# Colorado Bend State Park

**Gorman Falls** is a unique geologic formation that supports a sensitive ecosystem. The mineral rich spring water deposits layers upon layers of delicate calcite, slowly building up the travertine formations you see here. New growth is fragile and is an important component of this unique environment providing a base for the lush aquatic vegetation and associated habitat seen here. Please do not enter the pools or climb on the falls.

Permit required before accessing park from boat.

**Park Reservations**
