Administrator's Statement

84th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

719 Texas State Technical College System Administration

LEGISLATIVE APPROPRIATION REQUEST FOR FY 2016 - 2017

Administrator's Statement: Texas State Technical College System Administration

In accordance with the instructions, the Texas State Technical College (TSTC) System Administration submits the following Legislative Appropriation Request (LAR) for fiscal years 2016 and 2017 to the Governor's Office of Budget, Policy, and Planning and the Legislative Budget Board. TSTC's LAR is submitted in five parts: the System Administration LAR and an LAR for each of the respective four TSTC colleges. The Administrator's Statement for TSTC System Administration applies to initiatives of the entire statewide organization; the individual college statements address the local representation of these initiatives. The TSTC System Administration budget covers only TSTC System Administration.

TSTC SYSTEM GOVERNANCE

The TSTC System is governed by a nine-person board of regents appointed by the Governor and confirmed by the Senate. Regents serve staggered six-year terms, with the terms of three members expiring in August of each odd-numbered year. The members of the board, their hometowns, and respective term ending dates are included within the organization chart submitted with this LAR.

The chancellor of the TSTC System is Michael L. Reeser.

DESCRIPTION OF TSTC SYSTEM

Established in 1965, the TSTC System includes four separately accredited colleges including TSTC Harlingen, TSTC Marshall, TSTC Waco, and TSTC West Texas. These colleges currently operate in 11 locations throughout the State of Texas. As it approaches its 50th anniversary, the TSTC Board of Regents has directed TSTC to pursue a single accreditation of the four colleges into a single, statewide college in preparation for the next 50 years.

Two years ago, TSTC submitted an appropriations request responding directly to a mandate of the 82nd Legislature to create a funding and operating model that rewards the institution for job placement and earnings of TSTC's graduates. The 83rd Legislature advanced this transition by allocating formula funding to TSTC based on the additional direct and indirect state tax revenues generated as a result of TSTC's impact on the employment of its students. That is, TSTC has shifted from an institution funded by activities to one that is funded for its results. Today, with its new funding and operating model aimed at placing more Texans in good jobs, TSTC is prepared to expand its response to the growing supply gap of technical training within Texas' labor market.

By design, TSTC System Administration is a streamlined and efficient body. It contains only those functions and initiatives that are statewide in scope, require cross-college coordination, and/or benefit from economies of scale. TSTC System Administration makes up only 3 percent of TSTC's total FTE and 4 percent of its overall budget.

SIGNIFICANT CHANGES, CHALLENGES AND OPPORTUNITIES

TSTC continuously positions itself to respond to the growing unmet need for skilled workers in Texas' labor market and to reform the classic higher education model. The following trends motivate the direction TSTC is taking:

84th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

719 Texas State Technical College System Administration

- Texas businesses in key industries are unable to find enough sufficiently trained workers to fill
 available, middle-skill jobs (those which require credentials between a high school degree and a fouryear college degree) leaving many Texas employers unable to grow and innovate, restricting their ability
 to compete in the current economy. This growing need for workers in middle-skill occupations is
 concentrated in the STEM fields, TSTC's primary focus.
- These fields make up the largest part of Texas' labor demand market; yet, Texas' supply of training in the middle-skill STEM fields has remained flat over the last decade.
- In response to this training shortage, portions of HB 5 created opportunity for increased technical
 education at the secondary level prompting numerous independent school districts to request assistance
 from TSTC. During the past year, TSTC has received more requests for partnerships in technical education
 than ever before.
- Global competitive challenges and tough economic dynamics continue to pressure the conventional structure
 of higher education. The conventional structure continues to be too slow and cumbersome to respond
 adequately to the needs of industry and its prospective workforce.
- To fulfill its unique mission in the Texas economy, TSTC must continue aligning and integrating education and workforce development through the transition of its operating model from funding-for-activity to funding-for-results.
- Industry competitiveness depends upon a talented workforce that has demonstrable skills and competencies
 that are relevant to the workplace, not necessary degrees and transcripts.
- Workplace needs can change so rapidly that it's essential that Texans be able to benefit from TSTC whether they are employed, underemployed, a secondary or postsecondary student, a graduate student, or a business person seeking to stay competitive.

As TSTC seeks to build the economic vibrancy of Texas by striving to develop the technical competence of Texans, placing more Texans is at the center of the baseline strategy request. Elements of this strategy include the following determinations:

- Merge the four TSTC college accreditations into a single, statewide accreditation to provide an
 efficient structure for increased instructional capacity, innovation, sustainability, quality,
 consistency, and flexibility to respond to the growth opportunities that lie ahead;
- Exploit every conceivable means to leverage and extend the entire system's resources for greater operating efficiency as TSTC seeks to serve markets of one, or markets of many, including TSTC's consolidation of core and innovative functions into a statewide, shared services model of operations

84th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

719 Texas State Technical College System Administration

(including statewide integration of student learning and development, marketing, finance, human and organization development, and business intelligence);

- Further develop the economic model, tools, and strategies for evaluating programs within the framework of TSTC's new funding formula as well as other factors, including current and future market demand and program cost;
- Stand up and expand start-up operations at TSTC's newest locations, including the East Williamson County
 Higher Education Center at Hutto, TSTC North Texas Center in Ellis County, the new Technical Center in
 Fort Bend County, and the new Abilene Industrial Technology Center contingent upon the Abilene Center's
 approval by the 84th Legislature;
- Continue working cooperatively with Texas community colleges and other partners to address Texas
 industry's training needs regardless of their location in the state;
- Provide students with the learning experiences required to achieve a relevant level of technical skill
 mastery that leads to successful employment or advancement in their current position;
- Accelerate the development of innovative practices in the design and delivery of technical training
 programs that set new standards in the achievement of technical skills mastery, including competencybased learning, and microcredentialing (e.g., badges) to increase the speed of workforce supply to the
 growing needs of Texas' industry;
- Enhance and improve student support services for veterans;
- Deepen our relationships with Texas employers in order to enrich their supply of job-ready technicians, and to ensure that their current workforce maintains its technical edge; and
- Continue the Center for Employability Outcomes project, approved by the Texas Higher Education
 Coordinating Board (THECB), aimed at aligning skill-based language used by higher education and employers
 to validate which learning outcomes are most relevant and which additional competencies may need to be
 incorporated into curricula, resulting in maximized student employability, earnings, and economic
 contributions to the State.

REDUCTION STRATEGIES

With the trend of declining General Revenue funds and reductions of federal pass-through funding, TSTC has employed a host of conventional strategies, including layoffs, redeployment of human and other resources, strategic line item budget reductions, delay of capital expenditures, and use of reserves to cover shortages. Since 2010, TSTC has reduced its statewide workforce by over 6.5% (7.3% if new operations are excluded).

84th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

719 Texas State Technical College System Administration

Level funding would require reducing services to ensure TSTC's reserve balances do not fall below thresholds currently under scrutiny by bond rating agencies. During the current year, TSTC's bond analysts revised either ratings or outlooks, citing uncertainty regarding TSTC's new funding formula when observing the decrease in funding from the 83rd Legislative Session.

TSTC's cost-reduction initiatives begin with examination of administrative overhead to mitigate the impact on economic drivers and mission-critical elements that are the instructional programs; however, reductions at the 5% and 10% levels would require significant scale back of offerings and levels of service at all locations. Programs most likely subject to reduction or elimination would include those with lower graduate wages, placement rates, and ability to produce students for the workforce. Those programs with lower market demand and higher programmatic costs would also be at risk. While TSTC will use this approach regardless of funding level, the thresholds for program reduction or closure at 5% and 10% reduction levels would extend to programs still in demand and meeting market need. In addition, reduction strategies would include the elimination of services considered core today that otherwise promote a strong student learning environment, but would be no longer feasible at the 5% and 10% reduction-levels of funding.

The result of 5% and 10% reductions would be diminished capacity to place more Texans in the Texas job market. Further, it would be more difficult to achieve the coordination of multi-faceted functions so that they work together harmoniously, efficiently, and effectively under these scenarios.

EXCEPTIONAL ITEM FUNDING REQUESTS

Exceptional Item funding requests include the following: the Transition Funding Mechanism for New Operations previously authorized in recent legislative sessions or new operations requested as part of this legislative session, Tuition Revenue Bond authorization and payment appropriations by the colleges for newly requested Tuition Revenue Bonds, and an increase to the Forecasting and Curriculum Development strategy for the Center for Employability Outcomes. Transition funding requests are included within the TSTC System Administration Legislative Appropriation Request within Exceptional Item Funding Requests. Tuition Revenue Bond, authorization and payment requests are included on the respective colleges Legislative Appropriation Request.

Transition Funding for New Operations

The "returned value" funding model, implemented by the 83rd Legislature does not provide funding for start-up operations because of the inherent lag between the teaching event and the actual funding. Where start-up operations under the contact hour funding model reimburse related costs within 1-3 years following the teaching event, funding for start-up operations does not enter TSTC's funding model until 8-10 years after the start-up activity is authorized. The "returned value" funding model is based on the additional direct and indirect state tax revenues generated as a result of the education provided to students by TSTC. Consequently, the funding formula does not fund start-up operations until after the site is located, established, students are enrolled, trained, enter the workforce, and are employed for five years. Transition funding is requested for the following start-up operations:

Fort Bend Technical Center. The Fort Bend County community has collaborated to allow for a significant expansion of TSTC offerings in Fort Bend County, with a significant amount of outside funding in the form of pledged support of over \$20 million from two foundations, including assistance from local economic development corporations for acquisition of land and the construction of a new technology education building. TSTC Waco requests \$9,000,000 for the FY 2016/2017 biennium to help fund startup personnel, facilities utilities/maintenance, and debt service for equipment financing during the initial two years of operation.

Abilene Industrial Technology Center. Within its TRB request, TSTC West Texas is seeking funding for a technical education building in Abilene in response to the

84th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

719 Texas State Technical College System Administration

increased workforce development need in the West Texas region associated with the related oil boom from the exploration and development of the Cline Shale. Transition Funding of \$2,400,000 to fund startup personnel, facilities utilities/maintenance, and debt service for equipment financing is requested in the initial two years of operations. TSTC West Texas is seeking donations (matching funds) from the local economic development corporation, private foundations, and industry for the related facility acquisition.

East Williamson County Higher Education Center at Hutto. As authorized by the Texas Education Code Chapter 130.092, TSTC Waco, in partnership with Temple College, joined with the Hutto community to fund the first building for the East Williamson County Higher Education Center at Hutto, a project authorized by the 80th Legislature. The community funds over half of the facility costs (TSTC Waco is funding 27% of the total cost of the building and owns 100%). TSTC Waco requests \$2,400,000 for the FY 2016/2017 biennium to help fund personnel and equipment costs for the third and fourth years of operation fulfilling the intent of Article IX, Section 18.30 of HB 3640 of the 83rd Legislature.

TSTC North Texas Center in Ellis County. The TSTC North Texas Center in Ellis County was established during the 83rd Legislative Session in partnership with Red Oak Independent School District to address the growing workforce development needs in Ellis County. TSTC Marshall requests \$9,000,000 to help fund personnel and operating costs for the second and third years of operation in its new facility fulfilling the intent of Article IX, Section 18.30 of HB 3640 of the 83rd Legislature.

Tuition Revenue Bond Payments:

Tuition Revenue Bond Issuance Authority in the amount of \$44,500,000 is requested by the TSTC System to fund essential facility projects at TSTC campuses. Thus, each of the TSTC colleges has made an Exceptional Item Request for projected debt service.

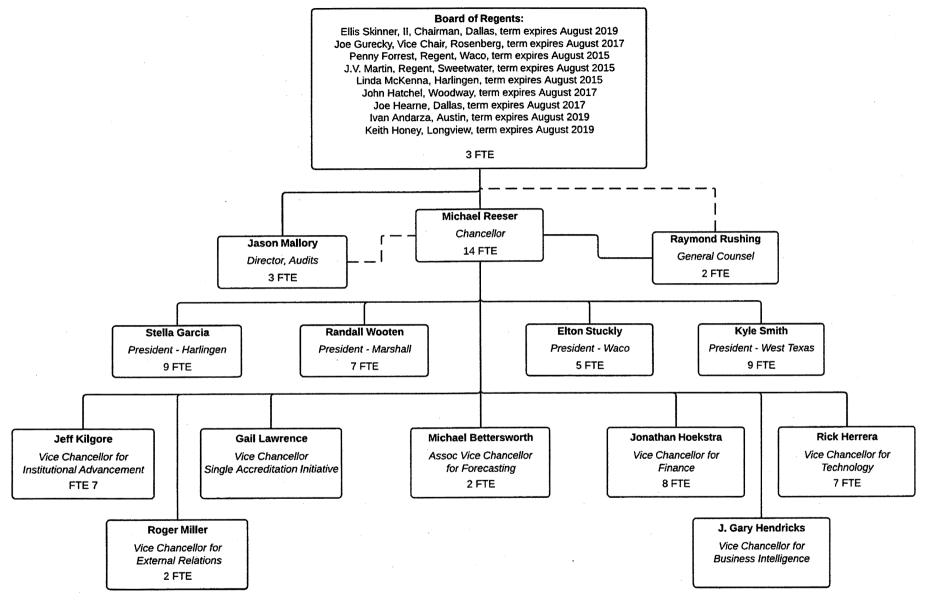

Forecasting and Curriculum Development

Funding of \$1,570,300 for the FY 2016/2017 biennium is requested to support TSTC's work on the Common Skills Language project approved by the THECB. This project is contained in the newly formed Center for Employability Outcomes.

BACKGROUND CHECKS

Criminal history record information is checked for employment applicants under final consideration, following normal screening and selection processes, for security sensitive positions. Security sensitive positions are restricted to those positions described in Texas Education Code § 51.215(c) and Texas Government Code § 411.094(a)(2). Security sensitive positions include those in which employees handle currency, have access to financial records, legal records, medical records, personnel records and student academic records, have access to a master key, or work in an area of the College which has been designated as a security sensitive area.

All advertisements and notices released for security sensitive positions include the statement: "Security Sensitive Position." Upon selection of the best qualified candidate for the position, the candidate may be offered continued employment by the College contingent upon the evaluation of the criminal history record check. If the check produces a criminal record on the candidate, the Human and Organization Development Executive or his/her designee evaluate the record and work with the department head to determine if the employee should be recommended or not recommended for employment. All criminal history information on applicants is privileged and confidential and is not released or otherwise disclosed to any person or agency other than those persons involved in the hiring process with a legitimate need to know this information, except on court order.

Est 2014

Bud 2015

BL 2016

BL 2017

TSTC System Administration requests additional operating funds of \$1.57 million to fully establish the new Center for Employability Outcomes. This work extends the Forecasting and Curriculum Development mandate for TSTC to forecast technical training and education needed to maintain and improve the state's economic and technological competitiveness.

In support of this mandate, TSTC created the Center for Employability Outcomes (C4EO) to improve the employability of students by aligning curriculum with industry need. As a result, more students will graduate with necessary skills and more employers will be able to find and hire the right talent to remain competitive. The Center provides students, colleges and businesses with job-driven tools to scientifically optimize alignment of curricula to labor market needs.

The Center's work is closely coordinated with the Texas Workforce Commission, Texas Higher Education Coordinating Board, and Texas Education Agency through complementary strategies. The Center is now implementing the use of detailed work activities to align curriculum within three areas: technical competencies (hard skills), workplace competencies (soft skills), and labor market needs. By increasing student placement and earnings outcomes, the Center's work will lead to improved economic returns for students, industry, Texas and its taxpayers.

TSTC has partnered with more than twenty (20) Texas community colleges and aligned 900 courses. The Center will expand outreach to an additional fifteen (15) colleges in FY2015 with support from the THECB.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The demand for skilled labor is growing due to rising incumbent worker retirements (baby boomers), global competition in the labor market, and technology advances across industry sectors. Aligning technical education curriculum with the needs of the labor market will increase student employability and result in higher economic returns to the private and public sector, and bridge the competency needs of industry. The Center's work has relied on temporary grant funding to develop and mature methodologies and is now ready to formalize its structure for expanded service delivery across Texas colleges. This request is a continuation of an existing initiative funded under the Forecasting and Curriculum Development Strategy.

Bud 2015

BL 2016

BL 2017

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy is to provide proportional share of staff group insurance premiums paid from Other Educational and General funds.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Strategy is impacted by the number of employees working 30 hours or more and the premium rates. Strategy based upon percentage of estimated other E & G income to total appropriation. There is a general revenue shortfall for group insurance; therefore, other strategies must supplement group insurance expenditures.

STRATEGY DESCRIPTION AND JUSTIFICATION:

To coordinate the activities of a multi-campus, statewide system while fulfilling the mandated responsibilities of a state agency. Provide instructional support services including overall leadership and direction for the college, Board support, policy development, financial and administrative services, internal audit, strategic planning coordination, legal services, human resource services, education services planning, organizational development, public information, resource development, and records management. Manage initiatives that are systemwide in scope, require cross-college coordination, and/or benefit from economies of scale.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The Governor's Office, Legislature, Texas Comptroller, State Treasurer, Legislative Budget Board, Attorney General and the Higher Education Coordinating Board each have an impact on the responsibilities of the agency.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Transition Funding Authorized by Article IX, Section 18.30 of HB 3640 of the 83rd Legislature, TSTC System Administration:

The "returned value" funding model, implemented by the 83rd Legislature, does not provide funding for start-up operations because of the inherent lag between the operation ramp-up, teaching event and the actual funding. In fulfilling the intent of Article IX, Section 18.30 of HB 3640 of the 83rd Legislature, TSTC System Administration requests \$11,400,000 to continue funding personnel, capital equipment financing, and operating costs for the North Texas Extension Center of TSTC Marshall and the East Williamson County Higher Education Center at Hutto of TSTC Waco until the results of operations enter TSTC's funding formula.

TSTC North Texas Center. Funding of \$9,000,000 is requested for the 2nd and 3rd years of operation at the state-of-the-art technical education facility built in partnership, and adjacent to, Red Oak ISD to address the growing workforce-development needs in Ellis County and the greater Dallas/Fort Worth metropolitan area.

East Williamson County Higher Education Center. The funding request is level with the \$2,400,000 level of funding in the current biennium. This funding would continue funding start-up personnel, equipment financing, and operating costs for the third and fourth years of operation. This center was created in partnership with Temple College with outside funding from the Hutto community.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

For both locations, the communities initially provided matching funds in the form of in-kind real property donations. In addition, the Hutto community contributes a substantial portion of the facility's debt service for the technical education facility. To realize the full capacity of this outside funding, operating funds are essential due to the nature of the TSTC outcomes-based funding formula. Because of the inherent 8-10 year lag until the results of operations contribute to TSTC's funding formula. transition funding to this point is vital to the success new operations.

The North Texas Extension Center would deploy the appropriated funds towards strengthening faculty and high equipment and operating costs associated with the industrial-related instructional programs. The funding for the Center in Hutto also continues to fund equipment debt service related to facility start-up and continues funding for operating expenses of salaries and wages, instructional supplies and materials.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Local foundations and governing bodies have collaborated and committed outside funding to allow for a significant expansion of TSTC offerings in both the Fort Bend county region and Abilene. The "returned value" funding model, implemented by the 83rd Legislature, does not provide funding for start-up operations because of the inherent lag between the operation ramp-up, teaching event and the actual funding. To respond to the increasing demand for technical education in these regions, the TSTC System Administration requests \$11.4 million to help fund start-up costs for personnel and operating expenditures related to expansion of TSTC operations in these two locations.

Fort Bend Technical Center in Fort Bend County. Funding of \$9,000,000 is requested for the first years of operational costs within a new technical education facility. Building One, to be constructed with outside funding (approximately \$20,000,000) that has been pledged by community partners in the Fort Bend county area. To augment the community-backed Building One, TSTC has requested TRB authorization to construct an additional building, Building Two, to address the full technical education need in the area.

Abilene Industrial Technology Center. TSTC West Texas requests \$2,400,000 in transition funding for a technical education building in Abilene in response to the increased workforce development need in the West Texas region associated with the related oil boom from the exploration and development of the Cline Shale. The funding request is only related to new and expanded capacities.

Bud 2015

BL 2016

BL 2017

For both expansions, the communities have committed significant matching funds in the form of donations of real property or cash to fund the construction of industrial technical education facilities. To realize the full capacity of this outside funding, operating funds are essential due to the nature of the TSTC outcomes-based funding formula. Because of the inherent 8-10 year lag until the results of operations contribute to TSTC's funding formula, transition funding to this point is vital to the success new operations.

The technical programs needed in the center expansion at Fort Bend County and Abilene require a considerable investment in equipment to maximize the student learning experience. Therefore, funding requests account for the significant outlays necessary for the high costs of equipment and operations required for the related industrial training. Both expansions will meet a need, which has intensified from the extraordinary growth in the oil and gas sector. These initiatives are both driven by an outcry from the local communities and their industry partners. These kind of facilities will service school districts, industry, and traditional and non-traditional students.

DESCRIPTION / JUSTIFICATION:

TSTC System Administration is requesting additional operating funds in the amount of \$1.57 million to fully establish the new Center for Employability Outcomes. This work is an extension of the Forecasting and Curriculum Development mandate, which requires TSTC to forecast technical training and education needed to maintain and improve the state's economic and technological competitiveness.

In support of this mandate, TSTC has created the Center for Employability Outcomes (C4EO) to improve the employability of students by ensuring that what is taught in the classroom aligns with what is needed by industry. As a result, more students will graduate with necessary skills and more employers will be able to find and hire the right talent to remain competitive. The Center does this by providing students, colleges and businesses with job-driven tools to scientifically optimize alignment of curricula to labor market needs.

The Center's work is done in close coordination with the Texas Workforce Commission, Texas Higher Education Coordinating Board, and Texas Education Agency through complementary strategies. The Center is now working to operationalize the use of detailed work activities to align curriculum within three areas: technical competencies (hard skills), workplace competencies (soft skills), and labor market needs. By increasing student placement and earnings outcomes, the Center's work will lead to improved economic returns for students, industry, Texas and its taxpayers.

TSTC has currently partnered with more than twenty (20) Texas community colleges and aligned 900 courses. The Center will expand outreach to an additional fifteen (15) colleges in FY2015 with support from the THECB.

Excp 2017

The demand for skilled labor is growing due to rising incumbent worker retirements (baby boomers), global competition in the labor market, and technology advances across industry sectors. Aligning technical education curriculum with the needs of the labor market will increase student employability and result in higher economic returns to the private and public sector, and bridge the competency needs of industry. The Center's work has relied on temporary grant funding to develop and mature methodologies and is now ready to formalize its structure for expanded service delivery across Texas colleges. This request is a continuation of an existing initiative funded under the Forecasting and Curriculum Development Strategy.

	Total Expenditures		4.8%		\$2,422,075	\$49,993,130		5.0%		\$2,588,123	\$51,381,393

B. Assessment of Fiscal Year 2012 - 2013 Efforts to Meet HUB Procurement Goals

Attainment:

Attainment:

The agency attained one of six, or 17%, of the applicable statewide HUB procurement goals in FY 2012. The agency attained zero of six, or 0%, of the applicable statewide HUB procurement goals in FY 2013.

Applicability:

Applicability:

The agency had expenditures in all of the six HUB categories for both FY 2012 and FY 2013.

Factors Affecting Attainment:

Factors Affecting Attainment:

- A portion of the goals showed a positive trend over the respective prior year in percent of total dollars spent on HUB contracts (2 of 6 in comparing FY 2012 to FY 2010, and 3 of 6 in comparing FY 2013 to FY2011).
- The percent of HUB bids/proposals received in FY 2012 as compared to FY 2010 declined.
- The college routinely utilizes vendors that could qualify for HUB certification, but they have no direct incentive to complete the HUB certification steps. This creates a limited supply of "HUB certified" vendors.

"Good-Faith" Efforts:

(54)

Project Description

TSTC Marshall proposes to acquire and finish build-out of the Red Oak Technology Center, an instructional and office facility for instructional programs and support services. TSTC and Red Oak ISD have partnered in the establishment of a state-of-the art technical college which combines the efforts of a traditional K-12 public school and a technical education provider to serve both high school and traditional college students.

Project Description

TSTC West Texas proposes to construct a technology center in Abilene, Texas which will create classroom, laboratory, and support space for heavy technical skills training as identified by industry need. This facility will service the ISD's, industry, traditional and non-traditional students in a city with a large population and a region preparing for an oil boom with the exploration and development of the Cline Shale.

To fund partnerships between TSTC and community colleges to increase access to technical education programs in high demand areas of the state

(3) (a) Major Accomplishments to Date:

TSTC has successful partnerships with Wharton County Junior College in Ft. Bend, Alvin Community College in Pearland, Temple College in Taylor and Hutto, Western Texas College, Ranger College, and Texas Tech University. Partnerships have proven to be a very efficient, effective, and expedient means of providing high-demand technical education across Texas

(3) (b) Major Accomplishments Expected During the Next 2 Years:

TSTC will maintain existing partnerships and is planning new partnerships with the state's community colleges.

(4) Funding Source Prior to Receiving Special Item Funding:

None

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

None

(7) Consequences of Not Funding:

Significant reduction in ability to provide additional access to technical education programs in high-demand areas of the state.

Schedule 9: Special Item Information

84th Regular Session, Agency Submission, Version 1 Automated Budget and Evaluation System of Texas (ABEST)

719 Texas State Technical College System Administration

Special Item:

2

Forecasting and Curriculum Development

(1) Year Special Item:

2006

Original Appropriations:

\$250,000

(2) Mission of Special Item:

Advance the employability of college students and the economic competencies needed by employers

(3) (a) Major Accomplishments to Date:

Alignment of over 900 courses across Texas community colleges. Creation of statewide detailed work activity (DWA) skills library and curriculum alignment tool for use by colleges. Approval by THECB for use by colleges to validate curriculum learning outcomes. Modeling of soft skill requirements in partnership with the TWC. Secured matching funds through additional grants and contracts. New high-tech degree programs and courses resulting from statewide studies and reports on emerging occupations for Texas Colleges

(3) (b) Major Accomplishments Expected During the Next 2 Years:

Operationalizes workplace competencies (soft skills) with technical competencies(hard skills) to increase retention and improve overall employability of graduates. Expand curriculum alignment platform to more Texas colleges. Integrate detailed work activity model into secondary CTE courses to promote seem less transitions into college courses. Expand national use of DWAs through licensing options.

(4) Funding Source Prior to Receiving Special Item Funding:

Perkins State Leadership Funds

(5) Formula Funding:

N

(6) Non-general Revenue Sources of Funding:

Possible Perkins funding

(7) Consequences of Not Funding:

Employers would be less able to find qualified candidates for technical positions in critical industry clusters, thus undermining the economic competitiveness of Texas.
