#### **USE OF HOMELAND SECURITY FUNDS**

These funds expended under Strategy 010101 are utilized for the continued operation and maintenance of a statewide air monitoring network established to protect public health and safety through the early detection of a terrorist attack utilizing biological agents released into the air. The costs associated with this program include: personnel (2 FTEs), city contracts, supplies including replacement parts for equipment, electricity and cellular phone service, shipping of supplies, travel to meetings and conferences, training and site improvements.

#### **USE OF HOMELAND SECURITY FUNDS**

Natural/man-made disasters are within Strategies 010101, 010102, 010103, 010202, 010203, 010301, 020101,030101 and 030102. Funds are used for the planning. development, coordination, and implementation of initiatives to promote the governor's homeland-security strategy, and to detect, deter, respond to, and recover from disasters, whether caused by nature or people. These initiatives include notifying and coordinating with those responsible for the state's critical infrastructure, including producers and purchasers of drinking water for the public, high-risk dams, refineries, petrochemical facilities, & wastewater-treatment facilities. Costs associated with homeland security include personnel, Emergency Response contract (West Fertilizer Plant Explosion 2013), Light Detection and Ranging (LIDAR) Contract for Dam inundation mapping, improvements to the Dam Safety module, travel to meetings, conferences, dam inspections, training, office supplies and equipment and software license purchases. In 2015 a Probable Maximum precipitation study will be conducted though federal grant. The funds are also used to fund the activities associated with the oversight and protection of critical water sector infrastructure. Contact information and key assets associated with water and wastewater systems are inventoried to aide in the response and recovery efforts during homeland security related incidents that interrupt water and wastewater service. The funds are also used to pay the cost associated with training staff in the Incident Command System (ICS) and National Incident Management System (NIMS) which are processes and protocols utilized during the response and recovery activities associated with homeland security incidents. Finally the funds are used to fund the Texas Water and Wastewater Response Network (TxWARN), which is a statewide mutual aid program dedicated to providing a forum for water and wastewater systems to share resources during homeland security incidents.
