funded in part by portions of franchise and other tax revenues. For the franchise

tax, the dedicated portion is the amount by which the total revenues collected under the new tax exceed the amount that would have been collected under the old tax. During the first three collection periods, the franchise tax has contributed \$4.3 billion to the Property Tax Relief Fund.

The \$3.9 billion collected in fiscal 2010, deposited to both General Revenue and the Property Tax Relief Fund, was 9.3 percent below the \$4.3 billion brought in during 2009, a decline mostly due to the recessionary economic conditions that existed during the period over which tax liability was calculated. In addition, as noted above, the 81st Legislature changed the amount of tax relief to small businesses by increasing the total revenue amount at which no tax is owed. That tax relief will continue in 2011, but is scheduled to be reduced beginning in 2012. The slowly improving economy will contribute to a gain in 2011 revenue, to just over \$4 billion. For the 2010-11 biennium, total franchise tax revenue is estimated to be \$7.9 billion, 9.5 percent below the 2008-09 amount. The biennial contribution to the Property Tax Relief Fund will be \$2.6 billion, 16.3 percent below the 2008-09 amount.

For the upcoming 2012-13 biennium, an improving economy and a reduced small business provision will combine to produce an 11.3 percent gain in total franchise tax revenue to \$8.8 billion. The contribution to the Property Tax Relief Fund is expected to grow by 15.0 percent to \$2.9 billion.

The 80th Legislature (in HB 3928, 2007) established a Business Tax Advisory Committee (BTAC) to assist it in evaluating the new tax. The first BTAC report was presented to the 81st Legislature in January 2009. Key issues covered in the report included the relative shares paid by industry type and business size, and tax incidence under the new and old taxes. The second BTAC report was presented December 13, 2010. A third and final report is scheduled for the 83rd Legislature in January 2013.

### **Motor Vehicle Taxes**

The state's principal motor vehicle taxes consist of the motor vehicle sales and use tax, the motor vehicle rental tax, and the manufactured housing sales and use tax. As with other sales taxes, motor vehicle sales tax collections respond to changes in the state's economy and reflect variations in the price and in the number of vehicles sold, rented and leased.

The fear of default in the automobile industry became reality with the Chapter 11 bankruptcy filings of Chrysler LLC (April 30, 2009), and General Motors (June 1, 2009). These actions, as well as credit tightening and the ongoing national recession, had the effect of stalling motor vehicle purchases. As a result, motor vehicle sales tax collections in May 2009 dropped to a level not seen since February 1998. Vehicle owners and potential buyers grappled with warranty and service issues, as well as the closing of 789 Chrysler dealerships and 900 General Motors dealerships nationwide.

Elements of the federal government's economic stimulus program were targeted to this industry. The Car Allowance Rebate System, popularly known as "Cash for Clunkers," resulted in some Texas consumers trading in their qualifying (older) vehicles, for newer, more fuel efficient vehicles. Most of the motor vehicle tax revenues generated by those sales were collected in September 2009.

The economic recession's impact on motor vehicle sales tax collections was felt from mid-fiscal 2008 through mid-fiscal 2010, a period of 24 continuous monthly year-over-year declines. That string was broken in March 2010, and year-over-year collections have grown in all but one month since. The recovery was aided by postponed fleet purchases now occurring, and by households needing replacement vehicles, but moderated by consumers buying smaller, more fuel efficient and less expensive crossover-type vehicles instead of large cars and sport utility vehicles.

Fiscal 2010 General Revenue-related motor vehicle tax collections were \$2.6 billion, 2.0 percent above fiscal

2009 collections. Last year's sales growth continues in fiscal 2011, reflecting, again, the pent-up business and household demand and the improving employment and credit conditions.

Through fiscal 2011 and the next biennium, the number of vehicle buyers is expected to grow because of the demand for replacement vehicles and increases in discretionary income. This revenue estimate, however, assumes the economy is unlikely to return—in the near future—to the motor vehicle sales and resultant sales tax collections, associated with both households and businesses, that were seen in the middle portion of the 2000s. As such, fiscal 2011 motor vehicle sales and rental tax revenues are expected to reach \$2.7 billion. Collections are expected to grow to \$2.8 billion in fiscal 2012 and to \$3.0 billion in fiscal 2012.

For the 2012-13 biennium, motor vehicle sales and rental taxes are expected to generate \$5.8 billion, up 8.8 percent from the \$5.3 billion collected in 2010-11.

### **Oil and Natural Gas Severance Taxes**

The taxes in this group consist of the oil production tax, levied at 4.6 percent of value; the natural gas tax, levied at 7.5 percent of value; and the oil regulation tax, levied at 3/16th of one cent per barrel of oil produced in the state.

Severance tax collections are the product of two factors: production and price. Texas oil production peaked almost 40 years ago in 1972, when calendar year production reached 1.26 billion barrels. Since then, the trend in production volumes has been downward, falling to 349 million barrels in calendar 2009.

In January 2002, the average taxable oil price was \$17.54 per barrel. From there oil prices steadily moved on a long-term upward path, which ended when they dramatically, and briefly, spiked in June 2008 at an all-time monthly high of \$131.20 per barrel. At that point, prices began a precipitous decline to \$32.65 by February 2009, a level last seen in 2004. This price decline

was the product of a strengthening dollar, a deepening credit crisis and looming recession, slowing demand, and growing excess supply. Prices eventually recovered to average \$72.75 in fiscal 2010, 21 percent above the fiscal 2009 average price of \$60.03.

Fiscal 2009 oil production and regulation tax revenues were \$885 million, 38 percent lower than the \$1.4 billion collected in fiscal 2008, which is an all-time record surpassing the previous record set in 1982. Fiscal 2010 collections increased by 14 percent to \$1.0 billion. The annual constitutional transfer of oil production tax revenues to the Economic Stabilization Fund will occur in both fiscal 2010 and 2011, as well as 2012 and 2013.

The severe U.S. economic and financial downturns may be easing, but the national economy has not yet returned to health; demand for oil is expected to be stable, and oil price levels should be as well through the 2012-13 biennium. The average taxable oil price for fiscal 2011 is estimated at \$70.73 per barrel. For fiscal 2012, the price is expected to decline slightly to \$67.97, then rise to \$70.04 in fiscal 2013 in response to modest increases in demand resulting from worldwide economic recovery. Because of the continuing trend of production declines and expected static prices in the near term, oil production and regulation taxes will generate \$1.9 billion in revenue for 2012-13, compared to \$2.0 billion in 2010-11, a 4.1 percent decline.

Taxable natural gas prices remained low throughout the 1980s and 1990s, holding near \$2 per Mcf (thousand cubic feet). Following the upward trend in crude oil prices, natural gas prices began to rise rapidly during the second half of fiscal 2000. In that year the average taxable price was \$2.59 per Mcf, and in fiscal 2008 the average price reached \$7.35, an average annual increase of 14 percent. In July 2008 the taxable price peaked at an all-time *monthly* high of \$11.22, but fell by more than two-thirds by the end of that fiscal year.

As the U.S. and world economies cooled, taxable natural gas prices fell in fiscal 2009 (to an average of \$4.98

per Mcf) and 2010 (to \$4.10). Production in those years remained strong while demand was weak. Natural gas in storage reached more than 3.8 trillion cubic feet (Tcf) in both fiscal 2010 and 2011. As the economy slowly improves and demand rises, and with storage and production levels remaining fairly stable, fiscal 2011 taxable prices are expected to remain low at \$3.82 per Mcf, then rise to \$3.93 per Mcf in fiscal 2012.

With the accelerated development of the Barnett Shale in North Texas, natural gas production has been on an upward path since 2006 and exceeded seven Tcf in both 2008 and 2009, levels not seen since the 1970s. With improving rig availability, gains in efficiency, and technological advances in horizontal drilling and fracturing, production costs have declined to levels that have favored shale wells (with potentially high production volumes) over conventional wells. In addition, with oil prices commanding a premium over natural gas, the development of natural gas plays rich in liquids, such as the Eagle Ford shale in South Texas, has accelerated in spite of soft natural gas prices. While natural gas production from the Barnett Shale may have reached a plateau, enhanced production from the Eagle Ford Shale and the Granite Wash Tight Sands region in Texas and Oklahoma are in their early stages and both areas present great future potential.

In addition, the production of natural gas from shale formations such as Haynesville (Louisiana and East Texas) and Marcellus (along the eastern seaboard, including parts of West Virginia, Pennsylvania, and New York states) is expected to become a larger portion of overall U.S. energy production.

Natural gas tax collections in the 2012-13 biennium—with an expectation of stable production and price levels and the continuation of refunds related to taxes previously paid on high-cost or difficult to extract natural gas—should total \$1.5 billion, compared to \$1.3 billion in 2010-11, a 10.6 percent increase.

### *Insurance Taxes*

Most of the insurance purchased in Texas is subject to two types of taxes: insurance premium taxes and insurance maintenance taxes. While the tax base for each is generally the amount of gross premiums written, the rates vary depending upon the type of insurance.

Insurance maintenance taxes are used to fund regulatory costs; the tax rates are adjusted annually based on each regulatory agency's appropriation and unexpended balance from the previous year. Insurance premium tax collections are deposited into the General Revenue Fund and are available for general purpose spending. The rate for life, accident, and health insurance is 1.75 percent; the rate for property and casualty insurance is 1.6 percent; the rate for title insurance is 1.35 percent; and the rate for unauthorized, surplus lines and independently procured insurance is 4.85 percent.

Tax revenue from all insurance taxes for all funds totaled \$2,580 million in the 2006-07 biennium and \$2,707 million in 2008-09, an increase of 4.9 percent. For the 2010-11 biennium, revenues are projected to total \$2,674 million, a 1.2 percent decrease from the previous biennium. These relatively small changes in biennial tax collections mask more substantial annual changes: collections peaked in fiscal 2008 at \$1.5 billion (up 7.7 percent), but then fell to \$1.3 billion in fiscal 2009 (down 13.3 percent).

The fiscal 2009 decrease in insurance tax revenue was predominantly due to two factors: Texas Windstorm Insurance Association (TWIA) assessment credits and Certified Capital Company (CAPCO) premium tax credits. Following Hurricanes Dolly in July 2008 and Ike in September 2008, TWIA imposed assessments of \$230 million on insurers. Twenty percent (\$46 million) of these assessments were available as premium tax credits in fiscal 2009. Another \$46 million in premium tax credits will be available each year through fiscal 2013. In addition to the new Ike-related assessment credits, fiscal 2009 was also the beginning of the first period of CAPCO invest-

ment premium tax credits, pursuant to legislation passed in 2001 and 2003. These credits, available at a rate of \$50 million per year, will run through fiscal 2016.

Despite ongoing CAPCO and Ike-related premium tax credits, insurance tax revenue will continue to grow. For the 2012-13 biennium, insurance tax revenue is expected to be \$2.8 billion, an increase of 6.2 percent over 2010-11.

### *Tobacco and Alcoholic Beverage Taxes*

On January 1, 2007, pursuant to HB 5, 79th Legislature, 3rd Called Session (2006), the cigarette tax rate increased by one dollar to a total of \$1.41 per pack of 20 cigarettes. The additional revenue attributable to that rate increase was dedicated to the Property Tax Relief Fund, while the revenue from the cigarette tax at the former rate (\$0.41 per pack) remains dedicated to the General Revenue Fund. This tax rate increase, along with rate increases for the federal cigarette tax, ongoing health concerns, and the increasing number of restrictions on public smoking, have exerted a significant downward force on cigarette consumption.

Effective September 1, 2009, the tax on tobacco products other than cigarettes and cigars (snuff; and chewing, pipe and roll-your-own tobacco) was converted from an ad valorem rate to a rate based on the manufacturer's list weight. The tax rate in fiscal 2010 was set at \$1.10 per ounce, while the prior ad valorem rate was 40 percent of the manufacturer's list price. The rate is set to increase by 3 cents per ounce every September through 2012 when the rate will reach \$1.19 per ounce. The rate will increase once more in December 2013 to a final rate of \$1.22 per ounce. The additional revenue attributable to the weight-based taxation method is dedicated to the Physician Education Loan Repayment Program Account in the General Revenue Fund.

In the 2010-11 biennium, collections from the cigarette and cigar and tobacco products taxes are expected to total \$2.8 billion for all funds, 5.2 percent below the

collections in the previous biennium. For the 2012-13 biennium, collections are expected to decline by 4.6 percent, to \$2.7 billion. Of this amount, \$1.1 billion will be available for General Revenue-related spending, while \$1.6 billion will be dedicated to the Property Tax Relief Fund and \$60 million will be dedicated to the Physician Education Loan Repayment Program.

Texas imposes several taxes on alcoholic beverages. The taxes on beer, liquor, wine, malt liquor (ale), and airline/passenger train beverages are based on the volume or quantity sold, while the tax on mixed beverages, levied at 14 percent of gross receipts, is value-based.

The mixed beverage tax accounts for over three-quarters of alcoholic beverage tax revenue. Collections from the mixed beverage tax weakened considerably in fiscal 2009 due to the economic recession, but is expected to rebound slowly in the 2010-11 biennium to reach \$1,253 million, 4.6 percent above 2008-09 collections. In the 2012-13 biennium, collections will increase to \$1,332 million, an increase of 6.4 percent over the previous biennium.

Combined alcoholic beverage tax collections are expected to be \$1.7 billion in 2012-13, up 6.0 percent from the \$1.6 billion 2010-11 estimate.

### *Motor Fuels Taxes*

In fiscal 2010, gasoline tax collections rose modestly by 0.7 percent over fiscal 2009. The growth occurred as Texas began to recover from the recession and as the price of gasoline had generally been declining. Diesel fuel tax collections fell by 0.9 percent in fiscal 2010, due largely to the continuing weak nature of the economy's transportation sector. However, beginning in April 2010, and continuing for the rest of that fiscal year, gasoline and diesel fuel tax revenues rose every month relative to the same month one year earlier.

After deducting for transfers to the State Highway Fund, motor fuels tax revenues for the 2010-11 biennium are expected to rise by 0.2 percent to \$1,635

million, sharply lower than the 1.0 percent increase in 2008-09. As the state's economy recovers, and with the expectation that fuel (and crude oil) prices will remain below their 2008 peak, the corresponding General Revenue-related motor fuels amount is expected to rise by 4.1 percent, to \$1,702 million in 2012-13.

### *Utility Taxes*

In addition to other taxes, investor-owned utilities pay several state utility taxes on their gross receipts. The gas, electric, and water utility tax is the largest, comprising roughly 84 percent of the state utility taxes revenue. General Revenue-related revenues from this source are expected to reach \$824 million in the 2010-11 biennium, a 5.5 percent decline when compared to the \$873 million collected in 2008-09. Looking forward to 2012-13, collections are expected to rebound by 9.5 percent to \$902 million owing to a growing economy and stable-to-rising commodity and energy prices.

Public utility gross receipts assessments, paid by electric and telecommunications utilities, will grow by 2.2 percent in the 2010-11 biennium, with higher growth expected in 2012-13 of 10.9 percent. Gas pipeline tax revenues are expected to increase by 7.8 percent in 2010-11 due to firm natural gas demand and stable prices in fiscal 2011. Following the rise in 2010-11, these revenues will increase by a robust 21.2 percent in 2012-13, as the economy moves fully into recovery.

Overall, combined utility tax revenues are expected to show a 4.2 percent biennial decline in 2010-11, yielding \$979 million. The outlook for 2012-13 will shift, with an expected increase of 10 percent to \$1.1 billion for total utility tax receipts, due to rising population and employment, as well as increasing national and state economic growth.

### *Hotel Occupancy Tax*

Following the extraordinary 29.5 percent growth rate recorded in the 2006-07 biennium, hotel occupancy

tax revenues grew by 10.2 percent to \$715 million in 2008-09, with collections slowing in the second half of the biennium as the economy weakened. As tourism and business-related travel declined, collections in both fiscal 2009 and 2010 decreased, the first back-to-back annual declines since fiscal 2002-03. Revenue collections in 2010-11 are expected to decrease by 5.5 percent to \$676 million. With the state and national economies improving in fiscal 2011, revenues will rebound in the 2012-13 biennium, yielding a 9.3 percent increase resulting in biennial collections of \$738 million.

### *Inheritance Tax*

The Inheritance tax is levied on estates that are required to file a federal estate tax return. In the late 1970s, the Texas Legislature revised the laws governing the Inheritance tax to establish a \$200,000 estate exemption that gradually increased to \$300,000 by 1985. HB 325 (67th Legislature, Regular Session, 1981) revised the tax as a “piggy-back” on the federal estate tax, making the Texas tax equal to the federal credit allowed for state inheritance taxes as computed on the federal estate tax return.

In 2001, Congress passed H.R.1836, the Economic Growth & Tax Relief Reconciliation Act, which incrementally phased out the state tax until it was fully eliminated for deaths occurring in calendar 2005 and beyond, and fully repealed the federal tax in 2010.

In December, 2010, Congress passed, and the President signed, a bill that for calendar 2011 and 2012 imposes the tax on estates valued at over \$5 million for individuals (instead of the \$1 million threshold in current law) and sets the tax rate at 35 percent (instead of 55 percent). Moreover, the bill excludes any mention of the state tax credit, which means for states like Texas that “piggy-back” on the federal tax there will be no state share. This bill’s provisions expire at the end of calendar 2012, and without further legislation the estate tax would revert to its pre-2001 form. In that

case Texas could begin to see inheritance tax collections in fiscal year 2014 for deaths occurring in calendar 2013.

### *Other Taxes*

The state’s remaining taxes include taxes on such disparate subjects as cement, sulphur, coin-operated machines, oil-well services, attorneys, and bingo rental receipts. Other tax collections are expected to generate \$158 million in General Revenue-related collections in the 2012-13 biennium, up 17.4 percent from the \$135 million collected in 2010-11.

### **Non-Tax Revenue**

In addition to the \$67.4 billion in tax revenue estimated for the 2012-13 biennium, the state’s General Revenue-related funds are expected to receive \$10.0 billion in non-tax revenue. This represents a 2.9 percent increase from the \$9.7 billion in non-tax receipts in 2010-11. Non-tax revenues flow from, among other sources, state lottery proceeds; licenses, fees, fines, and penalties; and, as discussed immediately below, the total return distribution from the Permanent School Fund to the Available School Fund.

### *Interest and Investment Income*

General Revenue-related interest and investment income in the 2012-13 biennium is expected to increase by 36.1 percent to \$1.5 billion from 2010-11 income of \$1.1 billion. The Permanent School Fund (PSF) traditionally produces most of the investment income accruing to General Revenue-related funds.

In September 2003, voters approved an amendment to the Texas Constitution to change the way funds are transferred from the PSF for use in providing aid to school districts. Under the old system, only earnings from interest and dividend proceeds were transferred. With the change, a disbursement system known as “total return” was put in place. The percentage distribution

rate, or total return, is adopted biennially by the State Board of Education (SBOE).

To help ensure the integrity of the PSF corpus, the 2003 amendment includes a provision governing the size and timing of disbursements, but until fiscal 2010 that provision had never come into play because the value of the corpus had consistently increased.

From October 2007 to October 2008, however, the market value of the PSF fell from \$26.7 billion to \$18.7 billion. Acting pursuant to the above mentioned Texas Constitutional requirement, the SBOE voted to disburse only \$60.7 million from the PSF in fiscal 2010. That vote provided that if the constitution's distribution provision allowed, a "catch up" distribution of \$1.1 billion would be made in fiscal 2011. The PSF market value recovered sufficiently and the \$1.1 billion "catch up" distribution will be made in fiscal 2011.

Given the recovery of the PSF market value the SBOE voted to use a total return of 3.5 percent for 2012-13 resulting in a distribution of \$1.6 billion for the biennium. In addition to this revenue, and upon action by the School Land Board which may or may not have occurred as of the release of this revenue estimate, an additional \$314 million could be available towards certification of the 2012-13 budget.

### *Lottery Proceeds*

In fiscal 2010, overall Texas lottery sales increased by 0.5 percent compared to fiscal 2009. Instant ("scratch-off") game sales dropped by 1.1 percent, and online ("lotto" style) game sales increased by 5.3 percent. The growth in online games was primarily due to increased play in Texas Lotto and the addition of Powerball and Power Play to the mix of online games sold in Texas in fiscal 2010. For all game types combined, Texas lottery sales totaled \$3.7 billion in fiscal 2010, of which \$2.4 billion was paid back to players in prizes and \$1.0 billion was transferred to the Foundation School Fund. Administrative costs to run the Texas lottery are legally

capped at 7 percent, but remain closer to 5 percent in practice. Retailers get a 5 percent commission for sales and receive a bonus for selling tickets that are redeemed for large jackpot amounts.

Having been in operation since fiscal 1992, the Texas lottery is mature, with gradual declines in per capita participation balanced almost evenly by the growth in the population of players. With this balance, transfers to the Foundation School Fund are projected to remain stable at \$2,009 million during the 2012-13 biennium, 0.5 percent more than the \$1,999 million transferred in 2010-11.

### *Remaining Revenues*

In addition to the two revenue sources discussed above, the non-tax revenue category includes, among other revenue sources, licenses, fees, fines, and penalties; the sales of goods and services; land income; contributions to employee benefits; settlements of claims (including tobacco settlement proceeds); unclaimed property; third-party payments from private vendors in the state-federal Medicaid program; and federal payments to the state for treating indigent patients.

In fiscal 1999, Texas began receiving regularly scheduled court settlement payments from tobacco product manufacturers. Beginning in 2000-01, payments were adjusted for changes in the national consumer price index, the settling tobacco companies' U.S. cigarette sales, and those companies' domestic operating profits. In 2012-13, Texas tobacco settlement receipts are expected to total \$867 million, an 8.7 percent decline from the \$950 million expected in 2010-11.

Tobacco settlement payments have been affected negatively by cigarette tax increases imposed by federal, state, and local governments. The resulting higher consumer prices have accelerated the decline in cigarette consumption, reducing the sales volume of the settling cigarette manufacturers and thereby lowering settlement payments.

Revenues from the Disproportionate Share (DSH) and Upper Payment Limit (UPL) programs, which help pay for indigent care at state and local hospitals, are expected to increase to \$648 million in the 2012-13 biennium, a 12.2 percent increase from the \$586 million expected in 2010-11. The state's \$415 million in DSH revenues in the 2010-11 biennium were augmented by \$171 million in UPL revenues. UPL payments (which are based on the generally higher Medicare rate, rather than the Medicaid rate, for procedures performed in the previous year) help reimburse hospitals for the cost of indigent care after a one year delay, and the payments also reduce the un-reimbursed cost of indigent care for DSH payment calculations after a two year delay.

Because of the increasing number and cost of prescriptions, the General Revenue portion of federally-mandated and state-supplemental Medicaid vendor drug rebates is expected to increase by 31.6 percent in the 2012-13 biennium, to a total of \$899 million, compared to the \$683 million expected in 2010-11. Payments from major pharmaceutical manufacturers participating in Medicaid's vendor drug program fell temporarily in 2006 and again in 2007 as Medicare (rather than Medicaid) assumed responsibility for providing prescription drugs to low-income senior citizens. However, after

Medicare's program was fully implemented, these rebates resumed growth in 2008.

## Revenue to All Funds

Revenue to all funds will total \$177.8 billion in the 2012-13 biennium, a 0.3 percent increase from the \$177.3 billion expected for the preceding biennium. In 2012-13, General Revenue-related receipts will total \$77.3 billion, 6.8 percent above the \$72.4 billion in corresponding collections in 2010-11; and dedicated federal income will account for \$70.2 billion, 6.9 percent below the \$75.4 billion expected in 2010-11 (including federal stimulus funds). Most of the federal funds will be used for health and human services, highway construction and maintenance, and public education programs.

A second large source of all funds revenue is the State Highway Fund's share of motor fuels tax revenue. This fund is constitutionally dedicated to activities associated with the state highway system.

In addition, total estimated revenues do not include certain local funds that are appropriated but not deposited into the State Treasury, but they do include certain revenues that are deposited in the State Treasury but not appropriated, such as royalties deposited to the Permanent School Fund. ☺
