CENTRALIZED TELEPHONE SYSTEM

PREPARED AND ISSUED BY

**STATE PURCHASING AND
GENERAL SERVICES COMMISSION**

AUSTIN, TEXAS

GENERAL INFORMATION
CENTRALIZED CAPITOL COMPLEX TELEPHONE SYSTEM (CCCTS)

Telephone service to the Capitol Complex is currently provided by a centralized telephone system (CCCTS). Many features are provided to increase the capabilities of your telephone service. Please read the dialing instructions in the users guide provided with each station installation to realize the most benefits from your CCCTS system. Additional guides are available through your telephone coordinator.

Reporting Personnel Changes - This directory is intended to serve for a maximum period of time. If personnel changes or telephone station changes occur in the alphabetical section of this directory, please advise the Telecommunications Services Division, State Purchasing and General Services Commission, so that the Directory Lookup System data base can be updated for the CCCTS operators. The CCCTS telephone directory is printed annually.

CCCTS Manager 463-3459
Customer Service 463-3580/3456

Telephone Trouble Reports-Dial "4 HELP" (4-4357) and report your CCCTS telephone trouble.

EMERGENCY CALLS

After 5:00 p.m., Holidays, Saturdays and Sundays

Emergency Police Number 463-3333
TDD Access Line (Capitol Building - Room 107)..... 463-3323
Security Officers Capitol Building 463-3556
Building Services 463-3342
Heating, Air Conditioning & Plumbing 463-3600/463-3556
Fire (Austin Fire Department)..... 911
City Police..... 911
Emergency Medical Services (EMS) 911
County Sheriff 473-9285
Texas Department of Public Safety 465-2000
Federal Bureau of Investigation 478-8501
Governor's Security-Department of Public Safety 463-1795
(Capitol Building-Room 107)

DIALING INSTRUCTIONS FOR CCCTS

CCCTS Operator Information - CCCTS station users dial "O"
Outside station users dial 463-4630

Touch-tone Dialing - The CCCTS system uses "push button" dialing. Press the button firmly when dialing. Simultaneous depression may result in a wrong number. The additional buttons (* and #) are for accessing special features, and some are listed below.

CCCTS Station-to-Station - wait for dial tone, then dial last 5 digits only. Example: to call 463-1234 just dial 3-1234.

CCCTS Station to Outside Number - wait for dial tone, dial "9" for outside, then dial the complete listed number.

Long Distance Calls - All intrastate (calls within Texas) and interstate (calls outside Texas) to a regular telephone number (area code + number) may be dialed direct by waiting for dial tone, dialing "9", followed by the area code and telephone number. The new CCCTS switch has a least cost routing capability and will select the cheapest available way to complete the call (TEX-AN, DDD, etc.). A class of service is also provided for each station user so that only those personnel designated by an agency are permitted to make selected types of long distance calls. Calls to the seven digit TEX-AN numbers are placed by dialing "8" followed by the TEX-AN number. By dialing "9" plus the above described intrastate and interstate calls can be routed over the TEX-AN network, so "8" plus dialing is generally not necessary.

Your new telephone system has many convenient features. These features will improve dialing speed and accuracy and simplify the use of special telephone services. Some of the features provided are:

Ringing - one ring, internal system call. Two rings, external system call. Three rings, priority system call.

Last Number Redial - will quickly and accurately redial last number called.

Abbreviated Dialing - a personal directory for frequently called internal or external numbers.

For other features provided by the CCCTS system, see your user guide.

Call Forward - allows all calls to be sent to another extension.

Call Back - if an internal extension is busy, call back allows the system to call you back when the extension is free.
