TEXAS CAPITOL COMPLEX TELEPHONE DIRECTORY

1993

PREPARED AND ISSUED BY

GENERAL SERVICES COMMISSION

AUSTIN, TEXAS

**GENERAL INFORMATION
CAPITOL COMPLEX TELEPHONE SYSTEM (CCTS)**

Telephone service to the Capitol Complex is currently provided by a centralized telephone system (CCTS). Many features are provided to increase the capabilities of your telephone service. Please read the dialing instructions in the users guide provided with each station installation to realize the most benefits from your CCTS system. Additional guides are available through your telephone coordinator.

Reporting Personnel Changes - This directory is intended to serve for a maximum period of time. If personnel changes or telephone station changes occur in the alphabetical section of this directory, please advise the Telecommunications Services Division, General Services Commission, so the data base can be updated for the CCTS operators. The CCTS telephone directory is printed annually.

CCTS Manager 463-3464
Customer Service..... 475-2480

Telephone Trouble Reports - Dial "4 HELP" (4-4357) and report your CCTS telephone trouble.

Federal Bureau of Investigation 478-8501

DIALING INSTRUCTIONS FOR CCTS

CCTS Operator Information - CCTS station users dial "O"
Outside station users dial 463-4630

Touch-tone Dialing - The CCTS system uses "push button" dialing. Press the button firmly when dialing. Simultaneous depression may result in a wrong number.

CCTS Station-to-Station - Wait for dial tone, then dial the last 5 digits of the CCTS phone number.

Example: to call 463-1234, just dial 3-1234.
to call 475-1234, just dial 5-1234.

***NOTE:** The following prefix (NXX) numbers are linked to the CCTS and can be 5-digit dialed: 463, 475, 322, and 416. For all other prefixes, you must dial "9" and the 7-digit telephone number.

CCTS Station to Outside Number - Wait for dial tone, dial "9" to get an outside line, then dial the 7-digit telephone number.

Long Distance Calls - Calls to intrastate (calls within Texas) and interstate (calls outside Texas) regular telephone numbers (area code + number) may be dialed direct by waiting for dial tone, dialing "9", and then the area code and telephone number. The CCTS switch has a least cost routing capability and will select the cheapest available way to complete the call. A class of service is also provided for each station user so that only those personnel designated by an agency are permitted to make selected types of long distance calls. Calls to the 7-digit TEX-AN numbers are placed by dialing "8" followed by the TEX-AN number.

Your telephone system has many convenient features. These features will improve dialing speed, accuracy, and simplify the use of special telephone services. The additional buttons "*" and "#" are for accessing special features, a few of which are listed below.

Ringling - Three different rings are used to identify the type of incoming call:

- One ring - Internal Call
- Two rings - External Call
- Three rings - System Priority Call (Example: callback)

Last Number Redial - Will redial the last *external* number called. Wait for the dial tone and press "#", 9.

Call Forward - Allows a user to manually forward calls to another phone number. To activate, wait for the dial tone, press "*", 3. After 2 beeps, key in the extension where calls are to be forwarded. To cancel, wait for the dial tone and press "#", 3.

Call Pickup - Allows a user to pick up on another ringing line. Wait for dial tone and press "#", 7. (Note: phone numbers must be in the same call pickup group for this feature to work.)

Voice Mail - Voice mailboxes are available on the CCTS system. Mailboxes allow users to receive messages from callers when they are away from their desks or on the telephone. Users may also send messages to other subscribers. The Aspen voice mail system may be accessed by subscribers by either dialing the extension 3-0828, pressing “*”, 5, or by pressing the “InteMail” button on the telephone (not all phones will have this feature). If you would like to subscribe to the voice mail system, please contact the telephone coordinator in your agency.

Conference Calls - The CCTS system allows up to seven parties to be joined in one call. It is recommended that no more than four parties be external. The TEX-AN network has a voice conferencing capability which can conference up to 236 conferees at one time. All conferences on the TEX-AN network must be scheduled. For more information or to schedule TEX-AN conferences, please call 475-2380.

Consult your user guide for more information on the CCTS. For training on other features of the CCTS such as Call Hold, Call Transfer, Call Waiting, Abbreviated Dialing, Call Back, and Call Park, contact the Telecommunications Services Division at 463-3449 to schedule a training class. For information on TEX-AN, see the introductory page in the TEX-AN State Telephone Directory.
