# General Information

*Municipal Solid Waste in Texas: A Year in Review* is prepared by the Municipal Solid Waste (MSW) Permits Section, Waste Permits Division. The summary includes data on the types and amounts of waste disposed and processed at permitted and registered MSW facilities. The report also includes an estimate of the state's remaining disposal capacity.

## Reporting Period

Reports from MSW facilities are based on a fiscal year, which runs from September 1 through August 31. All references to 2013 in this annual summary are related to fiscal year 2013 (September 1, 2012, through August 31, 2013).

## Reporting Requirements

In accordance with Title 30 of the Texas Administrative Code (30 TAC), Chapter 330 (Municipal Solid Waste), Subchapter P (relating to Fees and Reporting), MSW facility operators are required to submit an annual report to the Texas Commission on Environmental Quality (TCEQ) covering the types and amounts of waste processed or disposed at a facility.

## Data Sources

The data in this summary are condensed from annual reports submitted by 228 landfills (197 active and 31 inactive) and 238 processing facilities (192 active and 46 inactive). The MSW Permits Section reviewed the data and verified and/or reconciled discrepancies with facility representatives, quarterly report data, and agency records (MSW Records).

Facility reports included:

- operational information (e.g., which counties the facility serves),
- administrative information (e.g., who owns or operates the facility), and
- facility activities (e.g., amounts and types of waste accepted or processed at the facility).

Population data for this summary was obtained from the US Census Bureau's state population estimates<sup>1</sup> found at

<http://www.census.gov/popest/data/counties/totals/2013/CO-EST2013-01.html>

---

# Facility Information

## Landfills

**Type I facilities.** A Type I landfill is the standard landfill for the disposal of MSW. For 2013, 101 of the active landfills (51.3%) were Type I facilities.

**Type IV facilities.** A Type IV landfill only accepts brush, construction and demolition (C&D) waste, and other similar waste that will not putrefy. For 2013, 22 of the active landfills (11.2%) were Type IV facilities. In addition, Type IV landfills managed 9% of the total waste disposed and accounted for 4% of the total statewide remaining capacity. However, these landfills were not distributed evenly across the state; approximately 64% were located in the Houston-Galveston Area Council's region (HGAC-16).

**Arid-exempt (AE) facilities.** Type I and Type IV landfills in relatively dry parts of the state may be permitted as arid-exempt landfills. These landfills are limited in the amount of solid waste they may accept and they are exempt from liner and groundwater monitoring requirements.<sup>ii</sup> In 2013, 70 active landfills (36%) had an arid-exempt authorization. Arid-exempt landfills accounted for 1% of the total waste disposed and 1% of the total statewide remaining capacity.

**Monofills.** In 2013, counties or municipalities with 12,000 or fewer people could obtain a permit by rule under 30 TAC §330.7(i) to dispose demolition waste from properties with nuisance or abandoned buildings into disposal facilities that are owned or controlled by the county/municipality. For 2013, 4 of the state's active landfills (2%) were monofills.

## Landfills Reporting

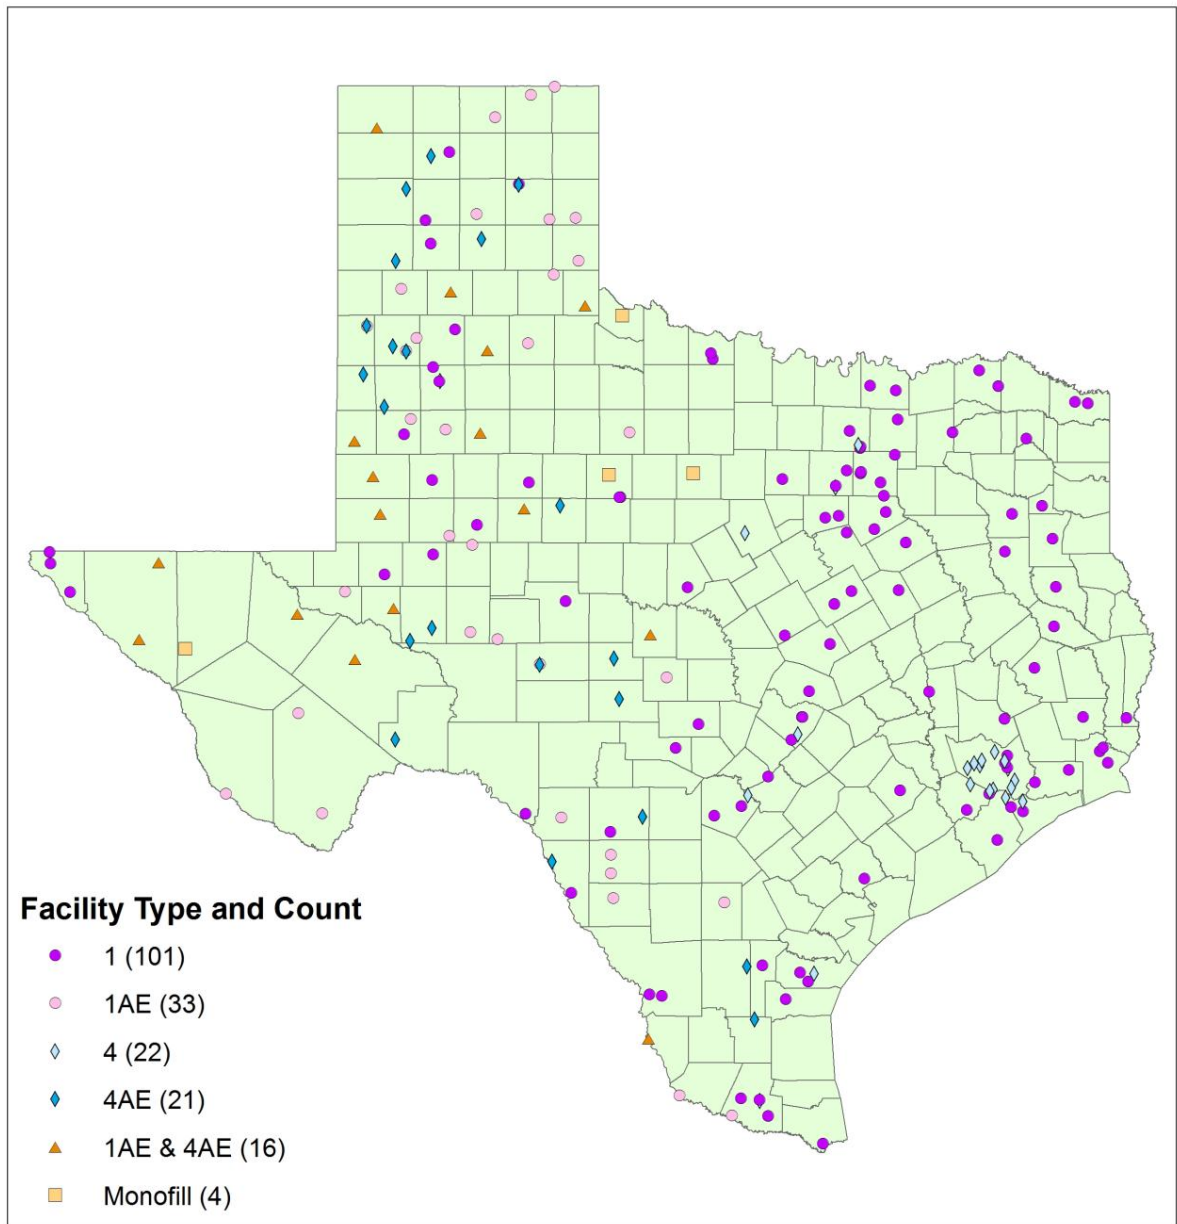

MSW Records indicated that in 2013 there were 237 permitted MSW landfills with a physical activity status of Active, Inactive (previously received waste), or Inactive New (not constructed or have yet to receive waste). Of these, reports were submitted by 228 facilities (197 Active, 18 Inactive, 13 Inactive New). Landfills not reporting were indicated as Inactive according to MSW Records.

Disposal and capacity data were evaluated for all 197 active landfills (Figure 1). Individual facility data for the 2013 active landfills is presented in the "Facility Data for MSW Landfills" section at the end of this report.

---

<sup>ii</sup> Title 30, Texas Administrative Code, Chapter 330, §330.5(b).

Figure 1. Active Texas MSW Landfills in 2013

## Processing Facilities

Permitted and registered MSW processing facilities are classified as Type V or Type IX facilities.

**Type V facilities.** Type V facilities store or process MSW. Processing includes transfer, incineration, shredding, grinding, baling, composting, salvaging, separation, dewatering, or reclamation of MSW. They may be authorized by permit. However, some facilities qualify for authorization by registration if they meet specific requirements identified by statute and rule. A transfer station that includes a material recovery operation, which recovers at least 10% by weight of the incoming waste stream for reuse or recycling, would qualify for a registration.

**Type IX facilities.** A Type IX facility recovers energy, material, or gas for beneficial use, including landfill mining, within or adjacent to a closed landfill, an inactive portion of a landfill, or an active landfill.

## Processing Facilities Reporting

MSW processing facilities are differentiated by sub-types in MSW Records. The breakdown of active facilities that submitted reports for 2013 is summarized in Table 1. For 2013, 192 of the 193 active processing facilities reported.

**Table 1. Active MSW Processing Facilities in 2013**

Facility Type	MSW Records for Active Facilities		Reports Received	
	Permitted	Registered	Permitted	Registered
Autoclave (5AC)	2	2	2	2
Liquid Waste Processor (5GG)	20	7	20	7
Medical Waste Processor (5MW)	2	5	2	4
Composting (5RC)	6	12	6	12
Recycling & Recovery (5RR)	1	1	1	1
Liquid Transfer Station (5TL)	0	5	0	5
Transfer Station (5TS)	31	69	31	69
Waste Incinerator (5WI)	3	0	3	0
Gas Recovery (9GR)	2	25	2	25
<b>Total</b>	<b>67</b>	<b>126</b>	<b>67</b>	<b>125</b>

Note: In the agency database, facility sub-types are identified using Arabic numbers with abbreviations (e.g., 5GG).

The total reported amount of waste processed by Type V facilities in 2013 was 5.95 million tons. Individual facility data for the 2013 active processing facilities is presented in the “Facility Data for MSW Processing Facilities” section at the end of this report.

For the Type IX landfill gas recovery for beneficial use facilities, 15.6 billion cubic feet of gas were processed with 6.13 billion cubic feet distributed off-site. The amount of power generated and used on-site was 256 million kilowatt hours (kWh). The amount of power generated and sold was 440 million kWh. Individual facility data for the 2013 active Type IX landfill gas recovery for beneficial use facilities is presented in the “Facility Data for MSW Facilities Recovering Landfill Gas for Beneficial Use” section at the end of this report.

## Other Information

**Use of scales.** The majority of active MSW landfills (71%) and 54% of the MSW Type V processing facilities reported using scales to measure all or some of their accepted waste or feedstock material in 2013. Facilities without scales (as well as many facilities with scales) also measured accepted waste or feedstock material by volume (i.e., cubic yards).

**Texas municipal solid waste fee.** In 2013, the state changed the MSW fees. As defined in Title 5 (Sanitation and Environmental Quality) Section 361.013(a) of the Texas Health and Safety Code:

*“...the commission shall charge a fee on all solid waste that is disposed of within this state. The fee is 94 cents per ton received for disposal at a municipal solid waste landfill if the solid waste is measured by weight. If the solid waste is measured by volume, the fee for compacted solid waste is 30 cents per cubic yard and the fee for uncompacted solid waste is 19 cents per cubic yard received for disposal at a municipal solid waste landfill. The commission shall set the fee for sludge or similar waste applied to the land for beneficial use on a dry weight basis and for solid waste received at an incinerator or a shredding and composting facility at half the fee set for solid waste received for disposal at a landfill...”*

MSW landfill and applicable processing facility operators collect this required fee as part of the tipping fee they charge their customers. This tipping fee is based on weight or volume, depending upon the type of waste and method of delivery to the facility.

For 2013, the statewide tipping fee rates charged by MSW landfills averaged

- \$31.72 per ton, with 137 facilities reporting;
- \$10.49 per cubic yard for compacted cubic yards, with 47 facilities reporting; and
- \$10.97 per cubic yard for uncompacted cubic yards, with 82 facilities reporting.

For 2013, the statewide tipping fee rates charged by MSW Type V processing facilities averaged

- \$47.63 per ton, with 56 facilities reporting;
- \$0.21 per gallon, with 34 facilities reporting;
- \$0.43 per pound, with 10 facilities reporting;
- \$19.30 per cubic yard for compacted cubic yards; with 18 facilities reporting; and
- \$13.63 per cubic yard for uncompacted cubic yards, with 35 facilities reporting.

**Facility ownership.** MSW facilities in Texas are typically owned by government entities such as cities and counties, or by corporations, and other types of privately held companies. In 2013, MSW Records indicated that 128 of the 197 active landfills (64%) were publicly owned, but represented only 34% of the total reported amount of waste disposed. For the active Type V processing facilities that reported, ownership was more evenly distributed, with 82 facilities publicly owned and 83 owned by private companies. For Type IX landfill gas recovery for beneficial use facilities, 23 of the 27 active facilities were privately owned.

# Waste Information

## Waste Managed by MSW Facilities

**MSW definitions.** MSW is defined under 30 TAC, Chapter 330 (Municipal Solid Waste), Subchapter A (General Information) as “solid waste, resulting from or incidental to municipal, community, commercial, institutional, and recreational activities, including garbage, rubbish, ashes, street cleanings, dead animals, abandoned automobiles, and all other solid waste other than industrial solid waste.” Industrial solid waste is defined and regulated under 30 TAC, Chapter 335 (Industrial Solid Waste and Municipal Hazardous Waste).

The Texas definition of MSW refers to the source, rather than the constituents or properties of the waste. Retailers, repair services, and the general public are municipal generators; manufacturers are industrial solid waste generators.

It is worth noting that the Texas definition of MSW is more encompassing than that of the United States Environmental Protection Agency (USEPA) and several other states. While the USEPA definition does not include C&D waste and municipal sludge, the Texas definition does. Therefore, the per capita MSW disposal and generation rates for Texas may appear to be higher than those of other states.

**Waste classifications.** Texas defines industrial solid wastes as separate and distinct from MSW. Industrial waste may be defined as hazardous or non-hazardous. MSW facilities may not accept regulated hazardous waste. Most MSW facilities may accept Class 2 and Class 3 non-hazardous industrial solid waste. Only facilities with dedicated Class 1 cells, which have more protective design requirements, may accept Class 1 non-hazardous waste. The non-hazardous industrial solid wastes are defined by classes.

- **Class 1:** industrial non-hazardous waste that, based on its constituents and properties, may pose a substantial danger to human health or the environment if it is not properly managed. There are special handling requirements for Class 1 wastes at MSW landfills. An example of Class 1 waste could be industrial sludge containing metals or organics.
- **Class 2:** industrial solid waste that cannot be described as hazardous, Class 1 non-hazardous, or Class 3. Activated sludge from industrial biological wastewater treatment plants are typically Class 2 wastes.
- **Class 3:** inert and essentially insoluble industrial solid wastes that do not readily decompose, such as bricks or concrete from an industrial facility.

It should be noted that waste classified as hazardous by federal rules cannot become non-hazardous through dilution. The Texas classification of Class 1 non-hazardous industrial waste is based on the leachable concentrations of constituents of concern found in the waste.

## Disposal Information

**Waste types.** While the majority of MSW disposed in Texas is residential and commercial waste, landfills have difficulty in estimating the amounts received for each waste type. For the purpose of this annual summary, residential and commercial waste are combined and defined as “municipal.” In 2013, municipal waste accounted for approximately 66% of the total waste disposed at MSW landfills. At 17%, construction and demolition waste was the second largest waste type disposed. “Additional Wastes” included, but was not limited to: tires, medical waste, litter, grease trap waste, and grit trap waste.

**Waste sources.** In 2013, 87% of MSW disposed in Texas was generated within the state. A total of 3,097 tons was received from Mexico, as reported by five landfills. In addition, a total of 263,879 tons was received from out-of-state, as reported by fourteen landfills. States served included Arkansas, Colorado, Kansas, Louisiana, New Mexico, and Oklahoma. There is no requirement for reporting the amount of MSW that is exported from Texas.

Figure 2 and Table 2 illustrate the types and estimated amounts of waste disposed in Texas MSW landfills for 2013.

**Figure 2. Types and Amounts of MSW Landfilled in 2013**

Note: Class 1 NHIW waste is included in “Contaminated soil” and “Additional Wastes” categories.

## Waste Information

**Table 2. Types and Amounts of MSW Landfilled in 2013**

Waste Type	Number of Landfills Accepting Waste	Tons Disposed	% of Total Tons Disposed
Municipal	154	20,044,610	65.57
Brush	59	241,102	0.79
Construction/Demolition	149	5,334,017	17.45
Litter	20	34,038	0.11
Class 1 NHIW <sup>1</sup>	15	330,401	1.08
Classes 2 and 3 NHIW <sup>1</sup>	50	1,562,649	5.11
Incinerator ash	6	4,224	0.01
Medical waste	12	27,091	0.09
CESQG <sup>2</sup>	1	24,883	0.08
RACM <sup>3</sup>	36	57,782	0.19
Non-RACM <sup>3</sup>	42	47,882	0.16
Dead animals	76	13,954	0.05
Sludge	86	1,544,261	5.05
Grease trap waste	12	8,410	0.03
Grit trap waste	21	13,249	0.04
Septage	7	60,151	0.20
Contaminated soil	39	614,951	2.01
Tires <sup>4</sup>	28	48,531	0.16
Pesticides	0	0	0.00
Used Oil Filter	2	431	<0.01
Other	40	557,123	1.82
<b>Total</b>		<b>30,569,741</b>	<b>100</b>

1. NHIW (Non Hazardous Industrial Waste)

2. CESQG (Municipal Hazardous Waste from Conditionally Exempt Small Quantity Generators.)

3. RACM (Regulated Asbestos-Containing Material.)

4. Tires – Only split, quartered, or shredded tires may be disposed in a landfill.

Note: Descriptions for several of the waste types listed in Table 2 are provided at the end of this report.

# Capacity Information

**Per capita rate.** In 2013, total disposal of MSW in the state was approximately 30.57 million tons. Using the state population estimate<sup>i</sup> of 26,448,193, the per capita landfill disposal rate in Texas was 6.33 pounds per person per day, which is slightly lower than the 2012 rate of 6.37 pounds. During this period, the state’s population increased 1.5%.

Figure 3 displays a graphic representation of disposal amounts and per capita rates over time. For more detailed information, please see the “Historical Data for MSW Landfills in Texas” table on page 23 of the report.

**Figure 3. Texas Total and Per Capita for MSW Landfill Disposal**

<sup>i</sup>Table 1. Annual Estimates of the Resident Population for Counties of Texas: April 1, 2010 to July 1, 2013; Source: U.S. Census Bureau, Population Division; Release Date: May 2013; <http://www.census.gov/popest/data/counties/totals/2013/CO-EST2013-01.html>

**Landfill capacity.** The total remaining MSW landfill capacity in the state at the end of 2013 was 2.79 billion cubic yards. Based on reported compaction rates, this volume would hold 1.88 billion tons of waste and serve for 62 years.

Table 3 summarizes the remaining capacity for all active MSW landfills by facility type. The analyses in this summary are based on the assumptions that no new landfill expansions or new permits will be issued and that the 2013 population and disposal amounts will remain constant.

**Table 3. Disposal Amounts and Remaining Capacity by Facility Type**

Facility Type	Number of Landfills	Disposal (Tons)	Remaining Capacity (Tons)	Remaining Capacity (Years)*
I	101	27,538,008	1,781,136,892	65
IV	22	2,693,328	80,810,354	30
IAE	33	173,257	9,772,951	56
IVAE	21	38,644	2,257,551	58
IAE and IVAE	16	118,144	6,621,163	56
Monofill	4	8,360	191,286	NA
<b>All types</b>	<b>197</b>	<b>30,569,741</b>	<b>1,880,790,197</b>	<b>62</b>

\* Average, assuming the 2013 disposal rate of 30.57 million tons per year.

NA – Not applicable. These facilities are authorized through a renewable five-year permit by rule.

**Growth and attrition.** According to submitted data, statewide capacity increased in 2013. The resulting net capacity increased by approximately 140.84 million tons (roughly 154 million cubic yards) or 8.09% from the statewide 2012 capacity.

**Statewide distribution.** In Texas, there are 24 Regional Planning Commissions, also known as Councils of Governments (COGs), responsible for MSW management planning on a regional basis (Figure 4).<sup>ii</sup> Although remaining capacity was not evenly distributed, the state appeared to have an adequate reserve of landfill capacity in 2013 (Table 4).

The Central Texas COG (CTCOG -23) indicated the least amount of remaining capacity with 18 years. The South Texas Development Council region (STDC-19) capacity increased from 11 years in 2012 to 127 years in 2013 with the opening of the Ponderosa Regional Landfill (Permit No. 2286). Landfill capacity also increased from 24 years to 104 years in the Lower Rio Grande Valley Development Council (LRGVDC-21) region with the opening of the La Gloria Ranch Landfill (Permit 2348).

# Trends

**Landfill closures.** In 1987, there were 763 authorized MSW landfills accepting waste. The reduction in the number of active landfills between the late 1980's and mid 1990's was primarily due to the stringent requirements of the Federal Resource Conservation and Recovery Act (RCRA) Subtitle D. However, since the late 1990s, this decreasing trend has stabilized, suggesting a continued move away from smaller community landfills and toward larger regional landfills.

**Capacity reserve.** From 1986 to the mid-1990s, the state's reserve capacity for MSW disposal was less than 22 years. The current reserve capacity for disposal is approximately 62 years (Figure 5). The increasing reserve capacity trend is attributed to an expansion in the available volume of permitted disposal capacity and to improvements in compaction and diversion. In 1986, the average compaction rate was approximately 650 pounds of waste per cubic yard, and the 2000 average was approximately 1,000 pounds per cubic yard. The 2013 average compaction rate was calculated as 1,114 pounds per cubic yard.

**Figure 5. Number of MSW Landfills and Remaining Capacity**

**Landfill size.** In addition to improvements in the operation of MSW landfills, size and service areas for landfills have continued to grow. In 1986, the statewide average landfill size was 50 acres with an average depth of 6.5 feet and an average height of 13 feet. In 2013, the statewide average landfill size was 240 acres with an average depth of 36 feet, and an average height of 83 feet.

Table 5 provides the breakdown of the permitted heights for MSW landfills in 2013. Two landfills had a permitted height over 300 feet; Abilene Regional Landfill (Permit No. 1469A; WCTCOG-7) and Greenwood Farms (Permit No. 1972A; ETCOG-6).

**Table 5. Permitted Heights for MSW Landfills in 2013**

Permitted Height	Number of Landfills	% of Landfills
<100 ft	122*	63
100 ft – 200 ft	52	27
200 ft – 300 ft	17	9
>300 ft	2	1

\* Permitted heights for monofills are not included in the report.

**Counties served.** The 197 active MSW landfills in the state reported the number of counties they served in 2013 (Table 6). Service to more than one county was provided by 129 landfills (66%). Table 7 shows the number of active landfills in each Texas County. Counties with a change in number of landfills from 2012 have been indicated.

**Table 6. Number of Texas Counties Served by MSW Landfills in 2013**

Number of Counties Served	Number of Landfills
1	68
2 – 5	65
6 – 10	44
11 – 15	9
16 – 20	7
>20	4

# MSW Recycling

**Recycling.** Public and private programs supporting the state’s goals for reducing, reusing, and recycling assist in preserving disposal capacity in landfills. Throughout the state, paper, glass, aluminum cans, plastic, scrap metal, wood, and numerous other materials are recycled every day. Information on TCEQ’s promotion of recycling programs can be found on the agency’s website at <http://www.tceq.texas.gov/p2/recycle/recycling.html>.

Currently, the effect of recycling in Texas is difficult to measure. An accurate statewide recycling rate cannot be obtained because there is no requirement for reporting quantities of materials diverted from the solid waste stream before reaching the gate at MSW landfills or processing facilities. City curbside recycling programs are an example of when materials are diverted prior to reaching a disposal or processing facility.

**Television recycling.** In 2011, the state established the Texas Recycles TVs Program. Beginning January 31, 2014, television (TV) recyclers were required to report the total weight or volume of TVs received, recycled, and disposed of in the preceding calendar year (CY) on an annual basis. In CY 2013 (January 1, 2013 – December 31, 2013), Texas TV recyclers received approximately 22 million pounds, recycled 21 million pounds, and disposed of 4300 pounds of covered television equipment. The definition of a “TV recycler” and of “Covered television equipment” is provided in the “MSW Waste and Material Type Descriptions” section at the end of this report.

**Composting.** In Texas, composting is a method used for recycling organic materials. Permitted and registered MSW facilities are allowed to accept bulking agents and feedstock materials such as municipal sewage sludge, positively-sorted and source separated organic materials, disposable diapers, source-separated yard trimmings, clean wood material, vegetative material, paper, manure, meat, fish, dairy, oil, grease materials, or dead animal carcasses. In addition, permitted facilities are authorized to accept mixed municipal solid waste and grease trap waste. In 2013, a total of 430,285 tons of organic material was composted as reported by 8 landfills and 17 composting facilities.

**Diversions.** Permitted and registered MSW facilities report the amount of waste that enters a facility's gate, but is then diverted from the solid waste stream as recyclable materials. In 2013, over 1.2 million tons of materials were reported as diverted from MSW facilities for recycling or reuse: a total of 919,020 tons, as reported by 111 landfills; and a total of 372,218 tons, as reported by 83 processing facilities, with transfer stations representing the majority.

Table 8 presents the various material streams and estimated amounts reported as diverted by MSW facilities in 2013. It is noted that data in the table represents only the amount of recyclable material leaving a disposal or processing facility and may or may not include the numbers reported by recycling facilities, such as composting and TV recycling facilities.

**Table 8. Types and Amounts of Diverted Materials**

<b>Material Type</b>	<b>Tons Diverted</b>	<b>% of Total Tons Diverted</b>
Yard Waste or Brush	396,780	30.73
Metal	53,739	4.16
Glass	20,332	1.57
Plastics	10,176	0.79
Construction/Demolition Waste	312,881	24.23
Paper/Cardboard	128,136	9.92
Electronic Materials	961	0.07
White Goods	1,122	0.09
Tires	9,900	0.77
Automotive	3,396	0.26
Shingles	6,326	0.49
Used Oil	827	0.06
Unclassified Materials	346,663	26.85
<b>Total</b>	<b>1,291,239</b>	<b>100</b>

Note: Descriptions for several of the material types listed in Table 8 are provided at the end of this report.

# Historical Data for MSW Landfills in Texas

Year	Waste Disposal (Tons)	State Population	Per Capita Disposal*	Number of Active Landfills	Remaining Capacity (Cubic Yards)	Remaining Capacity (Tons)	Remaining Capacity (Years)
1988	18,114,295	16,668,639	5.95	750	1,162,374,628	377,771,754	21

## Facility Data for MSW Landfills

The maps and tables included in this section represent the active MSW landfill data reported for 2013. The maps and tables are organized by COG region and county. All values were rounded to the nearest whole number.

### Key for Landfill Data Tables

Column Heading	Description
Type	Facility types are identified by Arabic numbers with applicable abbreviations (e.g., 1AE) in the agency database
2013 Tons	Total Tons Landfilled in Fiscal Year 2013
Rem Yds	Remaining Landfill Capacity in Cubic Yards
Rate	Reported Compaction Rate at the Landfill in Pounds per Cubic Yards
Rem Tons	Remaining Landfill Capacity in Equivalent Tons (based on reported landfill compaction rate)
Rem Yrs	Remaining Landfill Capacity in Years (facility's reported data, which is either an estimate where appropriate or on permit volumes and compacted waste acceptance rates)
NA	Not applicable

# Facility Data for MSW Processing Facilities

The maps and tables included in this section represent the active MSW processing facilities data reported for 2013. The maps and tables are organized by COG Region and county. All values are rounded to the nearest whole number.

## Key for Processing Facilities Data Tables

Type	Description
Type	Facility sub-types are identified by Arabic numbers with applicable abbreviations (e.g., 5TS) in the agency database
5AC	Medical waste autoclave facility
5GG	Liquid waste (i.e., grease trap waste, grit trap waste, sludge, septage) processing facility
5MW	Medical waste processor
5RC	Mixed waste composting facility
5RR	Materials recovery facility (MRF)
5TL	Liquid Transfer Station
5TS	Transfer station
5WI	Incinerator (no electrical power generation)

2013 Tons - Total tons handled in fiscal year 2013 in terms of major permitted activity (e.g., for a transfer station, total tons transferred; for an incinerator, total tons incinerated).

# Facility Data for MSW Facilities Recovering Landfill Gas for Beneficial Use

**Active gas recovery facilities (Type 9GR), organized by COG Region and Facility Permit or Registration Number**

Key:

LFG – Landfill Gas

LFGTE – Landfill Gas to Energy

Landfill – Permit Number of the landfill from which the LFGTE facility recovers gas

Gas Processed – Estimated Gas Processed at the facility in Fiscal Year 2013

Gas Distributed Offsite – Estimated Gas Distributed Off-site from the facility in Fiscal Year 2013

Power Generated & Used – Estimated Gas Generated and Used On-site by the facility in Fiscal Year 2013

Power Generated & Sold – Estimated Gas Generated and Sold by the facility in Fiscal Year 2013

ft<sup>3</sup> – standard cubic feet

kWh – kilowatt hours

# MSW Waste and Material Type Descriptions

Waste/Material Type	Description
Brush	Cuttings or trimmings from trees, shrubs, or lawns and similar materials.
CESQG	Conditionally exempt small-quantity generator – a person that generates no more than 220 pounds of hazardous waste in a calendar month.
Class 1 wastes	Any industrial solid waste or mixture of industrial solid wastes that because of its concentration, or physical or chemical characteristics is toxic, corrosive, flammable, a strong sensitizer or irritant, a generator of sudden pressure by decomposition, heat, or other means, or may pose a substantial present or potential danger to human health or the environment when improperly processed, stored, transported, or disposed of or otherwise managed, as further defined in §335.505 of this title (relating to Class 1 Waste Determination).
Class 2 wastes	Any individual solid waste or combination of industrial solid waste that are not described as Hazardous, Class 1, or Class 3 as defined in §335.506 of this title (relating to Class 2 Waste Determination).
Class 3 wastes	Inert and essentially insoluble industrial solid waste, usually including, but not limited to, materials such as rock, brick, glass, dirt, and certain plastics and rubber, etc., that are not readily decomposable, as further defined in §335.507 of this title (relating to Class 3 Waste Determination).
Commercial solid waste	All types of solid waste generated by stores, offices, restaurants, warehouses, and other nonmanufacturing activities, excluding residential and industrial wastes.
Construction/Demolition Waste	Waste resulting from construction or demolition projects; includes all materials that are directly or indirectly the by-products of construction work or that result from demolition of buildings and other structures, including, but not limited to, paper, cartons, gypsum board, wood, excelsior, rubber, and plastics.
Covered television equipment	A direct view or projection television with a viewable screen of nine inches or larger whose display technology is based on cathode ray tube, plasma, liquid crystal, digital light processing, liquid crystal on silicon, crystal reflective technology, light-emitting diode, or similar technology. This definition also covers a display that is peripheral to a computer that contains a television tuner. This program applies to television equipment that is purchased primarily for personal or home-business use.
Grease trap waste	Material collected in and from a grease interceptor in the sanitary sewer service line of a commercial, institutional, or industrial food service or processing establishment, including the solids resulting from dewatering processes.
Grit trap waste	Grit trap waste includes waste from interceptors placed in the drains prior to entering the sewer system at maintenance and repair shops, automobile service stations, car washes, laundries, and other similar establishments.

Waste/Material Type	Description
Litter	Rubbish and putrescible waste.
Medical waste	Treated and untreated special waste from health care-related facilities that is comprised of animal waste, bulk blood, bulk human blood, bulk human body fluids, microbiological waste, pathological waste, and sharps as those terms are defined in 25 TAC §1.132 (relating to Definitions) from the sources specified in 25 TAC §1.134 (relating to Application), as well as regulated medical waste as defined in 49 Code of Federal Regulations §173.134(a)(5), except that the term does not include medical waste produced on a farm or ranch as defined in 34 TAC §3.296(f) (relating to Agriculture, Animal Life, Feed, Seed, Plants, and Fertilizer), nor does the term include artificial, nonhuman materials removed from a patient and requested by the patient, including, but not limited to, orthopedic devices and breast implants.
Monofill	A landfill that is granted a permit by rule, for a period of up to five years to a county or municipality with a population of 12,000 people or less to dispose of demolition waste from properties with nuisance or abandoned building.
Municipal solid waste	Solid waste, resulting from or incidental to municipal, community, commercial, institutional, and recreational activities, including garbage, rubbish, ashes, street cleanings, dead animals, abandoned automobiles, and all other solid waste other than industrial solid waste.
NHIW	Non-Hazardous Industrial Waste. Includes Class 1 non-hazardous, Class 2 & Class 3 wastes.
Non-RACM	Non-regulated asbestos-containing material as defined in 40 Code of Federal Regulations Part 61. This is asbestos material in a form such that potential health risks resulting from exposure to it are minimal.
Paper	A material made from plant fibers (such as but not limited to wood pulp, rice hulls, and kenaf). The sludge byproduct resulting from the production of paper may be approved as a feedstock pursuant to §332.33(b) of this title (relating to Required Forms, Applications, Reports, and Request To Use the Sludge Byproduct of Paper Production).
RACM	Regulated asbestos-containing material as defined in 40 Code of Federal Regulations Part 61, as amended, includes: friable asbestos material, Category I nonfriable ACM that has become friable; Category I nonfriable ACM that will be or has been subjected to sanding, grinding, cutting, or abrading; or Category II nonfriable ACM that has a high probability of becoming or has become crumbled, pulverized, or reduced to powder by the forces expected to act on the material during demolition or renovation operations.
Residential Waste (Household waste)	Any solid waste (including garbage, trash, and sanitary waste in septic tanks) derived from households (including single and multiple houses, hotels, and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds, and day-use recreation areas); does not include yard waste or brush that is completely free of any household wastes.
Septage	The liquid and solid material pumped from a septic tank, cesspool, or similar sewage treatment system.
Sludge	Any solid, semi-solid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water-supply treatment plant, or air pollution control facility, exclusive of the treated effluent from a wastewater treatment plant.

<b>Waste/Material Type</b>	<b>Description</b>
Tires (Scrap)	Any tire that can no longer be used for its original intended purpose. Only split, quartered, or shredded tires may be disposed of in a landfill.
Television Recycler	A person who separates collected television equipment and refurbishes that equipment for reuse, or processes equipment to be returned to use in the form of raw materials or products. The term does not include an entity that solely collects or sorts television equipment prior to shipment for recycling.
Used Oil	Any oil that has been refined from crude oil, has been used, and, as a result of such use, is contaminated by physical or chemical impurities.
White Goods	Discarded large household appliances such as refrigerators, stoves, washing machines, or dishwashers.
Yard Waste	Leaves, grass clippings, yard and garden debris, and brush, including clean woody vegetative material not greater than six inches in diameter that results from landscaping maintenance and land-clearing operations. The term does not include stumps, roots, or shrubs with intact root balls.
